Abroad, Germany in 1884 and Great Britain in 1897 and 1906 were influential in turning attention to the system of benefits for injuries due to employment, not necessarily to a proved negligent act. Laws of Maryland (1902, 1910) and Montana (1909), were results of early efforts to enact State laws, but without adequate regard for either legal or economic principles. The first official recognition of the principle by the Congress of the United States was the Federal act of 1908, providing limited benefits for designated classes of employees of the United States; though acts of 1882 (Life Saving Service) and 1900 (Postal Service) had made some provision of this nature for the services indicated.

Concurrently with these dates the subject came to attract general attention from State legislatures.

The following table shows the progress of action, both in the appointment of commissions and in the enactment of laws, in the United States up to Jan. 1, 1929:

State.	Year Law Effective.	Death.		Permanent Total Disability.		Partial Disability.		Medical Service.	
		Weeks	Amount	Weeks.	Amount.	Weeks.	Amount.	Maximum Period.	Max. Amount.
Alabama	1919	300	$5,000	550	$5,000	300	.....	60 days.	$100

Notes: (a) unlimited, (b), until death or remarriage; (c), during disability; (d), maximum, $7,500; (e), then 25% of annual earnings for life; (f), to minor dependents under 16; (g), maximum, $15,000; (h), not covered; (f), also hospital first 30 days, maximum, $150.

WORKING HOURS OF THE HOUSEWIFE.

With the help of the extension and research staffs of several colleges, the Bureau of Home Economics of the United States Department of Agriculture induced more than 2,000 housewives to keep careful daily records of how they spent their time for seven days of a typical week. Most of the records came from farm and village women in middle-class homes, although club women in towns and cities were also represented.

Five-sixths of the women included in the survey spent over 42 hours a week in their home making, more than half spent over 48 hours, and one-third over 56 hours, the combined average being slightly over 51 hours a week. The average time spent in all work by 950 farm women was over 62 hours a week, their duties including care of poultry and milk, gardening, and other farm work in addition to the actual housekeeping.

The average time spent in home making by the women in cities of from 2,500 to 50,000 population was 51 hours a week and in cities of 50,000 and upward, a little over 48 hours, in spite of the fact that the average city household (4.1 persons) was smaller than the rural (4.4 persons), and that the city housewife had more help. Only 10 per cent of the women in large cities spent less than 35 hours a week in their home making.

The figures for the other routine tasks were almost identical, averaging about 7½ hours per week for cleaning, 5¼ for laundering, 1½ for mending, and 4½ for sewing.

For all women covered in the survey the time devoted to purchasing, planning, and other management averaged only 2½ hours per week, and only 4½ hours were given to caring for members of the family—dressing and bathing the children, teaching, supervising, and other direct care.

THE AMERICAN RED CROSS.

The American Red Cross operates under its charter by Act of Congress of January 5, 1905, "to furnish volunteer aid to the sick and wounded of armies in time of war in accordance with the convention of Geneva; to act in matters of voluntary relief and in accord with the military and naval authorities as a medium of communication between the American people and their army and navy; to continue and carry on a system of national and international relief in time of peace and to apply the same in mitigating the suffering caused by pestilence, famine, fire, floods and other great national calamities and to devise and carry on measures for preventing the same."

Herbert Hoover, as president of the United States, is president of the American Red Cross and John Barton Payne is chairman of the Central Committee, the governing body composed of eighteen persons, six of whom represent the Federal Government. National headquarters is located at Washington, D. C., with branch offices in St. Louis and San Francisco, and from these centers the activities of 3,553 chapters are directed.

All accounts of the American Red Cross are audited by the War Department, through which also the annual report of the organization is submitted to Congress.

The society is a member of the League of Red Cross Societies, made up of Red Cross organizations in 54 nations; and of the International Red Cross Committee of Geneva, Switzerland, composed of Red Cross societies of 58 nations, who are signers of the Treaty of Geneva.

On June 30, 1929, there were 3,553 chapters of the American Red Cross. Service work for disabled veterans and their dependent families was carried on by 2,821 chapters, which spent $1,963,000 while the national organization spent an additional $737,871.19 for the same purpose. Service to ex-service men and their families included assistance in filing death and disability claims for Federal and State benefits, such as compensation, bonus, etc., and social or financial aid while adjustment of claims was pending. Recreation and other service was conducted in 65 government hospitals, including those of the Veterans' Bureau, Army, Navy, and Department of the Interior, and also in two contract hospitals.

The year brought many opportunities to the Red Cross for rendering service, as there were 131 disasters, 120 of which were in the United States and its insular possessions. Contributions of funds were made to 11 foreign Red Cross societies for the relief of victims of major disasters. This was the greatest number of disasters in any one year in the organization's history. Communities in 38 states were affected, several states being forced twice to request relief. In all, disaster struck 364 counties and in 28 of them disaster were felt twice. Cyclones, hurricanes, floods and tornadoes wrought the heaviest damage, causing the greatest loss in lives and property. The largest relief operations were in the West Indies hurricane, which affected parts of Florida, Porto Rico and the Virgin Islands and in which more than 2,000 lives were lost. In the second largest disaster, the Southeastern floods in Georgia, Alabama, Florida and Mississippi, the loss of life was negligible, but great damage was done to the farming communities.

For domestic disaster relief the national organization spent $4,863,570.15 and the chapters spent $463,000, making a total of $5,326,570.15. For insular and foreign operations in disaster relief $3,343,057.09 was expended. The only nation-wide appeal for a relief fund was for the sufferers of the West Indies hurricane, and the public contributed $5,883,726.

Enrollment of Red Cross nurses, acting as a reserve for the Army and Navy and other governmental nursing services, and for call during emergency, totals 49,153. The Red Cross employs 766 nurses in public health work. Home hygiene and care of the sick certificates were issued to 42,234 graduates of this course; 4,793 classes of children and adults were taught nutrition; first aid certificates issued numbered 52,596, a total of 350,491 to date; life-saving members enrolled were 46,898, with 220,404 enrolled to date. Garments for disaster victims, etc., produced, 210,088; surgical dressings, 2,959,304; volumes transcribed into braille for the blind, 1,849.

Welfare service was provided for an average of 10,742 families each month in communities where no other agency existed for such work.

Expenditures for fiscal year, 1928-1929 were:

Domestic Operations.	*National Organization.*	*Chapters.*	*Total.*
Disaster relief ...	$4,863,570	$463,000	$5,326,570
Health activities:			
Enrolled nurses' reserve.....	44,387	.....	44,387
First aid and life saving.....	301,316	167,000	468,316
Home hygiene and care of sick	87,767	119,000	206,767
Nutrition.....	71,159	138,000	209,159
Public health nursing.....	154,477	593,000	747,477
Junior Red Cross	238,039	320,000	558,039
War service:			
To disabled veterans.....	737,871		
To men now serving in the regular Army & Navy.....	307,828	1,963,000	3,008,699
All other chapter activities.....		1,137,000	1,137,000
Other domestic work.....	293,124	.....	293,124
Insular and Foreign Operations.			
Disaster relief...	3,343,057	.....	3,343,057
Health activities.	66,133	.....	66,133
Junior Red Cross —Foreign.....	29,460	.....	29,460
Other work.....	39,877	.....	39,877
League of Red Cross Societies	208,000	.....	208,000
Supervision and gen'l managem't:	277,614	.....	277,614
Total.....	$11,063,680	$4,900,000	$15,963,680

Revenues for the national organization during the fiscal year ending June 30, 1929 were $10,700,000. The unobligated funds remaining in the treasury on June 30, 1929, $4,100,000, after $4,410,000 had been budgeted and $7,974,977 set aside for specified activities.

The membership in the American Red Cross at the end of the last fiscal year was 4,127,946 adults and 6,878,423 juniors in the American Junior Red Cross.

AMERICAN RED CROSS MEDALS.

1915—*First Aid*—Willis F. Ream, Windber, Pa.; *Life Saving*—Mr. Charles T. Snedeker, Tampa, Fla.

1916—No awards.

1917—*First Aid*—Miss Lulu Andrews, Faribault, Minn.; *Life Saving*—Wm. J. McIntosh, Galveston, Texas.

1918—*First Aid*—Joseph W. Hodges, Baltimore, Md.; *Life Saving*—Floyd C. Harper and Ernest Porter, Jacksonville, Fla.

1919—*First Aid*—W. H. Twohig, West Grove, Pa.

1920—*Life Saving*—Charles D. Mangels, San Francisco, Calif.

1921—*First Aid*—Leo F. Mooney, Pittston, Pa.; *Life Saving*—Wray Farmin, Sandpoint, Idaho, and William Johnson, Spokane, Wash.

1922—*First Aid*—Vernon Enos, Connellsville, Pa.; *Life Saving*—Mary Buhner, St. Petersburg, Fla.

1923—*First Aid*—Myron Q. Raidline, Bethlehem, Pa.; *Life Saving*—Miss Swanhild Bryhhildsen, Brooklyn, N. Y.

1924—*First Aid*—Clarence K. Hicks, Wiley G. Warner and Roy B. Garlin, Carlisle, Pa.; *Life Saving*—J. P. Miller, St. Louis, Mo.

1925—*First Aid*—James G. White, employee Western Electric Co., Vancouver, Wash.; *Life Saving*—Mr. George B. Dimitroff, 35 St. John St., Jamaica Plain, Mass.

1926—*First Aid*—Joel Towler, Sandy Level, Virginia. Line foreman, Long Lines Department, American Tel. & Tel. Co.; *Life Saving*—Giles Caldwell, 1911 Fruitvale Ave., Oakland, Calif.

1927—*First Aid*—Hugh G. Sherlock, Missoula, Montana. Sub-foreman Mountain States Telephone and Telegraph Company; *Life Saving*—Edward Riemer, 512 West 43rd St., New York City.

The plan of awards was changed for 1928, so that, instead of issuing prizes for the outstanding cases in First Aid and Life Saving reported, there were issued Certificates of Merit to persons who performed a First Aid or Life Saving act adjudged meritorious, and where personal risk may or may not be involved. The Red Cross awarded fifty-eight such certificates for the outstanding cases reported during 1928.

THE AMERICAN FLAG, ITS ORIGIN.

As to the origin of the flag of the United States, Dr. A. C. Flick, New York State Historian, in a Bulletin to the schools, says:

"In 1775 the Philadelphia Troop of Light Horse carried a standard with thirteen alternate blue and silver stripes in the upper left-hand corner.

At Cambridge on January 2, 1776, Washington, without authorization of the Continental Congress, raised a flag consisting of thirteen alternate white and red stripes with the crosses of St. George and St. Andrew in a blue field in the upper left-hand corner.

"It was called the 'Union Flag,' the 'Grand Union Flag' and the 'Continental Flag' and was employed until displaced by the Stars and Stripes adopted by the Continental Congress.

"The beautiful tradition that Betsy Ross, as early as June 1776, made a Stars and Stripes flag from a pencil sketch supplied by Washington but changed the points of the stars from six to five, has become a classic notwithstanding the fact that historians doubt its accuracy.

"Half a dozen different localities claim to have been the place where the Stars and Stripes was first used.

"Within New York State alone such contention has been set forth for Fort Ann on July 8, Fort Stanwix on August 3, Bennington on August 16, and Saratoga on September 19, 1777.

"The flag with thirteen stripes and thirteen stars, authorized on June 14, 1777, continued to be used as the national emblem until Congress passed the following act, which President Washington signed:

> "That from and after May 1, 1795, the flag of the United States be fifteen stripes, alternate red and white; and that the union be fifteen stars, white in a blue field.

"This action was necessitated by the admission of the states of Vermont and Kentucky to the Union.

"The flag of 1795 had the stars arranged in three rows of five each instead of in a circle, and served for 23 years.

"With the admission of more new states, however, it became apparent that the 1795 flag would have to be further modified; hence in 1818 a law was passed by Congress providing:

> "That from and after the fourth day of July next, the flag of the United States be thirteen horizontal stripes, alternate red and white; that the union have twenty stars, white in a blue field.
>
> "That on the admission of every new state into the Union, one star be added to the union of the flag; and that such addition shall take effect on the fourth of July next succeeding such admission.

"Since 1818 additional stars have been added until today there are 48 on the flag. No law has been passed to designate how the stars shall be arranged. At one time they formed a design of a larger star. Now by common practice they form six rows of eight stars each."

THE FORT SCHUYLER FLAG.

Victor H. Paltsits, Chief of the American History Division and Keeper of Manuscripts, Public Library, New York City, has said, in a published statement:

"The flag improvised at Fort Schuyler (N. Y.), and flung in the face of the enemy on Aug. 3, 1777, was a Continental flag and not the Stars and Stripes.

"We know what the Continental flag looked like, and that it was used as a naval and as a military flag before the flag resolution of June 14, 1777 was considered. The Continental flag was continued in use as a military flag.

"The Stars and Stripes was a naval flag and was not used as a military flag during the revolution. Nobody has ever found a sure record of the use of the Stars and Stripes as a military flag during the period of that war."

Gherardi Davis, in 1927, in connection with Mr. Paltsits' statement, answered, saying:

"The Fort Schuyler event was in August, 1777. But if Lieutenant Digby, of the 51st British Foot, is right in his famous diary, the 2d New Hampshire had already lost a stars and stripes to the 9th Foot at Fort Anne early in July, 1777.

"The New Hampshire regiment lost two colors, but neither is an American flag. They are now at Concord, N. H. I discovered them in England in 1906, and some years later, hearing from their owner, Colonel Rogers, that they could be purchased, wrote to Concord about them and presented them to the state.

"This, then, eliminates Digby's flag. I will add that neither he nor his regiment was at the Fort Anne fight.

"There is no proof whatever of the flag's being carried at the Brandywine.

"Furthermore, in 1779, Washington and the War Board distinctly say in their correspondence on the subject of colors that the army flag is to be different from the marine flag, which was the stars and stripes, and that its pattern had not been determined.

"No captured stars and stripes of those days is known to exist in England or Germany."

NATIONAL FLAG CODE.

(Rules, as adopted by the National Flag Conference.)

1. The flag should be displayed only from sunrise to sunset, or between such hours as may be designated by proper authority. It should be displayed on national and state holidays and on historic and special occasions.

2. When carried in a procession with another flag or flags, the flag of the United States should be either on the marching right, i. e., the flag's own right, or when there is a line of other flags the flag of the United States may be in front of the center.

3. When displayed with another flag against a wall from crossed staffs, the flag of the United States should be on the right, the flag's own right, and its staff should be in front of the other flag.

4. When a number of flags are grouped and displayed from staffs, the flag of the United States should be in the center or at the highest point.

5. When flags of states or cities or pennants of societies are flown on the same halyard with the flag of the United States, the national flag should always be at the peak. When flown from adjacent staffs the flag of the United States should be hoisted first. No flag or pennant should be placed above or to the right.

6. When flags of two or more nations are displayed they should be flown from separate staffs of the same height and the flags should be of approximately equal size.

7. When the flag is displayed from a staff projecting horizontally or at an angle from the window sill, balcony, or front of building, the union of the flag should go clear to the head of the staff unless the flag is at half mast.

8. When the flag of the United States is displayed in a manner other than by being flown from a staff it should be displayed flat, whether indoors or out. When displayed either horizontally or vertically against a wall, the union should be uppermost and to the flag's own right, i. e., to the observer's left. When displayed in a window it should be displayed the same way, that is, with the union or blue field to the left of the observer in the street.

9. When displayed over the middle of the street, as between buildings, the flag of the United States should be suspended vertically with the union to the north in an east-and-west street or to the east in a north-and-south street.

10. When used on a speaker's platform, the flag should be displayed above and behind the speaker. It should never be used to cover the speaker's desk nor to drape over the front of the platform. If flown from a staff it should be on the speaker's right.

11. When used in unveiling a statue or monument, the flag should not be allowed to fall to the ground but should be carried aloft to wave out, forming a distinctive feature.

12. When flown at half staff, the flag is hoisted to the peak for an instant, and then lowered to the half staff position, but before lowering the flag for the day it is raised again to the peak. By "half staff" is meant hauling the flag down to one-half the distance between the top and bottom of the staff. If local conditions require, divergence from this position is permissible. On Memorial Day, May 30th, the flag is displayed at half staff from sunrise until noon and at full staff from noon until sunset.

13. Flags flown from fixed staffs are placed at half staff to indicate mourning. When the flag is displayed on a small staff, as when carried in parade, mourning is indicated by attaching two streamers of black crepe to the spear head, allowing the streamers to fall naturally.

14. When used to cover a casket the flag should be placed so that the union is at the head and over the left shoulder. The flag should not be lowered into the grave nor allowed to touch the ground.

15. When the flag is displayed in the body of the church it should be from a staff placed on the congregation's right as they face the clergyman. The service flag, the state flag, or other flag should be at the left of the congregation. If in the chancel, or on the platform, the flag of the United States should be placed on the clergyman's right as he faces the congregation and other flags on his left.

THE AMERICAN LEGION.

Commander—O. L. Bodenhamer, War Memorial Bldg., Indianapolis, Ind.; *Vice-Commanders*—Milton D. Campbell, Cincinnati, O.; John J. Dugan, Wilmington, Del.; Frank Schoble, Jr., Wyncote, Penn.; Willis M. Brewer, Pontiac, Mich.; Morton M. David, Denver, Col.

Chaplain—Rev. George F. Kettell, D. D., Macedon, N. Y.; *Historian*—Eben Putnam, Wellesley Farms, Mass.; *Treasurer*—Bowman Elder, War Memorial Bldg., Indianapolis; *Judge Advocate*—Scott W. Lucas, Havana, Ill.; *Adjutant*—James F. Barton, War Memorial Bldg., Indianapolis.

THE AMERICAN LEGION AUXILIARY.

President—Mrs. Donald Macrae, Council Bluffs, Iowa; *Vice-Presidents*—Mrs. Vaun Scott Seybert, Indianapolis; Miss Adelaide Fitzgerald, Boston; Mrs. J. A. Howell, 2349 Adams Ave., Ogden, Utah; Mrs. L. E. Thompson, 1608 E. 8th St., Pueblo, Colo.; Mrs. Harry F. Vass, Winston-Salem, No. Car.

Treasurer—Mrs. Cecilia Wenz, War Memorial Bldg., Indianapolis; *Chaplain*—Mrs. W. W. Townes, Jr., Petersburg, Va.; *Historian*—Mrs. Frank Fleming, Augusta, Ga.; *Secretary*—Mrs. Gwendolyn Wiggin MacDowell, War Memorial Bldg., Indianapolis; *Counsel General*—Scott W. Lucan, Havana, Ill.

LA SOCIETE DES QUARANTE HOMMES ET HUIT CHEVAUX (FORTY AND EIGHT)

Chef de Chemin de Fer—E. Snapper Ingram, Los Angeles; *Sous Chefs de Chemin de Fer*—William H. Yeager, Girard, Pa.; Talmage Smith, Grand Island, Neb.; Austin Imirie, Washington, D. C.; David Levy, Cincinnati; Ralph E. McNeely, Fowler, Ind. Dr. William H. Hamley, Lake Providence, La.

DEPARTMENT COMMANDERS OF THE LEGION.

Alabama—George M. Grant, Troy, Ala.; Alaska—Dr. S. C. Shurick, Ketchikan, Alaska; Arizona—Hilliard T. Brooke, Phoenix, Ariz.; Arkansas—R. L. Gordon, Dermott, Ark.; California—Clarence L. Kincaid, Los Angeles; Canada—R. E. Allen, Winnipeg, Can.

Colorado—Kenaz Huffman, Denver, Colo.; Connecticut—Paige A. Seaton, Waterbury, Conn.; Delaware—Dr. Richard Beebe, Lewes, Del.; D. C.—L. E. Atkins, Washington, D. C; Florida—Robert A. Gray, Tallahassee, Fla.; France—Albert B. Cudebec, 3 rue Taitbout, Paris, France;

Georgia—Chas. P. Graddick, Barnesville, Ga.; Hawaii—John T. Fisher, Honolulu; Idaho—Nicholas Ifft, Pocatello, Idaho; Illinois—E. A. Hayes, 110 N. Water St. Decatur Ill.; Indiana—Forest A. Harness, Kokomo, Ind.; Iowa—Glenn C. Haynes, Des Moines, Iowa.

Italy—Mrs. Julia Wheelock, Palazzo Viminale, Ministero Interni, Rome.

Kansas—Harry W. Colmery, Topeka, Kan.; Kentucky—Harvey White, Louisville, Ky.; Louisiana—Roland B. Howell, Thibodaux, La.; Maine—Basil H. Stinson, Rockland, Me.; Maryland—Harlan Johnson, Baltimore; Massachusetts—John J. O'Connell, Boston.

Mexico—E. P. Lowry, American Embassy, Mexico City.

Michigan—Raymond J. Kelly, Detroit; Minnesota—E. V. Cliff, Ottonville, Minn.; Mississippi—Wm. A. Schmitt, Clarksdale, Miss.; Missouri—T. J. Strickler, Kansas City, Mo.; Montana—Harold DePue, Sidney, Mont.; Nebraska—Dwight P. Griswold, Gordon; Mont.; Nebraska—Dwight P. Griswold, Gordon, Neb.

Nevada—V. Hursh, Sparks, Nev.; New Hampshire—Harry W. Dudley, Tilton, N. H.; New Jersey—Richard Hartshorne, Newark, N. J.; New Mexico—Daniel Vaughan, Las Cruces, N. M.

New York—John J. Bennett, Jr., 32 Broadway, N. Y. City; North Carolina—R. G. Cherry, Gastonia, No. Car.; North Dakota—Harry Hart, Ray, No. Dak.; Ohio—Dudley A. White, Norwalk, Ohio. Oklahoma—B. G. Patton, Okmulgee, Okla.

Oregon—Sidney S. George, Eugene, Ore.

Panama—Wm. Miller, Balboa Heights, Canal Zone.

Pennsylvania—Frank L. Pinola, Wilkes Barre, Pa.; Philippine Is.—Benj. S. Ohnick, Manila, P. I.; Porto Rico—Miguel A. Munoz, San Juan, Porto Rico, Rhode Island—Charles W. Anthony, Providence, R. I.; South Carolina—George D. Levy, Sumter, So. Car.; South Dakota—L. C. Morrison, Kadoka, So. Dak.

Tennessee—R. A. McMillan, Knoxville, Tenn

Texas—Ernest C. Cox, Austin, Tex.; Utah—Cecil D. Pope, Helper, Utah; Vermont—Marcell Conway, Barre, Vt.; Virginia—B. M. Roszel, Winchester, Va.; Washington—W. D. Welsh, Port Angeles, Wash.; West Virginia—Dr James A. Duff, Martinsburg, W. Va.; Wisconsin—Marshall Graff, Appleton, Wis.; Wyoming—E. T. Storey, Cheyenne, Wyo.

PAST NATIONAL COMMANDERS.

Bennett C. Clark, 506 Olive Street, St. Louis, Mo.

Milton J. Foreman, 1150 First Nat'l Bank Bldg., Chicago, Illinois.

Henry D. Lindsley, Ritz Tower, 465 Park Ave., New York City.

Franklin D'Olier, The Prudential Ins. Co. of America, Newark, New Jersey.

John G. Emery, 43 Pearl St., Grand Rapids, Mich.

Hanford MacNider, Mason City, Iowa.

Alvin Owsley, 1219 Main Street, Dallas, Texas.

John R. Quinn, 930 Rives-Strong Bldg., Los Angeles, California.

James A. Drain, Old Nat'l Bank Bldg., Spokane, Washington.

Howard P. Savage, Metropolitan Motor Coach Co., Edison Bldg., 72 W. Adams St., Chicago, Illinois.

Edward E. Spafford, Room 1519, 111 Broadway, New York City.

Paul V. McNutt, Bloomington, Indiana.

MILITARY ORDER OF THE WORLD WAR.

National Headquarters—1518 K Street, N. W., Washington, D. C.

Commander-in-Chief—Admiral T. J. Cowie, Washington, D. C.; *Honorary Commanders-in-Chief*—Maj. Gen. Geo. H. Harries, Chicago; Maj. Gen. Mark L. Hersey, Washington.

Vice-Commanders-in-Chief—Col. H. Harrison Smith, Philadelphia; Maj. Gen. John A. Lejeune, Lexington, Va.

Junior Vice-Commanders-in-Chief—Maj. Edward W. Moore, El Cajon, Calif.; Lt. Col. Walter M. Pratt, Boston; Lt. Col. Sydney L. Smith, Brooklyn; Lt. Col. F. E. Drake, Paris.

Treasurer-General—Lt. Col. David T. Abercrombie, Ossining, N. Y. *Judge Advocate-General*—Maj. William L. Symons, Washington, D. C.. *Surgeon-General*—Col. George F. Keenan, Boston. *Chaplain-General*—Maj. Charles B. DuBell, Philadelphia. *Historian-General*—Maj. Gist Blair, Washington, D. C.

General Staff—Col. T. T. P. Luquer, New York City; Maj. Ennalls Waggaman, Washington, D. C.; Lt. Comdr. Roger Kemper Rogan, Cincinnati; Capt. John Parker Hill, Philadelphia; Col. Edward N. Wentworth, Chicago; Col. Frederick N. Hatch, St. Louis; Maj. William Guy Carleton, Buffalo; Capt. Wiley H. Marble, Worcester, Mass.

Executive Officer—Adjutant-General, Colonel C. Nixon, Washington.

THE PRESIDENT'S FLAG.

The President's flag consists of the President's seal in bronze, upon a blue background, with a large white star in each corner. The design of this seal may be seen in the floor of the entrance corridor of the White House.

When the President visits a vessel of the United States, the President's flag is broken at the main the moment he reaches the deck and is kept flying as long as he is on board.

When the President is embarked on a boat he usually directs that his flag be displayed from the staff in the bow of his barge. When he passes in a boat flying his flag, vessels of the navy parade the full guard, four ruffles are given on the drum, four flourishes are sounded on the bugle, the National Anthem is played by the band, and officers and men salute.

Four different names for the flag of the United States are in use in the military service, viz.: flag color, standard, and ensign.

In general, the term "flag" is applicable regardless of size, relative proportions, or manner of display, but the other three terms have certain well-defined usages of long standing, as follows:

(1) A *color* is a flag carried by unmounted units.

(2) A *standard* is a flag carried by mounted or motorized units.

(3) An *ensign* is a flag flown on ships and small boats.

The canton or union now contains 48 stars arranged in 6 horizontal and 8 vertical rows, each star with one point upward.

Military and Naval Affairs.

HIGHEST RANKING OFFICERS IN THE UNITED STATES ARMY.

(The list is as of Nov. 1, 1929, and includes both staff and line. Retirement age is sixty-four years.)

CHIEF OF STAFF.

General Charles P. Summerall, 1867, 1888, 1929.

REAR ADMIRALS IN THE UNITED STATES NAVY.

(In the order of seniority, as of Nov. 1, 1929. First year is that of birth, second, that of appointment to the navy. The retirement age is sixty-four years.)

Philip Andrews, 1866-1882; Newton A. McCully, 1867-1883; Andrew T. Long, 1866-1883; Guy H. Burrage, 1867-1883; Ashley H. Robertson, 1867-1884; Samuel S. Robison, 1867-1884; Charles F. Hughes, 1866-1884; Mark L. Bristol, 1868-1883; Richard H. Jackson, 1866-1890; Thomas P. Magruder, 1867-1885; Sumner E. W. Kittelle, 1867-1885; William V. Pratt, 1869-1885; Louis M. Nulton, 1869-1885; Louis R. de Steiguer, 1867-1885; William W. Phelps, 1869-1885; William C. Cole, 1868-1885; Jehu V. Chase, 1869-1886; George R. Marvell, 1869-1885; Henry J. Zeigemeier, 1869-1886; Montgomery M. Taylor, 1869-1886; Charles B. McVay, Jr., 1868-1886; John H. Dayton, 1869-1886; William D. MacDougall, 1868-1885; Lucius A. Bostwick, 1869-1886; William A. Moffett, 1869-1886; Julian L. Latimer, 1868-1886; Frank H. Schofield, 1869-1886; Arthur L. Willard, 1870-1887; Herny H. Hough, 1871-1887; Harley H. Christy, 1870-1887; Noble E. Irwin, 1869-1887; Thomas J. Senn, 1871-1887; Richard H. Leigh, 1870-1887; George W. Laws, 1870-1887; George C. Day, 1871-1888; Luke McNamee, 1871-1888; John R. Y. Blakely, 1872-1888; Yates Stirling, Jr., 1872-1888; Joel R. P. Pringle, 1873-1888; Frank H. Clark, 1871-1889; Edward H. Campbell, 1872-1889; Walter S. Crosley, 1871-1889; Frank B. Upham 1872-1889; David F. Sellers, 1874-1890; Ridley McLean, 1872-1890; Joseph M. Reeves, 1872-1890; Frank H. Brumby, 1874-1891; Harris Laning, 1873-1891; Henry V. Butler, 1874-1891; James J. Raby, 1874-1891; William H. Standley, 1872-1891; Thomas T. Craven, 1873-1892; Wat T. Cluverius, 1874-1892; Albert W. Marshall, 1874-1892; Harry E. Yarnell, 1875-1893; Arthur J. Hepburn, 1877-1893; Thomas C. Hart, 1877-1893.

REAR ADMIRALS (Staff).

Medical Corps.

Edward R. Stitt, 1867-1889; Albert M. D. McCormick, 1866, 1888; Robert M. Kennedy, 1867-1890; Norman J. Blackwood, 1866-1890.

Supply Corps.

Christian J. Peoples, 1876-1900; Thomas S. Jewett, 1866-1892; Thomas H. Hicks, 1869-1892.

Construction Corps.

George H. Rock, 1868-1885.

Civil Engineer Corps.

Harry H. Rousseau, 1870-1898; Frank T. Chambers, 1870-1897.

PAY IN THE NAVY.

Pay of enlisted men ranges from $21 to $157.50 a month, according to grade and length of service.

Pay of warrant officers varies from $153 to $189 a month, according to length in service.

Pay of commissioned officers below the grade of Rear Admiral ranges from $1,500 to $6,000 per annum according to length of service.

JOINT BOARD OF THE ARMY AND NAVY.

Chief of Staff, Army, Major Gen. Charles P. Summerall; Deputy Chief of Staff, Army, Maj. Gen. Briant H. Wells, Asst. Chief of Staff War Plans Division, Army, Brig. Gen. George S. Simonds; Chief of Naval Operations, Admiral Charles F. Hughes; Asst. Chief of Naval Operations, Rear Admiral William H. Standley; Director, War Plans Division; Office of Naval Operations, Rear Admiral Frank H. Schofield.

THE AERONAUTICAL BOARD OF THE ARMY AND NAVY.

Members of the Board (all ex-officio).

Gillmore. *Representative of War Plans Division, General Staff, Army,* Major John N. Greely. *Chief of the Bureau of Aeronautics, Navy,* Rear Admiral William A. Moffett. *Chief of the Planning Division, Bureau Aeronautics, Navy,* Comm. R. K. Turner. *Representative of the War Plans Division, Office of Naval Operations, Navy,* Capt. L. Coxe.

Secretary, Mr. Jarvis Butler.

THE REGULAR ARMY OF THE UNITED STATES.

The Army of the United States consists of the Regular Army, the National Guard while in the service of the United States, and the Organized Reserves, including the Officers' Reserve Corps and the Enlisted Reserve Corps.

The Regular Army consists of the Infantry, the Cavalry, the Field Artillery, the Coast Artillery Corps, the Air Corps, the Corps of Engineers, the Signal Corps, which are designated the combatant arms or the line of the army, the General Staff Corps, the Adjutant General's Department, the Inspector General's Department, the Judge Advocate General's Department, the Quartermaster Corps, the Finance Department, the Medical Department, the Ordnance Department, the Chemical Warfare Service, the officers of the Bureau of Insular Affairs, the officers and enlisted men under the jurisdiction of the Militia Bureau, the chaplains, the professors and cadets of the United States Military Academy, detached officers, detached enlisted men, unassigned recruits, the officers and enlisted men of the retired list, and such other officers and enlisted men as are now or may hereafter be provided for.

The Act of Congress making appropriations for the year ending June 30, 1929, contemplates an average enlisted strength of approximately 118,750 men in the Regular Army, and 6,445 Philippine Scouts.

The Organized Reserves constitute a war force to meet any major emergency requiring the use of troops in excess of those of the Regular Army and the National Guard.

The National Guard consists of the regularly enlisted men who upon original enlistment are not less than 18 nor more than 45 years of age or who in subsequent enlistments shall not be more than 64 years of age, and of commissioned officers and warrant officers between the ages of 21 and 64 years.

Only citizens or those who have declared their intention of becoming citizens are eligible for enlistment in the National Guard. Under War Department regulations officers and warrant officers must be citizens. The organization of the National Guard in general is the same as that prescribed for the Regular Army. The National Guard is primarily a state force but may be called as such by the President into the service of the United States, and when so called is subject to the laws and r gulations governing the Regular Army as far as applicable. When Congress has authorized the use of troops in excess of those of the Regular Army. the members of the National Guard may be drafted into the federal service to serve therein for the period of the war or emergency, unless sooner discharged. The strength of the National Guard on June 30, 1929, was 176,988

MILITARY DEPARTMENTS AND CORPS AREAS, U. S. ARMY.

Department or Corps Areas.	Headquarters.	Jurisdiction.
First Corps Area	Boston	Me., N. H., Vt., Mass., R. I., Conn., part of Long Island.
Second Corps Area	N. Y. (Gov. Island)	N. Y., N. J., Del., Porto Rico.
Third Corps Area	Baltimore, Md.	Pa., Md., Va., D. C.
Fourth Corps Area	Ft. McPherson, Ga.	N. C., S. C., Ga., Fla., Ala., Tenn., Miss., La.
Fifth Corps Area	Ft. Hayes, Ohio	Ohio, W. Va., Ind., Ky.
Sixth Corps Area	Chicago, Ill.	Ill., Mich., Wis., The post of Jefferson Bks., Mo., and Arcadia Target Range, near Arcadia, Mo.
Seventh Corps Area	Omaha, Neb.	Ark., Mo., except the post of Jefferson Bks., Mo., and Arcadia Target Range, near Arcadia, Mo.; Kan., Iowa, Neb., Minn., N. Dak., S. Dak.
Eighth Corps Area	Ft. Sam Houston, Tex.	Tex., Okla., Col., N. Mex., Ft. D. A. Russell, Wyo., inc. targ. and manoeuv. reserv. and Ariz. (except Yuma).
Ninth Corps Area	Presidio of San Francisco, Cal.	Wash., Ore., Idaho, Mont., Wyo. (except that part of Fort D. A. Russell in the Eighth Corps Area), Utah., Nev., Cal., Alaska, and Yuma, Ariz.
Hawaiian Dept.	Fort Shafter, T. H.	Hawaiian Islands and dependencies.
Philippine Dept.	Manila	Philippine Islands.
Pan. Canal Dept.	Quarry Heights	Canal Zone.
U. S. Army Troops in China	Amer. Bks., Tientsin	U. S. Army troops in China.

COAST ARTILLERY DISTRICTS.

First	Boston	Harbor defenses of Boston, L. I. Sound, Narragansett Bay, New Bedford, Portland and Portsmouth.
Second	Ft. Totten, N. Y.	Harbor defenses of the Delaware, Eastern N. Y., Sandy Hook, and Southern N. Y.
Third	Ft. Monroe, Va.	Harbor defenses of Chesapeake Bay, and the Potomac.
Fourth	Ft. McPherson, Ga.	Harbor defenses of Charleston, Key West and Pensacola.
Ninth	Presidio of San Francisco, Cal.	Harbor defenses of the Columbia, Los Angeles, Puget Sound, San Diego, and San Francisco.
Panama	Ft. Amador, Canal Zone	Harbor defenses of Balboa and Cristobal.
Hawaiian	Fort Shafter, T. H.	Harbor defenses of Honolulu and Pearl Harbor.
Philippines	Fort Mills, P. I.	Harbor defenses of Manila and Subic Bays.

The territorial limits of the coast artillery districts within the continental limits of the United States are those of the corps areas bearing the same numerical designations.

The active tactical divisions, with their headquarters, are as follows: *First*, Ft. Hamilton, N. Y.; *Second*, Ft. Sam Houston, Tex.; *Third*, Fort Lewis, Wash.; *Hawaiian Division*, Schofield Barracks, H. T.; *Panama Canal Division*, Ft. Amador, C. Z.; *Philippine Division*, Ft. Wm. McKinley, P. I.; *First Cavalry Division*, Ft. Bliss, Tex.

The General Hospitals of the army are located at Hot Springs, Ark. (also navy); Denver; Presidio of San Francisco; Manila; Honolulu; Army Medical Center at Washington, D. C., and El Paso, Tex.

ENLISTED STRENGTH OF THE REGULAR ARMY—BY ARM OR SERVICE

Arm or Service.	Strength, June 30, 1929. Excl. Scouts.	Scouts.	Total.	Arm or Service.	Strength, June 30, 1929. Excl. Scouts.	Scouts.	Total.

By Scouts is meant Philippine Scouts.

Of the 137,529 commissioned officers, warrant officers and enlisted men in the military service on June 30, 1929, a total of 98,943 were serving in the Continental United States, 14,228 in Hawaii, 8,784 in the Canal Zone, 288 in Alaska, 1,196 in Porto Rico, 11,337 in the Philippine Islands, including 6,567 officers and enlisted men in the Philippine Scouts, 1,012 in China, 6 in Europe, which were attached to the Graves Registration Service, and 1,735 were en route from one country to another, on leave of absence, or were serving as military attaches in various foreign countries.

ARMY TRAINING ACTIVITIES.

Regular Army—Throughout the year all units of the Regular Army receive peace-time training at their home stations or in summer training camps. In addition to its self-training one of the principal missions of the Regular Army now consists in training civilian adjuncts of the Army of the United States.

National Guard—The National Guard is trained throughout the year. This training is directed toward providing in time of peace, an adequate, organized, and effective force, sufficiently trained and developed so that it will be available in minor emergencies for employment within the limits of the United States by the States or by the United States, and so that it will be immediately available in major emergencies for employment in the execution of limited missions. The law requires that each organization assemble for drill and instruction not less than forty-eight times each year and shall in addition participate in encampments and maneuvers, or other exercises at least fifteen days each year.

The assemblies for drill and instruction (technically known as armory drills) are carried on at the home station of the organization where an armory or other suitable building is available.

The fifteen days' field training is carried on during the summer months at camps or localities especially selected for this purpose.

During the summer of 1929 a total of 163,124 officers, warrant officers and enlisted men participated in field training.

Organized Reserves—Active duty training for officers of the Organized Reserves is usually conducted at Regular Army garrisons, the officers of a regiment, or other appropriate unit, being trained together for a period of fifteen days.

Of the 112,722 officers in the Reserve Corps, 19,608 received active duty training in 1929 for fifteen days and 944 received training at schools and other institutions for longer periods than fifteen days. Altogether 21,901 reserve officers were enrolled in the Army correspondence courses.

Reserve Officers' Training Corps—Young men attending certain schools and colleges receive military training during a considerable portion of their academic courses. At least once during his course in college each young man who is a member of the R. O. T. C. is given six weeks' training at a summer training camp. During the last year 127,453 were trained in schools and colleges and 6,612 received their six weeks' training at summer training camps.

Citizens' Military Training Camps—During the summer of 1929 there were established throughout the United States 53 camps for the training of the youth of the Nation. Young men between the ages of seventeen and thirty-one attended these camps and there received the rudiments of military training, a course of physical development and instruction in citizenship.

The complete course in these camps extends over a period of four years, occupying one month per year. Graduation from four of these camps is a material step toward a commission in the Officers' Reserve Corps. In the summer of 1929, 37,979 young men were enrolled in camps.

THE AIR SERVICE.

AIR CORPS FLYING FIELDS.

Barksdale Field, Shreveport, La.

Naval Reserve Aviation Bases—Minneapolis, Minn.; Long Beach, Cal.; Oakland, Cal.; Grosse Ile, Detroit.

NAVAL AVIATION APPROPRIATIONS.

The amounts of the Naval Aviation appropriations for the fiscal years since 1916 are: (1917) $3,500,000; (1918) $61,133,000; (1919) $220,383,119; (1920) $25,000,000; (1921) $20,000,000; (1922) $13,413,431; (1923) $14,683,950; (1924) $14,647,174; (1925) $15,150,000; (1926) $14,790,000 for aviation navy, and $3,000,000 for aircraft for carriers; (1927) $19,065,288 for aviation; $3,300,000 for aircraft carriers; (1928) $19,755,000 for aviation, and $345,000 for airplanes for the Naval Reserve; (1929), $32,189,000; (1930), $31,430,000.

THE AMERICAN'S CREED.

Written by William Tyler Page, Clerk of the U. S. House of Representatives, in 1917, and adopted and promulgated by the Government's Committee on Publication. Accepted by the House of Representatives, on behalf of the American People, April 3, 1918.

I believe in the United States of America as a Government of the people, by the people, for the people; whose just powers are derived from the consent of the governed; a democracy in a republic; a sovereign Nation of many sovereign States; a perfect union, one and inseparable; established upon those principles of freedom, equality, justice and humanity for which American patriots sacrificed their lives and fortunes.

I therefore believe it is my duty to my country to love it; to support its Constitution; to obey its laws; to respect its flag, and to defend it against all enemies.

NATIONAL GUARD STRENGTH.

(Revised by the Militia Bureau of U. S. War Dept., 30, 1929.)

States.	Total	States.	Total.	States.	Total.	States.	Total.
Alabama	2,622	Iowa	3,443	New Hampshire	1,012	South Dakota	1,239
Arizona	1,053	Kansas	3,154	New Jersey	4,522	Tennessee	2,395
Arkansas	2,148	Kentucky	2,714	New Mexico	907	Texas	7,599
California	5,584	Louisiana	1,890	New York	20,354	Utah	1,328
Colorado	1,725	Maine	2,207	North Carolina	3,269	Vermont	1,186
Connecticut	4,093	Maryland	3,199	North Dakota	1,150	Virginia	3,756
Delaware	796	Massachusetts	9,339	Ohio	8,039	Washington	2,649
Dist. of Columbia	940	Michigan	4,578	Oklahoma	4,875	West Virginia	1,844
Florida	2,360	Minnesota	4,862	Oregon	2,977	Wisconsin	4,627
Georgia	3,421	Mississippi	1,653	Pennsylvania	11,614	Wyoming	608
Hawaii	1,637	Missouri	4,373	Porto Rico	1,508		
Idaho	1,133	Montana	1,155	Rhode Island	1,709	Total	176,988
Illinois	9,279	Nebraska	1,692	South Carolina	1,999		
Indiana	4,590	Nevada	122				

The national guard strength is thus classified—Infanty Divisions, 124,991; Cavalry Divisions, 10,718; Army troops (less Cavalry Divisions) 5,041; Corps troops, 11,125.

State Staff Corps, 1,186; Special Allotment (Infantry), 14,447; Coast Defense, 7,407; General Headquarters Reserve, 2,073.

NEW YORK NATIONAL GUARD.

(Officially revised as of Oct. 15, 1929)

Commander in Chief, the Governor of the State.

Adjutant General, Brig. Gen. Franklin W. Ward; office at No. 100 State Street, Albany. The *State Arsenal* is at 62nd St. and 2nd Ave., Brooklyn. *Commander of the New York National Guard*, Major Gen. William N. Haskell, office Municipal Building, New York City.

BRIGADE AND OTHER COMMANDERS.

THE RANK OF GENERAL AND LIEUTENANT GENERAL.

The list (date when Congress conferred rank in parentheses) is:

General of the Army—George Washington (June 15, 1775); Ulysses S. Grant (July 25, 1866); William T. Sherman (March 4, 1869; Philip H. Sheridan (June 1, 1888); John J. Pershing (Oct. 6, 1917); Tasker H. Bliss (Oct. 6, 1917); Peyton C. March (May 20, 1918); Charles P. Summerall (Feb. 23, 1929).

Lieutenant General of the Army—George Washington (July 3, 1798); Ulysses S. Grant (March 2, 1864); William T. Sherman (July 25, 1866); Philip H. Sheridan (March 4, 1869); John M. Schofield (Feb. 8, 1895); Nelson A. Miles (June 6, 1900); Samuel B. M. Young (Aug. 8, 1903); Adna R. Chaffee (Jan. 9, 1904); John C. Bates (Feb. 1, 1906); Henry C. Corbin (April 15, 1906; Arthur MacArthur (Sept. 15, 1906); Hunter Liggett (Oct. 16, 1918.; Robert L. Bullard (Oct. 16, 1918); Edgar Jadwin (retired Aug. 7, 1929, with rank of Lieutenant General, Act, March 3, 1915).

INTERMENTS IN NATIONAL CEMETERIES.

Alexandria (Pineville), La., 4681; Alexandria, Va., 3,579; Andersonville, Ga., 13,737; Andrew Jonhson, (Greenville), Tenn., 54; Annapolis, Md., 2,561; Antietam (Sharpsburg), Md., 4,823; Arlington (Ft. Myer), Va., 37,852; Balls Bluff (Leesburg), Va., 25; Barrancas, Fla., 2,991; Baton Rouge, La., 3,309; Battle Ground (Takoma Park Sts.), D. C., 44; Beaufort, S. C., 9,735; Beverly, N. J., 262; Camp Butler (Springfield), Ill., 1,621; Camp Nelson, Ky., 3,673; Cave Hill, (Louisville), Ky., 5,305; Chalmette (Arabi), La., 13,444; Chattanooga, Tenn., 14,402; City Point, Va., 5,211; Cold Harbor (Richmond), Va., 1,971; Corinth, Miss., 5,755; Crown Hill (Indianapolis), Ind., 1,070; Culpepper, Va., 1,378; Custer Battlefield (Crow Agency), Mont., 1,648; Cypress Hills (Brooklyn), N. Y., 12,159; Danville, Ky., 363; Danville, Va., 1,331; Fayetteville, Ark., 1,383; Finns Point (Salem), N. J., 2,652; Florence, S. C., 3,019; Fort Donelson, (Dover), Tenn., 682; Fort Gibson, Okla., 2,570; Fort Harrison (Richmond), Va., 819; Fort Leavenworth, Kan., 4,407; Fort McPherson, (Brady), Neb., 1,113; Fort Scott, Kan., 1,084; Fort Smith, Ark., 2,596; Fredricksburg, Va., 15,220; Gettysburg, Pa., 3,765; Glendale, Va., 1,202; Grafton, W. Va., 1,338; Hampton, Va., 13,571; Jefferson Barracks, Mo., 14,017; Jefferson City, Mo., 911; Keokuk, Iowa, 1,050; Knoxville, Tenn., 3,907; Lebanon, Ky., 880; Lexington, Ky., 1,227; Little Rock, Ark., 7,370; Loudon Park (Baltimore), Md., 4,937; Marietta, Ga., 10,584; Memphis, Tenn., 14,923; Mexico City, Mexico, 1,563; Mill Springs (Somerset), Ky., 746; Mobile, Ala., 2,458; Mound City, Ill., 5,554; Nashville (Madison), Tenn., 16,877; Natchez, Miss., 3,665; New Albany, Ind., 3,345; Newbern, N. C., 3,464; Philadelphia (Pittsville Sta.), Pa., 4,570; Poplar Grove (Petersburg), Va., 6,232; Port Hudson, La., 3,859; Quincy, Ill., 320; Raleigh, N. C., 1,249; Richmond, Va., 6,650; Rock Island, Ill., 578; Salisbury, N. C., 12,192; San Antonio, Tex., 3,646; San Francisco (Presidio Sta.), Cal., 11,390; Santa Fe., N. M., 1,382; Seven Pines (Richmond), Va., 1,406; Shiloh (Pittsburgh Landing), Tenn., 3,637; Soldiers Home, D. C., 8,892; Springfield, Mo., 2,727; St. Augustine, Fla., 1,874; Staunton, Va., 774; Stone River (Murfreesboro), Tenn., 6,164; Vicksburg, Miss., 17,365; Wilmington, N. C., 2,415; Winchester, Va., 4,561; Woodlawn (Elmira), N. Y., 5,323; Yorktown, Va., 2,204; Sitka, Alaska, 70; Zachary Taylor, 2. Total, 413,367.

Total area, 2,105 acres, of which 1,216 are inclosed.

Of the interments about 10,700 are those of Confederates, being mainly in the National Cemeteries at Arlington, Camp Butler, City Point, Cypress Hills, Finns Point, Fort Smith, Hampton, Jefferson Barracks, Little Rock, Philadelphia, Springfield and Woodlawn.

Number of overseas soldiers returned and interred in National Cemeteries, 6,577, not including 75 from Russia.

Approximately 5,600 World War dead buried in Arlington National Cemetery.

UNITED STATES MILITARY ACADEMY AT WEST POINT.

The United States Military Academy is situated on the Hudson River, at West Point, N. Y., a place rich in historical interest and made memorable by the treason of Benedict Arnold. The massive stone buildings rising grandly above the broad, winding river harmonize beautifully with the background of blue hills to form an ideal location for this, the greatest military school in the world. The buildings and grounds represent a money value of approximately $25,000,000.

The maximum authorized strength of the Corps of Cadets, excepting four Filipinos, is 1,374, appointed in number and from sources as follows: 4 from each State at large, 192; 2 from each congressional district, 870; 2 from each Territory, 4; 4 from the District of Columbia, 4; 2 from natives of Porto Rico, 2; 122 from the United States at large, 122; 180 from among the enlisted men of the Regular Army and of the National Guard, in number as nearly equal as practicable, 180. Total 1,374.

Of the 122 from the United States at large, 2 are appointed upon the recommendation of the Vice-President, 20 are selected from among the honor graduates of those educational institutions which have officers of the Regular Army detailed as professors of military science and tactics and which upon the determination of their relative standing at the last preceding annual inspection regularly made by the War Department were designated as "honor military schools," and 40 are chosen from among the sons of veterans who were killed in action or died prior to July 2, 1921, of wounds received or disease contracted in line of duty during the World War.

Candidates are eligible for admission from the day they are 17 (or 19 if from the Regular Army or from the National Guard) until the day they become 22 years of age, on which latter day they are not eligible. The age requirements for all candidates, as well as the service requirements for appointment from the Army and from the National Guard, are statutory and can not be waived.

Appointments to the Academy are made only to fill vacancies as they may occur, and candidates may be designated one year in advance of admission. For each vacancy from a State or Congressional district three candidates may be nominated, a principal, a first alternate, who is entitled to admission only in the event of the failure of the principal, and a second alternate, who is entitled to admission only in the event of the failure of both the principal and the first alternate. The selection of these candidates is left entirely with the Senator or Representative who has the vacancy at his disposal and may be either by competitive examination or direct choice at the option of the Congressman.

Each candidate must pass a rigid physical examination and none is accepted who has any defect or infirmity which renders him unfit for military service. In addition, each candidate must pass an examination in the subjects of Algebra, Geometry, English Grammar, Composition and Literature, and History. However, graduates of first class high schools and students at universities and colleges of ecognized standing may submit educational certificates which will be considered by the Academic Board, and if satisfactory may be accepted in lieu of the mental examination.

The course of study is four years, during which time the cadets are under strict military discipline. The summers are spent in camp. Academic work begins in September of each year and ends the following June. Cadets of the first, second and third classes not undergoing examinations are allowed short leaves of absence at Christmas, and those who have successfully completed the third class course are allowed leaves of absence from about the middle of June to August 28. The course is largely mathematical and professional. The principal subjects taught are Mathematics, English, French, Spanish, Drawing, Drill Regulations of all arms of the service, Natural and Experimental Philosophy, Chemistry, Mineralogy, Geology, Electricity, History, International, Constitutional and Military Law, Civil and Military Engineering, Art and Science of War, Economics and Government, and Ordnance and Gunnery.

The pay of a cadet is $780 per year and commutation of rations, at present fixed at 80 cents per day. The total is $1,072, which, with proper economy, is sufficient to meet his actual needs at the Academy.

Each cadet when admitted to the Academy signs an agreement to serve for a period of eight years, unless sooner discharged by competent authority. Upon graduation, cadets are commissioned second lieutenants in the United States Army, with the exception of the Filipino cadets, who are eligible for commission only in the Philippine Scouts.

The total number of graduates, including foreigners receiving instruction under special Acts of Congress, from 1802 to June 13, 1929, inclusive is 8,785. The number of cadets in the Corps on Aug. 31, 1929, was 1,278. The Superintendent is Maj. Gen. Edwin B. Winans, U. S. A., and there are 211 officers and instructors at the Academy.

Detailed information as to the appointment and admission of cadets is contained in an attractively illustrated pamphlet, a copy of which will be furnished, without cost, upon application to the Adjutant General of the Army, Washington, D. C.

PUBLIC BUILDINGS PLANNED FOR WASHINGTON.

The Public Buildings Commission —Senator Reed Smoot of Utah, Chairman, Senator Claude A. Swanson of Virginia, Congressmen Richard N. Elliott of Indiana and Fritz G. Lanham of Texas, David Lynn, Architect of the Capitol, James A. Wetmore, Acting supervising Architect of the Treasury, and Lt. Col. U. S. Grant 3d, U. S. A., executive officer—is the Supervising agency under the bill passed May 25, 1926, appropriating $50,000,000 to be expended ($10,000,000 a year for five years) to procure adequate housing for all government activities in Washington.

An expenditure of an additional $25,000,000 for the purchase of sites was authorized by the 70th Congress by an Act approved January 13, 1928 amending the original Public Building Bill approved May 25, 1926.

The Commission has approved the purchase of all land not now Government owned in the Triangle bounded by the Mall, Pennsylvania Avenue and 15th Street, and reservations C and D, N. W.

Congress specified buildings "combining high standards of architectural beauty and practical utility" and suitable approaches, and beautifying and embellishing their surroundings in harmony with the L'Enfant plan.

The Commission has approved in general a plan for the erection of buildings covering this entire Triangle and has specifically approved, both as to the location of and the amount to be expended on the following buildings:

The completion of the center wing of the Department of Agriculture Administration Building $2,000,000; the Internal Revenue Building, to be located between 10th and 12th, B and C Streets, N. W., $10 000,000; the Department of Commerce Building, to be located between 14th and 15th and B and D Streets, N. W., $17,500,000; the extension of the Government Printing Office Building, $1,250,000; the Archives Building, between Pennsylvania Avenue, B. 9th and 10th Streets, N. W., $6,900,000; the Agriculture Department Extensible Building, to be located between Linwood Place, 13th, B and C Streets, S. W., $5,750,000.

In addition to the above mentioned, the Commission has recommended that buildings for the Department of Justice, Department of Labor, General Accounting Office and the Independent Offices Building be located in the above mentioned Triangle.

New plans provide space and opportunity for a new Post Office Department Building when needed, and for the eventual inclusion of the existing District Building.

The site for the Supreme Court Building, as approved, is located between East Capitol Street and Maryland Avenue and First and Second Streets, N. E.

The annual rental paid for space occupied by Government Departments and independent establishments in private property in Washington was $814,217.12 in 1924; $913,770.24 in 1925; $857,141.68 in 1926; $997,120.41 in 1927; $1,210,335.83 in 1928. The figures for 1926 to 1928, inclusive, do not include rents paid for local Post Office stations.

It is expected that the center wing of the Department of Agriculture Administration Building will be completed in February, 1930, and will contain 322,000 square feet.

The Internal Revenue Building, which it is expected will be completed by June 30, 1930, will contain 750,000 square feet and house 4,500 employees.

The extension to the Government Printing Office Building is expected to be completed by July 21, 1930, and will contain 168,000 square feet.

The Department of Commerce Building will contain 1,092,000 square feet and house 5,000 employees, and it is expected that this building will be completed in February, 1932.

THE PLEDGE TO THE FLAG.

(Taught in many of the schools and repeated by the pupils daily.)

"I pledge allegiance to the flag of the United States
And to the Republic for which it stands,
One Nation, indivisible,
With liberty and justice for all."

The Pledge to the Flag, it is asserted, was written in Aug., 1892, by Francis Bellamy a member of the staff of the *Youth's Companion*, of Boston, who had been active in getting Congress to authorize the President to proclaim Oct. 12 as Columbus Day, a national holiday for the schools. The idea of that holiday is claimed by James B. Upham, who was one of the junior proprietors of the paper mentioned.

The flag should be displayed only from sunrise to sunset, or between such hours as may be designated by proper authority. It should be displayed on national and State holidays and on historic and special occasions.

When carried in a procession the flag of the United States should be either on the marching right, i. e., the flag's own right, or when there is a line of other flags, the flag of the United States may be in front of the centre of that line.

When flags of two or more nations are displayed they should be flown from separate staffs of the same height and the flags should be of approximately equal size.

When displayed over the middle of the street, as between buildings, the flag of the United States should be suspended vertically with the union to the north in an east-and-west street or to the east in a north-and-south street.

When used on a speaker's platform, the flag should be displayed above and behind the speaker.

When flown at half staff, the flag is hoisted to the peak for an instant, and then lowered to the half staff position, but before lowering the flag for the day it is raised again to the peak. By "half staff" is meant hauling the flag down to one-half the distance between the top and bottom of the staff.

On Memorial Day, May 30, the flag is displayed at half staff from sunrise until noon and at full staff from noon until sunset.

TROOPS ENGAGED IN UNITED STATES WARS.

(Prepared by Adjutant-General's Office, U. S. Army.)

War.	Dates.			Troops Engaged.

a Proclamation of Congress read to Army at 12 o'clock noon on April 19, 1783.

b Estimates on total troops run from 250,000 to 395,858. Greatest strength of Continental Army was about 35,000, in November, 1778.

c Evidently represents *enlisments* and not individual soldiers, hence is considerably in excess of actual number of troops employed, as it is known that a large proportion of the men rendered more than one term of service and are counted that number of times.

d Hostilities began on this date. The Act of Congress approved May 13, 1846, declared the existence of a state of war

e Capture of the City of Mexico.

f Date of Gen. Lee's surrender.

g Of this number only 46,347 were actually drafted, the remaining 73,607 having served as substitutes.

h Army only, does not include Marines who served with the Army in France.

The Continental Army was organized by the Continental Congress June 15, 1775, under George Washington as Major-Gen. and Commander-in-Chief. The so-called Continentals in the Revolution totaled 231,771. The War Department was established Aug. 7, 1789. The standing army organized September, 1790.

UNION ARMY LOSSES IN THE CIVIL WAR.

(From "Regimental Losses in the American Civil War," by William F. Fox, Lieutenant-Colonel, U. S. V.)

September 19-20, 1863..	Chickamauga.....	1,656	9,749	4,774	16,179
June 1-4, 1864.....	Cold Harbor.....	1,844	9,077	1,816	12,737
December 11-14, 1862..	Fredericksburg.....	1,284	9,600	1,769	12,653
August 28-30, 1862....	Manassas.....	1,747	8.452	4,263	14,462
April 6-7, 1862	Shiloh.....	1,754	8,408	2,855	13,047
December 31, 1862....	Stone River.....	1,730	7,802	3,717	13,249
June 15-19, 1864.....	Petersburg (assault)....	1,688	8,513	1,185	11,386
July 21, 1861.....	Bull Run (first Manassas)	470	1,071	1,793	3,334

Northern writers usually estimate the total number of Confederate troops in the Civil War at 1,400,000, based on a population of 5,000,000 whites. Southern historians estimate the total number of Confederate troops at 600,000. R. H. McKim puts the total at 621,800. On March 1, 1862, by Confederate records, the total was 340,250. Woodrow Wilson, in his "History of the American People," estimated the Confederate troops at 900,000

The Confederate losses in particular engagements were as follows: Bull Run (first Manassas), July 21, 1861, killed, 387; wounded, 1,582; captured and missing, 13; aggregate, 1,982. Fort Donelson, Tenn., February 14-16, 1862, killed, 466; wounded, 1,534; captured and missing, 13,829; aggregate, 15,829. Shiloh, Tenn., April 6-7, 1862, killed, 1,723; wounded, 8,012; captured and missing, 959; aggregate, 10,694. Seven Days' Battle, Virginia, June 25-July 1, 1862, killed, 3,478; wounded, 16,261; captured and missing, 875; aggregate, 20,614. Second Manassas, August 21-September 2, 1862, killed, 1,481; wounded and missing, 7,627; captured and missing, 89; aggregate, 9,197. Antietam campaign, September 12-20, 1862, killed, 1,886; wounded, 9,348; captured and missing, 1,367; aggregate, 12,601. Fredericksburg, December 13, 1862, killed, 596; wounded, 4,068; captured and missing, 651; aggregate, 5,315. Stone River, Tenn. December 31, 1862, killed, 1,294; wounded, 7,945; captured and missing, 1,027; aggregate, 10,266. Chancellorsville, May 1-4, 1863, killed, 1,665; wounded, 9,081; captured and missing, 2,018; aggregate, 12,764. Gettysburg, July 1-3, 1863, killed, 2,592; wounded 12,706; captured and missing, 5,150; aggregate, 20,448. Chickamauga, September 19-20, 1863, killed, 2,312; wounded, 14,674; captured and missing, 1,468; aggregate, 18,454 Franklin, Nov. 3, 1864, killed, 6,252

The number of casualties in the volunteer and regular, armies of the United States during the war of 1861-65, according to a statement prepared by the Adjutant-General's office, was as follows: Killed in battle, 67,058; died of wounds. 43,012: died of disease, 224,586; other causes, such as accidents, murder, etc., 24,872; total died, 359,528; total deserted (estimated), 117,247. The joint resolution of Congress, approved April 6, 1917, provides "That the state of war between the United States and the Imperial German Government which has been thrust upon the United States is hereby formally declared."

The existence of a state of war between the United States of America and the Imperial and Royal Austro-Hungarian Government was declared by joint resolution of Congress approved Dec. 7, 1917.

Russia surrendered to Central Powers Dec. 16, 1917; Roumania, May 6, 1918.

Bulgaria surrendered to the Allies Sept. 29, 1918; Turkey, Oct. 30, 1918; Austria-Hungary, Nov. 3, 1918; Germany, Nov. 11, 1918.

Peace treaties—(1918) March 3, at Brest-Litovsk, between Russia, Germany, Austria-Hungary, Bulgaria and Turkey; (1918) March 7, between Germany and Finland; (1919) June 28, at Versailles, between Germany and Allies; (1919) Sept. 10, at St. Germain, between Austria and Allies; (1919) Nov. 27, at Neuilly, between Bulgaria and Allies; (1920) June 4, at the Grand Trianon, between Hungary and Allies; (1920) Aug. 10, at Sevres, between Turkey and Allies

U. S. PEACE PACTS WITH CENTRAL POWERS.

(Memorandum by the Department of State.)

"Treaty between the U. S. and Germany Restoring Friendly Relations signed at Berlin, Aug. 25, 1921; ratification advised by Senate, Oct. 18, 1921; ratified by the President, Oct. 21, 1921; ratified by Germany, Nov. 2, 1921; ratifications exchanged at Berlin, Nov. 11, 1921; proclaimed, Nov. 14, 1921.

"Treaty between the U. S. and Austria Establishing Friendly Relations signed at Vienna, Aug. 24, 1921; ratification advised by Senate, Oct. 18, 1921; ratified by the President, Oct. 21, 1921; ratified by Austria, Oct. 8, 1921; ratifications exchanged at Vienna, Nov. 8, 1921; proclaimed, Nov. 17, 1921

"Treaty between the U. S. and Hungary Establishing Friendly Relations signed at Budapest, Aug. 29, 1921; ratification advised by Senate, Oct. 18, 1921; ratified by President, Oct. 21, 1921; ratified by Hungary, Dec. 12, 1921; ratifications exchanged at Budapest, Dec. 17, 1921; proclaimed Dec. 20, 1921.

"In proclaiming the treaties Restoring Friendly Relations with Germany and Austria, the President declared the state of war between the U. S. and the Governments of Germany and Austria to have terminated on July 2, 1921.

"February 21, 1923, is the date upon which Gen. Allen and his command ceased to occupy German territory. These were the last American troops to leave Germany with the exception of a small detachment of a few men which withdrew from Germany on July 11, 1923."

INSIGNIA FOR SHOULDER LOOPS.

Silver stars for general officers, 1 inch in diameter. *General*—Four silver stars; *Lieutenant General*—Three silver stars; *Major General*—Two silver stars; *Brigadier General*—One silver star.

The last survivor of the Mexican War, Owen Thomas Edgar, 98, died on Sept. 3, 1929, at Washington, D. C. He was born at Philadelphia, and in early life was a printer.

There were two survivors until June 16, 1929, when death took William F. T. Buckner, 101, at Paris, Mo. He was born in Virginia. In later life he was a banker. Four of his grandsons served in the A. E. F. in France, in the World War.

UNITED STATES VETERANS' BUREAU.

(Data are official, and are supplied by the Director of the Bureau.)

Director, Frank T. Hines; *Assistant to the Director*, Adelbert D. Hiller; *Assistant Directors*: Winthrop Adams, Acting (Medical); Harold W. Breining (Finance); William Wolff Smith (Legal); Omer W. Clark (Coordination); John D. Cutter (Supply). Chief, Construction Division, Louis H. Tripp.

The number of compensation claims received to June 30, 1929 is 1,130,870. All but 9,883 of these claims have been adjudicated. Of the number adjudicated, 560,919 were granted.

The number of veterans now receiving compensation is 266,498 and the number of deceased veterans whose beneficiaries are receiving compensation is 88,529. Monthly disbursements approximate $16,000,000.00

The total amount of disbursements for compensation is $1,438,751,961.50.

The total number of ex-service men admitted to hospitals to July 1, 1929, is 429,660. A total of 795,725 treatments were given to patients outside of hospitals during the past twelve months and 890,020 examinations were made during the same period.

The Bureau utilizes 96 Government owned or controlled hospitals, of which 49 are under the direct control of the Bureau.

The total number of patients remaining in all hospitals on July 1, 1929, was 27,784, of whom 6,547 were suffering from tuberculosis, 13,781 from neuropsychiatric diseases, and 7,456 from general and surgical diseases and conditions.

On July 1, 1929, 649,837 service and ex-service men and women were carrying Government Life Insurance aggregating $3,058,577,039.

Loans on Adjusted Service Certificates have been made by the Bureau to 1,429,946 veterans, the amount of money being $133,653,488.78.

On July 1, 1929, The Bureau was supervising the guardianship of 57,530 wards, of whom 21,774 were incompetent veterans and 34,787 were minor children of deceased veterans, and 969 were incompetent dependents.

The number of fiduciaries whose activities were under the supervision of the Bureau was 51,974.

The total disbursements made by the Bureau amount to $4,773,858,879.51, of which $883,991,424.99 was from insurance premiums and allotments deducted from service men's pay.

The largest items are: compensation, $1,438,751,961,50; term insurance, $1,133,311,544; vocational training, $644,993,467.71; and medical and hospital services, $351,076,919.84.

UNITED STATES NAVAL ACADEMY AT ANNAPOLIS.

The students of the Naval Academy are styled midshipmen. Four midshipmen are allowed for the Vice President and for each Senator, Representative and Delegate in Congress; one for Porto Rico, a native of the island, nominated by the Governor; one for the Resident Commissioner from Porto Rico, two for the District of Columbia, and fifteen appointed each year from the United States at large.

In addition, one Filipino is allowed for each class. The appointment from the District of Columbia and fifteen each year at large are made by the President.

The selection of candidates, by competitive examination or otherwise, for nomination for vacancies in the quota of Senators, Representatives and Delegates in Congress is entirely in the hands of each Senator, Representative and Delegate in Congress having a vacancy; and all applications for appointment or inquiries relative to competitive examinations should be addressed accordingly. Two examinations for admission are held each year, the first on the third Wednesday in February, the second on the third Wednesday in April.

The law authorizes the appointment of one hundred enlisted men each year, to be selected as a result of a competitive examination of enlisted men of the Regular Navy and Marine Corps, who must not be more than twenty years of age on April 1 of the year they enter, and who will have been in the service at least one year by July 1 of that year.

The law authorizes the appointment of twenty-five midshipmen each year, to be selected as a result of competitive examination of enlisted men of the Naval Reserve and the Marine Corps Reserve. Candidates must be citizens of the United States who are not more than twenty years of age on April 1 of the year in which appointed; who have been in the Naval Reserve at least one year by July 1 of the year in which appointed.

The competitive examination of these enlisted men is held on the third Wednesday in April of each year. Candidates may also be accepted on certificate.

An act of Congress approved June 8, 1926, authorizes that the number of midshipmen now allowed by law at the United States Naval Academy be increased by 40 from the United States at large, to be appointed by the President from among the sons of officers, soldiers, sailors, and marines of the Army, Navy, and Marine Corps of the United States who were killed in action or died prior to July 2, 1921, of wounds or injuries received or disease contracted in line of duty during the World War; *Provided*, That one-half shall be appointed from among the sons of officers and one-half from among the sons of warrant officers, soldiers, sailors, and marines of the Army, Navy, and Marine Corps.

All candidates, except 4 Filipinos, are required to be citizens of the United States and must not be less than 16 nor more than 20 years of age on April 1 of the calendar year in which they enter.

The course for midshipmen is four years. During the summer, midshipmen of the first, second and third classes go to sea for about three months. Midshipmen after graduation are commissioned as Ensigns in the navy, and occasionally to fill vacancies in the Marine Corps and in certain of the staff corps of the navy.

The height of candidates for admission shall not be less than five feet two inches, at the age of sixteen years, with an increase of one inch for each additional year or fraction of a year over one-half; and the minimum weight at sixteen years shall be one hundred and nine pounds, with an increase of not less than three pounds for each additional year or fraction of a year over one-half. Any marked deviation in the height and weight relative to the age of a candidate will add materially to the consideration for rejection. Candidates must be unmarried, and any midshipman who shall marry, or who shall be found to be married before his final graduation, shall be dismissed from the service. Each candidate who has passed the required examinations must, before being admitted as a midshipman, deposit the sum of $100 to cover part of the cost of his initial outfit.

After being admitted, he is credited with the sum of $250, which is needed in addition to the $100 cash deposit to complete paying for the uniforms, clothing, textbooks, etc. This amount ($250) is deducted from the midshipman's pay in monthly installments. Any midshipman may, however, immediately after entering the Academy repay this amount in full.

Each candidate before admission will be required to sign articles by which he binds himself to serve in the United States Navy during the pleasure of the President of the United States (including his time of probation at the Naval Academy) unless sooner discharged. The pay of a midshipman is $780 a year.

Naval Academy entrance literature may be obtained upon application to the Bureau of Navigation, Navy Department, Washington, D. C. Rear Admiral S. S. Robison was appointed superintendent at Annapolis and took charge on June 20, 1928.

NEW YORK STATE MERCHANT MARINE ACADEMY.

The New York State Merchant Marine Academy, the oldest nautical school in the United States, was established in 1874 and until July 1, 1929, was known as the New York State Nautical School. It is now under the control of the State Department of Education with a Board of Visitors composed of maritime men representing the different Boards of Trade and Chambers of Commerce. The Student body is divided into two branches, deck and engineers. The deck cadets are given practical and theoretical instruction in all branches of seamanship and of navigation in ship construction and stability, in cargo handling and ship's business. The engineer cadets besides shopwork and drawing are given practical and theoretical instruction in marine engines and boilers and in internal combustion engines. All cadets are trained in handling small boats under oars and sails. The course equips the graduate to perform the duties of junior officer on merchant ships.

Applicants for admission must at the time of their examination be between the ages of 17 and 20 years, of normal size and sound constitution, and free from all physical defects, must pass a strict physical examination, must produce testimonials of character, must have had two years high school education and pass a satisfactory mental examination, must be residents of New York State and have either a parent or guardian who is a resident of the State of New York to sign the necessary papers, and they must have an inclination for a sea-faring life and enter the school of their own free will. Examinations both mental and physical are conducted on board the Training Ship. Two years are required to complete the course and obtain a diploma and certificate of graduation. The school year begins about October 1st, and is divided into the Winter term from October 1st to May 1st, during which time the Training Ship "Newport" is moored alongside of a pier in New York City and the time is devoted to both theoretical and practical instruction. At the beginning of the Summer term from June 1st to September 30th the "Newport" makes a cruise usually to foreign waters when the entire time is devoted to practical work. There is no charge for tuition or board but the cadets are required to deposit $160 to provide for uniforms and working clothes. A registration fee of $2 is required with the application.

The office of the school is located at 17 Battery Place, Room 2730, New York City.

UNITED STATES COAST GUARD.

The United States Coast Guard was created by Act of Congress, approved Jan. 28, 1915, by combining therein the Revenue Cutter Service, organized Aug. 4, 1790, and the Life Saving Service, which latter was operated in connection with the Revenue Cutter Service, but on June 18, 1878, was erected into a separate organization under the Treasury Department. At the close of the fiscal year ended June 30, 1929, there were in commission in the Coast Guard 74 cutters and launches, 24 destroyers, 253 patrol boats, and 107 picket boats.

The Coast Guard stations in an active status at the close of the year numbered 252. Briefly stated, the principal duties of the Coast Guard are:

Rendering assistance to vessels in distress and saving life and property; destruction or removal of wrecks, derelicts, and other floating dangers to navigation; extending medical aid to American vessels engaged in deep-sea fisheries; protection of the customs revenue; operating as a part of the navy in time of war or when the President shall so direct; enforcement of law and regulation governing anchorage of vessels in navigable waters; enforcement of law relating to quarantine and neutrality; suppression of mutinies on merchant vessels; enforcement of navigation and other laws governing merchant vessels and motor boats; enforcement of law to provide for safety of life on navigable waters during regattas and marine parades; protection of game and the seal and other fisheries in Alaska, etc.; enforcement of sponge-fishing law; international ice patrol in the vicinity of the Grand Banks off Newfoundland.

NAVAL EDUCATION SYSTEM OF THE UNITED STATES.

(By the Bureau of Navigaton of the Navy Department.)

The Bureau of Navigation of the Navy Department is charged with the training and education of the line officers of the navy and all enlisted men, except those of the Hospital Corps. Each Staff Bureau is charged with the training and education of the staff officers, and the Bureau of Medicine and Surgery with the training and education of the members of the Hospital Corps.

TRAINING OF OFFICERS—REGULAR NAVY.

Midshipmen, when appointed, are given four years' instruction in general and technical subjects at the Naval Academy, Annapolis, Md. Upon graduation they are commissioned as ensigns, or assigned by the Secretary of the Navy to fill vacancies in the lowest commissioned grades of the Marine Corps or Staff Corps of the navy.

Schools are maintained to give special instruction in various lines or post-graduate work in particular subjects pertinent to the navy, to a certain number of officers who have the requisite qualifications, who show aptitude and who request the instruction. The following courses are in operation:

War College—Newport, R. I., one year; senior course for officers of command or flag rank; junior course for lieutenant-commanders and lieutenants with at least six years' service as commissioned officers; correspondence courses for any officer ashore or afloat. A few Marine Corps officers and army officers take this course every year for a study of problems affecting their service branches.

Army War College—Washington, D. C., one year. A few naval officers and Marine Corps officers who have completed the Naval War College course attend this course each year. Special attention is given to problems affecting the joint manoeuvres of the army, navy and Marine Corps.

Post-Graduate Work—Special post-graduate instruction is given in the following: Engineering (mechanical, electrical, communication, steam machinery, radio, internal combustion engines, aeronautical, acoustical); ordnance (design, torpedoes, ballistics, explosives, metallurgy, fire-control); civil engineering; naval construction and law; compass installation and navigational instrument design. The courses are of two or three years' duration. The first year of all courses is given at the Post-Graduate School at Annapolis, Md., and consists of preparation and technical ground work. The preliminary course merges into the specialization course and is continued at the civilian institution which offers the best facilities in the given work.

Special instruction is now given at the following universities: Columbia, Harvard, Yale, Massachusetts Institute of Technology, Chicago, Rensselaer Polytechnic Institute, and George Washington.

Officers taking the law course do so at George Washington University and are assigned to duty in the office of the Judge Advocate General of the navy during their three-year course.

Officers are selected for post-graduate work in engineering and ordnance five or six years after graduation, and in naval construction and civil engineering one or two years after graduation.

Officers successfully completing the latter courses are transferred to the Naval Construction Corps and Civil Engineering Corps respectively.

General Line Course—Post-Graduate School—Naval Academy, Annapolis, Md., one year. For Lieutenants and Lieutenant Commanders. The course is of a cultural and professional nature. Instruction is given in the latest practices in the following subjects: navigation, engineering, ordnance and gunnery, seamanship, communications, and electricity; instruction is also given in government, logic and economics.

Submarines—New London, Conn., six months; practical training in handling submarines and firing torpedoes from them. Officers must have had at least two years' sea duty to be eligible.

Torpedoes—Newport, R. I.; five months; theoretical and practical instruction in the assembly, firing, care and maintenance of the various types of torpedoes. Selection confined to junior officers when available for such detail.

Aviation—Pensacola, Fla., eight months; training ing in heavier-than-air craft; graduates of the Navy Academy eligible for this course after completing two years' sea duty; age limit thirty-one years, Lakehurst, N. J.; not to exceed twelve months; training in lighter-than-air craft; midshipmen given ground instruction and ten hours' flight training before being commissioned.

Optical Instruction—Navy Yards, Washington, D. C., and Mare Island, Cal.; course for range finder officers, four weeks; long course for officers, six months. Selection confined to junior officers available for this detail.

Gyro Compass—Navy Yards, New York, N. Y., and Mare Island, Cal., four to six months. Gunners (E) with gyro experience available for this detail.

Correspondence Courses—Correspondence courses are issued to officers requesting them, as follows: International Law and Strategy and Tactics; Duties of Supply Officers and Pay Clerks; Navigation.

TRAINING OF ENLISTED MEN:

The Bureau of Navigation maintains the following Naval Training Stations: Hampton Roads, Va.; Newport, R. I.; Great Lakes, Ill.; San Diego, Cal.

The course of training of all newly enlisted men covers a period of eight weeks. Special stress during training is placed on (*a*) training a recruit properly to care for his person and property; (*b*) infantry drill; (*c*) pulling an oar; (*d*) swimming. If the opportunity permits, additional instruction is given in knotting and splicing and small arms practice.

Upon completion of the eight weeks' course, a certain number of recruits, selected on a competitive basis, are transferred to service schools for training in specialist lines.

The others are sent to general service and their training continued for eight weeks, when they are advanced from the rating of apprentice seaman to seaman second class or fireman third class.

Service Schools—These schools are maintained to supplement the training carried out on board cruising vessels. Some schools are maintained for special training of petty officers in duties where facilities for training afloat are lacking or inadequate; other schools simply parallel the training activities afloat.

Schools are maintained for training men in the following subjects: Radio material, general electricity, gyro compasses, machine shop practice and operating engineering, coppersmithing, blacksmithing, boilermaking, music, hospital service, pharmacy, aviation mechanics, aerography, torpedoes, optics, fire control, sound, submarines, aviation piloting, cooking, baking, diving, radio operating, and stenography, and various minor specialities.

Naval Academy Preparatory Class—Hampton Roads, Va., and San Diego, Cal. This is a special cpurse five months in length, affording enlisted men an opportunity to prepare themselves for the entrance examinations to the Naval Academy.

Instruction is given under the supervision of officers specially selected for this work.

The law permits the appointment of 100 enlisted men annually to the Naval Academy, and through these classes the Bureau of Navigation is able to practically fill the quota allowed.

NAVAL TRAINING COURSES.

The courses are available to all men of the navy and are furnished free of charge to any ship or station upon official request. There are three kinds of courses: (*a*) Rating courses, to afford men means by which they may qualify themselves for a particular rating; (*b*) general technical courses, to increase the skill of the men in naval work; (*c*) academic courses, to further the general education of the individual. Total number of courses, 121.

Naval Reserve Officers' Training Corps units have been established in the following universities: Yale, Harvard, Georgia School of Technology, University of California, University of Washington, Northwestern University. The naval course at these universities is an elective one, and students enrolled in the course are given credit towards a degree for the successful completion of their naval work. Instruction is given in the following subjects: Navigation, seamanship, ordnance and gunnery, naval organization and operation, strategy and tactics, international law, communications and marine engineering. The course is divided into two parts: The basic course, which corresponds to the freshman and sophomore years; and the advanced course, which corresponds to the junior and senior years. Students enroll for each course, but the successful completion of the basic course is a requirement for enrollment in the advanced course. Members of the advanced course receive commuted rations amounting to approximately $110 per year. Uniforms, equipment, and books are furnished free of charge to the students. The uniform is similar to that worn by officers of the regular navy with special insignia for this corps. Such students as successfully complete the four-year naval course, and so desire, are given commissions as ensigns in the Volunteer Reserve upon graduation.

Instructions of Officers and Men—Study periods are assigned during each weekly drill and instruction is carried on in accordance with approved syllabus.

This syllabus covers primary courses for all enlisted men, secondary courses for non-rated men, advanced courses for petty officer ratings, and courses for junior officers and for senior officers in the subjects of navigation, seamanship, ordnance and gunnery, engineering and aviation.

Study courses issued to the regular navy are also provided for the reserve force.

Besides the 18 capital ships of 525,840 tons total, listed above, the American Navy, on Sept. 14, 1929, consisted (tonnage in parenthesis) of 3 aircraft carriers (76,286); 10 cruisers (70,500); 284 vessels of the destroyer type (290,304); and 108 submarines (77,062).

There were under construction on that date 13 cruisers (130,000); and 2 submarines (5,520).

And in addition, there had been authorized by Congress, up to the date named, 1 aircraft carrier (13,800); 10 cruisers (100,000); 12 destroyers (by Act of Aug. 29, 1916, but no funds yet appropriated); and 3 submarines (4,650).

The Navy aircraft include the dirigible balloon, Los Angeles, 656 feet long; 2 non-rigid airships; 14 free balloons, 9 kite balloons; 197 fighting planes; 255 observation planes; 242 torpedo and bombing planes, 28 patrol planes, and 186 training planes—a total of 908 airplanes.

Among the craft other than battleships in the above table, in commission, were the cruisers, Pittsburgh (13,680); Seattle (14,500); and Rochester (9,700); the light cruisers, Cincinnati, Concord, Detroit, Marblehead, Memphis, Milwaukee, Omaha, Raleigh, Richmond, and Trenton, each of 7,050 tons, the light cruisers, Cleveland, Denver, and Galveston, each of 3,200 tons, and the aircraft carriers, Lexington, Saratoga, and Langley, (last named, 12,700 tons).

The V-4, put in commission in April, 1928, is the only mine laying submarine in the Navy.

Of the ships out of commission, the Navy has ordered sold or scrapped 15 ships, including the cruisers Huntington (ex-West Virginia); Frederick (ex-Maryland); the Pueblo (ex-Colorado); the Huron (ex-South Dakota); New Orleans, Albany, Charlotte, Salem, Birmingham, and St. Louis. The Salem and the Birmingham were built as scout cruisers, and had extra speed.

Navy Yards—Portsmouth, N. H.; Boston, Mass.; Brooklyn, N. Y.; Philadelphia, Pa.; Washington, D. C.; Norfolk, Va.; Charleston, S. C.; Mare Island, Cal.; Bremerton, Wash.; Pearl Harbor, T. H.

Stations—Newport, R. I.; New London, Conn.; Key West, Fla.; Pensacola, Fla.; New Orleans, La.; San Diego, Cal.; Guam, Samoa, Cavite, P. I.; St. Thomas, W. I.; Guantanamo, Cuba; Balboa, C. Z.

Training Stations—Hampton Roads, Va.; San Diego, Cal.; Great Lakes, Ill.; Newport, R. I.

The **Lexington** and **Saratoga**, originally intended to be battle cruisers, as provided for in the 1926 building program, were converted to aircraft carriers under the terms of the Washington Conference, and commissioned in the Navy late in 1927, the **Saratoga** on November 16, the **Lexington** on December 14. They are sister ships; dimensions and facts concerning them are as follows:

Length—850 feet on water line, 888 feet over all; beam—105 feet; mean draft—31 feet normal displacement, 33,000 tons; speed, 33 knots. Main battery, eight 8-inch guns in four turrets. Anti-aircraft battery, twelve 5-inch anti-aircraft guns. Carry 40 bombat planes and 32 bombing planes.

At Camden, N. J., on Jan. 23, 1929, the first cruiser built for the Navy under the terms of the Limitation of Armament Conference held in 1922 left the ways—the Salt Lake City.

The new light cruiser, Pensacola, was launched on April 25, 1929, at the Brooklyn Navy Yard. When completely fitted for sea she will have a displacement of 10,000 tons. Her turbines develop 107,000 horsepower and will drive her at forty miles an hour. Her 2,100 tons of crude oil fuel give her a cruising radius of 14,000 miles.

She carries ten 8-inch guns, four 5-inch anti-aircraft guns, two triple 21-inch torpedo tubes on deck and two scouting planes.

Secretary of the Navy C. F. Adams, on June 29, 1929, awarded contracts for the construction of the first two 10,000-ton cruisers authorized by Congress for the fifteen-cruiser program of 1929, 1930, and 1931. One will be built by the Puget Sound Navy Yard and the other by the Bethlehem Shipbuilding Corporation.

The Puget Sound Navy Yard bid was $8,838,000, with a construction period of forty months. The bid submitted by the Bethlehem Shipbuilding Corporation was for one vessel to be constructed at Quincy, Mass., and delivered at the Navy Yard at Boston within thirty-six months from the date of contract at a cost of $10,753,000.

The Secretary, on July 3, 1929, let the contracts for the three other cruisers authorized by Congress to be begun in that year, one contract went to the New York Navy Yard at an estimated cost of $10,508,100. The ship wil be completed within thirty-six months from the time construction is started.

Contracts for one new 10,000-ton cruiser each also were awarded to the New York Ship Building Company at Camden, N. J., and to the Philadelphia Navy Yard. The former is to build the ship for $10,903,000 within a time limit of thirty-six months and the latter for $10,285,906 within forty-two months.

The fifteen cruisers authorized by the Act of Feb. 13, 1929, to be begun in 1929, 1930, and 1931, are to cost not over $17,000,000 each, including armor and armament. A $19,000,000 aircraft carrier also is authorized.

The 15-cruiser Act also says:

Section 4. In the event of an international agreement, which the President is requested to encourage, for the further limitation of naval armament, to which the United States is signatory, the President is hereby authorized and empowered to suspend in whole or in part any of the naval construction authorized under this act.

Section 5. (a)—That the Congress favors a treaty, or treaties, with all the principal maritime nations regulating the conduct of belligerents and neutrals in war at sea, including the inviolability of private property thereon.

(b)—That such treaties be negotiated if practicably possible prior to the meeting of the conference on the limitation of armaments in 1931.

The French Navy launched at Brest on April 24, 1929, the 10,000-ton cruiser, Foch. One of the six cruisers authorized by the program of December, 1927, the Foch is the third to take the water. The other two, the Duquesne and Tourville, are in active service, the Tourville having conveyed the body of Ambassador Herrick to the United States.

Like her sister ships, the Foch is 582 feet long and 57 beam, with a speed of 32.8 knots. Her armament comprises eight 203-millimeter guns, eight 95 and eight 37-millimeter guns, six tubes for launching 550-millimeter torpedoes, twelve powerful anti-aircraft guns and provision for three hydroplanes. Three groups of turbines capable of an aggregate horsepower of 100,000 supply the motive power.

*The ten cruisers shown as appropriated for, plus the five shown as authorized, constitute the 15 cruisers authorized by the last Congress to be laid down, five in fiscal year 1929, five in fiscal year 1930 and five in fiscal year 1931. The first five were to be built, two by private contractors and three by Government yards. The President recently announced that the three to be built by Navy Yards, which would ordinarily have been laid down late in 1929, have been held up.

°Includes *Surrey* and *Northumberland*. Prime Minister recently announced that work on these two cruisers had been suspended.

†Tonnage of two of these is estimated.

NOTE: *U. S. Cruisers:* The 10 shown as built are of the 6" gun type. The twenty-three shown as building, appropriated for, and authorized are the 8" gun type.

British Cruisers: In the fifty-two shown as built there are thirty-eight of the 6" gun type, four of the 7.5" gun type and ten of the 8" gun type. The seven shown as building are of the 8" gun type. In the three appropriated for, two are of the 6" gun type and one of the 8" gun type.

Japanese Cruisers: In the twenty-eight shown as built, seventeen are of the 5.5" gun type, four of the 6" gun type and seven of the 8" gun type. The five shown as building are of the 8" gun type.

French Cruisers: In the eleven shown as built there is one 3.9" gun type, three 5.9" gun type, three 6.1" gun type, two 7.5" gun type, and two 8" gun type; of the four building, one is of the 6.1" gun type and three of the 8" gun type. The one appropriated for is of the 8" gun type.

Italian Cruisers: In the eleven shown as built, two are of the 3.9" gun type, three of the 4.7" gun type, three of the 5.9" gun type, one of the 8" gun type, and two of the 10" gun type. Of the five shown as building, four are of the 6" gun type and one of the 8" gun type. Of the six appropriated for, two are of the 6" gun type and four are of the 8" gun type.

Constitution of the United States.

The Constitution originally consisted of a Preamble and seven Articles, and in that form was ratified by a convention of the States, Sept. 17, 1787. The Government under the Constitution was declared in effect on the first Wednesday in March, 1789. The signers of the original Constitution, by virtue of their membership in Congress, were:

GEO. WASHINGTON, *President and deputy from Virginia.* NEW HAMPSHIRE — John Langdon, Nicholas Gilman. MASSACHUSETTS—Nathaniel Gorham, Rufus King. CONNECTICUT—Wm. Saml. Johnson, Roger Sherman. NEW YORK—Alexander Hamilton. NEW JERSEY—Wil. Livingston, David Brearley, Wm. Patterson, Jona. Dayton. PENNSYLVANIA—B. Franklin, Robt. Morris, Thos. Fitzsimons, James Wilson, Thomas Mifflin, Geo. Clymer, Jared Ingersoll, Gouv. Morris. DELAWARE—Geo. Read, John Dickinson. Jaco. Broom, Gunning Bedford jun, Richard Basset. MARYLAND—James McHenry, Danl. Carroll, Dan. of St. Thos. Jenifer. VIRGINIA—John Blair, James Madison, Jr. NORTH CAROLINA—Wm. Blount, Hu. Williamson, Richd. Dobbs Spaight. SOUTH CAROLINA—J. Rutledge, Charles Pinckney, Charles Cotesworth Pinckney, Pierce Butler. GEORGIA—William Few, Abr. Baldwin. Attest: WILLIAM JACKSON, *Secretary.*

The Constitution was ratified by the thirteen original States in the following order:

Delaware, December 7, 1787 (yeas, 30), unanimous.

Pennsylvania, December 12, 1787, vote 43 to 23.

New Jersey, December 18, 1787 (yeas, 38), unanimous.

Georgia, January 2, 1788 (yeas, 26), unanimous.

Connecticut, January 9, 1788, vote 128 to 40.

Massachusetts, February 6, 1788, vote 187 to 168.

Maryland, April 28, 1788, vote 63 to 11.

South Carolina, May 23, 1788, vote 149 to 73.

New Hampshire, June 21, 1788, vote 57 to 46.

Virginia, June 26, 1788, vote 89 to 79.

New York, July 26, 1788, vote 30 to 27.

North Carolina, November 21, 1789, vote 194 to 77.

Rhode Island, May 29, 1790, vote 34 to 32.

(Vermont, by convention, ratified Jan. 10, 1791; and Congress, Feb. 18, 1791, admitted that State into the Union.)

THE CONSTITUTION.

PREAMBLE.

We, the people of the United States, in order to form a more perfect Union, establish justice, insure domestic tranquility, provide for the common defence, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this CONSTITUTION for the United States of America.

ARTICLE I.

Section 1—(Legislative powers: in whom vested:)

All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

Section 2—(House of Representatives, how and by whom chosen. Qualifications of a Representative. Representatives and direct taxes, how apportioned. Enumeration. Vacancies to be filled. Power of choosing officers, and of impeachment.)

1. The House of Representatives shall be composed of members chosen every second year by the people of the several States, and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislature.

2. No person shall be a Representative who shall not have attained to the age of twenty-five years and been seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State in which he shall be chosen.

3. Representatives and direct taxes shall be apportioned among the several States which may be included within this Union according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons. The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct. The number of Representatives shall not exceed one for every thirty thousand, but each State shall have at least one Representative; and until such enumeration shall be made, the State of New Hampshire shall be entitled to choose 3; Massachusetts, 8; Rhode Island and Providence Plantations, 1; Connecticut, 5; New York, 6; New Jersey, 4; Pennsylvania, 8; Delaware, 1; Maryland, 6; Virginia, 10; North Carolina, 5; South Carolina, 5, and Georgia, 3.*

4. When vacancies happen in the representation from any State, the Executive Authority thereof shall issue writs of election to fill such vacancies.

5. The House of Representatives shall choose their Speaker and other officers, and shall have the sole power of impeachment.

Section 3—(Senators, how and by whom chosen. How classified. State Executive, when to make temporary appointments, in case, etc. Qualifications of a Senator. President of the Senate, his right to vote. President pro tem., and other officers of the Senate, how chosen. Power to try impeachments. When President is tried, Chief Justice to preside. Sentence.)

1. The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six years; and each Senator shall have one vote.

2. Immediately after they shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one-third may be chosen every second year; and if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the Executive thereof may make temporary appointment until the next meeting of the Legislature, which shall then fill such vacancies.

3. No person shall be a Senator who shall not have attained to the age of thirty years, and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State for which he shall be chosen.

4. The Vice President of the United States shall be President of the Senate, but shall have no vote unless they be equally divided.

5. The Senate shall choose their other officers, and also a President pro tempore, in the absence of the Vice President, or when he shall exercise the office of President of the United States.

6. The Senate shall have the sole power to try all impeachments. When sitting for that purpose, they shall be on oath or affirmation. When the President of the United States is tried, the Chief Justice shall preside; and no person shall be convicted without the concurrence of two-thirds of the members present.

7. Judgment of cases of impeachment shall not extend further than to removal from office, and disqualification to hold and enjoy any office of honor, trust, or profit under the United States; but the party convicted shall nevertheless be liable and subject to indictment, trial, judgment, and punishment, according to law.

Section 4—(Times, etc., of holding elections, how prescribed. One session in each year.)

1. The times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to places of choosing Senators.

2. The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December, unless they shall by law appoint a different day.

Section 5—(Membership, Quorum, Adjournments. Rules. Power to punish or expel. Journal. Time of adjournments, how limited, etc.)

1. Each House shall be the judge of the elections, returns, and qualifications of its own members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members in such manner and under such penalties as each House may provide.

2. Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and with the concurrence of two-thirds expel a member.

3. Each House shall keep a journal of its proceedings, and from time to time publish the same, excepting such parts as may in their judgment require secrecy; and the yeas and nays of the members of

* See Article XIV., Amendments.

either House on any question shall, at the desire of one-fifth of those present, be entered on the journal.

4. Neither House, during the session of Congress shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two Houses shall be sitting.

Section 6—(Compensation. Privileges. Disqualification in certain cases.)

1. The Senators and Representatives shall receive a compensation for their services to be ascertained by law, and paid out of the Treasury of the United States. They shall in all cases, except treason, felony, and breach of the peace, be privileged from arrest during their attendance at the session of their respective Houses, and in going to and returning from the same; and for any speech or debate in either House they shall not be questioned in any other place.

2. No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States which shall have been created, or the emoluments whereof shall have been increased during such time; and no person holding any office under the United States shall be a member of either House during his continuance in office.

Section 7—(House to originate all revenue bills. Veto. Bill may be passed by two-thirds of each House, notwithstanding, etc. Bill, not returned in ten days, to become a law. Provisions as to orders, concurrent resolutions, etc.)

1. All bills for raising revenue shall originate in the House of Representatives, but the Senate may propose or concur with amendments, as on other bills.

2. Every bill which shall have passed the House of Representatives and the Senate shall, before it becomes a law, be presented to the President of the United States; if he approve, he shall sign it, but if not, he shall return it, with his objections, to that House in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it. If after such reconsideration two-thirds of that House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall likewise be reconsidered; and if approved by two-thirds of that House it shall become a law. But in all such cases the votes of both Houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each House respectively. If any bill shall not be returned by the President within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Congress by their adjournment prevent its return; in which case it shall not be a law.

3. Every order, resolution, or vote to which the concurrence of the Senate and House of Representatives may be necessary (except on a question of adjournment) shall be presented to the President of the United States; and before the same shall take effect shall be approved by him, or being disapproved by him, shall be repassed by two-thirds of the Senate and the House of Representatives, according to the rules and limitations prescribed in the case of a bill.

Section 8—(Powers of Congress.)

1. The Congress shall have power:

To lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defence and general welfare of the United States; but all duties, imposts, and excises shall be uniform throughout the United States.

2. To borrow money on the credit of the United States.

3. To regulate commerce with foreign nations, and among the several States, and with the Indian tribes.

4. To establish an uniform rule of naturalization and uniform laws on the subject of bankruptcies throughout the United States.

5. To coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures.

6. To provide for the punishment of counterfeiting the securities and current coin of the United States.

7. To establish post-offices and post-roads.

8. To promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive rights to their respective writings and discoveries.

9. To constitute tribunals inferior to the Supreme Court.

10. To define and punish piracies and felonies committed on the high seas, and offences against the law of nations.

11. To declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water.

12. To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years.

13. To provide and maintain a navy.

14. To make rules for the government and regulation of the land and naval forces.

15. To provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions.

16. To provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States, reserving to the States respectively the appointment of the officers, and the authority of training the militia according to the discipline prescribed by Congress.

17. To exercise exclusive legislation in all cases whatsoever over such district (not exceeding ten miles square) as may, by cession of particular States and the acceptance of Congress, become the seat of Government of the United States, and to exercise like authority over all places purchased by the consent of the Legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dry-docks, and other needful buildings.

18. To make all laws which shall be necessary and proper for carrying into execution the foregoing powers and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof.

Section 9—(Provision as to migration or importation of certain persons. Habeas Corpus. Bills of attainder, etc. Taxes, how apportioned. No export duty. No commercial preference. Money, how drawn from Treasury, etc. No titular nobility. Officers not to receive presents, etc.)

1. The migration or importation of such persons as any of the States now existing shall think proper to admit shall not be prohibited by the Congress prior to the year one thousand eight hundred and eight, but a tax or duty may be imposed on such importation, not exceeding ten dollars for each person.

2. The privilege of the writ of habeas corpus shall not be suspended, unless when in cases of rebellion or invasion the public safety may require it.

3. No bill of attainder or ex post facto law shall be passed.

4. No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken.

5. No tax or duty shall be laid on articles exported from any State.

6. No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another, nor shall vessels bound to or from one State be obliged to enter, clear, or pay duties in another.

7. No money shall be drawn from the Treasury but in consequence of appropriations made by law; and a regular statement and account of the receipts and expenditures of all public money shall be published from time to time.

8. No title of nobility shall be granted by the United States. And no person holding any office of profit or trust under them shall, without the consent of the Congress, accept of any present, emolument, office, or title of any kind whatever from any king, prince, or foreign state.

Section 10—(States prohibited from the exercise of certain powers.)

1. No State shall enter into any treaty, alliance, or confederation, grant letters of marque and reprisal, coin money, emit bills of credit, make anything but gold and silver coin a tender in payment of debts, pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or grant any title of nobility.

2. No State shall, without the consent of the Congress, lay any impost or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws, and the net produce of all duties and imposts, laid by any State on imports or exports, shall be for the use of the Treasury of the United States; and all such laws shall be subject to the revision and control of the Congress.

3. No State shall, without the consent of Congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into agreement or compact with another State, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will not admit of delay.

ARTICLE II.

Section 1—(President; his term of office. Electors of President; number and how appointed. Electors to vote on same day. Qualification of President. On whom his duties devolve in case of his removal, death, etc. President's compensation. His oath of office.)

1. The Executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and, together with the Vice-President, chosen for the same term, be elected as follows:

2. Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors

equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative or person holding an office of trust or profit under the United States shall be appointed an elector.

3. The electors shall meet in their respective States and vote by ballot for two persons, of whom one at least shall not be an inhabitant of the same State with themselves. And they shall make a list of all the persons voted for, and of the number of votes for each, which list they shall sign and certify and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted. The person having the greatest number of votes shall be the President, if such number be a majority of the whole number of electors appointed, and if there be more than one who have such a majority, and have an equal number of votes, then the House of Representatives shall immediately choose by ballot one of them for President; and if no person have a majority, then from the five highest on the list the said House shall in like manner choose the President. But in choosing the President, the vote shall be taken by States, the representation from each State having one vote. A quorum, for this purpose, shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. In every case, after the choice of the President, the person having the greatest number of votes of the electors shall be the Vice President. But if there should remain two or more who have equal votes, the Senate shall choose from them by ballot the Vice President.*

4. The Congress may determine the time of choosing the electors and the day on which they shall give their votes, which day shall be the same throughout the United States.

5. No person except a natural born citizen, or a citizen of the United States, at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years and been fourteen years a resident within the United States.

6. In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice President, and the Congress may by law provide for the case of removal, death, resignation, or inability, both of the President and Vice President, declaring what officer shall then act as President, and such officer shall act accordingly until the disability be removed or a President shall be elected.

7. The President shall, at stated times, receive for his services a compensation which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States, or any of them.

8. Before he enter on the execution of his office he shall take the following oath or affirmation:

"I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States, and will, to the best of my ability, preserve, protect, and defend the Constitution of the United States."

Section 2—(President to be Commander-in-Chief. He may require opinions of Cabinet Officers, etc., may pardon. Treaty-making power. Nomination of certain officers. When President may fill vacancies.)

1. The President shall be Commander-in-Chief of the Army and Navy of the United States, and of the militia of the several States when called into the actual service of the United States; he may require the opinion, in writing, of the principal officer in each of the executive departments upon any subject relating to the duties of their respective offices, and he shall have power to grant reprieves and pardons for offences against the United States except in cases of impeachment.

2. He shall have power, by and with the advice and consent of the Senate to make treaties, provided two-thirds of the Senators present concur; and he shall nominate and by and with the advice and consent of the Senate shall appoint ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers of the United States whose appointments are not herein otherwise provided for, and which shall be established by law: but the Congress may by law vest the appointment of such inferior officers as they think proper in the President alone, in the courts of law, or in the heads of departments.

3. The President shall have power to fill up all vacancies they may happen during the recess of the Senate by granting commissions, which shall expire at the end of their next session.

Section 3—(President shall communicate to Congress. He may convene and adjourn Congress, in case of disagreement, etc. Shall receive Ambassadors, execute laws, and commission officers.)

He shall from time to time give to the Congress information of the state of the Union, and recommend to their consideration such measures as he shall judge necessary and expedient; he may, on extraordinary occasions, convene both Houses, or either of them, and in case of disagreement between them with respect to the time of adjournment, he may adjourn them to such time as he shall think proper; he shall receive ambassadors and other public ministers; he shall take care that the laws be faithfully executed, and shall commission all the officers of the United States.

Section 4—(All civil offices forfeited for certain crimes.)

The President, Vice-President, and all civil officers of the United States shall be removed from office on impeachment for and conviction of treason, bribery or other high crimes and misdemeanors.

ARTICLE III.

Section 1—(Judicial powers. Tenure. Compensation.)

The judicial power of the United States shall be vested in one Supreme Court, and in such inferior courts as the Congress may from time to time ordain and establish. The judges, both of the Supreme and inferior courts, shall hold their offices during good behavior, and shall at stated times receive for their services a compensation which shall not be diminished during their continuance in office.

Section 2—(Judicial power; to what cases it extends. Original jurisdiction of Supreme Court. Appellate. Trial by jury, etc. Trial, where.)

1. The judicial power shall extend to all cases in law and equity arising under this Constitution, the laws of the United States, and treaties made, or which shall be made, under their authority; to all cases affecting ambassadors, other public ministers and consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the United States shall be a party; to controversies between two or more States, between a State and citizens of another State, between citizens of different States, between citizens of the same State claiming lands under grants of different States, and between a State, or the citizens thereof, and foreign states, citizens, or subjects.

2. In all cases affecting ambassadors, other public ministers, and consuls, and those in which a State shall be party, the Supreme Court shall have original jurisdiction. In all the other cases before mentioned the Supreme Court shall have appellate jurisdiction both as to law and fact, with such exceptions and under such regulations as the Congress shall make.

3. The trial of all crimes, except in cases of impeachment, shall be by jury, and such trial shall be held in the State where the said crimes shall have been committed; but when not committed within any State the trial shall be at such place or places as the Congress may by law have directed.

Section 3—(Treason defined. Proof of. Punishment of.)

1. Treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act, or on confession in open court.

2. The Congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood or forfeiture except during the life of the person attained.

ARTICLE IV.

Section 1—(Each State to give credit to the public acts, etc., of every other State.)

Full faith and credit shall be given in each State to the public acts, records, and judicial proceedings of every other State. And the Congress may by general laws prescribe the manner in which such acts, records, and proceedings shall be proved, and the effect thereof.

Section 2—(Privileges of citizens of each State. Fugitives from justice to be delivered up. Persons held to service having escaped, to be delivered up.)

1. The citizens of each State shall be entitled to all privileges and immunities of citizens in the several States.

2. A person charged in any State with treason, felony, or other crime, who shall flee from justice, and be found in another State, shall, on demand of the

*This clause is superseded by Article XII., Amendments.

Executive authority of the State from which he fled, be delivered up, to be removed to the State having jurisdiction of the crime.

3. No person held to service or labor in one State, under the laws thereof, escaping into another shall in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

Section 3—(Admission of new States. Power of Congress over territory and other property.)

1. New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the jurisdiction of any other State, nor any State be formed by the junction of two or more States, or parts of States, without the consent of the Legislatures of the States concerned, as well as of the Congress.

2. The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular State.

Section 4—(Republican form of government guaranteed. Each State to be protected.)

The United States shall guarantee to every State in this Union a Republican form of government, and shall protect each of them against invasion, and, on application of the Legislature, or of the Executive (when the Legislature cannot be convened), against domestic violence.

ARTICLE V.

(Constitution; how amended. Proviso.)

The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution, or, on the application of the Legislatures of two-thirds of the several States, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes, as part of this Constitution, when ratified by the Legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, as the one or the other mode of ratification may be proposed by the Congress; provided that no amendment which may be made prior to the year one thousand eight hundred and eight shall in any manner affect the first and fourth clauses in the Ninth Section of the First Article; and that no State, without its consent, shall be deprived of its equal suffrage in the Senate.

ARTICLE VI.

(Certain debts, etc., declared valid. Supremacy of Constitution, treaties, and laws of the United States. Oath to support Constitution, by whom taken. No religious test.)

1. All debts contracted and engagements entered into before the adoption of this Constitution shall be as valid against the United States under this Constitution as under the Confederation.

2. This Constitution and the laws of the United States which shall be made in pursuance thereof and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land, and the judges in every State shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding.

3. The Senators and Representatives before mentioned, and the members of the several State Legislatures, and all executive and judicial officers, both of the United States and of the several States, shall be bound by oath or affirmation to support this Constitution; but no religious test shall ever be required as a qualification to any office or public trust under the United States.

ARTICLE VII.

(What ratification shall establish Constitution.)

The ratification of the Conventions of nine States shall be sufficient for the establishment of this Constitution between the States so ratifying the same.

AMENDMENTS TO THE CONSTITUTION OF THE UNITED STATES.

Opposition in and out of Congress to the Constitution, in that it was not sufficiently explicit as to individual and State rights, led to an agreement to submit to the people immediately after the adoption of the Constitution a number of safeguarding amendments.

And so it was that the First Congress, at its first session, at the City of New York, Sept. 25, 1789, adopted and submitted to the States twelve proposed amendments—A Bill of Rights as it was then and ever since has been popularly called. Ten of these amendments (now commonly known as one to ten inclusive, but in reality three to twelve inclusive) were ratified by the States as follows—New Jersey, Nov. 20, 1789; Maryland, Dec. 19, 1789; North Carolina, Dec. 22, 1789; South Carolina, Jan. 19, 1790; New Hampshire, Jan. 25, 1790; Delaware, Jan. 28, 1790; Pennsylvania, March 10, 1790; New York, March 27, 1790; Rhode Island, June 15, 1790; Vermont, Nov. 3, 1791; Virginia, Dec. 15, 1791. No ratification by Connecticut, Georgia or Massachusetts is on record. These original ten ratified amendments appear in order below as Articles I. to X. inclusive.

The two of the original proposed amendments which were not ratified by the necessary number of States related, the first to apportionment of Representatives; the second, to compensation of members of Congress.

TITLES OF NOBILITY.

Congress, May 1, 1810, proposed to the States the following Amendment to the Constitution:

"If any citizen of the United States shall accept, claim, receive, or retain any title of nobility or honor, or shall, without the consent of Congress, accept and retain any present, pension, office, or emolument of any kind whatever, from any emperor, king, prince or foreign power, such person shall cease to be a citizen of the United States and shall be incapable of holding any office of trust or profit under them or either of them."

It was ratified by Maryland, Dec. 25, 1810; Kentucky, Jan. 31, 1811; Ohio, Jan. 31, 1811; Delaware, Feb. 2, 1811; Pennsylvania, Feb. 6, 1811; New Jersey, Feb. 13, 1811; Vermont, Oct. 24, 1811; Tennessee, Nov. 21, 1811; Georgia, Dec. 13, 1811; North Carolina, Dec. 23, 1811; Massachusetts, Feb. 27, 1812; New Hampshire, Dec. 10, 1812.

Rejected by New York (Senate), March 12, 1811; Connecticut, May session, 1813; South Carolina, approved by Senate Nov. 28, 1811, reported unfavorably in House and not further considered Dec. 7, 1813; Rhode Island, Sept. 15, 1814.

The amendment failed, not having sufficient ratifications.

AMENDMENT TO PROHIBIT THE CONSTITUTION FROM ABOLISHING OR INTERFERING WITH SLAVERY.

(The Corwin Amendment.)

Congress, March 2, 1861, proposed to the States the following Amendment to the Constitution:

"No amendment shall be made to the Constitution which will authorize or give to Congress the power to abolish or interfere, within any State, with the domestic institutions thereof, including that of persons held to labor or service by the laws of said State."

Ratified by Ohio, March 13, 1861; Maryland, Jan. 10, 1862; Illinois (convention), Feb. 14, 1862. The amendment failed, for lack of a sufficient number of ratifications.

THE TEN ORIGINAL AMENDMENTS.

(They were declared in force December 15, 1791.)

ARTICLE I.

Religious Establishment Prohibited Freedom of Speech, of the Press, and Right to Petition.

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech or of the press; or the right of the people peaceably to assemble and to petition the Government for a redress of grievances.

ARTICLE II.

Right to Keep and Bear Arms.

A well-regulated militia being necessary to the security of a free State, the right of the people to keep and bear arms shall not be infringed.

ARTICLE III.

No Soldier to Be Quartered in Any House, Unless, Etc.

No soldier shall, in time of peace, be quartered in any house without the consent of the owner, nor in time of war but in a manner to be prescribed by law.

ARTICLE IV.

Right of Search and Seizure Regulated.

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

ARTICLE V.
Provisions Concerning Prosecution, Trial and Punishment.—Private Property Not to Be Taken for Public Use, Without Compensation.

No person shall be held to answer for a capital or other infamous crime unless on a presentment or indictment of a Grand Jury, except in cases arising in the land or naval forces, or in the militia, when in actual service, in time of war or public danger; nor shall any person be subject for the same offense to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use without just compensation.

ARTICLE VI.
Right to Speedy Trial, Witnesses, Etc.

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which districts shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defense.

ARTICLE VII.
Right of Trial by Jury.

In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury shall be otherwise re-examined in any court of the United States than according to the rules of the common law.

ARTICLE VIII.
Excessive Bail or Fines and Cruel Punishment Prohibited.

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

ARTICLE IX.
Rule of Construction of Constitution.

The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people.

ARTICLE X.
Rights of States Under Constitution.

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

ARTICLE XI.
Judicial Powers Construed.

The following amendment was proposed to the Legislatures of the several States by the Third Congress on the 5th of March, 1794, and was declared to have been ratified in a message from the President to Congress, dated Jan. 8, 1798.

The judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States, by citizens of another State, or by citizens or subjects of any foreign state.

ARTICLE XII.
Manner of Choosing President and Vice-President.

The following amendment was proposed to the Legislatures of the several States by the Eighth Congress on the 12th of December, 1803, and was declared to have been ratified in a proclamation by the Secretary of State, dated September 25, 1804. It was ratified by all the States except Connecticut, Delaware, Massachusetts, and New Hampshire.

The Electors shall meet in their respective States, and vote by ballot for President and Vice-President, one of whom at least shall not be an inhabitant of the same State with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President; and they shall make distinct list of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which list they shall sign and certify, and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate; the President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates and the votes shall then be counted; the person having the greatest number of votes for President shall be the President, if such number be a majority of the whole number of Electors appointed; and if no person have such majority, then from the persons having the highest number, not exceeding three, on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President, the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. And if the House of Representatives shall not choose a President, whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in the case of the death or other constitutional disability of the President. The person having the greatest number of votes as Vice-President shall be the Vice-President if such number be a majority of the whole number of Electors appointed, and if no person have a majority, then from the two highest numbers on the list the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the United States.

ARTICLE XIII.
Slavery Abolished.

The following amendment was proposed to the Legislatures of the several States by the Thirty-eighth Congress on the 1st of February, 1865, and was declared to have been ratified in a proclamation by the Secretary of State dated December 18, 1865. It was rejected by Delaware and Kentucky: was conditionally ratified by Alabama and Mississippi: and Texas took no action.

1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

2. Congress shall have power to enforce this article by appropriate legislation.

ARTICLE XIV.
Citizenship Rights Not to Be Abridged.

The following, popularly known as the Reconstruction Amendment, was proposed to the Legislatures of the several States by the Thirty-ninth Congress on the 16th of June, 1866, and was declared to have been ratified in a proclamation by the Secretary of State, dated July 28, 1868. The amendment got the support of 23 Northern States: it was rejected by Delaware, Kentucky, Maryland, and 10 Southern States. California took no action. Subsequently it was ratified by the 10 Southern States.

1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.

Apportionment of Representatives in Congress.

2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State excluding Indians not taxed. But when the right to vote at any election for the choice of Electors for President and Vice-President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male inhabitants of such State, being twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion, or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

Power of Congress to Remove Disabilities of United States Officials for Rebellion.

3. No person shall be a Senator or Representative in Congress, or Elector of President and Vice-President or holding any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State Legislature or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid and comfort to the enemies thereof. But Congress may, by a vote of two-thirds of each House, remove such disability.

What Public Debts Are Valid.

4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection and rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or eman-

cipation of any slave; but all such debts, obligations, and claims shall be held illegal and void.

5. The Congress shall have power to enforce by appropriate legislation the provisions of this article.

ARTICLE XV.
Equal Rights for White and Colored Citizens.

The following amendment was proposed to the Legislatures of the several States by the Fortieth Congress on the 27th of February, 1869, and was declared to have been ratified in a proclamation by the Secretary of State, dated March 30, 1870. It was not acted on by Tennessee; it was rejected by California, Delaware, Kentucky, Maryland, and Oregon; ratified by the remaining 30 States. New York rescinded its ratification January 5, 1870. New Jersey rejected it in 1870, but ratified it in 1871.

1. The right of the citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

2. The Congress shall have power to enforce the provisions of this article by appropriate legislation.

ARTICLE XVI.
Income Taxes Authorized.

The following amendment was proposed to the Legislatures of the several States by the Sixty-first Congress on the 12th day of July, 1909, and was declared to have been ratified in a proclamation by the Secretary of State, dated February 25, 1913. The income tax amendment was ratified by all the States except Connecticut, Florida, Pennsylvania, Rhode Island, Utah, and Virginia.

The Congress shall have power to lay and collect taxes on incomes, from whatever sources derived, without apportionment among the several States, and without regard to any census or enumeration.

ARTICLE XVII.
United States Senators to Be Elected by Direct Popular Vote.

The following amendment was proposed to the Legislatures of the several States by the Sixty-second Congress on the 16th day of May, 1912, and was declared to have been ratified in a proclamation by the Secretary of State, dated May 31, 1913. It got the vote of all the States except Alabama, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Rhode Island, South Carolina, Utah, and Virginia.

1. The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislatures.

Vacancies in Senatorships, When Governor May Fill by Appointment.

2. When vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies: Provided, That the Legislature of any State may empower the Executive thereof to make temporary appointment until the people fill the vacancies by election as the Legislature may direct.

3. This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution.

ARTICLE XVIII.
Liquor Prohibition Amendment.

The following amendment was proposed to the Legislatures of the several States by the Sixty-fifth Congress, December 18, 1917; and on January 29, 1919, the United States Secretary of State proclaimed its adoption by 36 States, and declared it in effect on January 16, 1920.

The amendment ultimately was adopted by all the States except Connecticut and Rhode Is and. New Jersey ratified on March 10, 1922.

Enforcement of the National Prohibition Act was in effect at 12 P. M., January 16, 1920, except as to certain sections of Title II. wherein other dates were specified.

Early in 1920, the validity of the Eighteenth Amendment was upheld by the Supreme Court of the United States, in suits to void, brought by the States of Rhode Island and New Jersey, and by various brewers and distillers.

1. After one year from the ratification of this article the manufacture, sale, or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

2. The Congress and the several States shall have concurrent power to enforce this article by appropriate legislation.

3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the Legislatures of the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.

ARTICLE XIX.
Giving Nation-Wide Suffrage to Women.

The following amendment was proposed to the Legislatures of the several States by the Sixty-fifth Congress, having been adopted by the House of Representatives, May 21, 1919, and by the Senate, June 4, 1919. On August 26, 1920, the United States Secretary of State proclaimed it in effect, having been adopted (June 10, 1919–August 18, 1920) by three-quarters of the States. The Tennessee House, August 31, rescinded its ratification, 47 to 24.

1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex.

2. Congress shall have power, by appropriate legislation, to enforce the provisions of this article.

THE PROPOSED ARTICLE XX.
Federal Regulation of Child Labor.

The following amendment was proposed to the Legislatures of the several States by the Sixty-eighth Congress, having been adopted as a joint resolution by the House of Representatives (297 to 69) on April 26, 1924, and by the Senate (61 to 25) on June 2, 1924.

Section 1—The Congress shall have power to limit, regulate, and prohibit the labor of persons under eighteen years of age.

Section 2—The power of the several States is unimpaired by this article except that the operation of State laws shall be suspended to the extent necessary to give effect to legislation enacted by the Congress.

Five states have adopted the Amendment—Arizona, Arkansas, California, Montana, and Wisconsin.

Six states have taken no definite action—Alabama, Illinois, Mississippi, New Jersey, New York, and Rhode Island.

It has been ratified by one House of the Legislature in New Mexico, and Nevada.

It has been rejected by both Houses, in Connecticut, Delaware, Florida, Georgia, Indiana, Kansas, Kentucky, Maine, Maryland, Massachusetts, Minnesota, Missouri, New Hampshire, North Carolina, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia.

The amendment was rejected by one House in Idaho, Louisiana, Michigan, Nebraska, North Dakota, Ohio, Oklahoma, Oregon, and Wyoming.

A vote was indefinitely postponed by one House, in Colorado and Iowa.

THE OATH OF A PRESIDENT.

The Constitution of the United States (Article II, Section 1, paragraph 8) directs that the President, before he enters on the execution of his office, shall take the following oath or affirmation:

"I do solemnly swear (or affirm) that I will faithfully execute the office of president of the United States, and will, to the best of my ability, *preserve, protect,* and *defend* the Constitution of the United States."

Chief Justice Taft, in administering the oath to president-elect Herbert Hoover, on the Capitol portico, on March 4, 1929, used the words "*preserve, maintain,* and *defend.*"

When his attention was called, by letter, to the lapse, by Miss Helen Terwilliger, 13, of Walden, N. Y., Mr. Taft wrote to her saying his memory was that he had said "*preserve, maintain,* and *protect.*"

But when the Pathe and Paramount sound news reels of the inauguration were run off, before newspaper men, at New York City, they proved that Miss Terwilliger was right, and that the Chief Justice's recollection was at fault.

The validity of the oath was not interfered with by substitution of "maintain" for "protect," Mr. Taft assured the Walden girl. He told her that when he was sworn in as president, in the Senate Chamber, Chief Justice Fuller made a similar slip.

It is asserted that when Vice-President Curtis administered the oath to Senators he inadvertantly substituted "without mental *obligation*" for "without mental *reservations.*"

Declaration of Independence.

(Unanimously adopted, July 4, 1776; signed by 54 delegates, Aug. 2, 1776; by Thos. McKean, Del., in Oct., and by Matthew Thornton, N. Hamp., in Nov. of that year.)

When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security. Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.

He has forbidden his Governors to pass Laws of immediate and pressing importance, unless suspended in their operation till his Assent should be obtained, and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other Laws for the accommodation of large districts of people, unless those people would relinquish the right of Representation in the Legislature, a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their public Records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the Legislative powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the meantime exposed to all the dangers of invasion from without, and convulsions within.

He has endeavoured to prevent the population of these States; for that purpose obstructing the Laws for Naturalization of Foreigners; refusing to pass others to encourage their migration hither, and raising the conditions of new Appropriations of Lands.

He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary powers.

He has made Judges dependent on his Will alone, for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of New Offices, and sent hither swarms of Officers to harass our people, and eat out their substance.

He has kept among us, in times of peace, Standing Armies, without the Consent of our legislature.

He has affected to render the Military independent of and superior to the Civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitution and unacknowledged by our laws; giving his Assent to their Acts of pretended Legislation: For quartering large bodies of armed troops among us: For protecting them by a mock Trial from punishment for any Murders which they should commit on the Inhabitants of these States: For cutting off our Trade with all parts of the world: For imposing Taxes on us without our Consent: For depriving us in many cases of the benefits of Trial by Jury: For transporting us beyond Seas to be tried for pretended offences: For abolishing the free System of English Laws in a neighbouring Province, establishing therein an Arbitrary government, and enlarging its Boundaries so as to render it at once an example and fit instrument for introducing the same absolute rule into these Colonies: For taking away our Charters, abolishing our most valuable Laws and altering fundamentally the Forms of our Governments: For suspending our own Legislatures, and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated Government here by declaring us out of his Protection and waging War against us.

He has plundered our seas, ravaged our Coasts, burnt our towns, and destroyed the lives of our people.

He is at this time transporting large Armies of foreign Mercenaries to complete the works of death, desolation and tyranny, already begun with circumstances of cruelty and perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the Head of a civilized nation.

He has constrained our fellow Citizens taken Captive on the high Seas to bear Arms against their Country, to become the executioners of their friends and Brethren, or to fall themselves by their Hands.

He has excited domestic insurrections amongst us, and has endeavoured to bring on the inhabitants of our frontiers, the merciless Indian Savages, whose known rule of warfare is an undistinguished destruction of all ages, sexes and conditions. In every stage of these Oppressions We have Petitioned for Redress in the most humble terms. Our repeated Petitions have been answered by repeated injury. A Prince, whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free people. Nor have We been wanting in attentions to our British brethren. We have warned them from time to time of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity, which denounces our Separation, and hold them, as we hold the rest of mankind, Enemies in War, in Peace Friends.

WE THEREFORE, the Representatives of the United States of America, in General Congress, Assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the Name, and by authority of the good People of these Colonies, solemnly publish and declare, That these United Colonies are, and of Right ought to be Free and Independent States; that they are Absolved from all Allegiance to the British Crown, and that all political connection between them and the State of Great Britain is and ought to be totally dissolved; and that as Free and Independent States, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which Independent States may of right do. And for the support of this Declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our Lives, our Fortunes, and our sacred Honor.

SIGNERS OF THE DECLARATION OF INDEPENDENCE.

(Compiled by Simon Newton, Detroit.)

The oldest signer when the signatures were affixed was Benjamin Franklin, the next oldest was Stephen Hopkins.

The first of the signers to die was John Morton; the second was Button Gwinnett.

The earliest known attempt in the American colonies of a declaration of independence was at a town meeting at Mendon, Mass., in 1773.

There was also the Mecklenburg, N. C., declaration for independence, May 31, 1775.

The date in the above table given as that of the birth of Button Gwinnett is the date of his baptism, as recorded in the parish register at Down Hatherly, Gloucestershire, England, where the Georgia signer was born. It was customary in those days to baptize within ten days of birth.

A signature of Button Gwinnett, attached to a will as a witness, the document having been filed in Georgia, was sold at auction at New York City in April, 1926, for $22,500. Gwinnett was killed in a duel.

A letter of the Marine Committee at Philadelphia, July 12, 1776, containing the signatures of Robert Morris, Button Gwinnett, Francis Lewis, George Read, and Arthur Middleton, was sold for $51,000 on March 15, 1927. Another Gwinnett signature sold for $28,500, in Nov., 1926 and still another for $18,600 on Nov. 4, 1927, at N. Y. City.

An autograph of Thomas Lynch, Jr., a signer, was sold at N. Y. City in 1929 for $9,500. It was signed on Aug. 22, 1775, and was on a receipt for £50, in payment by South Carolina for one of Lynch's father's slaves who had been executed.

It was to this Declaration that John Hancock of Massachusetts was the first to affix his signature, saying, according to some historians: "I write so that George the Third may read without his spectacles."

And Benjamin Franklin is said to have remarked: "If we don't hang together, we'll all hang separately."

The signers and their families were proscribed as traitors by the British Government, and rewards fo £500 were offered for their apprehension.

DUTIES OF THE SECRETARY OF STATE OF THE UNITED STATES.

The Secretary of State is charged, under the direction of the President, with the duties appertaining to correspondence with the public ministers and the consuls of the United States and with the representatives of foreign powers accredited to the United States, and to negotiations of whatever character relating to the foreign affairs of the United States.

He is also the medium of correspondence between the President and the chief executives of the several States of the United States; he has the custody of the great seal of the United States, and countersigns and affixes such seal to all Executives proclamations, to various commissions, and to warrants for the extradition of fugitives from justice.

He is regarded as the first in rank among the members of the Cabinet.

He is also the custodian of the treaties made with foreign States, and of the laws of the United States.

He grants and issues passports, and exequaturs to foreign consuls in the United States are issued through his office.

He publishes the laws and resolutions of Congress, amendments to the Constitution, and proclamations declaring the admission of new States into the Union.

THE MONROE DOCTRINE.

The Secretary of State of the United States, Charles E. Hughes, in an address delivered before the American Bar Association at Minneapolis, Minn., Aug. 30, 1923, restated the genesis and scope of the Monroe Doctrine as it stands to-day. The Secretary's main points were:

The people of the United States had watched with deep sympathy the long struggle of our Southern neighbors for independence. The Republic of Colombia was recognized in 1822, the Government of Buenos Aires and the States of Mexico and Chile, early in 1823. Deeply interested as we were in the development of republican institutions, the United States did not hesitate because of the political form of government and was the first to recognize the independent Empire of Brazil in May, 1824, and this was followed by the recognition of the Federation of Central American States in August of that year.

The Holy Alliance formed by the sovereigns of Austria, Russia, and Prussia had sought to enforce the divine right of kings against the progress of liberal principles. Joined by France, they undertook "to put an end to the system of representative government" and after Ferdinand VII had been restored to Spain, the overthrowing of the new governments erected out of the old colonies of Spain in the Americas was proposed. In August, 1823, George Canning, British Foreign Secretary, wrote Richard Rush, American Minister in London, suggesting a joint declaration, in substance, that the recovery of the colonies by Spain was hopeless; that neither Great Britain nor the United States was aiming at the possession of any portion of these colonies; and that they could not see with indifference any portion of them transferred to any other power. Correspondence followed between President Monroe and Jefferson and Madison, whose advice he sought. It was after mature deliberation by the President and his Cabinet, which contained not only John Quincy Adams, Secretary of State, but John C. Calhoun and William Wirt, that the American position was formulated in President Monroe's message of December 2, 1823.

The Russian Emperor had issued a ukase in 1821 prohibiting citizens of other nations from navigating and fishing within 100 Italian miles of the northwest coast of North America from Bering Straits to the fifty-first parallel of north latitude. Protests had followed. In July, 1823, Secretary Adams informed the Russian Minister that the United States "should contest the right of Russia to any territorial establishment on this continent, and that we should assume distinctly the principle that the American continents are no longer subjects for any new European colonial establishments." It was in connection with this pretension of Russia that President Monroe, declared in his message:

"In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been judged proper for asserting as a principle, in which the rights and interests of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintained are henceforth not to be considered as subjects for future colonization by any European powers."

The other paragraph of President Monroe's message concerned our neighbors to the south, as follows:

"In the wars of the European powers in matters relating to themselves we have never taken any part, nor does it comport with our policy so to do. It is only when our rights are involved or seriously menaced that we resent injuries or make preparation for our defense. With the movements in this hemisphere we are, of necessity, more intimately connected, and by causes which must be obvious to all enlightened and impartial observers. The political system of the allied powers is essentially different in this respect from that of America. * * *

"We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the governments who have declared their independence and have maintained it and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny, by any European power, in any other light than as the manifestation of an unfriendly disposition toward the United States."

Properly understood, it is opposed (1) to any non-American action encroaching upon the political independence of American States under any guise and (2) to the acquisition in any manner of the control of additional territory in this hemisphere by any non-American power.

The Monroe Doctrine is not a legislative pronouncement; it has been approved by action of Congress, but it does not rest upon any Congressional sanction. It has had the implied indorsement of the treaty-making power in the reservations to the two Hague conventions of 1899 and 1907, but it is not defined by treaty and does not draw its force from any international agreement. It is not like a constitutional provision deriving its authority from the fact that it is a part of the organic law transcending and limiting executive and legislative power. It is not a part of international law, maintained by the consent of the civilized powers and alterable only at their will. It is a policy declared by the Executive of the United States and repeated in one form or another by Presidents and Secretaries of State in the conduct of our foreign relations. Its significance lies in the fact that in its essentials, as set forth by President Monroe and as forcibly and repeatedly, asserted by our responsible statesmen, it has been for 100 years, and continues to be, an integral part of our national thought and purpose, expressing a profound conviction which even the upheaval caused by the Great War, and our participation in that struggle upon European soil, has not uprooted or fundamentally changed.

The Monroe Doctrine is not a policy of aggression; it is a policy of self-defense. It was asserted at a time when the danger of foreign aggression in this hemisphere was very real, when the new American States had not yet established a firm basis of independent national life, and we were menaced by threats of old world powers directed against republican institutions. It still remains an assertion of the principle of national security.

As the policy embodied in the Monroe Doctrine is distinctively the policy of the United States, the Government of the United States reserves to itself its definition, interpretation and application. This Government has not been disposed to enter into engagements which would have the effect of submitting to any other power or to any concert of powers the determination either of the occasions upon which the principles of the Monroe Doctrine shall be invoked or of the measures that shall be taken in giving it effect. As President Wilson observed: "The Monroe Doctrine was proclaimed by the United States on her own authority. It always has been maintained and always will be maintained upon her own responsibility."

The policy of the Monroe Doctrine does not infringe upon the independence and sovereignty of other American States. Misconception upon this point is the only disturbing influence in our relations with Latin American States. The declaration of our purpose to oppose what is inimical to our safety does not imply an attempt to establish a protectorate any more than a similar assertion by any one of the great southern republics of opposition to conduct on the part of any of the others endangering its security would aim at the establishment of a protectorate.

We utterly disclaim as unwarranted the observations which occasionally have been made implying a claim on our part to superintend the affairs of our sister republics, to assert an overlordship, to consider the spread of our authority beyond our own domain as the aim of our policy and to make our power the test of right in this hemisphere.

Such assertions do not express our national purpose; they belie our sincere friendship; they are false to the fundamental principles of our institutions and of our foreign policy which has sought to reflect with rare exceptions, the ideals of liberty; they menace us by stimulating a distrust which has no real foundation. They find no sanction whatever in the Monroe Doctrine. There is room in this hemisphere, without danger of collision, for the complete recognition of that doctrine and the independent sovereignty of the Latin-American republics.

We have grown rich and powerful, but we have not outgrown the necessity, in justice to ourselves and without injustice to others, of safeguarding our future peace and security.

So far as the region of the Caribbean Sea is concerned it may be said that if we had no Monroe Doctrine we should have to create one. * * * The United States has rights and obligations which that doctrine does not define. And in the unsettled condition of certain countries in the region of the Caribbean it has been necessary to assert these rights and obligations as well as the limited principles of the Monroe Doctrine. * * *

The disturbed conditions and revolutionary tendencies in some of the Central American republics have given great solicitude to the Government of the United States, and its efforts have been directed to the promotion of tranquillity and stability. This is in the interest of the maintenance of the unimpaired integrity and sovereignty of these republics.

BRIEF BIOGRAPHIES OF THE PRESIDENTS.

No.	Name.	Politics.	Native State.	Born.	Inaug.	Age at Inaug.	Time of Death.	Age at Death.
1.	George Washington	Fed.	Va.	1732, Feb. 22	1789	57	1799, Dec. 14	67
2.	John Adams	Fed.	Mass.	1735, Oct. 30	1797	61	1826, July 4	90
3.	Thomas Jefferson	Rep.	Va.	1743, April 13	1801	57	1826, July 4	83
4.	James Madison	Rep.	Va.	1751, March 16	1809	57	1836, June 28	85
5.	James Monroe	Rep.	Va.	1758, April 28	1817	58	1831, July 4	73
6.	John Quincy Adams	Rep.	Mass.	1767, July 11	1825	57	1848, Feb. 23	80
7.	Andrew Jackson	Dem.	N. C.	1767, March 15	1829	61	1845, June 8	78
8.	Martin Van Buren	Dem.	N. Y.	1782, Dec. 5	1837	54	1862, July 24	79
9.	William Henry Harrison	Whig.	Va.	1773, Feb. 9	1841	68	1841, April 4	68
10.	John Tyler	Dem.	Va.	1790, March 29	1841	51	1862, Jan. 17	71
11.	James Knox Polk	Dem.	N. C.	1795, Nov. 2	1845	49	1849, June 15	53
12.	Zachary Taylor	Whig.	Va.	1784, Nov. 24	1849	64	1850, July 9	65
13.	Millard Fillmore	Whig.	N. Y.	1800, Jan. 7	1850	50	1874, March 8	74
14.	Franklin Pierce	Dem.	N. H.	1804, Nov. 23	1853	48	1869, Oct. 8	64
15.	James Buchanan	Dem.	Pa.	1791, April 23	1857	65	1868, June 1	77
16.	Abraham Lincoln	Rep.	Ky.	1809, Feb. 12	1861	52	1865, April 15	56
17.	Andrew Johnson	Rep.	N. C.	1808, Dec. 29	1865	56	1875, July 31	66
18.	Ulysses Simpson Grant	Rep.	Ohio.	1822, April 27	1869	46	1885, July 23	63
19.	Rutherford Birchard Hayes	Rep.	Ohio.	1822, Oct. 4	1877	54	1893, Jan. 17	70
20.	James Abram Garfield	Rep.	Ohio.	1831, Nov. 19	1881	49	1881, Sept. 19	49
21.	Chester Alan Arthur	Rep.	Vt.	1830, Oct. 5	1881	50	1886, Nov. 18	56
22.	Grover Cleveland	Dem.	N. J.	1837, March 18	1885	47	1908, June 24	71
23.	Benjamin Harrison	Rep.	Ohio.	1833, Aug. 20	1889	55	1901, March 13	67
24.	Grover Cleveland	Dem.	N. J.	1837, March 18	1893	55	1908, June 24	71
25.	William McKinley	Rep.	Ohio.	1843, Jan. 29	1897	54	1901, Sept. 14	58
26.	Theodore Roosevelt	Rep.	N. Y.	1858, Oct. 27	1901	42	1919, Jan. 6	61
27.	William Howard Taft	Rep.	Ohio.	1857, Sept. 15	1909	51	.....	..
28.	Woodrow Wilson	Dem.	Va.	1856, Dec. 28	1913	56	1924, Feb. 3	67
29.	Warren Gamaliel Harding	Rep.	Ohio.	1865, Nov. 2	1921	55	1923, Aug. 2	58
30.	Calvin Coolidge	Rep.	Vt.	1872, July 4	1923	51	.....	..
31.	Herbert Clark Hoover	Rep.	Iowa.	1874, Aug. 10	1929	54	.....	..

Grant's baptismal Christian name was Hiram Ulysses; Cleveland's was Stephen Grover; Wilson's was Thomas Woodrow; Coolidge's was John Calvin.

RELIGIOUS AFFILIATIONS.

Friends (Quakers)—Hoover.
Episcopalians—Washington, Madison, Monroe, Gen. W. H. Harrison, Tyler, Taylor, Pierce, Arthur.
Presbyterians—Jackson, Polk, Buchanan, Cleveland, Benj. Harrison, Wilson.
Methodists—Johnson, Grant, Hayes, McKinley.
Unitarian—John Adams, J. Q. Adams, Fillmore, Taft.
Reformed Dutch—Van Buren, Roosevelt.
Baptist—Harding. *Congregationalist*—Coolidge.
Disciples—Garfield.
Jefferson and Lincoln did not claim membership in any denomination.

ANCESTRY.

Swiss—Hoover.
English—Washington, J. Adams, Madison, J. Q. Adams, W. H. Harrison, Tyler, Taylor, Fillmore, Pierce, Lincoln, Johnson, Grant, Garfield, Cleveland, B. Harrison, Taft, Harding. Coolidge.
Welsh—Jefferson.
Scotch—Monroe, Hayes. *Scotch-Irish*—Jackson, Polk, Buchanan, Arthur, McKinley, Wilson.
Dutch—Van Buren, Roosevelt.
The following Presidents were lawyers—J. Adams, Jefferson, Madison, Monroe, J. Q. Adams, Jackson, Van Buren, Tyler, Polk, Pierce, Buchanan, Lincoln, Hayes, Garfield, Cleveland, B. Harrison, McKinley, Taft, Wilson, Coolidge.
Washington was a planter and surveyor; Fillmore and Johnson were tailors; Hoover was a mining engineer.

PRESIDENTS OF THE CONTINENTAL CONGRESS.

The Continental Congress was in session at intervals from Sept. 5, 1774, to Oct. 21, 1788, at Philadelphia, Baltimore, Lancaster, Pa., York, Pa., Princeton, N. J., Annapolis, Md., Trenton, N. J., and New York City.
The Presidents of that Congress, with the dates of their election, were—(1) Peyton Randolph, Va., Sept. 5, 1774; (2) Henry Middleton, S. C., Oct. 22, 1774; (3) Peyton Randolph, Va., May 10, 1775; (4) John Hancock, Mass., May 24, 1775; (5) Henry Laurens, S. C., Nov. 1, 1777; (6) John Jay, N. Y., Dec. 10, 1778; (7) Samuel Huntington, Conn., Sept. 28, 1779; (8) Thomas McKean, Del., July 10, 1781; (9) John Hanson, Md., Nov. 5, 1781; (10) Elias Boudinot, N. J., Nov. 4, 1782; (11) Thomas Mifflin, Nov. 3, 1783; (12) R. H. Lee, Va., Nov. 30, 1784; (13) John Hancock, Mass., Nov. 23, 1785 (sick and did not serve); (14) Nathaniel Gorham, Mass., June 6, 1786; (15) Arthur St. Clair, Pa., Feb. 2, 1787; (16) Cyrus Griffin, Va., Jan. 22, 1788.

THE WIVES OF THE PRESIDENTS.

President.	Wife's Name.	Native State.	Born.	Married.	Died.	Sons.	Daughters.
Washington	Martha (Dandridge) Custis	Va.	1731	1759	1802	.....	.....
J. Adams	Abigail Smith	Mass.	1744	1764	1818	3	2
Jefferson	Martha (Wayles) Skelton	Va.	1748	1772	1782	1	5
Madison	Dorothy ("Dolly") (Payne) Todd	N. Car.	1772	1794	1849	.....	.....
Monroe	Eliza Kortright	N. Y.	1768	1786	1830	.....	2

Coolidge	Grace Anna Goodhue	Vt.	1879	1905	.....	2	.....
Hoover	Lou Henry	Iowa.	1875	1899	.....	2	.....

BIOGRAPHIES OF THE PRESIDENTS AND THEIR WIVES.

The following brief biographical notes of the Presidents and their wives are supplemental to the convenient tables which precede them and of which they form a part.

George Washington, Federalist, born on a Friday, was the great-grandson of Col. John Washington (1634-1677), who came from Yorkshire, England, and settled in 1657, or 1658, on a large tract he bought in Westmoreland County, Virginia, bordering the west shore of the Potomac River near its mouth. It is not known positively whether Col. John Washington's brother, Lawrence, and his sister, Martha, came over with him, or later. His brother Lawrence had married, in England, Mary Jones, daughter of a lawyer at Luton, in Bedfordshire.

The Washingtons had been aristocrats in England, adherents of the royal house of the Stuarts, and when Charles I was unseated by Cromwell, the Washingtons emigrated to the United States.

Col. John Washington, the pioneer settler, led troops against the Susquehannock Indians. He had a son, Lawrence Washington (baptized at Tring, England, June 18, 1635), whose second son was Augustine Washington, born in 1694. Augustine was twice married. By his first wife, Jane Butler, who died Nov. 24, 1729, he had four children. His second wife, Mary Ball, whom he married March 6, 1731, bore, as her first child, George Washington, born, as was his father, at Wakefield, on the Potomac, fifty miles below Mount Vernon. The Washingtons by that time owned much of the land in the fertile peninsula between the Potomac and Rappahannock Rivers.

It has been the opinion of some historians that the Washingtons settled first in the Barbados, after leaving England, and came from the Barbados to Virginia.

George's parents moved about 1735 to Mount Vernon, then called Hunting Creek. The mansion was burned in 1739, and the present one erected on the site. Augustine died April 12, 1743. There George Washington studied mathematics and became a surveyor in the employ of William Fairfax, father of Lawrence's wife and manager of the great Virginia estate of his cousin, Lord Fairfax. George accompanied Lawrence to Barbados, West Indies and got smallpox. After his return, he entered the military service of Virginia. He later served under Gen. Braddock in the war between the English and the French.

Washington took command of the Continental Army, at Cambridge, Mass., July 3, 1775, under a commission issued by Congress on June 17, that year; after winning the Revolutionary War, he took leave of the officers of his force, Dec. 4, 1783, at Fraunces's Tavern, New York City, and formally resigned to Congress, Dec. 20, that year, at Annapolis, Md., his commission as General and Commander in Chief.

He was President of the Convention that drafted the Constitution in 1787.

The estate at Mt. Vernon, which George Washington inherited from his half-brother Lawrence, had been named by Lawrence in honor of the British Admiral, Lord Vernon, under whom Lawrence had served at the siege of Carthagena.

Congress, on July 3, 1798, when war with France was imminent, again commissioned Washington as Lieutenant General and Commander in Chief, but hostilities were averted.

Washington's death was due to exposure on Dec. 12, 1799, in a storm while riding over his estate with his managers. He went to bed with a sore throat, followed by an ague. He had signed his will on July 9, 1799. The end came about 10.20 P. M., Saturday, Dec. 14, 1799. A vault was made for Washington's body under the dome of the Capitol at Washington, but the remains were interred at Mt. Vernon.

He was one of the wealthiest men in the country, owning 70,000 acres of land in Virginia and 40,000 acres in the near-west, which latter Congress gave him for his military service. His estate, at death, was valued at $5,300,000.

Washington was a slave owner, and a distiller, as well as a farmer. He was a man of powerful physique, 6 feet, 2 inches, in height, with sandy hair, blue eyes, big hands and feet. He weighed 210 pounds when 40 years of age. He was not a prohibitionist, and was a horseback rider, hunter and fisherman.

The Washington family in America were Episcopalians, and George Washington attended those services, at Alexandria, Va., and at New York City, where he had a family pew in St. Paul's Chapel, Broadway and Vesey St.

Washington's first inauguration was at New York, April 30, 1789; his second, at Philadelphia.

A granite monument, bearing the inscription "George Washington's Birthplace," marks, since 1896, almost the site of the house where Washington was born.

The farm extends to the west bank of the Potomac River, below the little settlement of Oak Grove, about 97 miles from the City of Washington by automobile and perhaps 75 miles by boat.

The Douglass House, at Trenton, N. J., in which Gen. Washington conferred with his staff on the night of Jan. 2, 1777, has become the property of that state as a historic place. The building has been completely restored. The conference held in the Douglass house by General Washington and his fellow-officers resulted in flanking the British army on the opposite side of Assunpink Creek in Trenton and the subsequent taking of Princeton by the Colonial troops.

Mrs. Washington was a daughter of Col. John Dandridge, planter, of New Kent County, Va., and widow of Daniel Parke Custis, also a rich farmer of that country. She was an Episcopalian.

Her marriage to Washington was on Jan. 6, 1759.

Gen. Washington had no children of his own. His wife, who was small and plump, with dark hair and hazel eyes, had become the mother of four children, Martha Parke Custis, and Col. John Parke Custis, and two who died in infancy.

Col. John Parke Custis (1753-1781), who inherited from his father an estate of 1,000 acres at Arlington, Va., near Washington, where now the National Cemetary is located, had four children—Eliza (1776-1832) who married Thomas Law; Martha, born in 1777, who became the wife of Thomas Peter; George Washington Parke Custis, who married Mary Lee Fitzhugh of Va., and whose daughter became the wife of Gen. Robert E. Lee, Confederate General; and Eleanor Parke Custis, who became the wife of Major Lawrence Lewis, son of Fielding Lewis, whose father, Fielding Lewis, 1725-1781, had married George Washington's sister, Elizabeth, and was a rich Virginia planter, owning half of the town of Fredericksburg, on the Rappahannock River.

At official receptions the visitors were seated while the President and wife passed among them.

John Adams, Federalist, who was born in the town of Quincy, Mass., and died there, was a great-grandson of Henry Adams, who came with his eight sons from Barton St. David, Somersetshire, England, in 1636, and settled on a grant of 40 acres. John was the eldest son of John Adams, farmer, and of Susanna Boylston, daughter of Peter Boylston, of Brookline, Mass. He graduated at Harvard in 1755; taught school at Worcester; practiced law at Boston; served in the State Legislature, in the Revolutionary Provincial Congress of Massachusetts and in the Continental Congress; he was a signer of the Declaration of Independence; Commissioner to France, 1778, with Benjamin Franklin and Arthur Lee, Minister to Holland; helped negotiate treaties in Europe; Minister to England 1785-1788; elected Vice President in 1788, and again in 1792; chosen President in 1796. He was inaugurated at Philadelphia.

He was the first President to live in the White House, at Washington.

Enraged at his failure of re-election in 1800 he started in his coach for Massachusetts early on March 4, 1801, refusing to attend the inauguration of Thomas Jefferson.

John Adams was a Unitarian and was a cousin of Samuel Adams of Massachusetts, who also was a signer of the Declaration. He was an orator and a pamphleteer; a man of medium height, active, florid, and corpulent. He died of debility, due to old age, on the same day as Jefferson.

The papers of John Adams and John Quincy Adams are in the possession of the family and in the custody of the Massachusetts Historical Society. These papers are being printed largely under the editorship of Worthington C. Ford. The Library of Congress has many letters of both Presidents.

Mrs. Adams was a daughter of the Rev. William Smith, a Congregational minister of Weymouth, Mass. Her mother, Elizabeth Quincy, was a great-great-granddaughter of the Puritan divine, Thomas Shepard of Cambridge, Mass., and great-grand-niece of the Rev. John Morton of Boston. Mrs. Adams's older sister, Mary, was the wife of Judge Richard Cranch of Boston.

Adams's oldest son, John Quincy Adams, became sixth President in 1825. A daughter, Abigail, married Col. William S. Smith.

Thomas Jefferson was of Welsh descent and was a Republican, that is, an anti-Federalist, and is called the founder of what is now known as the Democratic Party. He was born at Shadwell, in Albemarle County, Va., the third of ten children. His mother was a daughter of Isham Randolph, a rich Virginian. His father, Peter Jefferson, with the aid of thirty slaves, tilled a 1,900-acre tobacco and wheat plantation. The President died of old age and chronic diarrhea, in Albemarle County, at Monticello, which he had built from his own design and which creditors would have taken but for the financial aid of friends.

Jefferson was a lawyer. He was a writer, not an orator. He served in the Virginia House of

Burgesses with Washington, and in the Continental Congress; helped draft and signed the Declaration of Independence; succeeded Patrick Henry, in 1779, as Governor of Virginia; served in the Virginia militia in the Revolution; negotiated, in Europe, treaties with various countries; Secretary of State under Washington; elected Vice President under John Adams; elected President in 1800, with Aaron Burr, his rival for the Presidency, as Vice President; re-elected in 1804.

Jefferson was tall, raw-boned, freckled and sandy. He played the violin, and was a voluminous writer. He had no religious affiliations.

Jefferson was the first of the Presidents inaugurated at Washington.

Mrs. Jefferson, who was tall, slim, vivacious, with brown eyes, was a daughter of John Wayles, a wealthy lawyer of Charles City County, Va. Her first husband was Bathwest Skelton, who died before she was twenty years old.

Two of the children of the Jeffersons died in infancy. Of those who grew up, Martha, 1772-1836, became, in 1789, the wife of her cousin, Thomas M. Randolph, afterward Governor of Virginia, left a large family of sons and daughters and was the companion of her father in his declining years; Mary, 1778-1804, married her cousin, John Wayles Eppes, and had two children, one of whom, Mrs. S. R. Meikleham, died at Washington in 1897. Mrs. Jefferson's daughters were educated at Roman Catholic convent schools.

Mrs. Jefferson died nineteen years before her husband became President, and Mrs. Madison for a time acted as mistress of the White House. Later he abolished levees.

Jefferson inherited through his wife from her father 40,000 acres of land and 135 slaves.

James Madison, Republican, was born at Port Conway, King George County, Va., and died of old age at Montpelier, Orange County, Va. He was a son of James Madison, descendant of John Madison, of England, who in 1653 took out a patent for land on Chesapeake Bay between the York and North Rivers. James Madison's paternal grandmother, Frances Taylor, of Orange County, had four brothers, one of whom was grandfather of President Zachary Taylor. Madison's mother was Nelly Conway, and he was the first of twelve children.

Madison graduated at Princeton; helped draft the Virginia State Constitution, and was a member of the first State Legislature; a delegate to the Continental Congress; again a member of the Virginia Legislature; once more a delegate to the Continental Congress; served in the Federal Convention and helped draw up and signed the Federal Constitution; drew up the Virginia Resolution against the alien and sedition laws; Secretary of State under Jefferson; President for two terms.

Madison was small in stature, neat in attire, quiet, polite, and scholarly. He spent the latter part of his life on his estate at Montpelier. There he was buried. He was an Episcopalian.

Mrs. Madison, who was raised as a Quaker, was a daughter of John Payne of North Carolina. Her mother, Mary Coles, was a cousin of Patrick Henry. Her grandfather, John Payne, an English gentleman, settled in Virginia early in the eighteenth century. Her first husband, whom she married when nineteen, was John Todd, a Pennsylvania lawyer and Quaker, who died in 1793 at Philadelphia in a yellow fever epidemic. He left her one son, Payne Todd.

Madison married Mrs. Dorothy, or Dolly, Payne Todd at Harewood, Jefferson County, Va., the home of her younger sister, Mrs. Phillip Steptoe Washington. Mrs. Madison and her husband fled from Washington to Virginia by night in 1814, when British troops set fire to the Capitol and other buildings.

The first marriage in the White House was on March 11, 1811, and united Justice Thomas Todd, of the United States Supreme Court, and Lucy Payne Washington, widow of Phillip Steptoe Washington (nephew of George Washington) and sister of Dorothy or Dolly Payne, who married John Todd, and, after his death, became the wife of President Madison.

The second marriage in the White House occurred in 1812, and united Anna Todd, a cousin of the Payne sisters, and Edward Brake Jackson, of Virginia, afterwards a member of Congress.

James Monroe, Republican, was born on a Friday in Westmoreland County, Va., and died of old age at New York City. His ancestry was Scotch. The first Monroe in Virginia settled there prior to 1650. James was a son of Spence Monroe and Eliza Jones, sister of Judge Joseph Jones, a Virginia delegate to the Continental Congress. He attended William and Mary College, but soon, with teachers and students, left and joined the Revolutionary Army under Gen. Washington and was wounded in action.

He served in the Virginia Legislature and in the Continental Congress; helped draw up the Federal Constitution; served as United States Senator; Envoy to France, 1794; Governor of Virginia twice; Plenipotentiary to France, and in 1803 took part in the Louisiana Purchase; Minister to England; Secretary of State under Madison, and in 1814-15 also Secretary of War; President for two terms. As President in 1823 he formulated the "Monroe Doctrine," which declares against European aggrandizement in the three Americas.

He died of old age. His body was buried in the Marble Cemetery, Second Street, New York City, but in 1858 was interred in Hollywood Cemetery, Richmond, Va.

Except when in New York City, Monroe lived on his estate at Oak Hill, Loudon County, Va. He was a lawyer but seldom had practiced. He was an Episcopalian.

Mrs. Monroe, Eliza or Elizabeth, was born at New York City and was a daughter of former Capt. Lawrence Kortright of the British Army. While in France Mr. Monroe, then being the American Minister, secured the release from the prison, La Force, of Mme. de Lafayette, who hourly expected to be executed. One of Mrs. Monroe's sisters was the wife of M. Heyliger, Grand Chamberlain to the King of Denmark; another sister married Nicholas Gouverneur of New York City.

One of the daughters of the Monroes married Judge George Hay of Richmond, Va.; the younger, Maria, became in 1820 the wife of a cousin, Samuel L. Gouverneur of New York City. The marriage took place at the White House. She died in 1850. Mrs. Hay died at Paris and was buried there in Pere la Chaise.

John Quincy Adams, a son of President John Adams, and likewise a Unitarian, was born at Quincy, Mass., and died following a stroke of paralysis while in Congress at Washington. His mother's grandfather was John Quincy.

J. Q. Adams was educated in Europe, graduated at Harvard, and practiced law; was Minister to Holland, and to Portugal, under Washington; in his father's Administration was Minister to Prussia; served in the Massachusetts Senate; in 1803 entered the United States Senate, where he quit the Federalist Party and became a Republican and later a Whig.

Resigning from the Senate, he taught rhetoric at Harvard; Minister to Russia under Madison; took part in the peace treaty at Ghent; Minister to England; Secretary of State under Monroe and negotiated the Florida Purchase, and took part in formulating the Monroe Doctrine; chosen President by the House of Representatives, though Gen. Jackson had got the highest number of electoral votes at the election—Jackson, 99; Adams, 84; Crawford, 41; Clay, 37.

Soon after his Presidential term ended he was elected to the House of Representatives from Massachusetts and fought the slave power aggressively. He was a skilful and fiery debater, insensible to fear. He was buried at Quincy, Mass.

Mrs. John Quincy Adams was born at London and was a niece of Thomas Johnson of Maryland. Her father had lived abroad for years and by direction of Congress acted as American fiscal agent in France and later in England. Miss Johnson became the wife of Adams at London and was his companion during his long diplomatic career in Europe.

Their children were: George Washington Adams, born at Berlin in 1801; John Q. Adams jr., born at Boston, July 4, 1803; Charles Francis Adams, born at Boston in 1807; and Louisa Catherine Adams, born at St. Petersburg in 1811 and died there in 1812. Their son, C. F. Adams, lawyer, served in the Massachusetts Legislature; was Free Soil candidate for Vice-President in 1848; served in Congress; was Minister to England during the Civil War; was President of the Geneva Board of Arbitration. His four sons were all prominent.

Cake and wine were passed to guests at White House receptions in Adams's time.

J. Q. Adams jr. married his cousin, Miss Mary Hellen, in 1826, at the White House.

Andrew Jackson, Democrat, was born in the Waxhaw settlement on or close to the North Carolina-Tennessee border.

According to John T. Moore, Tennessee State Historian, Jackson was born in the George McKemey (spelled also McCamie, and McKamie) log cabin, which cabin is now situated about 407 yards on the North Carolina side of the North Carolina-Tennessee State line, and about 10 or 12 miles from the town of Monroe, N. C. He died of tuberculosis at his home, the Hermitage, near Nashville, Tenn. He was a son of Andrew Jackson, who came over from North Ireland in 1765, and his mother was Elizabeth Hutchinson, also from Ireland. He studied law at Salisbury, N. C., practiced at Nashville; he helped draw, in 1796, the Constitution of Tennessee; served in Congress, and in the U. S.

Senate; resigned in 1798 to become a Tennessee Supreme Court Judge; fought several duels, in one of which he killed Charles Dickinson and was himself severely wounded.

In 1812 Jackson, "Old Hickory," headed 2,000 troops against the British; in 1813 he defeated the Creek Indians on the Tallapoosa River; in 1814 he became a Major General in the army, and he defeated the British at Mobile, at Pensacola, and at New Orleans; he seized Florida temporarily from the Spanish, and quelled Negro and Indian disorders there. In 1821, after the purchase of Florida, he was appointed Governor; in 1823 he entered the U. S. Senate. In 1824 he got more electoral votes for President than J. Q. Adams, but election was thrown into the House of Representatives, where Adams was elected President by the vote of 13 States, 7 voting for Jackson and 4 for Crawford. In 1828 Jackson was elected President, and re-elected in 1832.

He was shot at, in the Capitol at Washington, Jan. 29, 1835, by Richard Lawrence, a house painter. The weapon missed fire. He was a Presbyterian.

Mrs. Jackson, born in North Carolina, was the daughter of Col. John Donelson, a surveyor who, in 1779, sold his ironworks in Pittsylvania County, Va., and, after a 2,000-mile journey by rivers, settled near Nashville, Tenn. His daughter was the best horsewoman and dancer in that part of the country. Her first husband, Capt. Lewis Robards, divorced her, after accusing Jackson, who married her, first, at Natchez in 1791, before the divorce actually was granted, and again in 1794, after the decree.

Mrs. Jackson died before her husband went into the White House. She had no children, but Gen. Jackson adopted one of her sister's children, a boy who was named Andrew Jackson jr. and who inherited the General's large estate.

The mistress of the White House in the Jackson Administration was his wife's sister, Emily, a slender brunette, who had married her cousin, Major A. J. Donelson. The latter served as private secretary to President Jackson. Emily's four children were born at the White House. She was assisted as mistress by Mrs. Sarah Yorke Jackson of Philadelphia, wife of the President's adopted son.

Gen. Jackson passed cheese to guests at White House levees.

There were two White House weddings in Jackson's Administration, that of M. Pageot of Martinique, later French Minister to the U. S., and Miss Lewis, daughter of Major Lewis of Nashville; and that of a niece of Jackson and Mr. Polk of Tennessee.

Martin Van Buren, Democrat, was born at Kinderhook, N. Y., and died there of asthma. He was the son of Abraham Van Buren and Mary Hoes (originally spelled Goes), widow of a man named Van Alen. James J. Van Alen was his half-brother. The whole family was of Dutch origin.

Van Buren practiced law; was Surrogate of Columbia County; a State Senator; Attorney General of the State; re-entered the State Senate; became U. S. Senator in 1821, and resigned to become Governor of New York; was Secretary of State under President Jackson; resigned in 1831 to be Minister to England but was not confirmed; was elected Vice President in 1832; in 1836 was elected President; was Free Soil candidate for President in 1848, but was defeated.

He was a member of the Dutch Reformed Church.

Mrs. Van Buren, like her husband, was of Dutch descent and was a blood relative of his mother, Mary Hoes, and was his classmate at the public school at Kinderhook, N. Y.

Of the Van Buren children, Abraham, 1807-1873, was a West Point graduate, an army officer on the western frontier, secretary to his father as President, an army officer in the Mexican War, and in his later years a man of leisure at New York City. Another son "Prince" John, 1810-1866, a lawyer, was elected Attorney General of New York State in 1845. He died at sea.

Abraham's wife, Angelica Singleton, born in South Carolina in 1820, daughter of a planter, was a cousin of William C. Preston and of President Madison's wife. She was mistress of the White House during most of Van Buren's term. Mrs. Van Buren was a member of the Dutch Reformed Church.

W. H. Harrison, a Whig, of English descent, was born at Berkeley, Charles City County, Va., and died of pneumonia at Washington. He was the third son of Benjamin Harrison, a signer of the Declaration of Independence. He graduated at Hampden Sidney College and studied medicine. Against the advice of his guardian, Robert Morris, he joined the army and went west and fought the Indians.

Harrison was Secretary of the Northwest Territory; a delegate in Congress; Governor of the Indian Territory; defeated the Indians at Tippecanoe, on the Wabash River; in 1812 took command of all United States troops in the northwest; in 1813 defeated the British in Canada. In 1816 he entered Congress; in 1819 he was in the Ohio Senate; in 1824 he entered the United States Senate, resigning to be Minister to Colombia; in 1836 he was defeated for President; in 1840 he was elected, and a month after his inauguration he died of pneumonia.

Harrison was an Episcopalian.

Mrs. Harrison was a daughter of Col. John Cleves Symmes, a delegate to the Continental Congress, a soldier in the Revolutionary Army, and Chief Justice of the New Jersey Supreme Court. She was born in Morristown, N. J.

Of President Harrison's sons, the third, John Scott Harrison of Indiana, 1804-1878, was a Whig in Congress and was the father of Benjamin Harrison, the twenty-third President. His daughter, Lucy, 1798-1826, born at Richmond, Va., became the wife of D. K. Este, a lawyer and judge of Cincinnati.

Gen. Harrison died a month after his inauguration. His wife, who at that time was an invalid, did not go to the White House with him, but remained at her home, North Bend, O. Mrs. Harrison was brought up a Methodist. She outlived her husband a quarter of a century. The mistress of the Executive Mansion during Gen. Harrison's occupancy was Mrs. Jane Findlay Irwin Harrison, wife of the President's second son, Col. W. H. Harrison jr. Her sister, Elizabeth Irwin, was the wife of John Scott Harrison.

John Tyler, a Democrat, second son of Judge John Tyler and Mary Armistead, both of English ancestry, was born at Greenway, Charles City County, Va., and died Jan. 17, 1862, of liver trouble at Richmond, Va. He graduated at William and Mary College; practiced law; served in the Virginia Legislature; fought in 1813 in the defense of Richmond against the British; re-elected to the Legislature; entered the House of Representatives in 1816, retiring in 1821 because of his health; entered the Legislature; became rector and chancellor of William and Mary College; in 1825 was elected Governor of Virginia, and was re-elected; in 1826 was elected to the U. S. Senate; was defeated, in 1836, for Vice President on the State-Rights Whig ticket; resigned from the Senate after refusing to obey a resolution of the Virginia Legislature demanding he vote for the Benton resolution; in 1838 re-entered the Virginia Legislature; in 1840 was chosen Vice President, and became President on Gen. Harrison's death.

In 1861 Tyler was a delegate from Virginia to the Peace Convention of 13 northern and 7 border States, at Washington, called after the secession of South Carolina, to adopt a place for settling the controversy between the North and the South. He was President of the gathering. The U. S. Senate rejected the convention's proposals. Tyler was elected by Virginia to the Confederate Congress, but died before it assembled.

Tyler was an Episcopalian, tall, thin, clean-shaven, with a Roman nose and a high receding forehead. His eyes were blue, his voice shrill. He was playing "knuckles" with his children at Williamsburg, Va., when notified, by a messenger who had come from Washington by sail boat, of President Harrison's sudden death, and he had to borrow money to get to the national capital. He was a violin player.

The first **Mrs. Tyler** was Letitia, a daughter of Robert Christian, a planter of New Kent County, Va. She was delicate and died in the White House. She was an Episcopalian.

Of her children, Robert Tyler, 1818-1877, lawyer editor, poet, married Priscilla, a daughter of T. A. Cooper, the tragedian, and she and her daughter, Mrs. Letitia Semple, were the mistresses of the White House. The latter was the wife of the nephew and adopted son of Judge Semple of Williamsburg, Va. One daughter, Elizabeth, married, at the White House, William Waller of Williamsburg, Va.; another, Alice, married the Rev. H. M. Denison of Wyoming, Pa.

The second **Mrs. Tyler** was Julia Gardiner, daughter of David Gardiner, whom he married on June 26, 1844, at New York City, was born on Gardiner's Island, near Easthampton, N. Y., and was a member of the family that held manorial rights on that island. Of her children, Lyon Gardiner Tyler, lawyer, legislator, became, in 1888, President of William and Mary College, Williamsburg, Va. Another son of President Tyler, State Judge David Gardiner Tyler, a Confederate veteran and a former member of Congress and a classmate of General Robert E. Lee, died aged 81. Sept. 5, 1927, at the ancestral homestead, Sherwood Forest, in Charles City County, Virginia. Her youngest son, Robert Fitzwalter Tyler, died, aged 70, at Richmond, Va., Dec. 30, 1927.

Mrs. Tyler was a Roman Catholic. Her father was killed by a cannon explosion on a warship on

the Potomac, and his body and that of other victims—the whole party having been the President's guests on a pleasure cruise—were removed to the White House. There Miss Gardiner met the President and aroused his affection.

James K. Polk, a Democrat, was born in Mecklenburg County, N. C., and died of diarrhea at Nashville, Tenn. The name originally was Pollock, and the family came from Ireland. His father was Samuel Polk, a farmer and surveyor, and his mother, Jane Knox, of Iredell County, N. C.

He graduated at the University of North Carolina; practiced law; served in the Legislature and in Congress; was elected Governor of Tennessee in 1839. He was called the "Napoleon of the Stump." He was, 1835-1839, Speaker of the U. S. House of Representatives; chosen President in 1844. He was a Presbyterian, wore his hair long, and was democratic and affable.

Mrs. Polk was a daughter of Joel Childress, a wealthy planter near Murfreesboro, Tenn. She was educated in a Moravian school. She abolished drink and dancing from White House receptions. She was a handsome woman of the Spanish type. Having no children, Mrs. Polk, after her husband's death, adopted a niece.

The Missouri Legislature has appropriated $15,000 for a statue to David R. Atchison, U. S. Senator from that state, 1843-1855, and who, it is claimed in Missouri, was actually President from midnight, Mar. 3, when Polk's term expired, to noon of Mar. 5, 1849, when Zachary Taylor was sworn in and inaugurated. Atchison, it is asserted, served as President because there was no Vice President and he, Atchison, was President pro tem of the Senate. Atchison never took the oath as President.

Zachary Taylor, a Whig, fifth in descent from an English immigrant of 1658, was born in Orange County, Va., and died of indigestion at the White House. His father, Col. Richard Taylor, was an American officer in the Revolution.

Zachary Taylor at 23 entered the army, fought the Indians along the Wabash and in Florida, in the Black Hawk and Seminole Wars; he defeated the Mexicans at the Rio Grande border of Texas, and, with Gen. Winfield Scott, was a hero of the Mexican War; was elected President in 1848. He was a cotton planter and had a large landed estate in Louisiana. He was buried at Springfield, near Louisville, Ky. He was an Episcopalian.

Mrs. Taylor was a daughter of Walter Smith, a planter of Calvert County, Md. Her younger daughter, Elizabeth ("Betty") Taylor, wife of Major W. W. S. Bliss, was mistress of the White House. "Betty," when a widow, married P. P. Sandridge of Winchester, Pa.

The Taylors' older daughter, Ann, became the wife of Dr. Robert Wood. Assistant Surgeon General of the army. Another, Sarah Knox Taylor, became the wife of Jefferson Davis.

Taylor's son, Richard, 1826-1879, born in Kentucky, served in the Confederate Army under "Stonewall" Jackson, and rose to be a Lieutenant General. He died at New York city.

Millard Fillmore, a Whig, was of English descent, the first of the name in the United States having been John, a mariner, of Ipswich, Mass. Millard's father, Nathaniel, was a pioneer log-cabin settler in Cayuga County, N. Y. Millard served apprenticeship as a wool carder, and then became a lawyer, at Buffalo. He served in the Legislature and in Congress, was State Comptroller, and in 1848 was elected Vice President and succeeded to the Presidency on Gen. Taylor's death, July 9, 1850.

The letters *to* President Fillmore were found in 1914 in an attic of his lawyer's in Buffalo. These papers are now in the Buffalo Historical Society; there are seventy volumes, and a list of the letters in these volumes is now being prepared for the Library of Congress with the view to photostat such of the letters as have historical importance. A collection of letters *from* Fillmore has been published under the auspices of the Buffalo Historical Society. Ex-President Fillmore passed his last years at Buffalo, dying there of old age, and was buried in Forest Lawn Cemetery, Buffalo. He was a Unitarian.

The first **Mrs. Fillmore** was the daughter of a Baptist clergyman, the Rev. Lemuel Powers of Stillwater, Saratoga County, N. Y. She taught school in Cayuga County, N. Y., in a backwoods district, and continued to teach after Fillmore married her. Owing to Mrs. Fillmore's health, her daughter, Miss Mary Abigail, was the White House mistress.

The second **Mrs. Fillmore,** whom he married at Albany, N. Y., at the Schuyler mansion, was Caroline Carmichael, a daughter of Charles Carmichael and Temperance Blachley of Morristown, N. J., and widow of Ezekiel C. McIntosh, a prominent merchant of Albany.

Franklin Pierce, a Democrat, born on Friday, inaugurated on Friday, died on Friday, first saw the light at Hillsborough, N. H., and died of stomach trouble at Concord, N. H. He was a son of Benjamin Pierce, farmer and officer in the Revolutionary Army. He graduated at Bowdoin College in 1824; practiced law; served in the New Hampshire Legislature, in the United States House of Representatives, and in the U. S. Senate, resigning in 1842 to resume his profession; was an officer, in 1847, in the war in Mexico; was elected President in 1852. After his term he made a tour of Europe.

Pierce was handsome, graceful, well-dressed; and was a notable orator. He was an Episcopalian. He left an estate valued at $72,000.

Mrs. Pierce was born at Hampton, N. H., was a daughter of the Rev. Jesse Appleton, President of Bowdoin College. Of the children of the Pierces, two sons died in early youth and the youngest, Benjamin, thirteen years old, was killed, Jan. 6, 1853, in a railroad accident near Lawrence, Mass., in the presence of his parents. This was two months before Mr. Pierce's inauguration.

James Buchanan, a Federalist, later a Democrat, of Scotch descent, was born near Mercersburg, Pa., and died of rheumatic gout, at Lancaster, Pa. He served as a volunteer in the defense of Baltimore, in the War of 1812; graduated at Dickinson College; practiced law; served in the Pennsylvania Legislature; was elected in 1820 to the House of Representatives, from which he resigned in 1831, when President Jackson appointed him Minister to Russia; was elected in 1824 to the U. S. Senate, where he stayed till 1845, when he became Secretary of State under President Polk. In 1849 he retired to Wheatland, his 22-acre estate near Lancaster; in 1853 was Minister to England; in 1856 he was elected President. He was a Presbyterian.

The Buchanan papers are mainly with the Pennsylvania Historical Society, but the Library of Congress has important sections, such as his letters to Harriet Lane Johnston.

President Buchanan was a bachelor. The mistress of the White House in his Administration was his sister Jane's daughter, Harriet Lane, whose father, Elliott T. Lane, came from an old Virginia family and had grown wealthy as a transcontinental trader. He lived at Mercersburg, Pa.

Miss Lane, tall and blonde with violet eyes, had been educated at a Roman Catholic school at Georgetown; later in life she became an Episcopalian. Her mother died when she was seven, her father when she was nine. Thereafter she made her home with her uncle. She was with him in his diplomatic career abroad.

The Prince of Wales (later King Edward) was a guest at the White House in the Buchanan Administration.

In January, 1866, Miss Lane married Henry Elliott Johnston of Baltimore. Her son, James Buchanan Johnston, died in 1881.

Abraham Lincoln, a Whig, later a Republican, 6 ft. 4 in. in height, was born in Hardin County, Ky., and was a descendant of Samuel Lincoln, who came over from Hingham, near Norwich, England, in 1637, and settled at Hingham, Mass. The Lincolns in successive generations lived in New Jersey, Pennsylvania, Virginia and Kentucky. Abraham's father, Thomas (grandson of John Lincoln of Rockingham, Va., and great-grandson of Mordecai Lincoln of Chester County, Penn.) was a carpenter, his mother, Nancy Hanks, was the niece of a carpenter. Abraham had a sister and a brother. The sister married but had no children. The brother died in infancy. In 1816 Abraham's parents moved across the Ohio River into Indiana, where his mother died in 1818. His father then married a widow, Sarah Bush Johnston. In 1830 the family moved to Macon County, Ill.

Abraham cleared the forest and helped build their cabin home; with Denton Offutt he carried farm produce by water to New Orleans and sold it; he kept a general store at New Salem, Ill., he served as an officer of volunteers in the Black Hawk Indian War; was Postmaster at New Salem; he served in the Illinois Legislature 1834-1840; practiced law at Springfield, Ill.; in 1846 was elected to House of Representatives and served one term; in 1858 debated slavery with Stephen A. Douglas in the latter's successful campaign for re-election to the U. S. Senate; in 1860 was elected President; re-elected in 1864; was shot Friday, April 14, 1865, at Ford's Theatre, Washington, by John Wilkes Booth, an actor, and died the next day. The assassin was shot to death April 26, by Sergt. Boston Corbett, U. S. Army, near Fredericksburg, Va. Lincoln was buried at Springfield, Ill.

Lincoln's estate, as administered by U. S. Supreme Court Justice David Davis, amounted to $110,295, mostly saved from his salary of $25,000 a year and invested in Government securities. The property

was equally divided among the widow and the two sons, Robert T., and Thomas ("Tad").

There were coincidences in the lives of Abraham Lincoln and Jefferson Davis. Both were born in Kentucky; Lincoln in 1809, Davis in 1808. Both removed from their native State in childhood, Lincoln to the Northwest, Davis to the Southwest. Lincoln was a Captain of Volunteers and Davis a Second Lieutenant of Regulars in the Black Hawk War of 1832. They began their political careers the same year, 1844, Lincoln being a Presidential Elector for Clay, and Davis for Polk. They were elected to Congress about the same time, 1845 and 1846. They were called to preside over their respective Governments the same year and within a few days, Davis, Feb.8,1861; Lincoln, March 4,1861.

Mrs. Lincoln was born at Lexington, Ky., was a daughter of Robert S. Todd, a pioneer settler, and a sister of the son of Gov. Ninian Edwards of Illinois.

Of the Lincoln children, William Wallace died in 1862, and Thomas ("Tad") in 1871. Another son, Robert Todd Lincoln, born at Springfield, Aug. 1, 1843, studied law at Harvard, served in the Civil War, was Secretary of War in the Garfield Cabinet, then Minister to Great Britain, and later counsel to and President of the Pullman Palace Car Co.

Robert T. Lincoln was found dead in bed, July 26, 1926, at his home, Manchester, Vt.

He had turned over to the U. S. Government more than 10,000 letters to and from Abraham Lincoln, also drafts of state papers, pamphlets, and newspaper clippings—all to be kept sealed at the Library of Congress until twenty-one years after the donor's death.

It is said of Mrs. Lincoln that she had from girlhood the ambition to be a President's wife. She refused an offer of marriage from Senator Stephen A. Douglas. As mistress of the White House there was little opportunity for formal receptions or for indulgence in her fondness of society, owing to the Civil War. The Executive Mansion was almost constantly the scene of war councils.

Andrew Johnson, a Democrat, whose father perished in rescuing a man from drowning, was born at Raleigh, N. C., and died of paralysis near Carter's Station, Tenn., and was buried at Greenville, Tenn. He was apprenticed, at 10 years, to a tailor and worked as a journeyman tailor. He married Eliza McCardle, who taught him to write; was elected an Alderman and in 1830 Mayor of Greenville, Tenn.; in 1835 entered the Legislature; in 1843 was elected to the House of Representatives as an anti-U. S. Bank Democrat, and served till 1853, when he was elected Governor of Tennessee; in 1857 he was elected to the U. S. Senate, where he was a Union man; was appointed by President Lincoln in 1862 Military Governor of Tennessee; in 1864 was elected Vice President when Lincoln was re-elected; was impeached by the House of Representatives for having removed without the Senate's consent E. M. Stanton, Secretary of War, and on other charges. Johnson was tried by the U. S. Senate, which voted 35 for conviction, 19 for acquittal; but as two-thirds vote was necessary for conviction the impeachment failed.

In 1875 he was again elected to the U. S. Senate from Tennessee. Johnson, bitter at his failure of renomination, refused to ride with Gen. Grant to the latter's inauguration and remained at the White House. He was a stocky man of medium height.

Mrs. Johnson, born at Leesburg, Tenn., died at Home, Tenn., was the only daughter of a widow in a mountain hamlet when Johnson married her.

Their daughter, Martha, born in 1828, was educated at Georgetown, D. C., was often a guest at the White House in Polk's Administration. In 1857 she married Judge D. T. Patterson and was mistress of the White House in place of her invalid mother. Another daughter, Mary, 1832-1883, was the wife, first of Daniel Stover of Carter County, Tenn., and, after his death, of W. R. Bacon of Greeneville, Tenn. By Stover she had three children.

Ulysses S. Grant, of Scotch descent, the pioneer in America being Matthew Grant, who settled in 1630 at Dorchester, Mass., was born at Point Pleasant, O., and died of cancer on Mt. McGregor, near Saratoga, N. Y. Grant's Tomb overlooks the Hudson at New York City.

He was the oldest of the six children of Jesse R. Grant, a tanner, and Hannah Simpson, and was baptized as Hiram Ulysses Grant. He worked as a boy on his father's farm; graduated in 1843 at the U. S. Military Academy; served as an officer under Gen. Zachary Taylor, 1845-48 in the war with Mexico; resigned in 1854, after service in the West, from the army, and was a farmer and real estate dealer at St. Louis; in 1860 clerked in his father's hardware and leather store at Galena, Ill.

At the outbreak of the Civil War he drilled volunteers, and was commissioned Colonel of the 21st Illinois Regiment by Gov. Yates. In 1862, after his capture of Ft. Donelson, he was made a Major General; captured Vicksburg July 4, 1863; won the battle of Chattanooga Nov. 24-25, 1863; in 1864 he was made Lieutenant-General; forced Lee's surrender at Appomattox, Va., April 9, 1865; in 1866 Congress commissioned him General of the Army.

Gen. Grant was elected President in 1868, by the Republican party. Early in life he was a Whig, but in 1856 he voted for Buchanan. In 1872 he was re-elected President on the Republican ticket; in 1877-1879 made a tour of the world and in 1880 visited the South, Cuba, and Mexico; in 1880 his Republican friends failed to renominate him for the Presidency, after 36 ballots; in 1884 he lost his fortune in the failure of Grant & Ward, New York, bankers, but recouped it by writing his memoirs. He was a Methodist.

Mrs. Grant was a daughter of Judge Frederick Dent of St. Louis, a son of a Revolutionary officer. The Grants had four children—Frederick Dent, Ulysses jr., Jesse and Nellie. The last named became the wife of Algernon Sartoris of London.

Gen. Frederick Dent Grant, West Point graduate and soldier, was Minister to Austria in the Benj. Harrison Administration, a New York City Police Commissioner, a general officer in the war with Spain.

Nellie Grant and Capt. Sartoris were married at the White House in 1874. Sartoris's mother was a sister of the actress Fannie Kemble. In 1912 Mrs. Sartoris, then a widow, became the wife of Frank H. Jones, a lawyer, who was First Assistant Postmaster General in Cleveland's Administration.

Rutherford B. Hayes, a Whig and then a Republican, was born, a posthumous child, on a Friday at Delaware, O., and died of heart disease at Fremont, O. His mother was Sophia Birchard, of Suffield, Conn. He graduated at Kenyon College, studied law at Harvard, and began to practice at Fremont; was City Solicitor of Cincinnati; served as a Union General in the Civil War; served in the House of Representatives, 1865-1867; was elected Governor of Ohio, in 1867 and was re-elected; defeated for Congress in 1872; re-elected Governor in 1875; in 1876 was the Republican candidate for President. The votes of Louisiana, South Carolina and Florida being in dispute, Congress appointed an Electoral Commission of 5 Senators, 5 Representatives and 5 Justices of the United States Supreme Court, who, by vote of 8 to 7, decided the votes of these States in favor of Gen. Hayes and he was seated.

He was a Methodist, and was a descendant of George Hayes, a Scotchman, who settled in 1680 at Windsor, Conn.

The Hayes papers are at Fremont, O.

Mrs. Hayes was a daughter of Dr. James Webb of Chillicothe, O., and a granddaughter of Dr. Isaac Cook. The Webbs had come from North Carolina. She refused to let wine be served in the White House. She was a Methodist and was a college graduate.

President Hayes and his wife had eight children: Birchard A. (1853); Webb C. (1856); Rutherford P. (1858); Joseph T. (1861-1863); George C. (1864-1866); Fanny (1867); Scott R. (1871); Manning F. (1873-1874).

In June, 1878, a White House wedding united Gen. Russell Hastings to his second wife, Emily Platt, niece of President Hayes and daughter of William A. Platt of Columbus, O. Gen. Hastings was a Civil War soldier born in Massachusetts in 1835. His first wife was Adele Humphreys of Michigan, by whom he had a son, Clive Hastings. By the White House bride he had three children, Russell Platt Hastings, Lucy Webb Hastings, and Fannie Hastings.

James A. Garfield, a Republican, born at Orange, O., died at Elberon, N. J., from assassin Guiteau's bullet, was a descendant of Edwin Garfield, an English Puritan, who, in 1630, was one of the founders of Watertown, Mass. His mother was Eliza Ballou, a New England descendant of a French Huguenot. His father, Abram Garfield, was a native of New York who pioneered in 1830 to the Ohio wilderness.

Garfield worked on a boat on the Ohio canals; did carpentry; was baptized in youth a Campbellite into the fold of "The Disciples;" graduated at Williams College; taught school at Hiram, O.; was admitted to the bar; in 1859 was elected to the State Senate; served as a Union General in the Civil War; resigned from the army in 1863 to take a seat in the United States House of Representatives, and served until 1880, when he was elected to the United States Senate. While in the House he was charged with having owned stock in the Credit Mobilier, a dummy scheme to aid the Union Pacific Railroad in Congress. This he denied.

In 1880 Garfield was elected President, and was

inaugurated on a Friday; on July 2, 1881, he was fatally shot at the Baltimore and Potomac Railway depot, Washington, by Charles Jules Guiteau Garfield was buried at Cleveland, O. Guiteau was convicted of murder and was hanged at the jail at Washington, June 30, 1882.

Garfield was burly and strong. He was remarked for his bright green "gander" eyes.

The Garfield papers are at Mentor, O.

Mrs Garfield's father was Zeb Rudolph, a farmer at Garrettsville, O. She and Garfield were schoolmates, and when she became his wife he was President of the Eclectic Institute at Hiram O. Her mother was a daughter of Elijah Mason of Lebanon, Conn., and a descendant of Gen. Nathaniel Greene.

Of the Garfield children, Harry A., lawyer, became President of Williams College; James R., lawyer, was Secretary of the Interior under Roosevelt; Abram became an architect; Irvin McDowell; Mary married J. Stanley Brown.

Chester A. Arthur, a Whig, then a Republican, who became President when Garfield died, was born at Fairfield, Vt., and died at New York City. He was a son of the Rev. William Arthur and Malvina Stone, of an old New Hampshire family.

He graduated at Union College; taught school at Pownall, Vt.; studied law in New York City, helped organize in 1861 the New York State Militia, and when the Civil War began he was appointed Quartermaster General and equipped State troops for service at the front; in 1871 was appointed Collector of the Port of New York and served until 1878, when President Hayes removed him for political reasons. In 1880 as delegate at large from New York State he was a leader in the fight at the Republican National Convention to name Gen. Grant for a third term, and in the interests of harmony was put on the ticket for Vice-President.

Arthur was tall, portly, dark, handsome, courtly. His death was due to apoplexy. He was buried at Albany, N. Y. He was an Episcopalian.

Mrs. Arthur, who died before her husband became President, was a Virginian from Fredericksburg, and was a daughter of Commander William Lewis Herndon of the Navy, who, in 1851, explored the Amazon River. The Arthurs had three children, W. L. H. Arthur, who died in infancy, Chester Alan Arthur Jr., born 1865, and Ellen Herndon Arthur, born 1871, who became the wife of Charles Pinkerton.

The mistress of the White House in Arthur's Administration was his sister Mary, wife of John E. McElroy of Albany, N. Y.

Grover Cleveland, a Democrat, born at Caldwell, N. J., died of debility at Princeton, N. J., was descended from Moses Cleveland, of England, who settled near Woburn, Mass., in 1635. Grover's father, Richard Falley Cleveland, was a son of a watchmaker, and was pastor of the Presbyterian Church at Caldwell. His mother was Anne Nealy, of Baltimore, daughter of a merchant, of Irish birth, and was tall, dark and slim. Grover was named after the Rev. Stephen Grover, his father's predecessor at Caldwell. He dropped the "Stephen" while a lad at Fayetteville, N. Y., whither his family had moved.

When he was 16 his father died and the son left school to clerk in a store at Clinton, N. Y.; he taught, with an older brother, at the New York City Institution for the Blind; he made up a herd book for his uncle, Lewis F. Allen, a stock breeder at Black Rock, near Buffalo; studied law at Buffalo and was admitted to the bar in 1859; in 1863 became Assistant District Attorney of Erie County; defeated for District Attorney in 1865, but was elected Sheriff in 1870; in 1881 was elected Mayor of Buffalo; in 1882 was elected Governor of New York; in 1884 he was elected President; defeated in 1888; re-elected President in 1892.

After leaving the White House he settled at Princeton, N. J. On the change of control of the Equitable Life Assurance Society of New York he was made a trustee. He was fond of hunting and fishing.

Mrs. Cleveland's father, Oscar Folsom, was a law partner of Cleveland at Buffalo. Her mother was Emma C. Harmon. She married the President at the White House and their second daughter was born there in 1893. Before the marriage, the mistress of the Executive Mansion was the President's youngest sister, Rose Elizabeth Cleveland.

President Cleveland had five children, Ruth, Esther, Marion, Richard Folsom, and Francis Grover. Cleveland's widow married, Feb. 10, 1913, Thomas Jex Preston jr., Professor of Archaeology at Princeton University.

Benjamin Harrison, a Republican, was born at North Bend, O., and died of pneumonia, at Indianapolis. He was descended from the Virginia Harrisons. He was the third son of John Scott Harrison, a son of President William Henry Harrison. By some, the Harrison lineage is traced to Pocahontas. Benjamin's mother was Elizabeth F. Irwin.

He worked on his father's 400-acre farm; graduated at Miami University; was admitted to practice law in 1853 at Cincinnati; elected in 1860 as reporter of the Indiana Supreme Court; raised volunteers and served as a Union General in the Civil War; defeated for Governor in 1876; in 1879 a member of the Mississippi River Commission; in 1881 elected from Indiana to the United States Senate; in 1888 was elected President; in 1892 was renominated but was defeated.

Harrison was an elder in the Presbyterian Church at Indianapolis. He was short, sandy, astute, unsociable, with small, bright, sharp eyes. His estate was estimated at $375,000.

The first **Mrs. Harrison**, who was born at Oxford, O., and died in the White House, was a daughter of Prof. John W. Scott of Miami University, later President of Oxford Seminary. She was a musician and painter, a Presbyterian Sunday school teacher, and was the first President-General of the Daughters of the American Revolution. Mrs. Harrison's son, Russell B., mining engineer and journalist, is a Lafayette graduate. Her daughter, Mary, married James R. McKee, an Indianapolis merchant.

The second **Mrs. Harrison** was Mrs. Mary Scott Lord Dimmick, niece of the first Mrs. Harrison, and widow of Walter Erskine Dimmick, a lawyer, who died at sea. She had spent two years at the White House during her aunt's life. The ex-President married her at New York City. By the second wife Mr. Harrison had one child, Elizabeth Harrison, born in 1897. In 1921, when she was a lawyer, she married James Blaine Walker jr., a great-nephew of James G. Blaine. The children of the first wife fought the second wife in court over a division of the Harrison estate.

William McKinley, a Republican, was born at Niles, O. and died at Buffalo, N. Y. He was of Highland Scotch descent, his ancestors having lived long in Ireland though before settling in York County, Pa. His father was William McKinley, operator of charcoal furnaces at Niles, O., his mother was Nancy Allison, of Scotch lineage, whose family had settled in Westmoreland County, Pa.

McKinley was the seventh of nine children. He quit Allegheny College to make a living, and taught school; enlisted as a private and served in the Civil War, and came out a Major; studied law and practiced at Canton, O.; elected, 1869, Prosecuting Attorney of Stark County; in 1876 was elected to the House of Representatives and served until 1891, except for a short time in 1884 when a contest unseated him; elected Governor, 1891 and re-elected in 1893; elected President in 1896 and re-elected in 1900; assassinated by an anarchist, Leon Czolgosz, who shot him twice, with a pistol hidden in a handkerchief, Sept. 6, 1901, at the Pan-American Exposition, Buffalo, N. Y. The President died Sept. 14, at the home of John G. Milburn, at Buffalo. Czolgosz was convicted and was electrocuted Oct. 29, 1901, at Auburn State Prison.

McKinley was a Methodist. He was buried at Canton, O.

The McKinley papers are in the possession of George B. Cortelyou at New York City.

Mrs. McKinley was a daughter of James Asbury Saxton and Catherine DeWalt. She was educated in private schools, spent some time in Europe and was cashier in her father's bank at Canton, Ohio, when she married. Their two children, Katie and Ida, died in early childhood. A nervous ailment then made her an invalid for the rest of her life. She was, nevertheless, the mistress of the White House, accompanied her husband everywhere, and was with him at Buffalo when he was assassinated.

Theodore Roosevelt, Republican, of Holland descent, was born at New York City and died in sleep of heart trouble at Oyster Bay, N. Y. He was a son of Theodore Roosevelt. His grandfather explored the Ohio and Mississippi on the first steamboat that navigated them. Theodore's mother, Martha Bullock, of Roswell, Ga., was descended from Georgia's first Governor, Archibald Bullock.

Roosevelt graduated at Harvard, traveled in Europe; served 1882-1884 in the New York State Assembly; lived 1884-1886 on a North Dakota ranch; was an unsuccessful candidate for Mayor of New York City in 1886; was Police Commissioner; was a member of the National Civil Service Commission; 1897-1898 Assistant Secretary of the Navy, resigning to organize, with Surgeon Leonard Wood, 1st U. S. Cavalry (Roosevelt's Rough Riders), which served in Cuba in the Spanish-American War, and of which he became Colonel; elected Governor of New York 1898; elected Vice President in 1900 and became President in 1901 on McKinley's assassination; elected President in 1904; hunted in East Africa in

1909-1910; defeated for President on the Progressive (Bull Moose) ticket in 1912; visited and explored South America, 1913-1914.

Roosevelt was a voluminous author, and fond of athletics. He was awarded the Nobel Peace Prize in 1906.

He was shot and wounded at Milwaukee, Oct. 14, 1912, by a crank. He belonged to the Reformed Dutch Church. He was buried at Oyster Bay, N. Y.

The first Mrs. **Roosevelt** was Alice Hathaway Lee, daughter of George Cabot Lee of Boston; she died in 1884. Her only child was Alice Lee Roosevelt, who, in 1906, at the White House, married Nicholas Longworth, a Cincinnati lawyer and landowner and a Republican Representative in Congress. A child, Paulina, was born Feb. 14, 1925.

The second **Mrs. Roosevelt**, whom he married in 1886 at London, was Edith Kermit Carow, daughter of Charles Carow of New York City. By this union there were five children—Theodore jr., Kermit, Ethel Carow (Mrs. Richard Derby), Archibald Bullock, and Quentin. The last, an aviator in Europe in the World War, was killed in action and was buried where he fell. Theodore, who served as Lieutenant Colonel in the World War, was Assistant Secretary of the Navy under Harding and under Coolidge, and ran unsuccessfully for Governor of New York State in 1924. Kermit and Archie also served in the war.

William H. Taft was born at Cincinnati, the son of Alphonso Taft and the latter's second wife, Louisa Maria Torrey, and he is a brother of Henry W. and Horace D. Taft, and a half-brother of Charles P. Taft, the latter's mother being Fannie Phelps, of Vermont. Alphonso Taft was Attorney General in Hayes Cabinet.

W. H. Taft graduated in 1878 at Yale, and in 1880 at the Cincinnati Law School; admitted to the Bar in 1880; was a law reporter on Cincinnati dailies; Assistant Prosecuting Attorney 1881-1883; Assistant City Solicitor, 1887; Judge Cincinnati Superior Court, 1887-1890; United States Solicitor General, 1890-1892; United States Circuit Judge, 1892-1900; professor at the University of Cincinnati, 1896-1900; President of the United States Philippine Commission, 1900-1901; Civil Governor of the Philippines, 1901-1904; in 1902 arranged at Rome with Pope Leo XIII. the question of purchase of Roman Catholic lands in the Philippines; Secretary of War under Roosevelt, 1904-1908; Provisional Governor of Cuba for a while in 1907; on Government mission in 1907 to Cuba, Panama and the Philippines.

He was elected President in 1908; defeated for re-election in 1912; professor of law at Yale University, 1913-1921; appointed Chief Justice United States Supreme Court, June 30, 1921.

Taft is a Unitarian. He is tall, portly and suave.

Mrs. Taft was Helen Herron of Cincinnati, a daughter of Judge John W. Herron and Harriet Collins. She is one of eight children, a musician and a founder of the Cincinnati Orchestra. Her father was a law partner of Rutherford B. Hayes before the latter became President. She comes from an old New England family. Her only daughter is Helen Herron Taft, wife of Frederick J. Manning, an instructor in history at Yale University; her sons are Robert Alphonso Taft and Charles Phelps Taft 2d, both of whom are married.

Mrs. Taft had a nervous breakdown in 1909 and the mistress of the White House for a time was her sister, Mrs. Louis More, wife of a professor at the University of Cincinnati. She is an Episcopalian. She instituted 5 o'clock teas at the White House. She has blue-gray eyes and a contralto voice, a broad forehead and brown hair.

Woodrow Wilson, a Democrat, was born at Staunton, Va., and died of heart disease, at Washington. He was a son of a Presbyterian minister, the Rev. Joseph Ruggles Wilson, and Janet Woodrow, daughter of a Scotch Presbyterian Minister; and a grandson of James Wilson, a Presbyterian, of Ulster, Ireland, who settled at Philadelphia in 1807 and became a printer, marrying, in 1808, a girl, also an Ulster Presbyterian, who had come across the Atlantic in the same ship with him. The Wilson ancestry was Scotch-Irish on both sides.

Wilson graduated at Princeton University, 1879; graduated in law at the University of Virginia in 1881; and took his Ph.D. degree at Johns Hopkins in 1886. He practiced law at Atlanta, Ga., 1882-1883; taught history and political economy at Bryn Mawr College, 1885-1888 and at Wesleyan University, 1888-1890; professor of jurisprudence and political economy at Princeton University, 1890-1902.

In 1902 he was chosen President of Princeton University and served until Oct. 1910; Governor of New Jersey, 1911-1913; elected President in 1912, re-elected in 1916. He helped draft a treaty of peace with Germany, at Paris, in 1919, welding in it the covenant of the League of Nations. The treaty was accepted by Japan and the Allies in Europe, but was rejected by the United States Senate. In campaigning in the West to arouse public sentiment for the treaty, the President became partly paralyzed by apoplexy and thereafter was an invalid. He was awarded the Nobel Peace Prize in 1919. Wilson was a Presbyterian. He was entombed at the P. E. Cathedral, Washington.

By his will, his daughter, Miss Margaret, inherited an annuity of $2,500, and the rest of the estate went to his widow. Its total value was estimated to be over $600,000.

The first **Mrs. Wilson**, Ellen Louise Axson of Rome, Ga., was a sister of Prof. Stockton Axson of Princeton University and a daughter of the Rev. S. E. Axson and Margaret Hoyt. She was aided as mistress of the White House, by her three children, Margaret W., Eleanor R., who there became the second wife of William G. McAdoo, Secretary of the Treasury under Wilson; and Jessie W., who also there married Francis B. Sayre, professor of law, Harvard. He is a member of the Pennsylvania family that has large coal and railroad properties. The first Mrs. Wilson died at the White House.

The second **Mrs. Wilson** was Edith Bolling of Wytheville, Va., widow of Norman Galt, a Washington jeweler. She is one of three sisters, inherited a fortune from her first husband and was mistress of the White House during the last of the first and all of the second Wilson Administration, accompanied him to the Versailles Peace Conference and was his companion in all of his travels in Europe and the United States. She was with him when he was stricken in the West.

Warren G. Harding was born at Corsica, O., and died of heart trouble, following pneumonia, at San Francisco. He was the son of Dr. George Tryon Harding and Phoebe Elizabeth Dickerson. He studied, 1879-1882, at Ohio Central College; in 1884 became connected with the Daily Star, at Marion, O., and later owned and edited the paper, selling it shortly before his death.

He served in the State Senate, 1900-1904; was Lieutenant Governor of Ohio, 1904-1906; defeated for Governor in 1910; entered the United States Senate in 1915; elected United States President in 1920.

The Limitation of Armament Conference was held under his invitation, at Washington, beginning on Nov. 11, 1921.

Harding was tall, leisurely in movement, genial, and a pacifier. He was a Baptist. He was buried at Marion, O.

His estate, exclusive of his newspaper, was officially appraised at $486,566. Personal property and chattels were appraised at $4,154.83, money $34,895.90, securities $400,794.91, and real estate at $46,720.

Securities listed in the report were three blocks of United States gold bonds of $64,000, $30,000 and $6,000. United States Liberty bonds, two blocks of $42,000 and $40,250; Federal Land Bank bonds to the value of $10,000; United States Treasury certificates of $92,250, and United States Treasury notes, three blocks, $15,000, $52,000 and $5,000.

Life insurance carried by the late President totaled $34,422.41.

Mrs. Harding, Florence Kling, born Aug. 15, 1860, was a daughter of Amos O. Kling, a Marion, Ohio, hardware merchant and later a banker. Her family were Mennonites. Mrs. Harding's first husband was Henry De Wolfe, by whom she had a son, Marshall Eugene De Wolfe. The couple were separated by a divorce decree and the Ohio Court restored her maiden name. De Wolfe died at about the time of the decree. The son, Marshall, died of tuberculosis in Colorado, where he had been established by Mr. Harding in the newspaper business.

Mrs. Harding died at Marion, Nov. 21, 1924. Almost all of her estate, estimated at over $500,000, was left in trust to Marshall De Wolfe's children, Jean and George N.

The cornerstone of the Harding memorial tomb, at Marion, was laid May 30, 1926.

Calvin Coolidge, a Republican, was born in Plymouth, Vt., son of Col. John Calvin Coolidge, farmer and storekeeper (who died, aged 80, at Plymouth, Vt., March 18, 1926), and Victoria J. Moor. His ancestor, John Coolidge, came with his wife, Mary, from England and settled at Cambridge (then Watertown), in the Puritan Colony of Massachusetts Bay, in 1630.

Calvin Coolidge graduated at Amherst College, 1895; admitted to practice law, 1897, at Northampton, Mass.; City Councilman, 1899; City Solicitor, 1900-1901; clerk of the Courts, 1904; member of the Lower House of the Massachusetts Legislature, 1907-1908; Mayor of Northampton, 1910-1911; member of the State Senate, 1912-1915, and President of that body, 1914-1915; Lieutenant Governor of Massachusetts, 1916-1918; Governor, 1919-1920. elected Vice President in 1920, and became President on Harding's death, Aug. 2, 1923. On retirement he returned to his Northampton (Mass.) home.

Coolidge is a Congregationalist.

Mrs. Coolidge is the daughter of Capt. Andrew I. Goodhue and Almira Barret, and was born on Jan. 3, 1879, at Burlington, Vt. The Captain was a Democrat and was a steamboat inspector while Grover Cleveland was President. The President's wife graduated at the University of Vermont in 1902 and then taught at the Clarke Institute for the Deaf, Northampton, Mass. They had two children, John B. Coolidge, born in 1906, who graduated at Amherst College, in the spring of 1923; and Calvin Coolidge jr., born in 1908, who died in Washington, July 7, 1924. Mrs. Coolidge is a brunette, active in social work, skilled in cooking and needlework. She is a Congregationalist.

Herbert Clark Hoover is of Swiss ancestry, according to the latest information. His genealogy, as given by himself in the Abridged Compendium of American genealogy, Vol. I, page 370, is as follows:

Andrew Hoover, born in Baden, Germany, came to America about 1740, and settled in Maryland. He married Margaret Foutz. Their son, John Hoover, removed from North Carolina to Ohio, married Sarah ——. Their son, Jesse Hoover (1799-1856), settled at West Branch, Iowa, 1854, married Rebecca Yount. Their son, Eli Hoover (1820-1892), married (1st) Mary Davis. Their son, Jesse Clark Hoover (1847-1880), married Hulda Randall Minthorn (1848-1883). Their son, Herbert Hoover, was born at West Branch, Iowa, Aug. 10, 1874.

The Andrew or Andreas Hoover, or Huber, who was born in Baden, was the son of Jonas Huber, who lived at Ellerstadt, District of Durkheim (Rhenish Palatinate). Jonas was the son of Johann Heinrich Huber, linen weaver, native of the Swiss Canton of Berne.

Herbert Hoover's parents were Quakers; the father, a blacksmith; the mother, a preacher of her faith. They had two other children, Theodore, and Mary, still living.

Left an orphan in childhood, Herbert worked with two of his uncles, on their farms in Iowa and in the Indian Territory, and then emigrated with a third uncle, John Minthorn to Newberg, Oregon, where a pioneer Quaker settlement was founded. The lad had learned among the Osage Indians to hunt and fish, in what is now Oklahoma.

Herbert Hoover's education was begun at his Uncle John Minthorn's Pacific Academy, now Pacific College, and was finished at Leland Stanford Junior University, which he entered when it first opened, in the fall of 1891. He specialized in geology, worked his way through, and graduated in 1895. There he met Miss Lou Henry, also a student, whom he married in 1899.

As an undergraduate he worked for the Arkansas and the United States Geological Surveys. After some experience as an actual mine laborer in northern California, he started on the career of a mining engineer, and from 1895 to 1914 he was thus engaged, in this country, South America, Europe, and Asia. From 1902 to 1908 he was a partner in the London firm of Bewick, Moreing & Co., mine operators.

He was Chairman 1914-1915 of the American Relief Commission, at London; he was the head, 1915-18, of the American Commission for Relief in Belgium; chairman, April-Aug., 1917, of the Food Commission of the (U. S.) Council of National Defense; U. S. Food Administrator, Aug. 1917-June, 1919.

He was U. S. Secretary of Commerce, 1921-28; Chairman, in 1927, of the Mississippi Flood Relief Commission. He served on many other national conferences, and, after his election to the Presidency, late in 1928, he made a friendship tour of South America.

The President is 5 ft. 11 in. in height, sturdy, and his average weight is 195 lbs. He has brown hair and blue gray eyes.

Mrs. Hoover, whose maiden name was Lou Henry, was born at Waterloo, Iowa, daughter of a banker and man of means, who died in 1928. Because of the mother's poor health, the Henrys moved first to Whittier, in Los Angeles County, Calif., and then to Monterey, same state.

Mrs. Hoover went, as a bride, in 1899, to China, and took part with her husband in the defense of Tientsin in the Boxer outbreak of 1900.

The Hoovers have two children, Herbert Jr., and Allan. The former is married, and has two children.

Mrs. Hoover was brought up as an Episcopalian. She and her husband were united in marriage, at Monterey, by a priest, Father Ramon Mestres, of the Roman Catholic mission there. The Hoovers attend the Friends' Meeting House at Washington.

CHARLES CURTIS, VICE-PRESIDENT.

Charles Curtis, of Topeka, was elected Vice President of the United States on Nov. 6, 1928. He was born in Topeka, Shawnee Co., Kans., Jan. 25, 1860. His maternal grandmother was half French and half Indian of the Kaw tribe and he has always been proud of his Indian blood and early upbringing with the tribe. Mr. Curtis received his education in the common schools of Topeka and studied law there. He was admitted to the bar and entered into partnership with A. H. Case in 1881.

Mr. Curtis was elected to Congress in 1892 and served until January, 1907, when he was elected to the United States Senate to fill out the unexpired term of J. R. Burton, resigned, succeeding Hon. A. W. Benson, appointed ad interim, and for the full term beginning March 4, 1907. He was President pro tempore of the Senate from Dec. 4 to Dec. 12, 1911. Mr. Curtis received the popular vote for renomination in 1912, but lost the nomination under the district plan. The Kansas Legislature in the session of 1913 provided for the nomination of United States Senators by direct vote of the people, and at the primary in 1914 Mr. Curtis won the nomination over Senator J. L. Bristow, was elected and was relected in 1920 and 1926.

Mr. Curtis married Annie M. Baird, Nov. 27, 1884. His wife is dead. His children are Mrs. Permelia George, Henry K. Curtis, and Mrs. Leona Knight of Providence, R. I.

VICE PRESIDENTS OF THE UNITED STATES.

Dumba was recalled in 1915. After the Treaty of Versailles the U. S. sent and received separate envoys in the cases of Austria and Hungary, A. H. Washburn being the first Minister to *Austria*, and Theo. Brentano the first to *Hungary;* the latter sent as its first Minister to the U. S. Count Laszlo Szechenyi, in 1922.

The Austrian Minister to the United States, Edgar L. G. Prochnik, was appointed in 1925.

IMPEACHMENTS IN UNITED STATES HISTORY.

Under the Constitution, the President, Vice President, and all civil officers of the United States are liable to impeachment for "treason, bribery, or other high crimes and misdemeanors," and, on conviction, shall be removed from office.

The House of Representatives has the sole power of impeachment.

The Senate has the sole power to try all impeachments. When sitting for that purpose they shall be on oath or affirmation.

When the President of the United States is tried, the Chief Justice of the Supreme Court shall preside.

No conviction is had except by the concurrence of two-thirds of the members present.

Judgment in cases of impeachment shall not extend further than to removal from office, and disqualification to hold and enjoy any office of honor, trust, or profit under the United States; but the person convicted "shall nevertheless be liable and subject to indictment, trial, judgment, and punishment, according to law."

Impeachments to date have been as follows:

(1) William Blount, one of the first two Senators from Tennessee, accused of treason and sedition, in having plotted to aid Great Britain in wresting Florida and the Louisiana territory from Spain. Inciting the Cherokee Indians was a part of the alleged conspiracy.

President John Adams, July 3, 1797, asked the House and Senate for an inquiry. The Senate, 25 to 1, expelled Blount, July 8, 1797. The House, Dec. 4, 1797, impeached him, and the impeachment trial began Dec. 17, 1798.

His Counsel said the Senate had lost jurisdiction when it expelled Blount. The Senate, Jan. 10, 1799, by vote of 14 to 11, agreed to that view of the case, and dismissed the impeachment.

Meantime, Blount had been elected to the State Senate of Tennessee and had been chosen (Dec. 3, 1797) president of that body.

(2) John Pickering, Judge of the District Court of the United States for the District of New Hampshire; impeached 1803 for drunkenness and disregard of the terms of the statutes; trial March 3 to March 12, 1804; vote, 19 guilty, 7 not guilty; verdict, guilty; punishment, removal from office.

(3) Samuel Chase, Associate Justice of the Supreme Court of the United States; impeached 1804 for misconduct at trials of persons charged with breach of the Sedition Law; trial Nov. 30, 1804, to March 1, 1805; vote, 9 guilty, 30 not guilty, and 15 guilty, 19 not guilty, on different counts; verdict, acquittal.

(4) James Peck, Judge of the District Court of the United States for the District of Missouri; impeached for tyrannous treatment of counsel, 1830; trial May 11 to May 30, 1830, and from Dec. 13, 1830, to Jan. 31, 1831; vote, 22 guilty, 21 not guilty, verdict, acquittal.

(5) West H. Humphreys, Judge of the District Court of the United States for the District of Tennessee, impeached 1862 for supporting the secession movement and unlawfully acting as Judge of the Confederate District Court; trial May 22 to June 26, 1862; vote, 32 guilty, 4 not guilty; verdict, guilty; punishment, removal from office.

(6) Andrew Johnson, President of the United States, impeached for usurpation of the law, corrupt use of the veto power, interference at elections and high crimes and misdemeanors; trial, March 30 to May 26, 1868; vote, guilty, 35, not guilty, 19; verdict, acquittal.

(7) William W. Belknap, Secretary of War of the United States, impeached for accepting bribes; trial, April 5 to Aug. 1, 1876; vote, guilty 5, not guilty, 25; verdict, acquittal.

(8) Charles Swayne, Judge of the District Court of the United States for the District of Florida; impeached 1905 for misconduct in office; trial Feb 6 to Feb. 27, 1905; vote, 55 guilty, 37 not guilty verdict, acquittal.

(9) Robert W. Archibald, Associate Judge of United States Commerce Court, was impeached July 11, 1912, on thirteen articles charging him with corrupt collusion with coal mine owners and railroad officials while in office. The Senate began his trial Dec. 3, 1912, and ended Jan. 13, 1913; verdict, guilty; removal from office.

(10) United States District Judge, Alston G. Dayton, Northern District of West Virginia, was impeached, June 12, 1914; proceedings abandoned March 3, 1915.

(11) George W. English, U. S. District Judge, East. Dist., Ill. The House, April 1, 1926, voted his impeachment. He resigned.

THE UNITED STATES IMMIGRATION LAW.

(The Federal Law of Aug. 3, 1882 levied a duty of 50 cents on each alien immigrant—the first head tax.)

THE QUOTA LAW.

The new United States Immigration Quota Law proclaimed in operation, as of July 1, 1929, admits yearly about 153,741 alien immigrants, as against 164,667 under the old law.

Under the new law the undesirable or ineligible aliens are largely weeded out before they start instead of after they get here.

The law relieves the great body of immigrants of detention at Ellis Island and removes many causes for delays and misfortunes after they reach American ports.

The American Consuls are directed to examine the information given on questionnaires and eliminate applicants who are feeble-minded and whose prison records make them undesirable.

The principal United States consular officer in each foreign country is designated as quota-control officer, and it is his duty to see that the quota is not exceeded. The Consular service is under the Department of State.

If an alien obtains a certificate and later changes his mind about emigrating to the United States, his place cannot be taken by another and he will be keeping some one else from coming.

REGISTRY OF ALIENS UNDER THE ACT OF MARCH 2, 1929.

The Act provides as follows:

(a) The registry of aliens at ports of entry required by section 1 of the Act of June 29, 1906, may be made as to any alien not ineligible to citizenship in whose case there is no record of admission for permanent residence, if such alien shall make a satisfactory showing to the Commissioner General of Immigration, in accordance with regulations prescribed by the Commissioner General of Immigration, with the approval of the Secretary of Labor, that he—

(1) Entered the United States prior to June 3, 1921;

(2) Has resided in the United States continuously since such entry;

(3) Is a person of good moral character; and

(4) Is not subject to deportation.

(b) For each such record of registry made as herein authorized the alien shall pay to the Commissioner General of Immigration a fee of $20.

For the purposes of the immigration laws and the naturalization laws an alien, in respect of whom a record of registry has been made as authorized by section 1 of this Act, shall be deemed to have been lawfully admitted to the United States for permanent residence as of the date of his entry.

THE JAPANESE EXCLUSION CLAUSE.

(The quotas are available only for persons born in the respective countries who are eligible to citizenship in the United States and admissible by the Immigration Law. This clause excludes Japanese, Chinese and other yellow races.)

A non-quota immigrant is:

(a) An immigrant who is the unmarried child under 21 years, or the wife, of a citizen of the U. S. or the husband of a citizen of the United States by a marriage occurring prior to June 1, 1928.

(b) An immigrant previously lawfully admitted to the United States, who is returning from a temporary visit abroad;

(c) An immigrant who was born in Canada, Newfoundland, Mexico, Cuba, Haiti, Dominican Republic, the Canal Zone, or an independent country of Central or South America, and his wife, and his unmarried children under 18 years, if accompanying or following to join him;

(d) An immigrant who continuously for at least two years immediately preceding the time of his application for admission to the U. S. has been, and who seeks to enter the U. S. solely for the purpose of, carrying on the vocation of minister, or professor and his wife, and his unmarried children under 18 years, if accompanying or following to join him;

(e) An immigrant who is a bona fide student at least 15 years of age and who seeks to enter the United States solely for the purpose of study at an accredited school; or

(f) A woman who was a citizen of the United States and who prior to September 22, 1922, lost her citizenship by reason of her marriage to an alien, but at the time of her application for an immigration visa is unmarried.

A quota immigrant is any other than a non-quota.

An alien who is not particularly specified in this act as a non-quota immigrant or a non-immigrant shall not be admitted as a non-quota immigrant or a non-immigrant by reason of relationship to any individual who is so specified or by reason of being excepted from the operation of any other law regulating or forbidding immigration.

IMMIGRATION VISAS.

Visas are issued to immigrants at $9 apiece (plus $1 for executing the application) by the United States consular officers abroad. They constitute the document which admits them to this country. Each visa contains the full details as to the immigrant's nationality, history, etc.; also a description of him, with his photograph.

A visa is good for four months, not counting the ocean trip, and it also validates a passport.

The steamship companies must keep a record of each visa they handle.

When the alien reaches the United States his visa is taken by the immigration officer at the port of arrival, who inspects the holder and, if the immigrant is acceptable, permits the person to enter and forwards the visa to the United States Department of Labor at Washington.

With the following exceptions all aliens are required to obtain from an American consular officer abroad an immigration visa before they can be admitted to the United States:

(1) A governmental official, his family, attendants, servants, and employees; (2) an alien visiting the United States temporarily as a tourist or temporarily for business or pleasure.

(3) An alien in continuous transit through the United States.

(4) An alien lawfully admitted to the United States who later goes in transit from one part of the United States to another through foreign contiguous territory.

(5) A bona fide alien seaman serving as such on a vessel arriving at a port of the United States and seeking to enter temporarily the United States solely in the pursuit of his calling as a seaman.

(6) An alien entitled to enter the United States solely to carry on trade under and in pursuance of the provisions of a present existing treaty of commerce and navigation.

(7) An alien, lawfully resident in the United States, who is returning from a temporary visit abroad and who is possessed of an unexpired return permit.

(8) (a) Aliens who have been previously lawfully admitted to the United States and who are returning from a temporary visit of not more than six months to Canada, Newfoundland, Bermuda, St. Pierre, Miquelon, Mexico, and islands included in the Bahamas and Greater Antilles groups, or such aliens who are returning from a temporary visit to any other foreign country and who are in possession of a permit to reenter the U. S. issued in accordance with the provisions of the immigration act of 1924, and (b) children born subsequent to the issuance of an immigration visa to the accompanying parent, if otherwise admissible, shall be permitted to enter the U. S. without an immigration visa.

Non-immigrant citizens of Canada, Newfoundland, Bermuda, the Bahamas, and British possessions in the Greater Antilles or British subjects domiciled therein or non-immigrant citizens of St. Pierre, or Miquelon, or French citizens domiciled therein, or non-immigrant citizens of Mexico, Cuba, Santo Domingo, or Haiti, if otherwise admissible, shall be permitted to enter the U. S. without a passport visa.

Where an immigrant arriving in the U. S. by water or arriving by water at a port designated as a U. S. port of entry for aliens in foreign contiguous territory, is in possession of and presents an immigration visa or permit to reenter which has expired, such immigrant shall be excluded unless it shall satisfactorily appear that the immigrant embarked on the vessel by which he arrives prior to the expiration of the validity of such immigration visa or permit and that he has proceeded by continuous voyage to the U. S.

An alien in the United States going abroad, for a visit may, on application, if his title is clear get for $3 from the Commissioner General of Immigration at Washington a re-entry permit.

A false statement under oath in any immigration document is punishable, on conviction, by not more than $10,000 fine or five years in prison, or both.

Steamship fines are fixed at $1,000, plus refunded fare, for each immigrant involved in attempted unlawful entry.

The 109,000 Japanese residing in the Hawaiian Islands are not affected by the exclusion provisions of the new Immigration Act, but are still subject to the restrictions of the General Immigration Act of Feb. 5, 1917. Secretary of Labor Davis ruled on July 15, 1924.

EXCLUDED CLASSES.

(1) All idiots, imbeciles, feeble-minded persons, epileptics, insane persons; persons who have had one or more attacks of insanity at any time previously; persons of constitutional psychopathic inferiority; persons with chronic alcoholism; paupers; profes-

sional beggars, vagrants, persons afflicted with tuberculosis in any form or with a loathsome or dangerous, contagious disease; persons not comprehended within any of the foregoing excluded classes who are found to be and are certified by the examining surgeon as being mentally or physically defective, such physical defect being of a nature which may affect the ability of such alien to earn a living; persons who have been convicted of or admit having committed a felony or other crime or misdemeanor involving moral turpitude; polygamists, or persons who practice polygamy or believe in or advocate the practise of polygamy.

(2) Anarchists, or persons who believe in or advocate the overthrow by force or violence of the Government of the United States or of all forms of law or who disbelieve in or are opposed to organized government, or who advocate the assassination of public officials, or who advocate or teach the unlawful destruction of property; persons who are members of or affiliated with any organization entertaining and teaching disbelief in or opposition to organized government, or who advocate or teach the duty, necessity, or propriety of the unlawfull assaulting or killing of any officer or officers, either of specific individuals or of officers generally, of the Government of the United States or of any other organized Government because of his or their official character, or who advocate or teach the unlawful destruction of property; prostitutes, or persons coming into the United States for the purpose of prostitution or for any other immoral purpose; persons who directly or indirectly procure or attempt to procure or import prostitutes or persons for the purpose of prostitution or for any other immoral purpose; persons who are supported by or receive in whole or in part the proceeds of prostitution.

(3) Persons, hereinafter called contract laborers, who have been induced, assisted, encouraged, or solicited to migrate to this country by offers or promises of employment, whether such offers or promises are true or false, or in consequence of agreements, oral, written, or printed, express or implied, to perform labor in this country of any kind, skilled or unskilled; persons who have come in consequence of advertisements for laborers printed, published, or distributed in a foreign country; persons likely to become a public charge, persons who have been excluded from admission and deported in pursuance of law, and who may again seek admission within one year from the date of such deportation, unless prior to their re-embarkation at a foreign port or their attempt to be admitted from foreign contiguous territory the Secretary of Labor shall have consented to the reapplying for admission.

Persons whose ticket or passage is paid for with the money of another, or who are assisted by others to come, unless it is affirmatively and satisfactorily shown that such persons do not belong to one of the foregoing excluded classes; persons whose ticket or passage is paid for by any corporation, association, society, municipality, or foreign Government, either directly or indirectly; stowaways, except that any such stowaway, if otherwise admissible, may be admitted in the discretion of the Secretary of Labor, all children under sixteen years of age unaccompanied by or not coming to one or both of their parents, except that any such children may, in the discretion of the Secretary of Labor, be admitted if in his opinion they are not likely to become a public charge and are otherwise eligible.

(4) Unless otherwise provided for by existing treaties, persons who are natives of islands not possessed by the United States adjacent to the continent of Asia, situate south of the twentieth parallel latitude north, west of the one hundred and sixtieth meridian of longitude east from Greenwich, and north of the tenth parallel of latitude south, or who are natives of any country, province, or dependency situate on the continent of Asia west of the one hundred and tenth meridian of longitude east from Greenwich and east of the fiftieth meridian of longitude east from Greenwich and south of the fiftieth parallel of latitude north, except that portion of said territory situate between the fiftieth and the sixty-fourth meridians of longitude east from Greenwich and the twenty-fourth and thirty-eighth parallels of latitude north, and no alien now in any way excluded from or prevented from entering the United States shall be admitted to the United States.

(5) Aliens who have been arrested and deported in pursuance of law, as distinguished from persons excluded and deported, regardless of when such deportation occurred. He cannot land even as a seaman, except to go to a hospital.

ILLITERACY.

All aliens over 16 years of age who cannot read the English language or some other language or dialect, including Hebrew or Yiddish, are excluded, with the following exceptions:

(a) Persons who are physically incapable of reading.

(b) Any admissible alien or any alien heretofore or hereafter legally admitted, or any citizen of the United States may bring in or send for his father or grandfather, over 55 years of age, his wife, his mother, his grandmother, or his unmarried or widowed daughter, who, if otherwise admissible, may be admitted whether such relative can read or not.

(c) Persons seeking admission to the United States to avoid religious persecution in the country of their last permanent residence.

(d) Persons previously residing in the United States who were lawfully admitted, resided continuously therein for five years, and return thereto within six months from the date of their departure therefrom.

(e) Persons in transit through the United States.

(f) Persons lawfully admitted and who later go in transit through foreign contiguous territory (the period an alien may remain in foreign contiguous territory while in transit under this exemption shall be limited to sixty days; an alien may leave and enter the United States at the same port and still be in transit within the meaning hereof).

(g) Exhibitors and employees of fairs and expositions authorized by Congress.

(h) Aliens whose ability to read can be readily determined by any ordinary method approved by the department may be excused from the actual taking of the test.

Skilled labor, if otherwise admissible, may be imported if labor of like kind unemployed cannot be found in this country.

The provisions of law applicable to contract labor shall not be held to exclude professional actors, artists, lecturers, singers, nurses, ministers of any religious denomination, professors for colleges or seminaries, persons belonging to any recognized learned profession, or persons employed as domestic servants.

VIOLATIONS AND PENALTIES.

Violations of the immoral-women clause are punishable, on conviction, by imprisonment up to ten years and a fine up to $5.000. Violations of the contract-labor clause are punishable, on conviction, by $1,000 fine in each case and (or) imprisonment up to two years. Violations of the Anarchist clause carry prison up to five years and fine up to $5,000. Other violations carry various penalties. It is unlawful for any person or concern engaged in bringing immigrants to give fare rebates or to solicit immigration; penalty, $300 fine in each case. The penalty for smuggling immigrants is fine up to $2,000 and prison up to five years.

Any alien who has been excluded from admission to the United States for any cause and who again seeks admission within one year from the date of such exclusion shall be excluded, unless prior to re-embarkation at a place outside of the United States or his attempt to be admitted from foreign contiguous territory the Secretary of Labor has consented to his reapplying for admission.

Any alien who, after March 4, 1929, enters the United States at any time or place other than as designated by immigration officials or who eludes or has eluded examination or inspection by immigration officials, or who obtains or has obtained entry to the United States by a willfully false or misleading representation or the willful concealment of a material fact, shall be guilty of a misdemeanor and, upon conviction, shall be punished by imprisonment for not more than one year or by a fine of not more than $1,000, or by both such fine and imprisonment.

Any alien sentenced to imprisonment shall not be deported under any provision of law until after the termination of the imprisonment.

Incoming aliens at all United States ports are examined by immigrant inspectors and are liable to examination by United States Public Health Service doctors. An alien can appeal to a board of special inquiry, and then to the Secretary of Labor whose word is final. Excluded aliens are returned at the ship's expense.

An alien certified for insanity or mental defect may appeal to a board of U. S. Public Health Service medical officers.

Aliens may be deported at any time within five years of their arrival if found guilty of crime or of having been of the excluded classes at arrival. An alien otherwise admissible may be let in by giving a cash bond that he or she will not become a public charge. The amount of cash is fixed in each case by the Secretary of Labor. It is unlawful for a ship to pay off or discharge an alien seaman in a U. S. port unless he lands merely to reship. An alien seaman unlawfully entered may be deported within three years of arrival, and this applies to any other person who got in unlawfully and who was not of the excluded classes.

Every alien who may not appear to the examining immigrant inspector at the port of arrival to be

clearly and beyond a doubt entitled to land under the provisions of this act, or any other immigration law, shall be detained for examination in relation thereto by a board of special inquiry.

Aliens excluded by a board of special inquiry, under the provisions of this act, shall be entitled to the right of appeal to the Secretary of Labor.

Effective July 1, 1928, an "immigrant" identification card is issued by consuls in the case of each "immigrant," quota and nonquota (except students), receiving a quota or nonquota immigration visa. The term "immigrant" is to be understood as defined by the Immigration Act of 1924.

PASSPORT REGULATIONS.

From and after Oct. 1, 1926, a large number of American Consular officers abroad were authorized to issue passports to American citizens abroad.

The State Department is not required by law to demand an oath of allegiance of American citizens applying for passports to travel abroad, Wilbur J. Carr, Assistant Secretary of State, notified H. Ralph Burton, general counsel for the Daughters of the American Revolution and several other patriotic societies, in a letter made public on July 23, 1929 by the Department.

Carr's letter was in defense of the State Department's decision to issue a passport to Dorothy Detzer, secretary of the Women's International League for Peace and Freedom, after she had definitely refused to accept that part of the usual oath which pledges departing citizens to "support and defend" the Constitution of the United States. Miss Detzer was permitted to take an oath to "support" the Constitution, with the promise to "defend" it omitted.

Passports will be issued by consuls only to applicants of the classes named below under the conditions described and in accordance with certain general instructions of the department:

(A). To native citizens, to whom departmental passports have been issued or who have been included in departmental passports subsequent to Jan. 3, 1918 and to native citizens who are identified by service passports issued to or including them.

(B). To native and naturalized citizens, whose registration at a consulate is valid at the time when the application for a passport is filed and has received the approval of the department.

(C). To naturalized citizens, to whom departmental passports have been issued, or who have been included in departmental passports, subsequent to Jan. 3, 1918, and provided they are able to submit evidence clearly establishing that they are in a position to rebut the presumption of expatriation prescribed by Section 2 of the Act of March 2, 1907.

(D). To citizens not included in the classes named above, in certain emergency cases.

There are still certain instances in which consuls will not be allowed to issue passports, the passports in these cases having to come from the State Department or be specifically authorized by it. The classes of persons in these cases were named as follows:

(A). Naturalized citizens against whom the presumption of having ceased to be citizens has arisen, i. e., those naturalized citizens who have resided for two years or more in the foreign State from which they came, or for five years in any other foreign State, where doubt exists as to whether they are in a position to rebut this presumption except when the registration as citizens of such persons is current and approved by the department.

(B). Women who were citizens of the United States but who, having been married to aliens after Sept. 22, 1922, may have become subject to the presumption of expatriation, unless such women desire to return to the United States for permanent residence.

(C). Persons who claim American citizenship, but who have never established their claims or whose claims are open to doubt. This class will include, among others:

1. Those persons who claim citizenship by birth in the United States and who adduce evidence in proof of their claims, the authenticity of which requires verification.

2. Those who claim citizenship by birth but who possess dual nationality and whose claims to the protection of this Government are of doubtful validity.

A consular officer will not be authorized finally to refuse to issue a passport, since such authority is vested only in the Secretary of State.

GENERAL PASSPORT REGULATIONS.

1. Authority to Issue—The Secretary of State may grant and issue passports, and cause passports to be granted, issued, and verified in foreign countries by diplomatic representatives of the United States.

2. To Whom Passports Are Issued—Section 4076 of the Revised Statutes of the United States (U. S. Comp. Stat., 1901, 2765) provides that "no passport shall be granted or issued to or verified for any other persons than those owing allegiance, whether citizens or not, to the United States." Persons who have declared their intention to become citizens are not classed as citizens.

3. By Whom Issued and Refusal to Issue—No one but the Secretary of State may grant and issue passports in the United States.

A citizen who is abroad and desires to procure a passport must apply therefore to the nearest consular officer. Applications for passports by persons in Hawaii, Porto Rico or the Philippines should be made to the chief executive of those islands.

4. Fee—A fee of $9 is required to be collected for every citizen's passport issued. That amount in currency or postal money order should accompany each application made by a citizen or person owing allegiance or entitled to the protection of the United States. Orders should be made payable to the Disbursing Clerk of the Department of State. Drafts or checks will not be accepted. No fee charged for the issue of a passport to widow, child, parent, brother or sister of an American soldier, sailor or marine buried abroad, to visit country of burial. A fee of $1 is, however, charged for executing all applications for passports.

VISA FEES ABOLISHED.

By negotiations through American diplomatic and consular offices, non-immigrant visa fees have been waived entirely as between the United States and Albania, Belgium, Costa Rica, Denmark, Estonia, Finland, Germany, Guatemala, Honduras, Iceland, Italy, Japan, Liberia, Liechtenstein, Mexico, Nicaragua, Panama, Persia, Salvador, Siam, Sweden, Switzerland.

The following countries have not abolished such visa fees but have reduced them as shown: Austria, $2; Bulgaria, $2; Chile, $4; Czechoslovia, $1; France, $2; The Netherlands, $1; Poland, $4; Spain, $1.93; Yugoslavia, $2.

5. Applications: Affidavit of Applicant—A person who is entitled to receive a passport, if within the United States, must submit a written application.

The application must be made before a clerk of a Federal court or a State court authorized to naturalize aliens, within the jurisdiction of which the application or his witness resides, and the seal of the court must be affixed, unless there is in such place an agent of the Department of State, in which case the application must be made before such agent. Passport agents are located in New York City, Chicago, Boston, Seattle, San Francisco and New Orleans.

A person applying for a passport or for a renewal of his passport or for an amendment thereto to include additional countries should state in a brief form the object or objects of his proposed trip abroad.

Passports are ordinarily issued valid for all countries.

(c) Photographs—The application must be accompanied by duplicate photographs of the applicant, on thin paper, unmounted, and not larger in size than three by three inches.

(d) Witness—The application must be supported by an affidavit of at least one credible witness, who has known the applicant at least two years.

The witness, in signing the application, should state the nature of his profession or business and his professional or business address. *No lawyer or other person will be accepted as witness to a passport application if he has received or expects to receive a fee for his services in connection therewith.* A passport issued by the Secretary of State on and after Jan. 3, 1918, to which is attached the photograph and signature of the person to whom the passport was originally issued, will be accepted in lieu of an identifying witness.

6. Native Citizen—A person born in the United States in a place where births are recorded will be required to submit a birth certificate, bearing the official seal of the certifying officer, with his application. If a birth certificate is not obtainable, the application must be supported by a baptismal certificate or an affidavit of the physician who attended the birth or affidavits of parents or other reputable persons having sufficient knowledge.

7. A Person Born Abroad Whose Father Was a Native Citizen of the United States—His application must show what his father was born in the United States, resided therein, and was a citizen at the time of the applicant's birth.

8. Naturalized Citizen—A naturalized citizen

must transmit his certificate of naturalization, or a duly certified copy of the court record thereof, with his application. It will be returned to him after inspection. He must state in his affidavit when he emigrated to this country, where he has lived since his arrival in the United States, when and before what court he was naturalized, and that he is the identical person described in the certificate of naturalization.

9. Woman's Application — She should state whether she has ever been married. A woman married to an American citizen prior to the Act of Congress approved Sept. 22, 1922, has the same citizenship as her husband unless she was, because of her race, ineligible to naturalization. If she is the wife of a native citizen of the United States, the fact should be made to appear in her application, which should be made according to the form prescribed for a native citizen, whether she was born in this country or abroad. If she is the wife of a naturalized citizen, she must transmit for inspection her husband's certificate of naturalization or a certified copy of the court record thereof, must state that she is the wife of the person described therein, and must set forth the facts of his birth, immigration, naturalization, and residence, as required in the rules governing the application of a naturalized citizen. A woman married after the passage of the Act of Congress mentioned above, does not take the citizenship of her husband and therefore she must submit evidence of her own American citizenship. The wife of an alien who was naturalized after Sept. 22, 1922, does not acquire American citizenship by virtue of her husband's naturalization. A married woman should sign her own Christian name with the family name of her husband.

10. The Child of a Naturalized Citizen Claiming Citizenship Through the Naturalization of the Parent—The applicant must state that he or she is the son or daughter, as the case may be, of the person described in the certificate of naturalization, which must be submitted for inspection, and must set forth the facts of emigration, naturalization, and residence.

11. A Resident of an Insular Possession of the United States Who Owes Allegiance to the United States—He must state that he owes allegiance to the United States and that he does not acknowledge allegiance to any other government, and must submit affidavits from at least two credible witnesses who are able to corroborate his statements as to birth, residence, and loyalty.

12. Expiration of Passport—The validity of a passport shall be limited to a period of two years: Provided, that the Secretary of State may limit the validity of a passport to a shorter period. And Provided further, that a passport may be renewed without any additional charge under regulations prescribed by the Secretary of State, and at his discretion to bona fide teachers, but the final date of expiration shall not be more than four years from the original date of issue.

A passport which was issued to a bona fide teacher less than two years prior to July 3, 1926, may be renewed so as to make it valid for a full period of four years; and passports issued on and after that date to bona fide teachers may likewise be extended at any time within four years so as to make the total period of validity four years from the date of issue.

The term "teacher" does not include persons engaged as private tutors or governesses. A new passport will be issued upon a new application.

13. Wife, Minor Children—When the applicant is accompanied by his wife and minor children who owe allegiance to the United States, one passport will suffice for all.

14. Titles—Professional and other titles will not be inserted in passports, but an applicant's name in religion, an author's nom de plume, a stage name, etc., may be included in parentheses.

15. Surrender of Old Passports—An applicant for a new passport who holds an expired or unexpired passport or passports issued on or after Jan. 3, 1918, should submit the latter to the official before whom he executed his application for a new passport.

16. Blank Forms of Application—They will be furnished by the department free of charge.

17. Address—Communications should be addressed to the Department of State, Passport Division, Washington, D. C.

Citizens of St. Pierre and Miquelon and French citizens domiciled therein, citizens of Canada, Newfoundland, Bermuda, the Bahamas and British possessions in the Greater Antilles and British subjects domiciled therein, citizens of Panama, Mexico, Cuba, Haiti and the Dominican Republic may pass in transit through the United States or enter the United States temporarily without passports or visas.

Non-Citizens embarking on a trip to Europe must present income tax receipts or certificates of exemption and secure a sailing permit issued by Internal Revenue officials.

Resident aliens who intend to come back may apply for a return permit from the Department of Labor or a non-quota visa from an American Consul abroad.

Return permits can be obtained only in the United States.

Application for such a permit is made on a special form and should be sent to the Commissioner General of Immigration at Washington, with two photographs 2½ by 3½ inches in size, with $3.

A return permit is issued for one year and may be extended for six months.

Passengers who are not in possession of a permit to re-enter but who wish to return to the United States must visit the nearest American consulate abroad and make an application for a non-quota visa to return. A fee of $10 is charged for such a visa.

Note—The passport office at New York City is in the Sub Treasury building, Wall and Nassau Sts.

Most all foreign countries require passports to be visaed by their consuls stationed in the U. S.

TRAVELERS BY AIR.

Dirigible balloon and airplane operators and passengers between the United States and foreign countries are subject to the same general laws and regulations that govern steamship and sailing vessel travel and operation.

Passports, and health examinations, and customs inquisitions, go with all of the known modes of getting across the oceans and national frontiers.

ACKNOWLEDGMENT OF DEEDS.

AN ACKNOWLEDGMENT is the act of declaring the execution of an instrument before an officer authorized to certify to such declaration. The officer certifies to the fact of such declaration, and to his knowledge of the identity of the person so declaring. Conveyances or deeds of land to be entitled to be recorded must first be acknowledged before a proper officer. Most of the States have forms of acknowledgments, which should be followed.

Acknowledgments may be taken in general by Notaries Public, Justices of the Peace, Judges or Clerks of Courts of the higher grades, Registers, Masters in Chancery, Court Commissioners, Town Clerks, Mayors and Clerks of Incorporated cities, within their respective jurisdictions.

REQUISITES TO VALID DEED.

The requisites to a valid deed are the same in general as other contracts, but the appointment of an attorney to execute a deed for another person must in general be executed with the same formalities requisite to the deed itself.

In N. Y. State, under the Common Law, a deed could be legally executed and acknowledged on Sunday. There is now nothing in the statutes to the contrary.

SEALS or their equivalent (or whatever is intended as such) are necessary in Alaska, Connecticut, Delaware, District of Columbia, Florida, Idaho, Illinois, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, North Carolina, Oregon, Pennsylvania, South Carolina, Vermont, Virginia, West Virginia, Wisconsin, Wyoming. In almost all the States deeds by corporations must be under seal. FORMS are prescribed or indicated by the statutes of most of the States except Connecticut, Florida, Louisiana. SEPARATE ACKNOWLEDGMENT by wife is required in Alaska, Arkansas, Delaware, District of Columbia, Florida, Georgia, Idaho, Kentucky, Louisiana, Montana, Nevada, North Carolina, Oregon, Pennsylvania, South Carolina, Tennessee, Texas. ONE WITNESS to the execution of deeds is required in District of Columbia, Maine (customary), Maryland, Nebraska, New Jersey (usual), Oklahoma, Utah, Wyoming. TWO WITNESSES to the execution of deeds are required in Arkansas, Connecticut, Florida, Georgia, Louisiana, Michigan, Minnesota, New Hampshire, Ohio, Oregon, South Carolina, Texas, Vermont, Wisconsin.

UNITED STATES NATURALIZATION LAWS.

The law of March 2. 1929. says that "no alien shall be admitted to citizenship unless (1) immediately preceding the date of his petition the alien has resided continuously within the United States for at least five years and within the county where the petitioner resided at the time of filing his petition for at least six months, (2) he has resided continuously within the United States from the date of his petition up to the time of his admission to citizenship, and (3) during all the periods referred to in this subdivision he has behaved as a person of good moral character, attached to the principles of the Constitution of the United States, and well disposed to the good order and happiness of the United States.

"At the hearing of the petition, residence in the county where the petitioner resides at the time of filing his petition, and the other qualifications required by this subdivision during such residence, shall be proved by the oral testimony of at least two credible witnesses, citizens of the United States, in addition to the affidavits required by this Act to be included in the petition.

"If the petitioner has resided in two or more places in such county and for this reason two witnesses can not be procured to testify as to all such residence, it may be proved by the oral testimony of two such witnesses for each such place of residence, in addition to the affidavits required by this Act to be included in the petition.

"At the hearing, residence within the United States but outside the county, and the other qualifications required by this subdivision during such residence shall be proved either by depositions made before a naturalization examiner or by the oral testimony of at least two such witnesses for each place of residence.

"If an individual returns to the country of his allegiance and remains therein for a continuous period of more than six months and less than one year during the period immediately preceding the date of filing the petition for citizenship for which continuous residence is required as a condition precedent to admission to citizenship, the continuity of such residence shall be presumed to be broken, but such presumption may be overcome by the presentation of satisfactory evidence that such individual had a reasonable cause for not returning to the United States prior to the expiration of such six months.

"Absence from the United States for a continuous period of one year or more during the period immediately preceding the date of filing the petition for citizenship for which continuous residence is required as a condition precedent to admission to citizenship, shall break the continuity of such residence."

No declaration or petition shall be made outside the office of the Clerk of the Court.

By an act of Congress approved Sept. 22, 1922, it is provided that after that date the citizenship status of a married woman shall no longer follow that of the husband, and that thereafter a married woman shall have the privilege of becoming naturalized on her own account.

An alien woman who marries a citizen or whose husband is naturalized after September 22, 1922, or a woman who lost her United States citizenship because of marriage before that date to an alien eligible to citizenship, may be naturalized without making a declaration of intention and after but one year's residence in the United States.

An alien woman married to an alien at the time of the passage of the above act, or who thereafter marries an alien, may become naturalized by complying with all requirements of the naturalization laws, including declaration, five years' continuous United States residence, six months continuous residence, and certificate of arrival.

The status of *single* alien women is not affected by this law, and women of this class may continue as in the past to file declarations and petitions for the purpose of becoming naturalized.

The act referred to further provides that any woman citizen who marries an alien ineligible to citizenship, shall cease to be a citizen, that no married woman whose husband is not eligible to citizenship shall be naturalized during the continuance of the marital status, and that she herself must be eligible to citizenship. Eligibility for citizenship is determined almost entirely by the question of whether the persons concerned are "white persons" or "persons of African nativity or African descent," as provided by the Revised Statutes.

No person under 18 years of age can file a declaration of intent.

A petition may not be heard until the expiration of at least ninety days after it is filed.

Judges of the United States District Courts are given authority by the act of June 8, 1926, to designate naturalization examiners to conduct preliminary hearings on petitions for naturalization and make findings and recommendations to the court.

The Naturalization Bureau is a part of the United States Department of Labor, at Washington, to which inquiries on details of the law and the regulations are to be addressed.

Not included above are certificates issued to American soldiers or sailors in the World War, as follows—(1918) 63,993; (1919) 128,335; (1920) 51,-972; (1921) 17,636; (1922) 9,468; (1923) 7,109; (1924) 10,170; (1925) not separately stated; (1926) 02; (1927) 4,311; (1928) 5,149.

NO PRESIDENT FOR TWELVE HOURS?

Who is President from midnight of March 3, when the term expires, to the hour on March 4 when the President-elect takes the oath of office?

No provision of law appears to have specific application to this situation.

The Presidential Succession Act (Act of January 19, 1886, 24 Stat. L 1) has application only to the "removal, death, resignation or inability of both the President and Vice-President."

Chief Justice John Marshall, in a letter of Feb. 20, 1821, to a distinguished inquirer, said:

"I have conversed with my brethren on the subject you suggested when I had the pleasure of seeing you, and will take the liberty to communicate the result.

"As the Constitution only provides that the President shall take the oath it prescribes 'before he enter on the execution of his office,' and as the law is silent on the subject, the time seems to be in some measure at the discretion of that high officer. There is an obvious propriety in taking the oath as soon as it can conveniently be taken, and thereby shortening the interval in which the executive power is suspended.

"But some interval is inevitable. The time of the actual President will expire, and that of the President-elect commence, at twelve in the night of the 3rd of March. It has been usual to take the oath at midday on the 4th.

"Thus there has been uniformly and voluntarily an interval of twelve hours during which the executive power could not be exercised. This interval may be unavoidably prolonged. Circumstances may prevent the declaration of the person who is chosen until it shall be too late to communicate the intelligence of his election until after the 4th of March. This occurred at the first election.

"Undoubtedly, on any pressing emergency the President might take the oath in the first hour of the 4th of March, but it has never been thought necessary so to do, and he has always named such hour as he deemed most convenient.

"If any circumstance should render it unfit to take the oath on the 4th of March, and the public business would sustain no injury by its being deferred till the 5th, no impropriety is perceived in deferring it till the 5th."

COPYRIGHT LAW OF THE UNITED STATES.

The copyright law provides that the application for registration of any work "shall specify to which of the following classes the work in which copyright is claimed belongs":

(a) Books including composite and cyclopaedic works, directories, gazetteers and other compilations; (b) periodicals, including newspapers; (c) lectures, sermons, addresses, prepared for oral delivery; (d) dramatic or dramatico-musical compositions; (e) musical compositions; (f) maps; (g) works of art, models or designs for works of art; (h) reproductions of a work of art; (i) drawings or plastic works of a scientific or technical character; (j) photographs; (k) prints and pictorial illustrations; (l) motion picture photo plays; (m) motion pictures other than photo plays.

For works reproduced in copies for sale or public distribution: 1. Publish the work with the copyright notice. The notice may be in the form "Copyright, 19.... (year date of publication), by..... (name of copyright proprietor), or in the case of works specified above (f) to (k) the notice may consist of the letter C inclosed in a circle ( ) accompanied by the initials, monogram, mark or symbol of the proprietor—provided that his name shall appear on some accessible part of the copies." 2. Promptly after publication send to the Copyright Office, Library of Congress, Washington, D. C., two copies (or if the work is by a foreign citizen and is first published in a foreign country, one copy only) of the best edition of the work, with an application for registration.

In the case of books by American authors, or permanent residents of the United States, the copies deposited must be accompanied by an affidavit, under the official seal of an officer authorized to administer oaths, stating that the typesetting, printing and binding of the book have been performed within the United States. Affidavit and application forms will be supplied by the Copyright Office on request.

Books of foreign origin in a language or languages other than English are not required to be manufactured in the United States. In the case of a book in the English language published abroad before publication in this country, an *ad interim* copyright for four months from the day of the deposit of the foreign copy may be secured by depositing in the Copyright Office one complete copy of the foreign edition within sixty days after its publication abroad. If two copies of such book manufactured and published in this country are deposited for registration during the *ad interim* term, the copyright shall be extended for the full term of twenty-eight years.

For works not reproduced in copies for sale: Copyright may also be had of certain classes of works (see a, b, c, below) of which copies are not reproduced for sale, by filing in the Copyright Office an application for registration, with the statutory fee of $1, sending therewith: (a) In the case of lectures or other oral addresses or of dramatic or musical compositions, one complete manuscript or typewritten copy of the work; (b) In the case of photographs not intended for general circulation, one photographic print. (c) In the case of works of art (paintings, drawings, sculpture), or of drawings or plastic works of a scientific or technical character, one photograph or other identifying production of the work. In the case of a motion picture photo-play, a title and description and one print taken from each scene or act. In case of a motion picture other than a photo-play, a title and description with not less than two prints to be taken from different sections of a complete motion picture. In all these cases, if the work is later reproduced in copies for sale, two copies must then be deposited with another application and fee

By an amendatory Act of Congress effective July 1, 1928, the statutory fee for registration of a published work subject to copyright was increased to $2.

This includes the Copyright Office certificate under seal.

For registration of a published photograph where a certificate is not desired the fee is $1.

For dramas, music, lectures and works of art not reproduced in copies for sale (i. e., unpublished) the registration fee is $1 as heretofore.

For registration of renewal of copyright, $1.

For recording assignments $2 for each Copyright Office record-book page or fraction thereof over one-half page.

Copyright notices in books must be placed on the title page or on the page immediately following.

At Rome, June 2, 1928, delegates of 30 nations representing more than 1,000,000,000 inhabitants signed a proposed international copyright convention, to be submitted to the parliaments of each country for ratification.

This law will form the basis of copyright legislation in countries belonging to the Copyright Union, which are bound by a mutual agreement whereby a work copyright in one is automatically copyright in all others.

The law accepted unanimously by the delegates of all the nations represented, provides what is known as "automatic copyright"; that is to say, the work of authors or musicians will be copyright without need of further formalities from the very moment it is set down on paper.

Each country is left free to support a copyright office where works can be registered, merely for convenience in establishing priority.

The original term of copyright under existing U. S. law runs for twenty-eight years. Within one year prior to the expiration of the original term, the author, if living, or the widow or widower of the author, or the children of the author if he be not living; or if none of these be living, then the author's executors, or in the absence of a will the author's next of kin, may secure a renewal for a further term of twenty-eight years, making fifty-six years in all In case of composite works, if the proprietor secured the original copyrights, he may also secure the renewal.

Copyrights are assignable.

Copyright is not secured in foreign countries by action in the Copyright Office, but only by complying with the legislation of such countries.

Copyright in foreign countries has no effect in the United States.

Copyright in the United States may be secured for works of foreign authors published in foreign countries on compliance with the American copyright law including publication with the copyright notice and deposit of a copy for registration here.

Copyright relations have been established by proclamation of the President with Austria, Belgium, Chile, Costa Rica, Cuba, Czechoslovakia, Denmark, Finland, France, Germany, Great Britain and the British possessions, Italy, Luxemburg, Mexico, Netherlands and possessions, Norway, Poland, Portugal, Roumania, Siam, Spain, Sweden, Switzerland, Tunis.

Copyright proclamations have been issued, securing copyright control of mechanical musical reproduction in the U. S. to citizens or subjects of Australia, Austria, Belgium, Canada, Chile, Cuba, Denmark, Finland, France, Germany, Great Britain, Italy, Luxemburg, Netherlands, New Zealand, Norway, South Africa, Sweden and Switzerland. The convention with Hungary and the proclamations in regard to Czechoslovakia, Poland, and Roumania include such protection.

Copyright treaties have also been entered into with China, Japan and Hungary (the latter in effect on Oct. 16, 1912). The Copyright Convention of Mexico of 1902 was ratified by the United States and became effective from July 1, 1908, as between the United States and Costa Rica, Guatemala, Honduras, Nicaragua and Salvador. The Pan-American Copyright Convention signed at Buenos Ayres in 1910 was proclaimed July 16, 1914, and is effective as between the United States and Bolivia, Brazil, Costa Rica, Dominican Republic, Ecuador, Guatemala, Haiti, Honduras, Nicaragua, Panama, Paraguay and Uruguay.

TRADE-MARK LAW, SUMMARY OF.

A trade mark, under the Act of Feb. 20, 1905, may be defined as an arbitrary word or symbol actually used on articles of merchandise to indicate where they come from, that is, who makes them, or who deals in them.

A trade-mark which has been so used in commerce among the several States, or with foreign nations, or with Indian tribes, may be registered in the Patent Office by any person, firm, corporation, or association owning such mark.

No trade-mark is registerable under the Act which is merely a geographical name or term, or which consists merely in a surname firm name, or corporation name not distinctively displayed, or merely in words or devices descriptive of the goods upon which it is used.

If the owner of a trade-mark which is not registerable under the Act, has had bona fide trade-mark use thereof for one year, such trade-mark may be registered under the provisions of the Act of March 19, 1920.

A registration under the Act of March 19, 1920, is not prima facie evidence of ownership.

The records of the Patent Office pertaining to registered trade-marks are open to public inspection and may be examined by the applicant or any person he may desire to assist him.

In order to identify any particular trade-mark

TRADE-MARK LAW—SUMMARY OF (Continued)

registered in the Patent Office, the registry number, or the date of registration and the name of registrant should be given.

Most of the States have their own trade-mark laws.

The United States Constitution does not contain any direct reference to trade-marks, and the power of Congress to legislate on the subject has been questioned. Doubt has been expressed as to the applicability of the so-called "commerce clause" of the Constitution.

It is contended that only an amendment to the Constitution can give Congress power over trade-marks.

A trade-mark is not subject to commerce. A trade-mark is a contract against fraud and deceit and a contract cannot be an article of commerce. This was decided in the Insurance cases in the U. S. Supreme Court.

A trade-mark is not an article of merchandise. A trade-mark is property, but it is such property that its rights can only rest upon the laws of the several states and depend upon them for protection. This latter statement is in substance from a decision of the Supreme Court in the Rectanus case.

In the Tea Rose case in that tribunal Justice Holmes stated that the States can deal, by statute, with trade-marks.

"The registration and protection of trade-marks within the several States must under the Constitution be left to be provided for by the State." (Report of Thomas Jefferson, Secretary of State, to the House of Representatives, Second Congress).

In Feb., 1929, the Pan-American Trade-Mark Conference, at Washington, signed a treaty for the protection of trade-marks among American States and a protocol for the establishment of an Inter-American Trade-Mark Bureau.

Among its main provisions are:

1. The Contracting States to grant to the nationals of other Contracting States, the same rights and remedies which their laws extend to their own nationals.

2. Every trade-mark duly registered or legally protected in one of the Contracting States, shall be admitted to registration or deposit and legally protected in the other Contracting States.

3. Extension to the owner of a trade-mark protected in one of the Contracting States, the right to oppose the use, registration or deposit of an unfair mark in any of the other States.

4. Prohibition of the use or adoption of a trade or commercial name identical with or deceptively similar to one legally adopted and previously used by another engaged in the same business in any of the Contracting States.

WILLS.

A Will or Testament is a final disposition of a person's property, to take effect after his death.

A codicil is an addition or alteration in such disposition.

A will, or codicil, may be signed any day, including Sundays and legal holidays.

All persons are competent to make a will except idiots, persons of unsound mind, and infants.

In many States a will of an unmarried woman is deemed revoked by her subsequent marriage.

A nuncupative or unwritten will is one made orally by a soldier in active service, or by a mariner while at sea.

In most of the States a will must be in writing, signed by the testator, or by some person in his presence, and by his direction, and attested by two (in some states three) witnesses, who must subscribe their names thereto in the presence of the testator.

Wills are of two general types.

The first provides for outright distribution of an estate.

The second provides for deferred distribution of part or all of an estate until conditions are more favorable.

The first type should provide for the appointment of an executor; the second, for an executor and a trustee.

An executor serves only long enough to close out an estate by legal process and turn it over to the beneficiaries or the trustee as directed in the will.

A trustee, after receiving part or all of an estate from the executor, holds and manages it until such time as the will directs final distribution.

The same person, or trust company, can act both as trustee and executor.

It formerly was the custom to give the widow a share of the estate and let the children have the rest; but latterly it is more and more the practice to give the widow a life income from part or all of the estate with the stipulation that if the income is not sufficient for her needs she is to receive such payments out of the principal as may be required.

The will often directs that at the widow's death the estate be divided into shares for the children or beneficiaries; and paid outright, or held in trust.

Unless the widow is experienced in business or finance, and has been in close contact with her husband's affairs, the trust plan has advantages, it is claimed, inasmuch as it relieves her of all problems of investment and management.

Insurance officials state that 90 per cent of all life insurance money that is paid out is dissipated within 7 years, and that a large part of the billion dollar list of worthless securities marketed every year in the United States is bought with money left to widows to invest.

Money or other property is now, more than formerly, left in trust for children, especially for such as are young, improvident, or incapable.

Funds may be left to charity outright, or in trust.

It is the duty of an executor to tally and appraise the estate, pay all taxes and legal claims, sell or liquidate if the will so provides, distribute the property, and make a final report to the court.

If personal effects—clothing, furniture, paintings, books, heirlooms, jewelry, automobiles, etc.—are not disposed of by will, they become part of the general estate and may have to be sold in liquidation.

Real estate given outright in a will does not pass through the executor's hands, the will in such a case operating as a deed.

It should be stated in the will whether inheritance taxes are to be paid out of the general estate or deducted from the individual legacies.

An executor and trustee can be given, in the will, the right to join in any agreement of merger, readjustment, exchange, or consolidation affecting the securities of the estate.

An executor and a trustee can be given, in the will, specific authority to sell, lease, and mortgage real estate: he can be instructed to continue as well as to liquidate a business.

A dower right is a widow's right to receive during her lifetime one-third of all the rents and revenues of the husband's lands.

Dower and courtesy rights were abolished in N. Y. State under a law of 1929. Husband and wife now have equal inheritance rights. Not over one-half of an estate can be devised by the owner to charity.

Debts are a prior lien on the estate under the law of New York and most of the states.

In general, throughout the United States, a person may by will dispose of personalty, at 18 years, and of realty at 21 years.

LINCOLN'S GETTYSBURG SPEECH.

(*Address at the Dedication of Gettysburg Cemetery, November* 19, 1863.)

Fourscore and seven years ago our fathers brought forth on this continent a new nation, conceived in liberty and dedicated to the proposition that all men are created equal.

Now we are engaged in a great civil war, testing whether that nation or any nation so conceived and so dedicated, can long endure. We are met on a great battlefield of that war. We have come to dedicate a portion of that field, as a final resting-place of those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this.

But, in a larger sense, we cannot dedicate—we cannot consecrate—we cannot hallow—this ground. The brave men, living and dead, who struggled here, have consecrated it, far above our poor power to add or detract. The world will little note, nor long remember, what we say here, but it can never forget what they did here. It is for us the living, rather, to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us—that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion—that we here highly resolve that these dead shall not have died in vain—that this nation, under God, shall have a new birth of freedom—and that government of the people, by the people for the people shall not perish from the earth. (Version of the Address as revised by Lincoln and printed in "Autographs of our Country's Authors," Baltimore, 1864.)

UNITED STATES ANTI-TRUST ACTS.

SHERMAN, CLAYTON AND WEBB EXPORT ACTS.

The so-called Sherman Act, in effect on and after July 2, 1890, includes the following provisions—

"Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal.

"Every person who shall make any such contract, or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by a fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the Court.

"Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by a fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the Court.

"Every contract, combination in form of trust or otherwise, or conspiracy, in restraint of trade or commerce in any Territory of the United States, or the District of Columbia, or in restraint of trade or commerce between any such Territory and another, or between any such Territory or Territories and State or States or the District of Columbia or with foreign nations, or between the District of Columbia and any State or States or foreign nations, is hereby declared illegal.

"Every person who shall make any such contract, or engage in any such combination or conspiracy, shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by a fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the Court.

"Any property owned under any contract or by any combination, or pursuant to any conspiracy (and being the subject thereof) mentioned in Section 1 of this act, and being in the course of transportation from one State to another, or to a foreign country, shall be forfeited to the United States, and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure and condemnation of property imported into the United States contrary to law.

"Any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared to be unlawful by this act may sue therefor in any Circuit Court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the costs of suit, including a reasonable attorney's fee.

"That the word 'person' or 'persons' wherever used in this act shall be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the Territories, the laws of any State or the laws of any foreign country."

CLAYTON ACT.

The Clayton Act (in effect Oct. 15, 1914, and amended as of May 15, 1916 and May 26, 1920) was intended to supplement the Sherman Law.

Section 2 of the Clayton Act says:

"It shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities, which commodites are sold for use, consumption, or resale within the United States or any Territory thereof or the District of Columbia or any insular possession or other place under the jurisdiction of the United States where the effect of such discrimination may be to substantially lessen competition or tend to create a monopoly in any line of commerce:

Provided, That nothing herein contained shall prevent discrimination in price between purchasers of commodities on account of differences in the grade, quality, or quantity of the commodity sold or that makes only due allowance for difference in the cost of selling or transportation or discrimination in price in the same or different communities made in good faith to meet competition:

"*And provided further*, That nothing herein contained shall prevent persons engaged in selling goods, wares, or merchandise in commerce from selecting their own customers in bona fide transactions and not in restraint of trade."

Section 3 says:

"It shall be unlawful for any person engaged in commerce, in the course of such commerce, to lease or make a sale or contract for sale of goods, wares, merchandise, machinery, supplies, or other commodities, whether patented or unpatented, for use, consumption, or resale within the United States or any Territory thereof or the District of Columbia or any insular possession or other place under the jurisdiction of the United States, or fix a price charged therefor, or discount from, or rebate upon, such price, on the condition, agreement, or understanding that the lessee or purchaser thereof shall not use or deal in the goods, wares, merchandise, machinery, supplies, or other commodities of a competitor or competitors of the lessor or seller where the effect of such lease, sale, or contract for sale or such condition, agreement, or understanding may be to substantially lessen competition or tend to create a monopoly in any line of commerce."

The U. S. Supreme Court, early in 1929, rendered what is known as the Van Camp decision as a response to two questions of law certified to it by a lower court in a suit brought against the American Can Co. by George Van Camp & Sons Co., in which it was charged that the can company had discriminated in the sale of cans and the rental of sealing machinery against Van Camp & Sons and in favor of the Van Camp Packing Co.

In its opinion the court held that the Clayton Act applies to a situation where there is discrimination by a seller against buyers.

Widespread interest was aroused because in the Mennen and National Biscuit cases lower courts had ruled that the act applied only to discrimination against sellers.

The chief general provisions of the Clayton Act are:

Violations by corporations deemed also that of individual directors, officers or agents authorizing, or doing any of acts constituting violation in whole or in part.

Injunctive relief against threatened loss provided for, and temporary injunctions without notice under stringent safeguards (giving security, prompt and early hearing, etc.).

Special provisions enacted to cover disputes between employers and employees. In general so-called "strikes" and "striking" by laboring men and unions where peaceable means and methods alone are employed cannot be enjoined.

Persons or corporations wilfully disobeying orders, decrees, etc., issued under the Sherman law may, in certain cases, be proceeded against as for criminal contempt. In such cases defendant may demand jury trial.

Punishment for contempt is not to exceed $1,000 fine, nor six months' imprisonment. These provisions do not apply to contempts committed in presence of the Court, or so near thereto as to obstruct the administration of justice.

The Sherman and Clayton acts do not apply to labor or farmers' unions not run for profit.

WEBB EXPORT TRADE ACT.

The Webb Export Trade Act, approved April 10, 1918, permitted combinations or associations of persons in the United States for the purpose of selling American goods abroad at prices which would compete with the foreign manufacturers or combinations.

FARM COOPERATIVE ACT OF FEB. 18, 1922.

(Authorizes association of producers of Agricultural Products.)

This law of Congress provides that "persons engaged in the production of agricultural products, as farmers, planters, ranchmen, dairymen, nut or fruit growers may act together in associations, corporations, or otherwise, with or without capital stock, in collectively processing, preparing for market, handling, and marketing in interstate and foreign commerce, such products of persons so engaged.

"Such associations may have marketing agencies in common; and such associations and their members may make the necessary contracts and agreements to effect such purposes:

"*Provided, however*, That such associations are operated for the mutual benefit of the members thereof, as such producers, and conform to one or both of the following requirements:

"First. That no member of the association is allowed more than one vote because of the amount of stock or membership capital he may own therein, or,

"Second. That the association does not pay dividends on stock or membership capital in excess of 8 per centum per annum. And in any case to the following:

"Third. That the association shall not deal in the products of non-members to an amount greater in value than such as are handled by it for members."

If any such association monopolizes or restrains trade in interstate or foreign commerce to such an extent that the price of any agricultural product is

unduly enhanced by reason thereof, the Secretary of Agriculture can sue and enjoin or restrain.

PACKERS AND STOCKYARDS ACT OF AUG. 15, 1921.

The act makes it unlawful for any packer to

(a) Engage in or use any unfair, unjustly discriminatory or deceptive practice or device in commerce; or

(b) Make or give, in commerce, any undue or unreasonable preference or advantage to any particular person or locality in any respect whatsoever, or subject, in commerce, any particular person or locality to any undue or unreasonable prejudice or disadvantage in any respect whatsoever; or

(c) Sell or otherwise transfer to or for any other packer, or buy or otherwise receive from or for any other packer, any article for the purpose or with the effect of apportioning the supply in commerce between any such packers, if such apportionment has the tendency or effect of restraining commerce or of creating a monopoly in commerce; or

(d) Sell or otherwise transfer to or for any other person, or buy or otherwise receive from or for any other person, any article for the purpose or with the effect of manipulating or controlling prices in commerce, or of creating a monopoly in the acquisition of, buying, selling, or dealing in, any article in commerce, or of restraining commerce; or

(e) Engage in any course of business or do any act for the purpose or with the effect of manipulating or controlling prices in commerce, or of creating a monopoly in the acquisition of, buying, selling, or dealing in, any article in commerce, or of restraining commerce; or

(f) Conspire, combine, agree, or arrange with any other person

(1) to apportion territory for carrying on business in commerce; or

(2) to apportion purchases or sales of any article in commerce; or

(3) to manipulate or control prices in commerce; or

(g) Conspire, combine, agree or arrange with any other person to do, or aid or abet the doing of, any act made unlawful by subdivision (a), (b), (c), (d), or (e).

The Secretary of Agriculture can give the packers hearings on complaints being made, and can issue orders binding on the packers. Each side can appeal to the U. S. Court, as in the case of the Federal Trade Commission.

The Secretary of Agriculture is authorized to license stockyards to do business. Violations by packers are liable to $10,000 fine and 5 years in prison. Stockyards violations are liable to $1,000 fine and 1 year in prison.

By the amendment of May 5, 1926, state bureaus for weighing livestock at stockyards may be registered by the Secretary of Agriculture as market agencies and are thus brought under the Federal Packers and Stockyards Act.

GRAIN-FUTURES ACT.

(In effect Nov. 1, 1922; held Constitutional by the U. S. Supreme Court. on April 16, 1923.)

This Act, which authorizes the Secretary of Agriculture to supervise trading in grain futures, took the place of the Futures Trading Act which the U. S. Supreme Court, in May, 1922, ruled unconstitutional.

In substance, the new law is the same as the old but the taxes are omitted. The new law says:

"It shall be unlawful for any person to deliver for transmission through the mails or in interstate commerce by telegraph, telephone, wireless, or other means of communication any offer to make or execute, or any confirmation of the execution of, or any quotation or report of the price of, any contract of sale of grain for future delivery on or subject to the rules of any board of trade in the United States, or for any person to make or execute such contract of sale, which is or may be used for (a) hedging any transaction in interstate commerce in grain or the products or by-products thereof, or (b) determining the price basis of any such transaction in interstate commerce, or (c) delivering grain sold, shipped, or received in interstate commerce for the fulfillment thereof, *except*

"(a) Where the seller is at the time of the making of such contract the owner of the actual physical property covered thereby, or is the grower thereof, or in case either party to the contract is the owner or renter of land on which the same is to be grown, or is an association of such growers, or growers of grain, or of such owners or renters of land; or

"(b) Where such contract is made by or through a member of a board of trade which has been designated by the Secretary of Agriculture as a 'contract market,' as hereinafter provided, and if such contract is evidenced by a record in writing which shows the date, the parties to such contract and their addresses, the property covered and its price, and the terms of delivery:

"Any person who shall violate provisions of this Act, or who shall fail to evidence any contract mentioned in said section by a record in writing as therein required, or who shall knowingly or carelessly deliver for transmission through the mails or in interstate commerce by telegraph, telephone, wireless, or other means of communication false or misleading or knowingly inaccurate reports concerning crop or market information or conditions that affect or tend to affect the price of grain in interstate commerce, shall be deemed guilty of a misdemeanor, and, upon conviction thereof, be fined not more than $10,000 or imprisoned for not more than one year, or both, together with the costs of prosecution."

ANTI-TRUST PROVISIONS OF RADIO ACT OF 1927-1928.

The Radio Act of Feb. 23, 1927, with its amendment of Mch. 28, 1928, includes the radio industry within the anti-trust provisions of the Sherman Act. The maximum penalty is $5,000 fine, or 5 years, or both, plus loss of or refusal of license. The statute applies to manufacturing, broadcasting or receiving.

As to the wireless, the statute says:

"No person, firm, company, or corporation now or hereafter directly or indirectly through any subsidiary, associated, or affiliated person, firm, company, corporation, or agent, or otherwise, in the business of transmitting and/or receiving for hire energy, communications, or signals by radio in accordance with the terms of the license issued under this Act, shall by purchase, lease, construction, or otherwise, directly or indirectly, acquire, own, control, or operate any cable or wire telegraph or telephone line or system between any place in any State, Territory, or possession of the United States or in the District of Columbia, and any place in any foreign country, or shall acquire, own, or control any part of the stock or other capital share of any interest in the physical property and/or other assets of any such cable, wire, telegraph, or telephone line or system, if in either case the purpose is and/or the effect thereof may be to substantially lessen competition or to restrain commerce between any place in any State, Territory, or possession of the United States or in the District of Columbia and any place in any foreign country, or unlawfully to create monopoly in any line of commerce."

COMPACT OF THE PILGRIMS OF 1620.

(Signed on board the Mayflower in Cape Cod (Provincetown) Harbor before landing.)

"In ye name of God, Amen. We whose names are underwritten, the loyall subjects of our dread soveraigne Lord, King James, by ye Grace of God, of Great Britaine, France & Ireland King, Defender of ye Faith, etc. Having undertaken, for ye glorie of God, and advancemente of ye Christian Faith and Honour of our King and countrie, a Voyage to plant ye first Colonie in ye Northerne part of Virginia, doe by these presents solemnly and mutually in ye Presence of God, and of one another, Covenant & Combine ourselves togeather into a Civill body Politick, for our better Ordering & Preservation & Furtherance of ye ends aforesaid; and by Vertue hearof to enact, constitute, and frame such just & equall lawes, ordinances, Acts, Constitutions & Offices, from Time to Time, as shall be thought most meete & convenient for ye generall good of ye Colonie, unto which we promise all due submission and obedience.

(Forty-one subscribers, each one noting the number of his family, a total of 101 persons.)

THE FEDERAL STATUTES ON BANKRUPTCY.

(Extracts from the United States Bankruptcy Act of July 1, 1898, as amended by subsequent acts.)

Who May Become Bankrupts.—(*a*) Any person, except a municipal, railroad, insurance or banking corporation.

(*b*) Any natural person, except a wage-earner or a person engaged chiefly in farming or the tillage of the soil, any unincorporated company, and any moneyed, business, or commercial corporation, except a municipal, railroad, insurance, or banking corporation, owing debts to the amount of one thousand dollars or over, may be adjudged an involuntary bankrupt.

The bankruptcy of a corporation shall not release its officers, directors, or stockholders, as such, from any liability under the laws of a State or Territory or of the United States.

Duties of Bankrupts.—The bankrupt shall (1) attend the first meeting of his creditors, if directed by the court or a Judge thereof to do so, and the hearing upon his application for a discharge, if filed; (2) comply with all lawful orders of the court; (3) examine the correctness of all proofs of claims filed against his estate; (4) execute and deliver such papers as shall be ordered by the court; (5) execute to his trustee transfers of all his property in foreign countries; (6) immediately inform his trustee of any attempt, by his creditors or other persons, to evade the provisions of this act, coming to his knowledge; (7) in case of any person having to his knowledge proved a false claim against his estate, disclose that fact immediately to his trustee; (8) prepare, make oath to, and file in court within ten days after adjudication if an involuntary bankrupt, and within ten days after the filing of a petition if a voluntary bankrupt, unless in either case further time is granted, a schedule of his property, showing the amount and kind of property, the location thereof, its money value, in detail, and a list of his creditors, showing their residences, if known (if unknown that fact to be stated), the amount due each of them, the consideration thereof, the security held by them, if any, and a claim for such exemptions as he may be entitled to, all in triplicate, one copy of each for the clerk, one for the referee, and one for the trustee; and (9) when present at the first meeting of his creditors, and at such other times as the court shall order, submit to an examination concerning the conducting of his business, the cause of his bankruptcy, his dealings with his creditors and other persons, the amount, kind, and whereabouts of his property, and, in addition, all matters which may affect the administration and settlement of his estate; but no testimony given by him shall be offered in evidence against him in any criminal proceedings, (as amended May 27, 1926).

Debts Which May Be Proved.—Debts of the bankrupt may be proved and allowed against his estate which are (1) a fixed liability as evidenced by a judgment or an instrument in writing, absolutely owing at the time of the filing of the petition against him, whether then payable or not, with any interest thereon which would have been recoverable at that date, or with a rebate of interest upon such as were not then payable and did not bear interest; (2) due as costs taxable against an involuntary bankrupt who was at the time of the filing of the petition against him plaintiff in a cause of action which would pass to the trustee and which the trustee declines to prosecute after notice; (3) founded upon a claim for taxable costs incurred in good faith by a creditor before the filing of the petition in an action to recover a provable debt; (4) founded upon an open account, or upon a contract express or implied; and (5) founded upon provable debts reduced to judgments after the filing of the petition and before the consideration of the bankrupt's application for a discharge, less costs incurred and interest accrued after the filing of the petition and up to the time of the entry of such judgments.

Unliquidated claims against the bankrupt may, pursuant to applications to the court, be liquidated in such manner as it shall direct, and may thereafter be proved and allowed against his estate.

Debts Not Affected By Discharge.—A discharge in bankruptcy shall release a bankrupt from all of his provable debts, except such as (first) are due as a tax levied by the United States, the State, county, district, or municipality in which he resides; (second) are liabilities for obtaining property by false pretenses or false representation, or for wilful and malicious injuries to the person or property of another, or for alimony due or to become due, or for maintenance or support of wife or child, or for seduction of an unmarried female, or for breach of promise of marriage accompanied by seduction, or for criminal conversation; (third) have not been duly scheduled in time for proof and allowance, with the name of the creditor, if known to the bankrupt, unless such creditor had notice or actual knowledge of the proceedings in bankruptcy; or (fourth) were created by his fraud, embezzlement, misappropriation, or defalcation while acting as an officer or in any fiduciary capacity; or (fifth) are for wages due to workmen, clerks, traveling or city salesmen, or servants, which have been earned within three months before the date of commencement of the proceedings in bankruptcy; or (sixth) are due for moneys of an employee received or retained by his employer to secure the faithful performance by such employee of the terms of a contract of employment (As amended by Act of Jan. 7, 1922.)

SUMMARY OF THE 1926 AMENDMENTS.

The amended bankruptcy law, in effect Aug. 27, 1926 enlarges the scope of the statute and closes many loopholes.

Concealment by officers and agents of any person or corporation subsequent to bankruptcy, or in contemplation of that act, becomes a new penal offense.

Indictment under the new law for this and other offenses may be found within three years, instead of one, from the time of adjudication.

One of the far-reaching provisions of the new law, according to Max Isaac, editor of The American Bankruptcy Review, relates to the payment of taxes assessed against realty belonging to bankrupts.

It is now provided that "no order shall be made for the payment of a tax assessed against real estate of a bankrupt in excess of the value of the interest of the bankrupt estate therein, as determined by the court."

The word "corporation" has been defined so as to include, beyond question, commercial or business trusts.

A new act of bankruptcy has been created under which a person or a corporation who, while insolvent, permits a lien to be created upon his property, and who does not discharge or vacate such lien within thirty days from the date it was so created, may be adjudged bankrupt.

Two of the existing acts of bankruptcy have been amended, under one of which a person may be adjudged bankrupt if a receiver for his effects is appointed while he is insolvent, regardless of whether insolvency was or was not alleged in the application for the receiver.

An important change in the present law is in permitting, under the new law, voluntary bankrupts to file their schedules within ten days after adjudication in the same manner as the act heretofore provided with respect to involuntary bankrupts.

In the future the courts may, under the new law, require indemnity bonds from those bankrupts who submit composition terms to their creditors, and who desire to have their businesses operated pending the acceptance or rejection of such terms.

Financial statements as a basis for obtaining money or property need not now be given directly or published "in any manner whatsoever."

The fraudulent transfer of property within twelve months instead of four months, and the obtaining of a discharge within six years' upon a creditors' petition, as well as upon voluntary petition, are grounds for denying a discharge.

To these have been added a new ground, the failure to explain satisfactorily any losses or deficiency of assets.

The maximum term of imprisonment upon conviction of any of the offenses set forth in the act has been extended from two to five years.

Concealment of property may now be made by persons other than the bankrupts, and may be from a receiver, United States marshal "or other officer of the court charged with the control or custody of property, or from creditors in composition cases."

The time for proving debts has been reduced from twelve to six months.

Wages, heretofore following taxes in the schedule of priorities, now have preference over taxes, and the amount which each "workman, clerk, traveling or city salesman or servant" may claim for services rendered within three months prior to the bankruptcy has been increased from $300 to $600.

Notwithstanding the amendment, one Federal Court has held that taxes, which are liens on property under State law, outrank wages.

Appeals must now be taken "within thirty days after the judgment, or order or other matter complained of has been rendered or entered."

PROMISSORY NOTES AND CHECKS.

Negotiable instruments, the common forms of which are promissory notes, checks, or other bills of exchange, while having the same general requisites as other contracts, have certain distinct features. The purpose of the law is to facilitate as much as possible their free passing from band to hand like currency. The assignment of an ordinary contract leaves the assignee in no different position for enforcing his rights than that of his assignor, but one who takes a negotiable instrument from a prior holder, without knowledge of any defences to it, before its maturity, and gives value for it, holds it free of any defences which might have been set up against his predecessors, except those defects that were inherent in the instrument itself.

To be negotiable an instrument must be in writing and signed by the maker (of a note) or drawer (of a bill or check).

It must contain an unconditional promise or order to pay a certain sum in money.

Must be payable on demand, or at a fixed or determinable future time.

Must be payable to order or to bearer.

An instrument is negotiated, that is completely transferred, so as to vest title in the purchaser, if payable to bearer, or indorsed simply with the name of the last holder, by mere delivery, if payable to order by the indorsement of the party to whom it is payable and delivery.

One who transfers an instrument by indorsement warrants to every subsequent holder that the instrument is genuine, that he has title to it, and that if not paid by the party primarily liable at maturity, he will pay it upon receiving due notice of non-payment.

To hold an indorser liable the holder upon its non-payment at maturity must give prompt notice of such non-payment to the indorser and that the holder looks to the indorser for payment. Such notice should be sent within twenty-four hours.

When an indorser is thus compelled to pay he may hold prior parties through whom he received the instrument liable to him by sending them prompt notice of non-payment upon receiving such notice from the holder.

The maker of a note is liable to pay it if unpaid at maturity without any notice from the holder or indorser.

Notice to one of several partners is sufficient notice to all.

When a check is certified by a bank the bank becomes primarily liable to pay it without notice of its non-payment, and when the holder of a check thus obtains its certification by the bank, the drawer of the check and previous indorsers are released from liability, and the holder looks to the bank for payment.

The drawer of a check that has been certified cannot stop payment on it at the bank after it has been certified.

As a matter of general practice checks dated on Sundays or holidays are not questioned. In the law volume, "Brady on Bank Checks" (2nd edition, page 53, paragraph 34, it is stated:

"Since it is the act of delivery that completes and gives life to a contract, a negotiable instrument delivered on a business day is valid and enforceable though dated and signed on Sunday."

A bona fide holder of a negotiable instrument, that is, a party who takes an instrument regular on its face, before its maturity, pays value for it and has no knowledge of any defences to it, is entitled to hold the party primarily liable responsible for its payment, despite any defences he may have against the party to whom he gave it, except such as rendered the instrument void in its conception.

LAW OF CONTRACTS.

A Contract is an agreement of two or more parties by which reciprocal rights and obligations are created. One party acquires a right, enforceable at law, to some act or forbearance from the other, who is under a corresponding obligation.

To the creation of a valid contract there must be:

1. Precise agreement. The offer of one party must be met by an acceptance by the other, according to the terms offered.
2. There must be a consideration.
3. The parties must have capacity to contract. The contracts of insane persons are not binding upon them. Married women are now generally permitted to contract as though single, and bind their separate property. The contracts of an infant are generally not binding upon him unless ratified after attaining his majority.
4. The party's consent must not be the result of fraud or imposition, or it may be avoided by the party imposed upon.
5. The purpose of the parties must be lawful. Agreements to defraud others, to violate statutes, or whose aim is against public policy are void.

The following contracts very generally are required to be attested by some writing:

Contracts by their terms not to be performed within a year from the making thereof.

A promise to answer for the debt, default, or miscarriage of another person.

Contracts made in consideration of marriage, except mutual promises to marry.

Promise of an executor or administrator to pay debts of deceased out of his own property.

Contracts for the creation of any interest or estate in land, with the exception of leases for a short term, generally one year.

Contracts for the sale of goods above a certain value, unless a portion of the price is paid or part of the goods delivered.

Partial performance of the contract is generally held to dispense with the necessity for a writing.

If the damages liable to result from the breaking of a contract are uncertain the parties may agree upon a sum to which either may be entitled as compensation for a breach, which will be upheld by the courts, but if the sum so fixed is not designed as a fair compensation to the party injured, but as a penalty to be inflicted, it will be disregarded.

A party is generally excused for the failure to perform what he has agreed only by the act of God or the public enemy, except in cases involving a personal element in the work to be performed, such as death or sickness of the party contracting.

INTEREST LAWS.

The contract rate means the maximum rate (except in pawnbroker's cases).

By charging a bonus for a loan and then putting on record the loan minus the bonus, many professional money lenders avoid the usury laws. They take advantage, also, of the pawnbroking interest rates by requiring a pledge from the borrower.

The general penalty for usury in most of the States is forfeiture of the excess interest.

The statutes of limitation of action for recovery or enforcement in civil actions on debts vary from 1 to 20 years in the different States, according to the kind of case.

The prevailing limit is 6 years on notes and open accounts.

In New York State the limitations are—on judgments, 6 years when not of record, 20 years, when of record; on notes, 6 years; on open accounts 6 years from last item on either side. A judgment ceases after 10 years to be a lien on real estate.

In New Jersey and Connecticut the statute in debt matters is 6 years.

In Illinois the statute on unwritten agreements is 5 years; on written agreements, 10 years.

ADMINISTRATION OF DECEASED PERSONS' ESTATES.

The following is a synopsis of the laws of the various States affecting the administration of the estate of a deceased person:

1. Who to Administer.—(a) If the deceased leaves a will, the duty of administration falls upon the executor. If no executor is named, or in the event of the death or refusal of the executor to act, the Court will grant administration under the will to some suitable person, generally selected from those most largely interested under the provisions of the will, such as the residuary legatees, if any. (b) If the deceased died intestate, letters of administration are granted to the following persons in practically all the States:

First—To the surviving husband or widow.

Second—To one or more of the next of kin entitled to share in the estate.

Third—If none of the above consent to act, to one of the creditors of the estate, except in localities where there is provided by law a Public Administrator, who is preferred to creditors.

In practically all the States an administrator is required to give bond for the faithful performance of his duties in double the value of the estate to be administered.

In most of the States, if so provided by the will, no bond is required of an executor, except that in some States an executor is required to give a bond to cover the probable amount of the debts of the estate, and in practically all the States, in the discretion of the Court, for cause shown, an executor may be required to give a bond.

2. Claims of Creditors.—The procedure in the several States in presenting creditors' claims against the estate varies very considerably. In the majority of the States the executor or administrator is required promptly to give public notice to creditors to present their claims to him, and the creditors are required so to present their claims supported by an affidavit that the same are justly due and owing from the estate, above any offsets or counter claims, within a period limited generally to six months or a year. The law of each State should be consulted for more specific details. Most of the States direct a final closing of the estate by the executor or administrator within a year or eighteen months after his appointment, though the time limit may be extended by the Probate Court if conditions require it.

3. The following table contains an analysis of the laws of the several States, covering:

(1) The inheritance or succession tax upon property received either by intestate laws, last will, or by gift or transfer, designed to take effect at death, excepting legacies for religious, charitable or educational purposes, which are tax exempt in most of the States. In the great majority of the States no distinction as to tax is made between real estate and personal property.

(2) The various classes of estate obligations given priority over other claims in case of the insolvency of the estate.

NOTE—*Tax* when used below means Inheritance Tax, and *Obligations* means Preferred Obligations.

Alabama—*Tax*—None. *Obligations*—Funeral expenses, administration expenses, expenses of last sickness, taxes, wages of servants or employees' any, other debts.

Alaska—*Tax*—Primary rates: On amount up to $15,000; to wife or lineal issue, 1%; to husband or lineal ancestor, 1½%; to brother or sister or descendant of such, wife or widow of son, or husband of daughter, 3%; brother or sister of father or mother, or descendant of such, 4%; other collaterals, or strangers, or body politic or corporate, 5%. On amounts $15,000 to $30,000, double primary rates; $30,000 to $50,000, 2½ times; $50,000 to $100,000, 3 times; over $100,000, 3½ times primary rates. Exemptions, to widow, husband, lineal issue (including adopted children), $10,000; to lineal ancestors, $3,000; to collaterals, $1,000; charitable transfers to hospitals, schools, etc., $2,500. *Obligations*—Funeral expenses, administration expenses, expenses of last sickness, taxes, wages of servants or employees.

Arizona—Husband and wife, lineal issue, lineal ancestor, adopted or acknowledged child; exempt, widow, $10,000; others, $2,000; tax on first $25,000, 1%; to $50,000, 2%; to $100,000, 3%; to $500,000, 4%; over $500,000, 5%. 2d Group—Brother, sister, descendants of, wife or widow of son, or husband of daughter, exempt, $500; rates: 2%, 4%, 6%, 8% and 10%. 3d—Brother or sister of father or mother or descendants of such—exempt, $250; rates: 3%, 6%, 9%, 12% and 15%. 4th—Brother or sister of grandfather or grandmother or descendants of such, exempt, $150; rates: 4%, 8%, 12%, 16% and 20%. 5th—Any other degree of consanguinity or stranger in blood, or a body politic or corporate, exempt $100; rates: 5%, 10%. 15%, 20% and 25%.

Arkansas—*Tax*—On amounts not exceeding $5,000 the rate is 1% to parents, husband or wife, child or adopted child, lineal descendant, son-in-law or daughter-in-law. Brother or sister including half-blood, 2%. To all others the rate on the same amount is 4%. $3,000 passing to widow or minor child and $1,000 passing to the other immediate relatives mentioned is exempt. The exemption to others more remote is $500. On amounts in excess of $5,000 the primary rates (1%, 2% and 4% respectively) are increased as follows: From $5,000 to $10,000, twice the primary rates; from $10,000 to $25,000, 3 times the primary rates; from $25,000 to $50,000, 4 times; $50,000 to $75,000, 5 times the primary rate; from $75,000 to $100,000, 6 times: $100,000 to $200,000, 7 times; $200,000 to $500,000, 8 times; $500,000 to $1,000,000, 9 times; over $1,000,000, 10 times. *Obligations*—Funeral expenses, expenses of last sickness, wages of servants, judgments which are liens on land of deceased· all debts due by estate, including taxes, cost of administration, etc.· Federal estate tax.

California—*Tax*, and exemptions—Minor child: exemption $24,000., $1,000 at 1%· $25,000 to $50,000 at 2%; $50,000 to $100,000 at 4%; $100,000 to $200,000 at 7%; $200,000 to $250,000 at 9%; all in excess of $500,000 at 10%.

Husband, his descendants, descendants of a wife, ancestors, adopted children or the issue thereof: $10,000 exempt; $15,000 at 1%; $25,000 to $50,000 at 2%; $50,000 to $100,000 at 4%; $100,000 to $200,000 at 7%; $200,000 to $500,000 at 9%; all in excess of $500,000 at 10%.

Widow: $50,000 exempt· $50,000 to $100,000 at 4%· $100,000 to $250,000 at 6%· $200,000 to $300,000 at 7%; all in excess of $300,000 at 8%.

Property received by any one belonging to the above classes from a member of the same class who died within five years and having paid a tax thereon is exempt from further tax.

Brothers, sisters, or their descendants, or to a son-in-law or daughter-in-law: $5,000 exempt; $20,000 at 3%; $25,000 to $50,000 at 6%; $50,000 to $100,000 at 9%; all in excess of $100,000 at 12%.

Uncles, aunts, or their descendants: $1,000 exempt; $24,000 at 4%; $25,000 to $50,000 at 8%; $50,000 to $100,000 at 10%; all in excess of $100,000 at 12%.

All others more remote in blood: $500 exempt; $24,500 at 5%; $25,000 to $50,000 at 10%; all in excess of $50,000 at 12%.

The provision taxing intangibles belonging to non-resident decedents at the flat rate of 2% has been repealed.

In addition to the above exemptions all community property passing to the husband on the death of the wife is exempt and one-half of the community property passing to the wife on the death of the husband is exempt.

Obligations—Funeral expenses, expenses of last sickness, wages due within 60 days, debts preferred by U. S. laws· judgments, mortgages and other liens.

Colorado—*Tax*—The exemptions are—$20,000 for the widow; $10,000 for husband, child, adopted child, or any lineal descendant; $2,000 for wife or widow of son, widower of daughter, grandparent, brother, sister, mutually acknowledged child; $500 for all others. The tax ranges from 2 per cent to 16 per cent, according to the degree of relationship and the size of the inheritance. *Obligations*—Moneys held in a fiduciary capacity, reasonable administration expenses, expenses for funeral and last sickness, allowances to widow and orphans.

Connecticut—*Tax*—The net estate of any resident of this State passing to any parent, grandparent, husband, wife, lineal descendant, adopted child, adoptive parent and lineal descendant of any adopted child, in excess of ten thousand dollars in value to and including twenty-five thousand dollars in value, shall be liable to a tax of 1% thereof; the tax on the amount passing to relatives of this class in excess of twenty-five thousand dollars to and including one hundred thousand dollars, shall be 2% thereof; on the amount in excess of two hundred thousand dollars 3% thereof; and on the amount in excess of two hundred thousand dollars, 4% thereof. *Deductions*—The net estate for taxation purposes of a resident decedent shall be ascertained by adding to the appraised value of the inventoried estate all gains

made in reducing to possession choses in action, including notes and mortgages but not including corporate or governmental stocks or bonds, nor including income accruing after death; and *deducting* therefrom: debts constituting lawful claims against the estate; losses incurred in the reduction to possession of choses in action, including notes and mortgages, but not including corporate or governmental stocks or bonds, nor including income accrued after death; unpaid taxes, (a) on real property within this State which were a lien at the date of decedent's death, (b) on personal property of the decedent which constituted a personal obligation or were a lien at the date of death; (c) unpaid income taxes, upon the income of the decedent accrued to the date of death; inheritance, succession, estate or transfer taxes, paid or payable to other States, territories, the District of Columbia, foreign countries or governmental subdivisions thereof with respect to intangible personal property, and federal estate taxes; any tax on untaxed property assessed by this State, against the estate of the decedent; special assessments which at the date of death, were a lien on real property of the decedent situated within this State; funeral expenses and all amounts actually expended or to be expended for a head-stone or memorial or for the care of any lot in which the decedent is buried; reasonable compensation of executors, administrators and of trustees and reasonable attorneys' fees; any allowance made and paid during the settlement of the estate for the support of the widow, dependent minor children, including legally adopted children, of the decedent or dependent children incapable of self-support because mentally or physically defective, receiving support mainly from the decedent at the time of his death, provided that no such deduction shall be made for any such allowance beyond the expiration of twelve months after the date of decedent's death; the amount at the date of decedent's death of all unpaid mortgages upon real or personal property situated within this State, which mortgages were not deducted in the appraisal of the property mortgaged; expenses of administration except as specially provided in section 11 of the law.

Delaware—*Tax*—To grandparents, parents, child or descendant, son- or daughter-in-law, or adopted child, $3,000 exempt; to husband or wife, $20,000 exemption. Rates on excess, 1% up to $50,000; 2%, $50,000 to $100,000; 3%, $100,000 to $200,000; 4% above $200,000. To brother or sister, uncle, aunt, great-uncle, great-aunt or their descendants, $1,000 exempt. Rates on excess, 2% up to $25,000; 3%, $25,000 to $100,000; 4%, $100,000 to $200,000; 5% above $200,000. To others more remote, 5% up to $25,000; 6%, $25,000 to $100,000; 7%, $100,000 to $200,000; 8% above $200,000. *Exemptions*—Any property or estate or interest therein passing to or for the use of, or in trust for, charitable, educational, historical or religious societies or institutions, or cities or towns for public improvement or to school districts or library commission. *Obligations*—Funeral expenses, expenses of last sickness; wages to servants and laborers, rent (not over one year), judgments, obligations of record, obligations under seal, contracts for payment of money or delivery of goods.

District of Columbia—*Tax*—None (see also United States, end of table. *Obligations*—Judgment or decree of Court, funeral expenses, other debts.

Florida—*Tax*—None. The voters in 1924 amended the State Constitution to prohibit inheritance or income taxes. *Obligations*—Administration expenses, funeral expenses, expenses of last sickness, judgments and debts due to State, mortgages, mechanics' liens, material men's laborers', employees' and other liens; all other debts without distinction or rank.

Georgia—*Tax*—Eighty per cent of the amount due as Federal Inheritance Tax. If the estate is not subject to the Federal Tax, no tax is assessed by the State. *Obligations*—Year's support of family, expenses of funeral and last sickness; administration expenses, taxes, fiduciary obligations, judgments, mortgages and other liens, rent, liquidated demands, open accounts.

Idaho—(See note under New York)—*Tax*—Tax on estates less than $25,000 at following rates: To husband or wife, lineal issue or ancestor, adopted child or its issue, 1%; exempt to widow or minor child, $10,000; to others of this class, exempt $4,000. To brother or sister, or their descendants, or wife or widow of son, or husband of daughter, 2%; exempt $2,000. To uncles, aunts or descendants, 3%; exempt, $1,000. To others, 5%; exempt $500. The tax in the case of husband, wife, lineal issue, rises to 10 per cent, according to the value of the inheritance, and to others the rates range from 2% to 20%. *Obligations*—Funeral expenses, expenses of last sickness, debts preferred by U. S. laws, judgments and mortgages.

Illinois—*Tax*—Class A, father, mother, lineal ancestor, husband, wife, child, adopted or mutually acknowledged child, brother, sister, wife or widow of son, husband of daughter, lineal descendant—in excess of exemption—to $50,000, 2%; $50,000 to $150,000, 4%; to $250,000, 6%; to $500,000, 10%; over $500,000, 14%. Class B, uncle, aunt, niece, nephew or lineal descendant of same, in excess of exemption—to $20,000, 6%; to $70,000, 8%; to $170,000, 12%; over $170,000, 16%. Class C, all others except Class D, which consists of gifts for hospitals, religious, educational, Bible, missionary, tract, scientific, benevolent or charitable purposes within the State, and which are entirely exempt—in excess of exemption—to $20,000, 10%; to $50,000, 12%; $50,000 to $100,000, 16%; to $150,000, 20%; to $250,000, 24%; over $250,000, 30%. *Exemptions*—Class A, $20,000, except to brother and sister, $10,000; Class B, exemption is $500; Class C, $100. *Deductions*—funeral and administration expenses, executors' and trustees' commissions, and property, estate and inheritance taxes which have become a lien.

Indiana (See note under New York)—*Tax* is on the excess above exemption, three classes. First includes husband, wife, lineal ancestor, lineal descendant, legally adopted child or child to whom the transferer for not less than ten years stood in the mutually acknowledged relationship of parent. Second, brother, sister or a descendant of a brother or sister, wife or widow of a son or husband of a daughter. Third, all others. Amount of tax runs from 1% to 10% on the first class; from 5% to 15% on the second class; from 7% to 20% on the third class. Exemptions are in the first class, wife $25,000, children of decedent under twenty-one years $10,000, others $5,000. Second class exemption is $500. Third class $100. Order of payment of obligations—costs of administration, widow's statutory allowance, attorney's fees, expense of last sickness, burial expenses, taxes, all claims due at death.

Iowa—*Tax*—Direct inheritance—Over exemption graduated tax: 1% on any amount in excess of $15,000 and up to $30,000; $30,000 to $45,000, 1½%; $45,000 to $60,000, 2%; $60,000 to $90,000, 2½%; $90,000 to $120,000, 3%; $120,000 to $180,000, 4%; $180,000 to $240,000, 5%; $240,000 to $300,000, 6%; on all sums in excess of $300,000, 7%. *Exemptions*—Husband or wife, one-third of net estate plus $15,000; each direct heir, $15,000. *Obligations*—Debts preferred by U. S. laws, public rates and taxes, wages within 90 days of death, claims filed within six months after notice. There is an exemption of $1,000 to each collateral heir or beneficiary.

Kansas—*Tax*—To husband, wife, lineal ancestor lineal descendant, wife or widow of same: On first $25,000, 1%; on second $25,000, 2%; on next $50,000, 3%; on next $400,000, 4%; on all over $500,000, 5% (except in case of wife of decedent one-half of above rates). To brothers and sisters, on first $25,000, 3%; on second $25,000, 5%; on next $50,000, 7½%; on next $400,000, 10%; on all over $500,000, 12½%. To relatives of all degrees other than as above, and to strangers, on first $25,000, 5%; on second $25,000, 7½%; on next $50,000, 10%; on next $400,000, 12½%; on all over $500,000, 15%. *Obligations*—Funeral expenses, expenses of the last sickness, wages of servants and demands for medicines and medical attendance during the last sickness of the deceased and the expenses of administration, debts due to State, judgments, all demands presented within one year after letters of administration. Exemptions to wife, $75,000; to others of Class A, $15,000; to each member of Class B, $5,000. Taxes are on excess over exemption.

Kentucky—*Tax*—Three classes: A—Husband, wife lineal ancestor, lineal descendant, adopted child mutually acknowledged child, step-child, daughter-in-law, son-in-law, or any lineal issue of such adopted or mutually acknowledged child or step-child; B—Brother, sister, brother-in-law, sister-in-law, nephew, neice, or lineal descendant of the wife or widow of a nephew, or husband of a niece, niece-in-law, newphew-in-law, or uncle and aunt; religious, charitable, educational and State institutions within U. S. but not within this State. C—Persons or corporations not included in A or B, and any person or corporation not exempted as bona fide charitable, educa-

tional or religious. Amount of tax runs from 1% to 16% on Class A; from 2% to 16% on Class B; from 6% to 16% on Class C—Up to $25,000, excess of value over $25,000 to $50,000; to $100,000; to $250,000; to $500,000, over $500,000 etc. *Exemptions*—Wife $20,000, all other persons in Class A $5,000 except persons under 21 years of age, $10,000 brothers, sisters, brothers in law and sisters-in-law, uncles and aunts, $2,000, all other persons or corporations, $500. Exemptions are to be taken out of the first $25,000. *Obligations*—In calculating the value of the distributive shares the following deductions shall be allowed and no others—Debt of the decedent, taxes accrued and unpaid, death duties paid to foreign countries, estate and inheritance taxes paid to other State, Federal estate taxes, drainage, street or other special assignments due and unpaid and constituting liens; funeral and burial expenses (including monument up to $500), commission of executors and administrators actually allowed and paid, cost of administration including reasonable attorney's fees, certain transfers made to persons of Class A by a decedent of Class A to any person of that class within two years, on which transfer tax was paid.

Louisiana—*Tax*—To direct descendant by blood or affinity, ascendant or surviving spouse in excess of $5,000, $5,000 to $20,000, 2%; over $20,000, 3%. To a collateral relation (including brothers or sisters by affinity), in excess of $1,000, on amount in excess of $1,000, $1,000 to $20,000, 5%; in excess of $20,000, 7%. To a stranger, in excess of $500, on amount in excess of $500, up to $5,000, 5%; in excess of $5,000, 10%. *Exemptions*—To direct descendant, ascendant or surviving spouse, $5,000; to collateral relations, $1,000; to a stranger, $500. All legacies and donations to charitable, religious or educational institutions located in State entirely exempt. *Obligations*—Funeral expenses, legal expenses, expenses of last sickness, servants' wages within one year, salaries, clerks.

Maine—*Tax*—To ancestors, parents, husband, wife, descendants, adopted child, adoptive parent, wife of son, husband of daughter, the rates are as follows: Up to $50,000, 1%; $50,000 to $100,000, 1½%; above $100,000, 2%; $10,000 exempt to parents, husband, wife, child, adopted child, or adoptive parent. To brother, sister, uncle, aunt, nephew, niece or cousin, the rates on the above amounts are 4%, 4½% and 5%; $500 exempt. To others, rates on the same amounts are 5%, 6% and 7%; same exemption. The Maine law takes advantage of the 80 per cent credit allowed under the Federal Tax Law. *Obligations*—Funeral and administration expenses; allowance to husband, widow or children; expenses of last sickness; debts preferred under U. S. laws; taxes.

Maryland—*Tax*—Exempt to parents, husband or wife, children, or lineal descendants; to others, 5% on the distributive share providing the estate of the decedent is $500 or more. *Obligations*—Taxes, funeral expenses, arrears of rent, judgments or decrees of court.

Massachusetts—*Tax*—An exemption of $10,000 is allowed husband, wife, father, mother, child, adopted child, adoptive parent, grandchild. The rate of tax on such is 1% to $25,000; 2% thence to $50,000; 4% to $250,000; and so on up to 7% on excess over $1,000,000. The rates for other classes of heirs range from 1% to 12%. Tax reductions are granted on account of Federal inheritance taxes. *Obligations*—Funeral bills, expenses of last sickness, charges of administration—these 3 preferred and not affected by insolvency; debts preferred by U. S. laws, public rates and taxes, wages not over $100, debts for necessaries furnished within six months not exceeding $100, all other creditors.

Michigan—*Four rates*—1. Beneficiaries, grandfather, grandmother, father, mother, husband, wife, child, brother, sister, wife or widow of son or husband of daughter, adopted and mutually acknowledged child, provided such relationship began at or before child's 17th birthday and continued until death of such decedent, granter, etc., or any lineal descendant exempt up to $5,000: wife up to $30,000, with an additional $5,000 for each minor child to whom no property is transferred. 2. Inheritance tax is on totals including exemptions up to $50,000, 1%; on first $50,000 above exemption, 1%; thence up to $250,000, 2%; up to $500,000, 4%; up to $750,000, 6%; in excess of $750,000, 8%, provided that portion of the property so transferred which consists of real estate shall be taxed at ¾ the rates specified. 3. In other cases except as in 4, up to $50,000, 5%; over $50,000, up to $500,000, 10%; in excess of $500,000, 15%. 4. Non resident aliens who are not lineal heirs or any corporation not chartered by U. S. or any state, are taxable at 25%. Where Federal treaties conflict this provision is abrogated.

Minnesota—*Tax*—In estates of persons who died prior to April 20, 1905, there was no tax; in estates of persons dying on or after April 20, 1905, and before July 1, 1911, rates and exemptions are fixed by Chap. 288, Laws of 1905; in estates of persons dying on or after July 1, 1911, to and including April 23, 1919, rates and exemptions are fixed by Section 2a, 2b and 2c as set forth in Section 2272, General Statutes of 1913; in estates of persons dying on or after April 24, 1919.—Seven classes of beneficiaries: 1, wife, adopted children and lineal issue; 2, husband, or mutually acknowledged child and issue; 3, lineal ancestor (father, mother, grandfather, etc.); 4, brother or sister, half-brother or half-sister, nephews, nieces, daughters-in-law, sons-in-law; 5, uncles, aunts, cousins, second cousins, etc.; 6, State of Minnesota or any political division for public purposes, religious, charitable, scientific, educational bodies, cemeteries, etc.—all within the State, totally exempt. 7, Kindred other than those mentioned, strangers to blood of decedent. Exemptions of $10,000 in Classes 1, 2 and $3,000 on class 3 on excess up to $100,000, 1% to 4½%; over $100,000, 4% to 6%; 4, exemptions of $1,000: on excess up to $100,000, 3% to 9%; over $100,000, 12%; 5, exemptions of $250 up to $100,000, 4% to 12%; over $100,000, 16%. 6, All exempt. 7, Exemption of $100: up to $100,000, 5% to 15%; over $100,000, 20%. *Obligations*—Administration expenses, funeral expenses, expenses of last sickness, debts preferred by U. S. laws, taxes.

Mississippi—*Tax*—By the 1928 law the tax on the net estate of a decedent ranges from four-fifths of 1 per cent for estates not in excess of $50,000, to 16 per cent of the amount by which the net estate exceeds $10,000,000. For the purposes of the tax the value of the net estate shall be determined in the case of a resident by deducting $100,000 from the value of the gross estate. *Obligations*—Funeral expenses, expenses of administration, support of widow as fixed by Chancery Court, all debts.

Missouri—*Tax*—To husband, wife, lineal descendant, adopted child or descendant, illegitimate child, up to $20,000, 1%; to $40,000, 2%; to $80,000, 3%; to $200,000, 4%; to $400,000, 5%; in excess of $400,000, 6%. To brother, sister or descendants, son-in-law, daughter-in-law, aunt, uncle or descendants, 3%, 6%, etc., over $400,000, 18%. To brother or sister of grandparents or descendants, 4%, 8%, etc., over $400,000, 24%. To all others, including foreign, charitable and religious bequests, 5%, 10%, etc., over $400,000, 30%. Exemptions, husband or wife, $20,000; plus the value of a child's share in the entire net estate; insane or blind lineal descendants, $15,000; lineal ancestor, lineal descendant, adopted child or its descendant or illegitimate child, $5,000; brother, sister or descendants, son-in-law, daughter-in-law, $500; aunt, uncle or their descendants, $250; brother or sister of grandparents or their descendants, $100; others of less than $100 not taxed. *Obligations*—Funeral expenses, expenses of last sickness, wages of servants, tombstone, taxes and public debts, judgments, all demands presented within six months after letters, all demands exhibited after six months and before one year.

Montana—*Tax*—Widow, exemption $17,500, rate on 1st $25,000, less exemptions, 1%; on next $25,000, 2%; on next $50,000, 3%; on balance, 4%. Husband, exemption, $5,000; lineal ancestor or descendant, adopted child or lineal issue of adopted child—exemption, $2,000—rates over exemption same as for widow. Brother or sister or descendant, son's wife or daughter's husband, exempt, $500—rates, 2%, 4%, 6% and 8%. Uncle, aunt or first cousin, no exemption; rates, 3%, 6%, 9% and 12%. The tax on estates of the net value of $1,000,000 or more ranges from 6 2/5% to 16%, according to the amount of the appraisal. All property transferred to the State or any of its institutions, or to municipal corporations within the state for strictly county, city, town, or municipal purposes, or to corporations or voluntary associations of this state organized under its laws solely for religious charitable, educational or other public purposes, which shall use the property so transferred exclusively for the purpose of their organization within the State, is exempt. *Deductions*—Debts owing at death, funeral expenses and last illness, State, county and municipal taxes, which are fixed in amount and owing by decedent at time of death; expenses of administration, including fees and commissions.

Nebraska—*Inheritance tax*—Father, mother, husband, wife, child, brother, sister, wife or widow of the son, or husband of the daughter, 1% over exemption of $10,000 each; uncle, aunt, niece, nephew or other lineal descendants of same, 4% over exemption of $2,000; in all other cases a graduated tax up to $5,000, from 4%; on all the excess over $5,000 to $10,000, 6%; on all the excess over $10,000 and not exceeding $20,000, 8%; on all excess over $20,000 and not exceeding $50,000, 10%; on all excess over $50,000; 12%. Widow or widower entitled besides to same exemptions as applies to intestate estates.

Nevada—*Tax*—It was repealed in 1925. *Obligations*—Funeral expenses; expenses of last sickness; wages, within ninety days; debts preferred by U. S. laws; judgments and mortgages.

New Hampshire—*Tax*—All property within the jurisdiction of the state, real, or personal, and any interest therein, belonging to inhabitants of the state, and all real estate within the state, or any interest therein, belonging to persons who are not inhabitants of the state, which shall pass by will or by the laws regulating intestate succession, or by deed, grant, bargain, sale or gift, made in contemplation of death, or made or intended to take effect in possession or enjoyment at or after the death of the grantor or donor, to any person, absolutely, or in trust, except to or for the use of the father, mother, husband, wife, lineal descendant, adopted child, the lineal descendant of any adopted child, the wife or widow of a son, or the husband of a daughter, of a decedent, or to or for the use of educational, religious, cemetery, or other institutions, societies or associations of public charity in this state, or for or upon trust for any charitable purpose in the state, or for the care of cemetery lots, or to a city or town in this state for public purposes, shall be subject to a tax at five per cent of its value, for the use of the state.

This law applies to estates of all decedents dying subsequent to April 24, 1925; the non-resident transfer tax of 2% upon transfer of personal property within the jurisdiction of the State is modified by laws of 1927 to the extent of exempting estates of residents of foreign states which reciprocate. *Obligations*—Administration expense, funeral expenses and expenses of last sickness, allowance to widow, taxes on realty due at death.

Note. Inheritance taxes paid in other jurisdictions is included in expenses of administration.

New Jersey—*Tax*—Effective on and after March 11, 1922. To father, mother, husband, wife, child, grandchild, lineal descendant, adopted child and issue, 1% on any amount over $5,000 and up to $50,000, and so on up to 16% on any amount over $3,700,000. To collateral issue, 5% on any amount up to $300,000, and so on up to 16% on any amount in excess of $2,700,000. To hospitals, orphan asylums, public libraries, Bible and tract societies, religious, benevolent and charitable institutions, 5%. To State of New Jersey, municipal corporations within State or other political division thereof, entirely exempt. *Obligations*—Administration expenses, judgments, funeral expenses, medical expenses of last sickness, inheritance tax. All the debts and expenses are first deducted from estate before calculation of tax, so the tax would be payable out of the balance of the estate after payment of obligations.

The exemption to the widow, husband, child, lineal issue, is $10,000; to others, $500. The rate of tax rises to 16%, according to valuation of inheritance (except that the tax is 5% on legacies to New Jersey charities or religious institutions), property left to the State or to any New Jersey city, town, village, is entirely exempt. All gifts of paintings, books, etc., for free exhibitions within State, are entirely exempt. *Obligations*—Inheritance tax, judgments, funeral expenses, medical expenses of last sickness.

New Mexico (See note under New York)—*Tax*—To father, mother, husband, wife, lineal descendant, adopted child, on amount, over exemption, 1%; and an additional tax of 1½% on grantee or donee in conveyance taking effect upon death. To wife or widow of son, husband of daughter, lineal descendant of adopted child, brother or sister, on amount over exemption, 5%, and an additional 3% on grantee or donee in conveyance taking effect upon death. To other collateral kindred, strangers to the blood, corporations, voluntary associations or societies, in amount over exemption, 5%, and an additional tax on grantee or donee in conveyance taking effect upon death, 3%.

New York—*Tax—Residents*—1. To parents, husband or wife, child, adopted child ($5,000 exempt), and 2, to lineal descendants, other than a child ($500 exempt), 1% up to $25,000; 2% on the next $75,000; 3% on the next $100,000; 4% on all additional sums. 3. To brother, sister, wife or widow of a son, husband of a daughter or mutually acknowledged child ($500 exempt), 2% up to $25,000; 3% on the next $75,000; 4% on the next $100,000; 5% thereafter. 4. To all others ($500 exempt), 5% up to $25,000; 6% on the next $75,000; 7% on the next $100,000; 8% thereafter. (In 2, 3 and 4 above if the transfer is in excess of $500 the entire amount is taxable.) *Deductions*—(a) debts and enforcible claims, (b) funeral expenses, (c) administration expenses, (d) executors' or trustees' commissions, (e) attorneys' fees, (f) certain taxes, (g) assessments for local improvements which are a lien on the real property, (h) unpaid mortgages. *Estate Tax*—Estates of resident decedents are subject to an estate tax which equals 80% of the United States estate tax and against which are allowed the same credits as are allowed against the United States estate tax. In computing the net estate an exemption of $100,000 is allowed. The rates range from four-fifths of one per cent. of the amount of the net estate not in excess of $50,000 to 16% of the amount by which the net estate exceeds $10,000,000. The effect of the estate tax is to take full advantage of the 80% credit allowed by the United States estate tax. *Non-Residents*—1. To transferees upon transfers by will or intestate laws, 3% upon the clear market value of the New York property transferred less encumbrances upon real property and such proportion of the debts and funeral expenses of the decedent and such portion of the expenses of administering the decedent's estate as the clear market value of the real property of the decedent within this State, ascertained as aforesaid, plus the clear market value of the personal property of the decedent within this state taxable under this article bears to the total clear market value of the real property of such decedent wheresoever situated, ascertained as aforesaid, plus the total clear market value of the personal property of the decedent wheresoever situated. 2. To transferees upon taxable transfers other than by will or intestate laws, 2% upon the clear market value of the property transferred. If the transfer is by will or intestate laws, the right to any deductions, except encumbrances on real property, may be waived by the executor or administrator and a tax of 2% upon the entire value of the taxable property paid.

By a 1929 law, effective on Sep. 1, 1930, the New York Legislature amended the Decedent Estate Law, the Surrogate's Court Act, the Real Property Law, the Civil Practice Act, and the Personal Property Law, generally in relation to decedents' estates.

Among the important changes the Act eliminates all distinction between the sexes and between real and personal property in so far as the descent and distribution of property are involved; abolishes dower and curtesy; prohibits a man or woman from disinheriting the surviving spouse; prohibits a husband from disinheriting his wife through the organization of a real estate corporation to hold title to his real estate; limits to one-half, the amount of the estate which may be given to charity; and gives an executor the right to sell real estate, unless that right is expressly withheld in the will. The Act does not affect existing wills nor those made prior to September 30, 1930.

By another law, reciprocity in estate taxes on intangible personal property was agreed upon as between New York, Idaho, Indiana, New Mexico, North Carolina, South Carolina, West Virginia, and the Canadian Yukon.

Under these agreements, estates of residents of New York State who die on and after the dates of agreement will not be subject to death taxation on intangible personal property in those States and the Yukon, and similarly, estates of persons dying in those States will not be taxable in State.

This 1929 reciprocal agreement became effective with the State of Indiana on March 9, with Idaho and Yukon Territory on March 16, with North Carolina on March 19, with West Virginia on June 3, with New Mexico on June 7, and with South Carolina on Jan. 1, 1930.

The New York Statute defines "intangible" personal property to mean "incorporeal property, including money, deposits in banks, mortgages, debts, receivables, shares of stock, bonds, notes, credits, evidences of an interest in property and evidences of debt."

The N. Y. Legislature in 1928 reenacted in amended form and made retroactive to July 1, 1925 a provision which had been declared unconstitutional by the Court of Appeals, providing for taxation of transfers of non-residents. The inheritance tax percentage heretofore applicable to

estates exceeding $1,000,000 now apply to estates of over $200,000.

North Carolina (See note under New York)—*Tax*—To husband or wife, lineal issue or lineal ancestors, heirs at law, son- or daughter-at-law, stepchild, adopted child. Exempt, $10,000 to widow, $5,000 to minor child, $2,000 to others of this class. Rates on excess, 1% up to $25,000; 2%, $25,000 to $100,000; 3%, $100,000 to $250,000; 4%, $250,000 to $500,000; 5% above $500,000 to $1,000,000; 6%, $1,500,000; up to 9% above that. To brother, sister, or their descendants, 3% on the first $10,000, rising gradually to 22% on all above $3,000,000. To other inheritors more remote the rates range from 7% to 26%. *Obligations*—Debts secured by liens on property of deceased, funeral expenses, taxes, debts due U. S. or State, judgments, wages within one year, medical attendance within one year.

North Dakota—*Tax*—On the net estate the tax is 1% of all under $25,000 and rises gradually to 7% of the amount over $1,500,000. Exemptions to husband or wife, $20,000 and insurance policies; to each lineal ancestor or descendant not over $3,000; (if a minor $5,000); devises or bequest to municipal corporations for county, town or municipal purposes, or to corporations of this State, organized for religious or charitable educational purposes, entirely exempt. *Obligations*—Debts, taxes, administration costs, funeral expenses, but not over $500 for monuments.

Ohio—*Tax*—To wife or minor child, on $20,000 or part thereof, over exemptions, 1%; on next $75,000, 2%; on next $100,000, 3%; on balance, 4%. To widower, adult child, adopted child, lineal descendants, on $21,500 or part thereof, over exemptions, 1%; on next $75,000, 2%; on next $100,000, 3%; on balance, 4%. To brother, sister, niece, nephew, wife or widow of a son, husband of a daughter, or child treated as son or daughter for ten years though not legally adopted, on $24,500 or part thereof, over exemptions, 5%; on next $75,000, 6%; on next $100,000, 7%; on balance, 8%. To other persons, institutions or corporations, on $25,000 or part thereof, 7%; on next $75,000, 8%; on next $100,000, 9%; on balance, 10%. *Exemptions*—To wife or minor child, $5,000; to father, mother, husband, adult child, adopted child, or lineal descendants, $3,500; to brother, sister, nephew, niece, wife or widow of son, husband of daughter, "or any child to whom the decedent for not less than ten years prior to the succession stood in the mutual acknowledged relation of parent," $500. *Preferred obligations*—Administration, funeral and last sickness expenses, allowance to widow and children for twelve months, debts, taxes.

Oklahoma—*Tax*—Ranges from 1% to 16% on the valuations above the exemptions, which latter are: $15,000 to the widow; $10,000 to children; $5,000 to husband, father, mother, grandchildren; $1,000 to brothers, sisters, daughters-in-law, son-in-law; $500 to other relatives. The tax rate for the wife is 1% up to $25,000; 2% to $50,000; 3% to $100,000; 4% to $700,000; etc. *Obligations*—Funeral expenses, expenses of last sickness, support of family for ninety days, taxes to U. S. or State, debts preferred by U. S. or State laws, judgments or mortgages, other claims presented within six months.

Oregon—*Tax*—To grandfather, grandmother, father, mother, husband, wife, child or stepchild, or any lineal descendant (exemption $1,000), $10,000 to $25,000, 1%; $25,000 to $50,000, 1½%; $50,000 to $100,000, 2%; $100,000 to $300,000, 3%; $300,000 to $500,000, 5%; $500,000 to $1,000,000, 7%; over $1,000,000, 10%. To brother, sister, uncle, aunt, niece, nephew, or lineal descendant (exemption $1,000), additional tax, $1,000 to $3,000, 1%; $3,000 to $5,000, 2%; $5,000 to $10,000, 4%; $10,000 to $30,000, 7%; $30,000 to $50,000, 10%; over $50,000, 15%. Additional tax in all other cases (no exemption) up to $500, 2%; $500 to $1,000, 4%; $1,000 to $2,000, 6%; $2,000 to $4,000, 8%; $4,000 to $10,000, 10%; $10,000 to $25,000, 15%; $25,000 to $50,000, 20%; over $50,000, 25%. Effective on and after May 29, 1919. *Deductions*—Expenses of administration, funeral expenses, U. S. taxes, expenses of last sickness, State and local taxes, debts preferred by U. S. laws, debts secured by liens and property set apart to the widow, husband or surviving children. Intangible personal property of a non-resident decedent, upon which an inheritance tax is imposed by Oregon Laws, shall not be subject to the tax so imposed if a like exemption is made by the laws of the State or Country of decedent's residence in favor of residents of the State of Oregon.

Pennsylvania—*Tax*—Transfer Inheritance Tax Act of 1919, imposing a tax on value of estate passing to direct and collateral heirs. To father, mother, husband, wife, children, lineal descendants, legally adopted children, step-children or the wife or widow of a deceased son, or from the mother of an illegitimate child, 2%; to all others, 10%; the only exemption allowed is the widow's exemption of $500, under a separate act. *Deductions*—Funeral and last sickness expenses and expenses of administration.

Rhode Island—*Tax*—Estates under $10,000 tax exempt (above said sum a general tax of 1% is imposed in addition to the rates specified below). To grandparents, parents, husband or wife, child, or descendant, adopted child, brother, sister, nephew, niece, son-in-law, or daughter-in-law, $25,000 is exempt. Rates on excess are: ½% below $50,000; 1%, $50,000 to $250,000; 1½%, $250,000 to $500,000; 2%, $500,000 to $750,000; 2½%, $750,000 to $1,000,000; 3% above $1,000,000. To others more remote, $1000, is exempt, and rates on excess are: 5% up to $50,000; 6%, $50,000 to $250,000; 7%, $250,000 to $1,000,000; 8% above $1,000,000. *Obligations*—Funeral expenses, expenses of last sickness, debts due U. S., State and town taxes, wages up to $100, other claims presented within six months, all other debts. If property insufficient to pay all debts of any class, creditors of that class shall be paid ratably, and no payment shall be made to creditors of any class until all of preceding class or classes have been paid in full.

South Carolina (See note under New York)—*Tax*—To husband, wife, minor child, minor grandchild, adult child, adult grandchildren, father or mother, on amount in excess of exemption; up to $20,000, 1%; $20,000 to $40,000, 2%; $40,000 to $80,000, 3%; $80,000 to $150,000, 4%; $150,000 to $300,000, 5%; in excess of $300,000, 6%. To lineal ancestor, lineal descendant (other than above), brother, sister, uncle, aunt, niece, nephew, wife or widow of son, or husband of daughter, on amount in excess of exemption, up to $20,000, 2%; to $40,000, 3%; to $80,000, 4%; to $150,000, 5%; to $300,000, 6%; over $300,000, 7%. To any other beneficiary, double above rates, viz., 4%, 6%, 8%, 10%, 12% and 14%. *Exemptions*—Husband or wife, $10,000; minor child, $7,500; adult child, father or mother, $5,000; lineal ancestor or descendant, brother, sister, uncle, aunt, etc., $500; any other beneficiary, $200. Devises or bequests for educational, religious, or public charities in this State, or for city or town for public purposes, entirely exempt. Act of Feb. 23, 1922. *Obligations*—Funeral, last sickness, probate and administration expenses, debts due to public, judgments, mortgages and executions, rent, bonds, contract debts.

South Dakota—*Tax*—Primary rates: To wife or lineal issue, up to $15,000 on excess after deducting exemptions from $15,000, 1%; to husband, lineal ancestor of decedent or any child legally adopted, or mutually acknowledged for not less than ten years or lineal issue of such, 2%; to brother or sister, or descendant, a wife or widow of a son or husband of a daughter, 3%. To brother or sister of father or mother, or a descendant of a brother or sister of the father or mother of decedent, 4%; to any person or persons in any other degree than as above, or strangers, or a body politic or corporate, 5%. Over $15,000 and up to $50,000, two times the primary rate; $50,000 to $100,000, 3 times; in excess of $100,000, 4 times the primary rate. *Exemptions*—All property transferred to public corporations within the State for strictly county, township, school or municipal purposes, property of clear value of $10,000 transferred to widow or husband of decedent, each lineal issue, or adopted or mutually acknowledged children and issue of such, lineal ancestors of decedent, exemption, $3,000; $500 exemption to brother or sister of decedent, or descendants of such, wife or widow of son or husband of daughter; $200 exemption to brother or sister of father or mother or descendants of such; $100 exemption to others. Entire exemption to hospitals, colleges, churches, etc., and charitable institutions, deductions to be made of amounts received from outside the State. *Obligations*—Funeral expenses, expenses of last sickness, wages for 60 days, debts preferred by U. S. laws, all other claims against the estate except that debts secured by liens have preference, according to priority, on any specific property.

Tennessee—*Tax*—To husband, wife or direct descendants, child adopted in conformity with laws of State, or ascendants of person making transfer, from $10,000 to $25,000, 1%; on next $25,000, or any part thereof, 1½%; on next

$50,000, 2%; on next $400,000, 3%; on $500,000 and all over that sum, 5%. To all others from $1,000 to $50,000, 5%; on next $50,000, 6%; on next $50,000, 7%; on next $50,000, 8%; on next $50,000, 9%; 10% on $250,000 and all over that sum. *Exemptions*—Property of intestate, testator or grantor when clear market value is less than $1,000. Property of clear market value of less than $10,000, transferred to wife, direct descendants and ascendants, or either of them, of person from whom transfer is made, the estate to be treated as a whole. All property transferred to municipal corporations for strictly municipal purposes. Property devised or transferred to any church for purely religious purposes, to any school or college for purely educational purposes, to any hospital or bona-fide charitable institution. *Obligations*—Transfer and inheritance taxes are included as debts in settlement of estate.

Texas—*Tax*—On property to or for use of husband or wife, direct lineal descendants or ascendants of decedent, or to legally adopted child, or to husband of daughter, or wife of son, an exemption of $25,000 and a graduated tax of 1% to 6%. If to religious, educational or charitable organizations in State, bequest to be used within State, all is exempt. If the devise is to a governmental unit, National or State, it is the same as to husband or wife. To brother or sister of decedent or lineal descendant of such, in excess of $10,000, a graduated tax from 3% up to (for over $1,000,000) 10%. To uncle or aunt of decedent or descendant of such, in excess of $1,000, a graduated tax from 4% to (for over $1,000,000) 15%. To any other person within or without this State, or to any religious, educational or charitable organization located without the State, a graduated tax of from 5% to (for over $1,000,000) 20%. *Obligations*—Funeral and last sickness expenses, administration expenses, debts secured by mortgage or other debts presented within twelve months, and debts presented after twelve months.

Utah—*Tax*—$10,000 of each estate exempt; tax 3%, $10,000 to $25,000; 5% above $25,000. *Obligations*—1(Funeral expenses the only preferred obligations. The term "debts" shall include local or State taxes due at time of death, court costs, statutory fees of executors, administrators or trustees.

Vermont—*Tax*—To husband, wife, child, father, mother or grandchild, wife or widow of a son or husband of a daughter, child adopted during minority, stepchild or other lineal descendant, no tax unless legacy or share exceeds $10,000; between $10,000 and $25,000, 1%; between $25,000 and $50,000, 2%; between $50,000 and $250,000, 4%; over $250,000, 5%. To all others, 5%. Exemptions, devises or bequests for charitable, religious or educational societies or institutions, cemetery purposes created or existing under laws of this State, to a Bishop in his ecclesiastical capacity for religious uses in this State. *Obligations*—Funeral expenses, taxes, debts due to State, debts due to U. S. These claims are to be paid first without being allowed by commissioners. Expenses of last illness and wages due within 3 months, not over $50, to be allowed if approved by commissioners. A headstone to cost not over $25 is permitted to an insolvent estate.

Virginia—*Tax*—The State inheritance tax law was amended in 1926 to correspond to the rates in the Federal Revenue Act of 1926, by providing as follows: "The minimum tax imposed and collectible by this Commonwealth upon the transfer at death of the estates of resident decedents shall in no case be less than the credit allowed by the act of Congress, known as the Revenue Act of 1926, which credit is allowed by the said act on account of estate, inheritance, legacy or succession taxes actually paid to any State or territory or the District of Columbia in respect of any property included in the gross estate. Such minimum inheritance tax imposed by this State, which is hereby imposed by this act, shall, in no case be less than 80% of the tax imposed by the said act of Congress."

The rate of inheritance tax to husband, wife, lineal ancestor, or lineal descendant (exemption, $10,000) is 1% on up to $40,000 of the devise, and rises to 5% on the excess over $1,000,000. Brother, sister, nephew, or niece, get $4,000 exemption and the rates vary from 2% to 10%. Other beneficiaries get $1,000 exemption each, and the rates vary from 5% to 15%. *Obligations*—Expenses of last illness and funeral, debts due U. S., debts due Va., taxes and levies prior to death, debts due as legal trustee, guardian, etc., all other demands except voluntary obligations.

Washington—*Tax*—To survivor and to father or mother. The rate of tax in this class of heirs ranges from 1% to 5%; in the case of other heirs, from 3% to 25% according to amount of inheritance and degree of relationship. *Obligations*—Funeral expenses, expenses of last sickness, debts preferred by U. S. laws, wages within 60 days, taxes, judgments and mortgages which are liens on land.

West Virginia (See note under New York)—*Tax*—To wife, husband, child or children of deceased child, or father or mother of decedent, not exceeding $50,000, 2%. To brother or sister of decedent (not including those of half blood), 4%. To those further removed in relationship from decedent than brother or sister, 7%. To those of no blood relationship, strangers, institutions, corporate or otherwise, except eleemosynart institutions hereinafter exempt, 9% of market value of such interest in such property. The tax rates range from 2% to 9% on the first $50,000, and thence rise to 5% to 9½%, according to the degree of relationship and the size of the inheritance. *Exemptions*—Property transferred to person or corporation for educational, literary, scientific, religious or charitable purposes, or to State, county or municipal corporation for public purposes, used exclusively in this State. To widow, $15,000; to wife, husband, child, children of deceased child, father or mother of decedent, $10,000, except that exemption to children of child shall be per stirpes not per capita. *Obligations*—Funeral and administration expenses, debts owing to U. S., taxes, fiduciary obligations.

Wisconsin—*Tax*—Tax of 2% to husband, wife, lineal descendants, lineal ancestors, adopted child, and lineal issue thereof. To brothers, sisters and their descendants, wife or widow of son, or husband of daughter, 4%. To uncles, aunts or their descendants, 6%. To all others, 8%. When the estate is above $25,000 the above rates are multiplied as follows: $25,000 to $50,000, 2 times on excess; $50,000 to $100,000, 3 times on excess; $100,000 to $500,000, 4 times on excess; above $500,000, 5 times on excess. But no such tax, however, shall exceed 15% of the property transferred to any beneficiary. *Exemptions*—$15,000 to widow, $2,000 to lineal descendants or ancestors and husband, and lesser amount to other relatives, down to $100 exemptions to strangers in blood. *Obligations*—Last sickness and funeral expenses; debts.

Wyoming—*Tax*—Class A. Husband, wife, parent, child, adopted child or adopted parent, brother or sister—exempt, $10,000; over exemption 2%. Class B. grandparent, grandchild, half-brother, half-sister, exemption $5,000; over exemption, 4%. Class C. All other excepting class D—no exemptions, 6%. Class D—Gifts for state, municipal, charitable, educational or religious purposes or to any institution for use in the preservation of wild fowls or game, entirely exempt.

United States—(See Federal Estate Tax.)

DISTRIBUTION OF INTESTATE'S PERSONAL ESTATE.

In many of the States the widow and children are entitled to receive a small portion of the estate, generally varying from $100 to $500, before the claims of creditors are paid. Aside from such exempt portion of the estate, the property to be distributed to widow or relatives is that remaining after all creditors' claims have been satisfied.

In all States where the deceased leaves a child or children, or descendants of any deceased child and no widow, the children or descendants take the entire estate, to the exclusion of all other relatives. The children take equal shares, and in most States the descendants of a deceased child together take the share of the parent, except where the descendants are all in equal degree to the deceased (all grandchildren, no children surviving), when they share equally and do not take their proportionate share of their parents' interest.

In most if not all of the States, the widow of a man who died without having made a will inherits one-third of the realty and one-half of the personalty, in all cases in which she is not the sole blood heir.

The statutes covering inheritance of intestate estates vary in almost every State as to the rights of the several heirs. The safest course is to communicate with the Surrogate's or Orphans' Probate Court in the county where the estate lies.

MARRIAGEABLE AGE IN THE UNITED STATES.

The following table shows, by states, the marriageable age for both males and females with and without consent of parents or guardians.

States.	With Consent.		Without Consent.		States	With Consent.		Without Consent.		States.	With Consent.		Without Consent.	
	Men.	Women.	Men.	Women.		Men.	Women.	Men.	Women.		Men.	Women.	Men.	Women

La.	14	12	14	12	Ohio.	18	16	21	21	Hawaii.	18	15	20	18

Note. In Colorado, Idaho, New Jersey, and some other states the law does not specifically fix the minimum age for marriage with consent of parents or guardians. In such cases the old English Common Law presumably prevails—14 years for a male, 12 years for a female. In several of the states a child can be disinherited by law for marrying below the legal age without parental consent.

Although the New Hampshire law fixes the age of consent at 20 for males and 18 for females, another section of the statute says: "No male below the age of 14 years and no female below the age of 13 years shall be capable of contracting a valid marriage." Marriages below the age of consent, but not below the 14-13 limit, can be made with the permission of a justice of the superior court or a judge of probate, on the application of parent or guardian.

MARRIAGE AND DIVORCE LAWS.

Marriage Licenses—A license of some kind is required in every State and Territory, and marriage in the United States is now universally on a civil-contract basis. But religious ceremonies are authorized in all the States, provided there is a license to wed. In New York State a marriage may be solemnized by a leader of the Ethical Culture Society of Manhattan or Brooklyn.

No delay in issuing a license, or in marrying under a license as soon as issued, is experienced, so far as the law is concerned, in Alabama, Arizona, Arkansas, Colorado, District of Columbia, Idaho, Illinois, Iowa, Kansas, Kentucky, Louisiana, Minnesota, Mississippi, Montana, Nevada, New York, North Carolina, Ohio, Oregon, Tennessee, Utah, Virginia, Washington, or Wyoming. In Texas, 3 days notice of intent to marry is required.

In New York State, a marriage certificate must be filed within 5 days, and all under 21 who wish to marry must present birth certificates or other proof of age. They can be married at the City Chapel, N. Y. City, only by a judge of a court of record.

In New York State, also, it is required, under a 1929 law that a woman who is 14 but not 16 years of age, must have the consent of a judge of the Children's Court in her jurisdiction (in addition to consent of parent or guardian) before she can marry.

A delay of 5 days is required by the statutes in Connecticut, Georgia, Maine, Massachusetts, Michigan, New Hampshire, Rhode Island, Vermont, and Wisconsin.

In Georgia and in North Carolina, this now applies only to minors.

But, in the 5-day states, a judge of a Probate or other court has power to authorize an immediate marriage, on an affidavit of necessity. This is true, in fact, of almost every state, no matter what ordinary delays the law stipulates.

Other states with waiting periods are—California, 3 days; Delaware, 24 hours for residents, 96 hours for non-residents; Florida, none, if the woman is a resident of the state; Indiana, 30 days if the woman is a non-resident; Maryland, 3 Sundays, for banns, if a church ceremony; New Jersey, 2 days; North Dakota, one year in the state, six months in the county; West Virginia, 30 days, and 7 days for a license.

EUGENICS AND MISCEGENATION.

Throughout the South and Southwest and in Delaware and some of the other states, marriage between whites and Negroes is unlawful; and marriage between whites and Indians is still forbidden in several southern and southwestern states.

In Georgia, marriage is by law forbidden between whites and negroes and between the white and yellow races. By negro, in the Georgia law, is meant "any trace of negro blood."

New York and about half of the states now put marriage on a eugenic basis, by requiring proof that the blood of both the man and the woman is free from venereal infection.

Texas, by a 1929 law, requires a health certificate. This is true in New Hampshire. Formerly, in Delaware, only the legislature could grant divorce.

In N. Y. State, by a law of 1926, before a marriage license is issued, the town or city clerk shall require from the prospective bride and groom a statement in the following words: "I have not to my knowledge been infected with any venereal disease, or if I have been so infected within five years I have had a laboratory test within that period which shows that I am now free from infection from any such disease."

Common-law marriages of a year or more duration, without either license or ceremony, are now validated by the courts in practically all the states, on proper proof, and where children or property are involved.

A 1926 law of N. Y. State authorizes a written contract of marriage signed by both parties and at least two witnesses who shall subscribe the same, stating the place of residence of each of the parties and witnesses and the date and place of marriage, and acknowledged by the parties and witnesses in the manner required for the acknowledgment of a conveyance of real estate to entitle the same to be recorded, *provided, however*, that all of such contracts of marriage must in order to be valid be acknowledged before a judge of a court of record.

Such contract shall be recorded within thirty days after its execution in the office of the State Department of Health, and a copy thereof shall be filed within thirty days after its execution in the office of the clerk of the county in which the marriage was solemnized.

SUMMARY OF THE DIVORCE LAWS OF THE STATES.

Below is a summary of the divorce laws of the States. The primary cause, everywhere, is adultery. Other primary causes are impotency (often styled physical incapacity), insanity, and cruelty; and conviction of felony since the marriage.

In South Carolina the law does not allow divorce for any cause.

There is a general similarity between the causes in the States.

All of the states make a distinction between divorce, and separation.

In every state, too, marriages can be dissolved not only by divorce but by annulment.

The primary cause for annulment is fraud of some kind, manifested in concealment by one or the other party of a condition which, would have barred the marriage, such as insanity, impotency, blood infection, conviction of felony, prior undissolved marriage, and so forth.

The New York State Legislature in 1923 passed an act, signed by the Governor May 21 and in immediate effect, amending the Marriage Law as follows:

Conditions attached to maintenance of action to annul a marriage. An action to annul a marriage may be maintained in either of the following cases:

1. Where both parties are residents of the State when the action is commenced.

2. Where the parties were married within the State and the plaintiff is a resident thereof when the action is commenced.

3. Where the parties, having been married without the State, have become residents of the State, and have continued to be residents thereof at least one year; and the plaintiff is such a resident when the action is commenced.

Figures in parentheses after each State show number of years residence required before divorce action can be begun.

Causes means causes for absolute divorce *in addition to adultery.*

Alabama—(1-3). *Causes.* Abandonment 2 years, crime against nature, habitual drunkenness, violence, pregnancy of wife by other than husband at marriage, physical incapacity, imprisonment for 2 years for felony, confinement in insane asylum for 20 years, provided insanity is incurable; if husband becomes addicted to cocaine, morphine or similar drugs. New ground for divorce: To the wife, when the wife without support from the husband for 2 years preceding the filing of the bill has lived separate and apart from the bed and board of the husband for 5 years next preceding the filing of the bill and she has actually resided in this State during all of said period.

Alaska—(2). *Causes.* Felony, physical incapacity, desertion 1 year, cruelty, habitual drunkenness, wilful neglect of husband for 12 months to provide for wife (he being of ability to do so).

Arizona—(1). *Causes.* Felony, physical incapacity before marriage, desertion 1 year, excesses, cruelty, neglect to provide 1 year, pregnancy of wife by other than husband at marriage, conviction of felony prior to marriage unknown to other party, habitual drunkenness.

Arkansas—(1). *Causes.* Desertion 1 year, felony, habitual drunkenness 1 year, cruelty, former marriage existing, physical incapacity.

California—(1). *Causes.* Cruelty, desertion 1 year, neglect 1 year, habitual drunkenness 1 year, felony. A wife, as well as a husband, may be compelled to pay alimony.

Colorado—(1). *Causes.* Insanity, desertion 1 year physical incapacity, cruelty, failure to provide 1 year, habitual drunkenness or drug fiend 1 year, felony, former marriage existing. By a 1925 law no decree of divorce is granted until 6 months after the trial.

Connecticut—(1). *Causes.* Adultery, fraudulent contract, wilful desertion 3 years, with total neglect of duty, habitual intemperance, intolerable cruelty, sentence to imprisonment for life, infamous crime involving violation of conjugal duty and punishable by imprisonment in State prison, 7 years' absence without being heard from. Where both husband and wife are residents, if either has become incurably insane and has been legally confined in a hospital or asylum for at least 5 years next preceding date of bringing complaint, divorce may be granted.

Delaware—(1). *Causes for absolute divorce.* Desertion 2 years, habitual drunkenness for 2 years, extreme cruelty such as to endanger life or health of either party, bigamy, "conviction and sentence for crime" followed by a continuous imprisonment for at least 2 years— "When at the time the cause of action arose, either party was a bona-fide resident of the State, and has continued so to be down to the time of the commencement of the action; except that no action for absolute divorce shall be commenced for any cause other than adultery, or bigamy, unless one of the parties has been for the 2 years next preceding the commencement of the action a bona-fide resident of this State."

District of Columbia—(3). *Causes.* Marriages may be annulled for former existing marriage, lunacy, fraud, coercion, physical incapacity and want of age at time of marriage. Absolute divorce granted only for adultery.

Florida—(2). *Causes.* Cruelty, violent temper, habitual drunkenness, physical incapacity, desertion 1 year, former marriage existing, relationship within prohibited degrees.

Georgia—(1). *Causes.* Mental and physical incapacity, desertion 3 years, felony, cruelty, force, duress, or fraud in obtaining marriage; pregnancy of wife by other than husband at marriage, relationship within prohibited degrees.

Hawaii—(2). *Causes.* Desertion 6 months; imprisonment for life or more than 7 years; nonsupport for 60 days; incurable insanity (3 years or more); felony, leprosy, cruelty, habitual drunkenness.

Idaho—(12 months). *Causes.* Cruelty, desertion 1 year, neglect 1 year, habitual drunkenness 1 year, felony, insanity.

Illinois—(1). *Causes.* Desertion 2 years, habitual drunkenness 2 years, former existing marriage, cruelty, felony, physical incapacity, attempt on life of other party, infection of other with communicable venereal disease.

Indiana—(2). *Causes.* Abandonment 2 years, cruelty, habitual drunkenness, failure to provide 2 years, felony, physical incapacity.

The Legislative Bureau of Indiana, by a 1925 law, is required to keep marriage and divorce statistics.

Iowa—(1). *Causes.* Desertion 2 years; felony, insanity or feeble-mindedness, habitual drunkenness, cruelty, pregnancy of wife by other than husband at marriage, unless husband has illegitimate child or children living of which wife did not know at time of marriage. The marriage may be annulled for the following causes existing at the time of the marriage: Insanity, physical incapacity, former existing marriage.

Kansas—(1). *Causes.* 1, when either of the parties had a former husband or wife living at the time of the subsequent marriage; 2, abandonment for one year; 3, adultery; 4, impotency; 5, when the wife at the time of the marriage was pregnant by another than her husband; 6, extreme cruelty; 7, fraudulent contract; 8, habitual drunkenness; 9, gross neglect of duty; 10, the conviction of a felony and imprisonment therefor subsequent to the marriage.

Kentucky—(1). *Causes.* Separation 5 years, desertion 1 year, felony, physical incapacity, loathsome disease, habitual drunkenness 1 year, cruel and inhuman treatment, force, fraud or duress in obtaining marriage, joining religious sect believing marriage unlawful, pregnancy of wife by other than husband at marriage or subsequent unchaste behavior.

Louisiana—(1). *Causes.* Condemnation to infamous punishment, 7 years' separation, absence of reconciliation for 1 year after a judgment of separation, separation from bed and board may be granted for habitual intemperance, excesses, cruel treatment or outrages, public defamation, abandonment, attempt by one spouse on life of the other, when fugitive from justice on charge of infamous crime.

Maine—(1). *Causes.* Cruelty, desertion 3 years, physical incapacity, habits of intoxication by liquors, opium or other drugs, neglect to provide.

Maryland—(2). *Causes.* 1. Impotence of either party before marriage. 2. Any cause which renders a marriage null and void. 3. Adultery. 4. Abandonment for 3 years. 5. Unchastity of wife before marriage.

Massachusetts—(3). *Causes.* Adultery, impotence, 3 years' desertion, gross and confirmed habits of intoxication caused by voluntary and excessive use of intoxicating liquor, opium or other drugs, cruel and abusive treatment, or on wife's libel, if husband being of sufficient ability, grossly or wantonly and cruelly refuses or neglects to provide suitable maintenance for her.

Michigan—(1). *Causes.* Felony, desertion 2 years, habitual drunkenness, physical incapacity, and in the discretion of the Court for cruelty or neglect to provide.

Minnesota—(1). *Causes.* Desertion 1 year, habitual drunkenness 1 year, cruelty, physical incapacity, sentence for felony, incurable insanity.

Mississippi—(1). *Causes.* Adultery, felony, desertion 2 years, consanguinity, physical incapacity, habitual drunkenness by liquor, opium or other drugs, cruelty, insanity at time of marriage, former existing marriage, pregnancy of wife by other than husband at marriage.

Missouri—(1). *Causes.* Felony, absence 1 year, habitual drunkenness 1 year, cruelty, indignities, vagrancy, former existing marriage, physical incapacity, conviction of felony prior to marriage unknown to other party, wife pregnant by other than husband at marriage.

Montana—(1). *Causes.* Adultery, action must be commenced within 2 years after discovery by injured party, extreme cruelty by inflicting grievous mental suffering for 1 year, 1 year's wilful desertion, 1 year of wilful neglect, 1 year of habitual intemperance, conviction of felony. Action must be commenced within 2 years after final judgment and sentence.

Nebraska—(1). *Causes.* Abandonment 2 years, habitual drunkenness, physical incapacity, felony, failure to support 2 years, cruelty, imprisonment for more than 3 years.

Nebraska, by a 1925 law, forbids a suit for divorce until 6 months after the notice of a suit was served.

Nevada—(3 months). *Causes.* Wilful desertion 1 year, conviction of felony or infamous crime, habitual gross drunkenness contracted since marriage, impotency at the time of the marriage continuing to the time of the divorce, extreme cruelty, neglect to provide 1 year, insanity for 2 years.

New Hampshire—Residence of 3 years required when action brought for desertion; for other causes but one year required. *Grounds for divorce are* impotency, adultery, extreme cruelty of either party, and treatment injuring the health or endangering the reason, conviction of either party of crime and actual imprisonment for more than a year, desertion for three years and drunkenness for three years, membership in a religious sect or society which professes to believe the marriage relations unlawful, coupled with refusal to cohabit for six months.

There are other causes but they would be included in desertion for a period of three years.

New Hampshire is a common-law state and any grounds which would be fraud would be a ground for divorce; and impotency must have existed before marriage, operating as a fraud. Desertion and drunkenness must have existed for three years. The other causes are understood to be a year because it is necessary for a year's residence to precede a commencement of any action.

New Jersey—(2). *Causes.* Desertion 2 years, extreme cruelty to either of the parties, whether the acts of cruelty were committed prior to or after the passage of this act (1923); provided that no petition for divorce shall be filed until after 6 months from the date of the last act of cruelty complained of. No divorce may be obtained on grounds arising in another State unless they constituted ground for divorce in the State where they arose.

A decree nisi becomes absolute after 3 months, under a 1927 amendment to the divorce law.

New Mexico—(1). *Causes.* Abandonment, cruelty, non-support, habitual drunkenness, felony, impotency, pregnancy of wife by other than husband at marriage, habitual drunkenness, conviction of felony and imprisonment therefor.

New York—(1). *Causes.* Adultery, incurable insanity, abandonment or absence for 5 successive years with proof of diligent but unavailing search, and consequent presumption of death. The marriage may be annulled for such causes as rendered the relationship void at its inception.

North Carolina—(2). *Causes.* Adultery by either party, pregnancy of wife by other than husband at marriage, physical incapacity, husband and wife living apart for 5 successive years, plaintiff in suit residing in State for that period.

North Dakota—(1). *Causes.* Adultery, extreme cruelty, desertion 1 year, neglect 1 year, habitual intemperance 1 year, conviction of felony. Insanity, party having been inmate of State institution for 5 years; no divorce for insanity to be granted until after thorough examination by committee, all of whom must agree insanity is incurable.

Ohio—(1). *Causes.* That either party had a husband or wife living at the time of the marriage from which the divorce is sought, wilful absence of either party from the other for 3 years, adultery, impotency, extreme cruelty, fraudulent contract, any gross neglect of duty, habitual drunkenness for 3 years, the imprisonment of either party in a penitentiary under sentence thereto. The petition for divorce under this clause must be filed during the imprisonment of the adverse party. The procurement of a divorce without this State, by a husband or wife, by virtue of which the party who procured it is released from the obligations of the marriage, while they remain binding upon the other party.

Oklahoma—(1). *Causes.* The district court may grant a divorce for any of the following causes: 1, when either of the parties had a former husband or wife living at the time of the subsequent marriage; 2, abandonment for one year; 3, adultery; 4, impotency; 5, when the wife, at the time of marriage, was pregnant by another than her husband; 6, extreme cruelty; 7, fraudulent contract; 8, habitual drunkenness; 9, gross neglect of duty; 10, conviction of a felony, and imprisonment in the penitentiary therefor, subsequent to the marriage.

Oklahoma, by a 1925 law makes it bigamous to remarry within 6 months after a divorce decree.

Oregon—(1). *Causes.* Conviction of felony, habitual gross drunkenness contracted since marriage and continuing 1 year, impotency existing at the time of the marriage and continuing to the commencement of the suit, wilful desertion 1 year, cruelty or personal indignities rendering life burdensome, permanent insanity.

Pennsylvania—(1). *Causes.* Physical incapacity, bigamy, adultery, desertion for two years, cruelty, procurement by fraud, conviction of felony, marriage within prohibited degree of consanguinity, permanent insanity.

A 1927 law authorizes a woman who gets a divorce to sell and mortgage her realty without the husband's joinder.

Porto Rico—(1). *Causes.* Adultery, felony, habitual drunkenness or continued and excessive use of opium, morphine, or any other narcotic; cruel treatment or grave injury; abandonment for more than 1 year; absolute, perpetual and incurable impotence occurred after marriage; attempt to corrupt sons or prostitute daughters; proposal of husband to prostitute wife.

Rhode Island—(2). *Causes.* Impotency, extreme cruelty, wilful desertion for 5 years of either of the parties, or for such desertion for a shorter period of time, in the discretion of the Court; continued drunkenness, or the habitual, excessive and intemperate use of opium, morphine or chloral, neglect and refusal for the period of at least 1 year next before the filing of the petition on the part of the husband to provide necessaries (or the subsistence of his wife (the husband being of sufficient ability), and for any other gross misbehavior and wickedness.

South Carolina—No divorces granted.

South Dakota—(1). *Causes.* Cruelty, desertion 1 year, neglect 1 year, habitual drunkenness 1 year, felony, insanity 5 years. The marriage may be annulled for the following causes existing at the time of the marriage: Want of age, former existing marriage, insanity, physical incapacity, force or fraud inducing marriage.

Tennessee—(2). *Causes.* Former existing marriage, desertion 2 years, felony, physical incapacity, attempt on life of other party, refusal of wife to live with husband in the State and absenting herself 2 years, pregnancy of wife by other than husband at marriage; cruelty, indignities, habitual drunkenness, habit contracted after marriage.

Texas—(1). *Causes.* Abandonment 3 years, physical incapacity, cruelty, excess or outrages rendering life together insupportable, felony, living apart without cohabitation 10 years.

Utah—(1). *Causes.* Desertion 1 year, physical incapacity, habitual drunkenness, felony, cruelty, incurable insanity.

Vermont—(2). *Causes.* Imprisonment 3 years, intolerable severity, desertion 3 years, neglect by husband to provide, absence 7 years without being heard from. Upon the dissolution of a marriage by a divorce or decree of nullity for any cause except that of adultery committed by the wife, the wife shall be entitled to the immediate possession of her real estate.

Virginia—(1). *Causes.* Adultery, felony, desertion 3 years, fugitive from justice 2 years, pregnancy of wife by other than husband at marriage, wife a prostitute, or either party convicted of felony before marriage unknown to other, physical incapacity.

Washington—(1). *Causes.* When consent to marriage was obtained by force or fraud and there has been no subsequent voluntary cohabitation, for adultery on part of wife or husband when unforgiven, and application is made within 1 year after it shall have become known; impotency, abandonment for 1 year; cruel treatment of either party by other, or personal indignities rendering life burdensome; habitual drunkenness of either party, or neglect or refusal of husband to make suitable provision; imprisonment in State penal institution; 5 years' separation; in case of incurable chronic mania or dementia for 5 years or more, while under confinement by order of a court of record, Court may in its discretion grant a divorce.

West Virginia—(1). *Causes.* Desertion 3 years, felony, physical incapacity, pregnancy of wife by other than husband at marriage, husband a licentious character or wife a prostitute unknown to other party, either party convicted of felony before marriage unknown to other.

Wisconsin—(2). *Causes.* Felony (imprisonment 3 years), desertion 1 year, cruelty, impotency, habitual drunkenness 1 year, separation 5 years. In the discretion of the Court for cruelty or neglect to provide.

Wyoming—(1). *Causes.* Felony, desertion 1 year, habitual drunkenness, cruelty, neglect to provide 1 year, husband a vagrant, physical incapacity, indignities rendering condition intolerable, pregnancy of wife by other than husband at marriage, either party convicted of felony before marriage unknown to other.

CRIMES AND PENALTIES.

PENALTIES FOR MURDER IN THE UNITED STATES.

State.	Penalty.	State.	Penalty.	State.	Penalty.
Alabama	Electrocution	Maine	Life Imprisonment	Oklahoma	Electrocution
Arizona	Hanging	Maryland	Hanging	Oregon	Hanging
Arkansas	Electrocution	Mass.	Electrocution	Pennsylvania	Electrocution

Kansas	Life Imprisonment	N. Carolina	Electrocution	Wyoming	Hanging
Kentucky	Electrocution	No. Dakota	Life Imprisonment	U. S. (Fed. Gov't.)	Hanging
Louisiana	Hanging	Ohio	Electrocution		

In North Dakota, Rhode Island, and some other states where life imprisonment is the only penalty for murder, death by hanging is inflicted if a person kills somebody else while serving a life term.

In some of the capital-punishment states the jury has the right to fix the penalty at life imprisonment, by urging mercy.

In Kentucky, the death penalty in case of rape is inflicted by hanging.

While the penalties for homicide are not precisely uniform throughout the various States of the Union, except for the continuance or the abolishment of capital punishment, they are similar.

With regard to other serious crimes, likewise, differences are more seeming than real. Felonies, such as manslaughter, arson, burglary, robbery and larceny, are in some States subdivided into degrees, first, second, third and even fourth; while in others there is a single general classification.

Where there is no subdivision into degrees, however, the modifying of penalties by reason of attending circumstances results in the same effect as though there were degrees.

In New York and in several other states laws are now in effect which provide longer and longer terms of imprisonment for second, third, or fourth or more convictions of felonies. The general effect is to shut professional criminals up for life.

In order to tighten still further the Baumes code the New York Legislature, in 1929, passed a law under which the statute of limitations stops running as soon as an indictment has been returned or any information filed until the case has been settled upon its merits. The measure also provides that when an indictment is set aside or dismissed during which the prosecution was pending, the time shall not be computed as part of the limitation. Under the old law, criminals indicted were not apprehended until after the statute of limitations expired, and then were immune from prosecution.

CRIMES AGAINST THE UNITED STATES.

Whoever, owing allegiance to the United States, levies war against them, or adheres to their enemies, giving them aid and comfort, is guilty of **treason.** The penalty upon conviction is imprisonment for not less than 5 years, fine of not less than $10,000, or death.

Misprision of treason consists in general of having knowledge of, concealing and not disclosing the treason of others. The penalty is imprisonment for not more than 7 years, and fine of not more than $1,000; or both fine and imprisonment.

Rebellion or insurrection is the inciting, setting on foot, assisting or engaging in armed resistance to the execution of the laws by two or more. The penalty on conviction is imprisonment for not more than ten years, fine of not more than $10,000, or both.

When two or more persons co-operate in committing any offense against the laws of the United States it is the crime of **conspiracy,** punishable by $10,000 fine or three years' imprisonment, or both. The Supreme Court has decided that to co-operate in violating any law of the United States, or encouraging or inciting or doing anything to cause the violation of such law, is "an offense against the United States" and, therefore, is the crime of conspiracy.

Offenses against the **mails** fall into two general classes: one, the misuse of the mails for immoral or fraudulent purposes, the other, robbing the mails, penalties vary with the nature of the particular offense.

FELONIES AND MISDEMEANORS.

Regarding the distinction between felonies and misdemeanors, Joab H. Banton, District Attorney of the County of New York, has given the Almanac the following statement:

"Under the Federal Penal Code, a felony is an offense 'which may be punished by death, or imprisonment for a term exceeding one year.'

"Under the Penal Law of this State, a felony is a crime 'which is or may be punishable by (1) death; or (2) imprisonment in a State prison.'

"Under our Penal Law, no crime is punishable by imprisonment in a State prison, unless the punishment inflicted is imprisonment for a term of one year or more. Therefore, if the offense is punishable by imprisonment for a term of one year or more, it is a felony.

"The term 'misdemeanor' is used in contradistinction to felony; the term 'felony' comprising the more serious offenses and the term 'misdemeanor' what are deemed to be minor trespasses. If the offense is not a felony, it is a misdemeanor.

"Moreover, what may be a felony in one jurisdiction (as e.g. under the Federal law) may be a misdemeanor in another (as e.g. under the State law).

"This, obviously, is because the Federal Penal Code is enacted by Congress, and the State Penal Law by our Legislature. And what may be regarded by one as a serious offense, may be regarded by the other as a mere trespass. Indeed, an offense may be a crime under the Federal law and not under the State law, and vice versa.

"Hence, to determine whether a particular act is a crime or not, and, if a crime, whether a felony or a misdemeanor, recourse must be had to the laws of the particular jurisdiction. If the crime is punishable as hereinbefore prescribed, it is a felony; otherwise not. Punishability is the test."

CRIMES UNDER STATE PENAL CODES.

Murder in the First Degree may be generally defined to be the unlawful, intentional and premeditated killing of a human being, or such a killing resulting from the commission or attempt to commit one of the graver crimes, such as arson, burglary, rape or robbery.

The penalties for murder in the first degree are shown in the table at the head of this page.

Murder in the Second Degree is such a killing without premeditation, or resulting from the attempt to commit some lesser crime.

Murder in the second degree is punished in the Federal Code by imprisonment for not less than 10 years to life.

In the states which have no death penalty, murder in the second degree is usually also punished by life imprisonment. In some states, such as Delaware, North Carolina, and North Dakota, the sentence may cover 30 years.

The minimum sentence may be as low as 1 year in Delaware, Ohio, and Vermont, and 5 years in West Virginia.

Manslaughter may be defined as a killing either unintentionally resulting from the careless or unlawful doing of some otherwise lawful act or from the commission of some unlawful act of comparatively trivial character or intentionally in the heat of passion and without premeditation.

What is said above as to punishment of murder in the second degree applies also to manslaughter. The penalty may range from 1 to 20 years.

Assault with Intent to Kill—Under Federal Statutes, assault with intent to kill or to commit a rape is punishable by imprisonment for not more than 20 years, while assault with intent to commit a felony other than murder or rape is punishable by not more than 5 years' imprisonment and a fine of not over $3,000.

Assault with intent to kill carries sentences varying from 3 months to 1 year in South Carolina, to 1½ years to death in Maryland, or 1 year to life in Oregon.

There is no uniformity in the penalties. The limit in New Mexico is 5 years; in Pennsylvania, 7 years; in West Virginia, 5 years.

Generally speaking, it depends on the weapon used and the ferocity of the attack.

Rape—In Federal Courts, rape is punishable with death by hanging.

Rape is liable in every state in the South and Southwest to punishment by death, but in practically all of these states a recommendation by the jury can soften the sentence to life imprisonment.

The minimum penalty in Alabama is 10 years; in Colorado, 1 year; in Idaho, 5 years; in Illinois, Indiana, Maine, North Dakota, Ohio, and Wyoming, 1 year.

Life imprisonment is the maximum in Colorado, Idaho, Illinois, Indiana, Nebraska, New Mexico, Ohio, Oregon, Rhode Island, and Wyoming.

Arson—where classified in degrees—though the number and exact definitions of degrees vary greatly—is in general classified with reference to two conditions, first, the character of the building burned, whether a dwelling house or structure likely to contain a human being; and, second, whether the crime is committed by day or night. Thus the most serious offense is the burning of an inhabited dwelling by night, and the least serious, the burning of an uninhabited structure by day. Often intermediate degrees are recognized, such as burning a dwelling by day or an uninhabited building by night. The Federal Statutes for arson in the first degree impose a penalty of not more than 20 years, and for the second degree, not more than 20 years and a fine of not more than $5,000.

Arson may bring the death penalty in Alabama, Delaware, Illinois, North Carolina, South Carolina, and Virginia. Life imprisonment or its 20-year equivalent, may result in Idaho, Illinois, Maine, Maryland, New Hampshire, New York, Ohio, Oregon, Pennsylvania, Rhode Island, Tennessee, Vermont, West Virginia, and Wyoming.

Where death results, arson becomes murder and is tried as such.

Burglary—The classification of burglary or housebreaking depends on substantially the same elements as those of arson; namely, the building entered, whether a dwelling or other building, and whether the offense was committed by day or night.

Burglary, robbery, and grand larceny, are to some extent interchangeable names and crimes, and carry penalties which range, in many grades, from 1 year to life imprisonment. As in the case of assault with intent to kill, the severity of the punishment as fixed by statute depends on whether the offender is armed, and how armed; and whether the crime is done by day or night; in a building, occupied or unoccupied; or on the street; with or without threat or force.

Burglary may fetch a sentence of death in North Carolina, or life imprisonment, or its 20-year equivalent, in Alabama, Delaware, Georgia, Illinois, Indiana, Maine, Minnesota, New Hampshire, Ohio, Rhode Island, South Carolina, and Utah.

Life imprisonment, under the Baumes and like laws may result in New York and several other states, in case of prior felony convictions.

Robbery may be punished by death in Alabama, and Virginia; and by a life term in Arkansas, Georgia, Idaho, Illinois, Indiana, Maine, Minnesota, New Hampshire, Ohio, Oregon, Rhode Island, South Dakota, and West Virginia.

In New York State 15 years is the ordinary maximum for a first offender; the same in case of burglary.

Robbery may be generally defined as the theft of property from the person or immediate presence of the victim, accomplished by force or fear. Where degrees of robbery are recognized, the distinction is generally determined by whether the thief be armed or unarmed, though some States also distinguish the second from the first degree, where the theft is accomplished by means of threats of future rather than immediate injury. Federal Statutes fix the penalty for robbery at not more than 15 years.

Grand Larceny is simply theft of property above a fixed value, generally $25 to $50—more States also classify as grand larceny theft of property from the person of the victim, irrespective of value, though, of course, accomplished without the force or fear which constitutes the crime of robbery. In the Federal Courts, grand larceny is punishable by not more than 10 years' imprisonment and a fine of not more than $10,000.

Grand larceny carries penalties of 1 to 15 years, taking no account of Baumes laws, the maximum being in the State of Washington. In general the maximum penalty is 7 to 10 years.

Forgery in general means the false making, imitating or counterfeiting or alteration of a genuine signature or written instrument. There are numerous Federal Statutes defining and imposing penalties for alteration of public records and documents. These do not come within the purview of this synopsis, being no one general classification. Counterfeiting is punished by imprisonment of not more than 15 years and a fine of not more than $5,000.

The penalties for forgery under the laws of the states average around four years.

Bigamy—A person who, having a husband or wife living, marries another, is guilty of bigamy. Under Federal Statutes, polygamy (or bigamy) in the Territories is punished by imprisonment for not more than 5 years and a fine of not more than $500. Five years' imprisonment is the most general maximum penalty in the States for bigamy and fines are quite commonly imposed.

In Arkansas the maximum penalty is 7 years; also in Nebraska, New Mexico, and Ohio; it is 6 years, in Delaware; it is 8 years, in Virginia; 10 years, in Mississippi and North Carolina; 21 years, in Tennessee; 2 years, in Colorado and Pennsylvania; 3 years, in Montana; 4 years, in Oregon.

Perjury under the various State codes usually means false testimony on a material point given in an action or proceeding at law.

Perjury may bring a life or 20-year sentence in Alabama, Maine, New York, Rhode Island and South Dakota, if committed in testifying in a case where the defendant at the trial is liable to a life sentence.

In Texas, perjury in a capital case may be punished by death.

In general the maximum penalties range from 10 to 14 years.

The minimum penalty is 1 year in all the states.

WOMEN ON JURIES.

Women are eligible to serve on juries in Arkansas, California, Delaware, District of Columbia, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Michigan, Minnesota, Mississippi, Nevada, New Jersey, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, Washington and Wisconsin.

In Delaware, though eligible, they have rarely served.

In Utah they are eligible, but are exempt, and hence are not called for service.

In Louisiana the women are not drawn for jury service unless they have filed with the court voluntary offer to serve.

Women do not serve in either criminal or civil juries in Alabama, Arizona, Connecticut, Florida, Idaho, Illinois, Maryland, Massachusetts, Missouri, Montana, New Mexico, New York, Oklahoma, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virginia, West Virginia or Wyoming.

In Idaho women served on juries until the Court ruled the enabling act unconstitutional.

Court decisions to the effect that women are ineligible, under the existing statutes, for jury service, have been rendered in Idaho, and Virginia.

COMPOSITION OF JURIES.

Juries in criminal cases involving anything more serious than petty misdemeanors consist of 12 persons, no more no less; and the verdict, to count, must be unanimous.

In Nevada, in protracted felony cases one or more alternative jurors may be selected to sit with the twelve, to take the place of any juror who may be incapacitated during the trial.

In some states, but not in New York, most of the petty cases in police or magistrates' courts are tried by less than 12 jury men.

In petty civil cases, and in equity suits, the jury may, by consent, consist of less than 12 persons.

WHEN A WARRANT CAN BE SERVED.

Section 170 of the N. Y. State Code of Criminal Procedure is as follows: "If the crime charged be a felony the arrest may be made on any day, and at any time of the day or during any night.

"If it be a misdemeanor, the arrest cannot be made on Sunday, or at night, unless by direction of the Magistrate endorsed upon the warrant."

Section 801 of the Code of Criminal Procedure deals with the service of a Search Warrant and is as follows: "The Magistrate must insert a direction in the warrant, that it be served in the daytime, unless the affidavit be positive that the property is on the person, or in the place to be searched, in which case he may insert a direction that it be served at any time of the day or night."

Section 802 of the Code of Criminal Procedure provides that in the City and County of New York a search warrant must be executed within five days after its date; in any other county, within ten days.

STATUTES OF LIMITATIONS IN CRIMINAL CASES.

There is no general statute of limitations applicable to criminal prosecutions in all the States of the Union. In each jurisdiction the matter is regulated by local statutes. Below are given the New York and Federal statutes:

NEW YORK.

In New York, the provisions in limiting the time for commencing prosecutions are contained in Sections 141 to 144, inclusive, of the Code of Criminal Procedure. These sections read as follows:

"There is no limitation of time within which a prosecution for murder must be commenced. It may be commenced at any time after the death of the person killed. (Section 141.)

"An indictment for a felony, other than murder, must be found within five years after its commission, except where a less time is prescribed by statute. And an indictment for a misdemeanor must be found within two years after its commission. (Section 142.)

"If, when the crime is committed, the defendant be out of the State, the indictment may be found within the term herein limited after his coming within the State; and no time during which the defendant is not an inhabitant of, or usually resident within, the State, or usually in personal attendance upon business or employment within the State, is part of the limitation. (Section 143.)

"An indictment is found, within the meaning of the last three sections, when it is duly presented by the Grand Jury in open court, and there received and filed." (Section 144.)

UNITED STATES.

"No person shall be prosecuted, tried, or punished for treason or other capital offense, wilful murder excepted, unless the indictment is found within three years next after such treason or capital offense is done or committed. (R. S. §1043.)

"No person shall be prosecuted, tried or punished for any offense, not capital, except as provided in section one thousand and forty-six, unless the indictment is found or the information is instituted within three years next after such offense shall have been committed. But this act shall not have effect to authorize the prosecution, trial or punishment for any offense barred by the provisions of existing laws. (R. S. § 1044, amended, April 13, 1876, c. 56, 19 Stat. 32.)

"Nothing in the two preceding sections shall extend to any person fleeing from justice. (R. S. § 1045.)

"No person shall be prosecuted, tried, or punished for any crime arising under the slave-trade laws of the United States, unless the indictment is found or the information is instituted within five years next after the committing of such crime. (R. S. § 1046.)

INTERNAL REVENUE PROSECUTIONS.

(From the Revenue Act of 1928.)

Sec. 1110. (a) The Act entitled "An Act to limit the time within which prosecutions may be instituted against persons charged with violating internal revenue laws," approved July 5, 1884, as amended, is reenacted without change, as follows:

"That no person shall be prosecuted, tried, or punished for any of the various offenses arising under the internal revenue laws of the United States unless the indictment is found or the information instituted within three years next after the commission of the offense: Provided,

"That for offenses involving the defrauding or attempting to defraud the United States or any agency thereof, whether by conspiracy or not, and in any manner, the period of limitation shall be six years, but this proviso shall not apply to acts, offenses, or transactions which were barred by law at the time of the enactment of the Revenue Act of 1924:

"Provided further, That the time during which the person committing the offense is absent from the district wherein the same is committed shall not be taken as any part of the time limited by law for the commencement of such proceedings:

"Provided further, That the provisions of this Act shall not apply to offenses committed prior to its passage:

"Provided further, That where a complaint shall be instituted before a commissioner of the United States within the period above limited, the time shall be extended until the discharge of the grand jury at its next session within the district:

"And provided further, That this Act shall not apply to offenses committed by officers of the United States."

"(b) Any prosecution or proceeding under an indictment found or information instituted prior to the enactment of the Revenue Act of 1921 shall not be affected in any manner by this section, nor by the amendment by the Revenue Act of 1921 of such Act of July 5, 1884, but such prosecution or proceeding shall be subject to the limitations imposed by law prior to the enactment of the Revenue Act of 1921."

ARREST IN CIVIL ACTION.

While imprisonment for debt as it formerly existed in English and American law, by which a debtor might be arrested and imprisoned for mere inability to pay his creditor, no longer exists in the United States, the statutes of the majority of the States provide for the arrest of a defendant in a civil action under varying conditions. A large number of States determine the right of arrest by the character of the claim on which suit is brought, allowing in it actions for fraud or the injuries known in the law as "torts," such as an injury to the person or property, conversion or embezzlement, libel, slander, or the like.

In the following States no civil arrest is allowed: Arizona, District of Columbia, Florida, Maryland, Minnesota, Mississippi, Missouri, Nebraska, New Mexico, Tennessee, and Texas.

In the following States the right to arrest depends upon the nature of claim in suit: In actions for fraud or torts, Connecticut; for fraud, libel, slander, or violent injury to person or property, Delaware; for fraud only, Iowa and Kansas; only after verdict of jury, finding malice, fraud, or wilful deceit, Colorado; for torts, breach of promise to marry, misconduct or embezzlement in office or professional capacity, Michigan, Pennsylvania, and New York (also for fine or penalty or to recover property concealed from Sheriff).

In the following States arrest is only allowed against a defendant about to remove from State or about to conceal, transfer, or remove his property to avoid plaintiff's claim or defraud creditors, irrespective of the nature of the claim: Indiana, Kentucky, Louisiana, New Hampshire, Utah, Virginia. In New Hampshire tax collector may also arrest person for non-payment of poll tax if not sufficient property upon which to make distress.

In the following States arrest is allowed in contract actions where the defendant is about to depart from the State or conceal or remove his property, and also in actions for fraud or torts of various kinds, though the provisions are not identical: Arkansas (fraud only), California, Idaho, Illinois, Maine, Massachusetts, Montana, Nevada, New Jersey, North Carolina, North Dakota, Oregon, South Carolina, South Dakota, Vermont, Washington, West Virginia (fraud only), Wisconsin.

SAYINGS BY GEORGE WASHINGTON.

Our Constitution enjoins that the will of the majority shall prevail.

No man can with propriety or good conscience correct others for a fault he is guilty of himself.

Virtue or morality is a necessary spring of popular government.

Truth will ultimately prevail where there is pains taken to bring it to light.

Teach the people themselves to know and to value their own rights.

The propitious smiles of Heaven can never be expected on a nation that disregards the eternal rules of order and right which Heaven itself has ordained.

The very idea of the power and right of the people to establish government presupposes the duty of every individual to obey the established government.

Every attempt to alienate any portion of our country from the rest should be indignantly frowned upon.

Let us impart all the blessings we possess, or ask for ourselves, to the whole family of mankind.

My public and private sentiments are at all times alike.

Postal Information.

(As of the act of Congress of May 29, 1928, effective July 1, 1928.)

DOMESTIC POSTAGE RATES.

First-Class: Letters and written and sealed matter, 2 cents for each ounce.

Government postal cards, 1 cent each.

Private mailing or post cards, 1 cent each.

Special delivery rates on first-class matter are—10 cents, up to 2 lbs.; 20 cents, 2 lbs. to 10 lbs.; 25 cents on matter weighing over 10 lbs.

Second-Class: Newspapers, magazines, and other periodicals containing notice of second-class entry. When sent by others than the publishers or news agent, 1 cent for each two ounces or fraction thereof.

Third-Class (limit, 8 ounces): Circulars and other miscellaneous printed matter, also merchandise, 1½ cents for each 2 ounces.

Special delivery rates on *other than first-class matter*—15 cents up to 2 lbs.; 25 cents, 2 lbs. to 10 lbs.; 35 cents on all matter weighing over 10 lbs.

Books (including catalogs) of 24 pages or more, seeds, cuttings, bulbs, roots, scions, and plants, 1 cent for each 2 ounces.

Bulk lots of identical pieces may be mailed in quantities of not less than 20 pounds or 200 pieces at pound rates with a minimum charge of one cent a piece, such rates being eight cents a pound or fraction thereof for books and catalogs having 24 pages or more, seeds and plants, and twelve cents a pound or fraction thereof for all other third-class matter.

Fourth-Class (over 8 ounces): Merchandise, books, printed matter, and all other mailable matter not in first or second class—

Zones, Miles.	1st Lb.	Additional Pounds.
Local.....	7	1 cent each 2 pounds.
1—up to 50....	7	1 cent each pound.
2—50 to 150...	7	1 cent each pound.
3—150 to 300...	8	2 cents each pound.
4—300 to 600...	8	4 cents each pound.
5—600 to 1,000.	9	6 cents each pound.
6—1,000 to 1,400	10	8 cents each pound.
7—1,400 to 1,800	12	10 cents each pound.
8—over 1,800...	13	12 cents each pound.

The rate on fourth-class matter between any point in the United States and any point in the Hawaiian Islands, and any point in Alaska, and between any two points in Alaska, is 13 cents for the first pound and 12 cents for each additional pound or fraction thereof.

These rates also apply to parcels mailed in the United States for delivery in the Canal Zone, and to parcels between the Philippine Islands and the United States or its possessions.

The limit of size is 84 inches in girth and length combined.

A special rate of postage is provided for library books, consisting wholly of reading matter and containing no advertising matter other than incidental announcements of books, mailed to readers by public libraries, organizations or associations not organized for profit and when returned by the readers, such rate being 3 cents for the first pound and 1 cent for each additional pound to any point within the first, second, or third zones, or within the State in which mailed.

The special handling postage charge on fourth-class matter is graduated according to the weights of the parcels, namely, 10 cents for parcels weighing not more than two pounds, 15 cents for parcels weighing more than two pounds but not exceeding ten pounds, and 20 cents for parcels weighing more than ten pounds.

Payment of the special handling postage charge entitles the parcel to receive the same expeditious handling, transportation and delivery accorded to mail matter of the first class but does not include special delivery at the office of address.

Airplane (air mail) rates—*Domestic*—The rate of postage on mail carried by airplane is 5 cents for the first ounce, or fraction thereof, and 10 cents for each additional ounce, or fraction thereof, regardless of distance, *except* when sent to Porto Rico or the Canal Zone. The rate between Porto Rico and the United States is 10 cents for each half ounce or fraction; the rate between the United States or Porto Rico and the Canal Zone is 25 cents for each half ounce or fraction. Such postage includes the transportation of the mail to and from the air mail routes.

Special airplane stamps issued for the payment of postage on air mail or ordinary postage stamps may be used. All mail intended to be carried by airplane should be plainly marked in the space immediately below the stamps and above the address "Via air mail."

The postage on all air mail should be fully prepaid in order to expedite its handling.

Any mailable matter, except that liable to damage from freezing, may be sent by mail at the above rate of postage, including sealed parcels not exceeding 50 pounds in weight and not exceeding 84 inches in length and girth combined.

Foreign—Same as domestic air mail rate for those countries having 2-cent postal conventions with the United States; for all other countries, 3 cents in addition to air mail rate.

Registry, Insurance, and C. O. D. services for airplane mail—Any matter, domestic or international, acceptable for transmission as registered, insured, or C. O. D. mail, may be sent by air mail service upon payment of the prescribed registry, insurance, or C. O. D. fee in addition to the required air mail postage.

Special Delivery—The use of special delivery stamps in addition to the Air Mail postage will insure prompt delivery at office of address. Any information concerning contract air mail routes may be obtained from the postmaster.

Registered Mail—The registry fees on both domestic and foreign mail must be prepaid by stamps affixed in addition to the regular postage.

The registry fees for domestic registered mail are—when contents are valued at $1 to $50, 15 cents; over $50, to $100, 20 cts.; over $100 to $200, 30 cts.; over $200, to $300, 40 cents; over $300, to $400, 50 cts.; over $400, to $500, 60 cts.; over $500, to $600, 70 cts.; over $600, to $700, 80 cts.; over $700, to $800, 90 cts.; over $800, to $1,000, 100 cts.

Mail matter without intrinsic value for which no indemnity is provided may be registered at the minimum fee of 15 cents.

For all articles of whatever class addressed to foreign countries, 15 cts., except registered parcel post packages for certain countries, concerning which consult postmaster. International indemnity for the total loss (cover and contents) of a *Postal Union* registered article is limited to $9.65 (50 francs), except for registered mail exchanged with Canada, Newfoundland and Labrador, which is limited to $25.

A charge of 5 cents is collected from the sender, in addition to the postage and registry fee, for a return receipt for a *Postal Union* registered article requested at the time of mailing. Consult postmaster as to fees chargeable for return receipts for registered international *parcel post* packages.

A charge of 10 cents is made for an inquiry as to the disposal of any registered article addressed to a foreign country unless the sender has failed to receive a return receipt for which he paid the required fee, and the same charge is made for other inquiries or complaints in connection with such mail, when the inquiries or complaints require written investigation or tracing by the Postal Service, unless the sender is able to show that a prima facie loss or other irregularity has occurred through fault of the Postal Service.

Any mailable articles, except unsealed fourth-class matter (parcel post) for domestic destinations, may be registered.

Mailable second and third class matter, valued at over $100, upon which a registry fee in excess of 20 cents is paid, must be sealed and first class postage paid thereon.

Domestic parcels containing fourth-class matter may also be registered if sealed and the required fee, and postage at the first class rate, are paid.

Return receipts for domestic registered mail, showing delivery, may be obtained upon request and payment of a fee of 3 cents for each receipt.

Letters, prints, samples of merchandise and commercial papers may be registered to practically all foreign countries.

International parcel post mail may be registered to some, but not all, foreign countries. In the case of a few foreign countries only indemnity ranging from $9.65 to $100 is paid for the loss, rifling or damage of international parcel post articles.

Insured Mail—Domestic third and fourth-class matter, mailed at or addressed to any post office in the United States or its possessions (except parcels mailed in the Philippine Islands), or on or to United States naval vessels, may be insured against loss, rifling, or damage in an amount equivalent to its value or the cost of repairs, but not to exceed $5, upon payment of a fee of 5 cents, $25 for 8 cents, $50 for 10 cents, or $100 for 25 cents, in addition to the postage, both fee and postage to be prepaid.

Return receipts for domestic insured parcels, showing delivery, may be obtained upon request and payment of a fee of 3 cents for each receipt.

Insured International Mail—International insurance service is provided for Canada, Newfoundland, Labrador, Great Britain, the Irish Free State and Northern Ireland, the Netherlands, and Portu-

gal, including Madeira and the Azores.

Canada and Newfoundland—Mailable merchandise and printed matter designated as third and fourth-class matter and Postal Union "prints" addressed to Canada or Newfoundland may be insured for the same fees and under the same conditions in so far as applicable, including payment of indemnity, as apply to domestic mail of these classes. Third-class or "printed matter" may be registered, if desired, but fourth-class parcels of general merchandise may be registered only when sealed and postage is paid at letter rate.

Senders' return receipts are not obtained for insured parcels addressed to Canada, but may be obtained for insured parcels addressed to Newfoundland by payment of a fee of 5 cents, in addition to postage and insurance fee, when requested at the time of mailing; when requested subsequent to the time of mailing, a charge of 10 cents is made.

A charge of 10 cents is made for an inquiry as to the disposal of an insured article addressed to Canada or Newfoundland.

Certain articles of considerable intrinsic value, usually of small size, such as jewelry, coins, precious stones, etc., cannot be insured, but may be registered when sealed and prepaid at the letter rate of postage in addition to the registry fee.

Great Britain and Northern Ireland and the Irish Free State—International parcel post packages for Great Britain and Northern Ireland and the Irish Free State may not be registered but may be insured when sealed and prepaid at the ordinary parcel post rates of postage for the following insurance fees in addition to the postage, within the limits of indemnity prescribed for the fees received. *Fees*—15 cts. on $10 indemnity; 20 cts. on $25; 30 cts. on $50; 50 cts. on $100.

Return receipts for insured parcels addressed to foreign countries except Canada will be furnished only upon request therefor by the sender and upon payment of a fee of 5 cents for each receipt. A fee of 10 cents is charged for return receipts requested subsequent to mailing.

Collect-on-Delivery International Mail—Registered international parcel post packages, registered Postal Union samples of merchandise, and all matter of the third class mailed under domestic classification, and all internation "Prints" within the prescribed limits of weight may be sent collect on delivery between any money order post office in the United States (including Alaska, Hawaii, Porto Rico, Guam, Tutuila, and Virgin Islands of the United States, but excluding the Canal Zone and Philippine Islands) and any money order post office in Mexico.

Domestic C. O. D. Mail—Domestic third and fourth-class matter, and sealed domestic mail matter of any class bearing postage at the first-class rate, may be sent C. O. D. between money order offices of the United States and its possessions, but not to or from the Philippines, the Canal Zone, or United States naval vessels on payment of a fee of 12 cents when the amount to be remitted does not exceed $10; on payment of a fee of 15 cents when the amount to be remitted does not exceed $50, or upon payment of a fee of 25 cents when the amount to be remitted does not exceed $100. Such parcels are insured against loss, rifling or damage in an amount equivalent to the actual value or the cost of repairs, but not to exceed $10, $50, or $100, according to whether a 12, 15, or 25 cent fee was paid.

Domestic C. O. D. mail, sealed, first-class, may be registered. The fees on domestic registered C. O. D. mail range from 25 cents to $1.20, according to amount to be collected or amount of indemnity desired.

Money Orders—The maximum is $100, but there is no limit to the number that can be issued in one day to the same remitter. The fees for domestic orders are: $0.01 to $2.50, 5 cents; $2.51 to $5, 7 cents; $5.01 to $10, 10 cents; $10.01 to $20, 12 cents; $20.01 to $40, 15 cents; $40.01 to $60, 18 cents; $60.01 to $80, 20 cents; $80.01 to $100, 22 cents.

International money orders cost 10 cents for $10.00 or less, and 10 cents extra on each additional $10 up to $1 for $100. Domestic money orders are payable within 30 days at any United States post office (continental); after that, only at the office designated.

Unmailable matter—Includes not only all legitimate matter not conforming to the rules as to legibility of address, size of package or certificates of inspection, but also pistols, revolvers, or other firearms that can be concealed on the person; and game, etc., killed out of season, poisons, explosive or inflammable articles, or bad smelling; all spirituous and malt liquors; all liquor advertisements to or from Prohibition localities, indecent matter, written or otherwise; dunning postals and lottery, endless chain and fraud matter. In addition, sealed mailed to a *foreign country*, except it be obviously letters, cannot be sent, nor can publications in violation of the copyright laws of the country of destination.

Postal Savings—One dollar will open an interest-bearing account. Any person ten years old or over may start an account. A married woman may deposit in her own name. Any number of dollars may be deposited, and at any time, until the balance to the credit of a depositor amounts to $2,500.

The submarine telegraph cables laid throughout the seas vary considerably in length, the coastal cables being shorter than those which cross the oceans.

The world's four longest cables are:

(1) the British Pacific cable, Vancouver (B. C.) to Fanning Island (North Pacific Ocean), 3,458 nautical miles;

(2) French Company's cable, Brest (France) to Cape Cod (Mass.), 3,176 nautical miles;

(3) Western Telegraph Company's cable, Island of Ascension (South Atlantic Ocean) to Buenos Aires, 3,144 nautical miles;

(4) Commercial Pacific Cable Company's cable, Midway Islands to Guam (North Pacific Ocean), 2,607 nautical miles.

THE SUN.

(By Dr. Henry B. Hedrick, Washington, D. C.)

The sun is the nearest of the stars, and to the earth the most important. It is a ball of fire, radiating the heat and light which make life possible. Compared with the other stars, the sun is only of medium size, but in comparison with the earth and the other planets, it is enormous.

The diameter of the sun is 864,100 miles, or 109.1 times the diameter of the earth. If we represent the sun as a globe two feet in diameter, the earth on the same scale would be the size of a small pea.

The average distance of the sun from the earth is 92,897,400 miles. A railroad train running 60 miles an hour would require 175 years to travel this distance.

Light from the sun reaches us in 499 seconds.

The density of the sun, found by dividing the mass by the volume, is about one and a half times that of water.

The average solar temperature has been estimated to be in the neighborhood of 1200° F.

If the light of the sun is allowed to fall on an instrument called a spectroscope, it will be found to form a continuous bright spectrum composed of all the colors of the rainbow, crossed by dark lines.

It has thus been learned that most of the elements found on the earth, iron, sodium, copper, etc., are also in the sun.

The outer layer of the sun's atmosphere is composed chiefly of hydrogen and helium.

The most interesting feature of the sun's surface is the occurrence of sun spots. These are dark, cloud-like regions, varying in size from 500 miles diameter to 50,000 miles, some of them being large enough to be visible to the naked eye, protected by smoked glasses.

The duration of a spot is short, usually from one to four days.

The number of spots varies greatly from year to year, and shows a fairly regular periodicity of about eleven years.

That the influence of the sun spots is felt on the earth is shown by the marked relation between the appearance of these spots and the variation of terrestial magnetism, manifest by the occurrence of magnetic storms, and displays of the aurora borealis.

The solar system, which consists of the sun and the heavenly bodies revolving around it, such as the earth and the other planets, the meteors, and the comets, occupies but an infinitesimal part of the universe. Although light from the sun reaches us in 499 seconds, it requires 4 3/10 years for light to reach us from the next nearest star.

THE STOVE ASKS THE SUN A QUESTION.

If the sun is radiating real heat, why is it that it grows colder and colder the higher up an aviator rises and the nearer to the sun he goes?

For example, on May 26, 1929, at Dessau, Germany, Willi Neunhofen, a Junker's flier, soared to a height of about 41,795 feet (12,739 meters). it was 80 degrees above zero, Fahrenheit, in the shade, when he took off, and it was 76 degrees below zero at the top of his climb. He nearly froze to death.

There are snow-capped mountains at the Equator. Commenting on low degrees of temperature at high altitudes, Prof. R. G. Aiken, Associate Director of the Lick Observatory, Mt. Hamilton, Calif., says:

"The Sun is 93,000,000 miles distant. Therefore, an ascent of four miles above the surface of the earth will make an insignificant difference in the amount of heat actually received from the sun.

"Further, the earth's atmosphere is practically transparent, and, therefore, nearly all the heat from the sun will pass through it to the earth's surface. This heat, falling upon the earth's surface, and reflected back into the earth's atmosphere, warms the lower levels more than the higher ones.

"This is the substance of the reason for the effect we actually find.

"In different parts of the earth's surface the reaction between the surface and the heat received from the sun varies because of differences in the surface configuration.

"There is no question at all as to the fact that the sun's radiation is a real thing."

1887	120,283,055	1901	165,817,810	1915	172,033,200	1928	472,224,568
1888	110,885,665	1902	161,078,040				

Loss per capita—(1923) $4.84; (1924) $4.90; (1925) $4.85; (1926) $4.79; (1927) $4.01; (1928) $3.93.

Loss insured and uninsured in 1928 in the following cities: Los Angeles, $2,549,730; Chicago, $12,999,899; Baltimore, $1,517,943; Boston, $3,922,032; Detroit, $3,682,964.

St. Louis, $2,750,449; New York, $16,624,381; Cleveland, $2,894,513; Philadelphia, $5,355,374.

Fires cost annually in the United States about 15,000 human lives.

According to The Spectator's Insurance Year Book there are 996 concerns doing fire and marine insurance in this country. In 1928 they had assets of $2,943,936,989; their income was $1,430,189,462; losses paid were $554,318,488; dividends were $115,487,961; expenses, $486,457,119; total expenditures, $1,156,263,568.

Ill.	3,295 (2,663)	Mont.	3,691 (2,792)	R. I.	3,086 (1,737)	U. S.	2,918 (1,950)
Ind.	2,942 (1,954)	Neb.	4,004 (3,049)	S. C.	1,385 (811)		

U. S. per capita in prior years—(1904) $1,318, (1900) $1,165; (1890) $1,036; (1880) $870.

The figures above include all property, both taxable and exempt. In 1870 the per capita of taxable property was $624; in 1860 it was $514; and in 1858 it was $308.

THE CHIEF SOURCES OF NATIONAL INCOME.

(From a Bulletin by the Federal Trade Commission.)

Of the total estimated income in 1923, amounting to nearly $70,000,000,000, manufacturing industries contributed 24.1 billions, or 34 per cent.

Agriculture came second in 1923 with 9.4 billions, which was 13.5 per cent. of the total.

Mercantile business made the third contribution in size, which was 8.6 billions, or about one-eighth of the total.

Fourth came the personal-service businesses—hotels, barber shops, shoe-repair shops, and a host of others—which furnished 6.3 billions, or 9 per cent. of the total income.

The professions—law, medicine, engineering, etc.—made the fifth contribution in size, which was 5.2 billions of dollars, or 7.5 per cent. of the total.

The share that was sixth in magnitude was that of the steam railroads, namely, 4.6 billions of dollars, or 6.7 per cent. of the total income in 1923.

Mining and quarrying contributed 3.4 billions, or 4.9 per cent. of the total in 1923, and ranked seventh.

The construction industry's share, 1¾ billions in 1923, ranked eighth and constituted 2.5 per cent. of the total income.

Commercial banking contributed 1.4 billions of dollars, or 2 per cent. of the total income in 1923.

Of the total estimated product of industry, amounting practically to $70,000,000,000 in 1923, the employed personnel of the industries and occupations received 38.2 billions, or 55 per cent., in salaries, wages, or other remuneration for their work; capital and enterprise received the other 45 per cent. in profits, rent, and interest.

NATIONAL WEALTH OF FOREIGN COUNTRIES.

Argentina—(1916) $13,900,000,000; (1928) $15,000,000,000.

Australia—(1917) $6,000,000,000.

Austria-Hungary—(before the war) $55,000,000,000.

Belgium—(1912) $5,800,000,000; (1920) $12,000,000,000; (1928) $10,769,000,000.

Brazil—(1928) $16,000,000,000.

British Empire—(1917) $130,000,000,000. The estimate was made by a Crown Minister, in Parliament.

Canada—(1903) $6,000,000,000; (1917) $11,000,000,000; (1924) $22,195,000,000; (1927-official) $27,687,000,000—Ontario, $9,560,775,000; Quebec, $6,852,279,000; Saskatchewan, $2,998,055,000; British Columbia, $2,318,651,000; Alberta, $2,258,210,000; Manitoba, $1,925,356,000; Nova Scotia, $857,129,000; New Brunswick, $751,818,000; Prince Edward Isl., $148,493,000.

Czechoslovakia—(1928) $9,942,000,000.

Denmark—(1925, official) 22,175,000,000 gold kroner; (1900) $2,000,000,000, a gold krone or crown is worth usually about 26-27 cents; (1928) $5,360,000,000.

France—(1908) $55,000,000,000; (1912) $58,500,000,000; (1925) $60,000,000,000.

Germany—(1908) $77,800,000,000 by one estimate, $83,000,000,000 by another; (1924) 150,000,000,000 gold marks, or $40,000,000,000, according to figures published by Dr. Luther, the German Finance Minister. In the U. S. Congress in 1929 the National Wealth of Germany in 1925 was estimated at $59,500,000,000.

Holland—(1928) $8,260,000,000.

Hungary—(1924) $3,155,200,000.

India (British)—(1922, Shirras) 15,000 crores of rupees—over $45,000,000,000.

Italy—(1925, Internatl. Chamber of Commerce), $25,000,000,000; (1912), $22,000,000,000.

Japan—(1912) $11,700,000,000; (1922) $22,500,000,000; (1928) $51,017,000,000.

Mexico—(1926, official), $6,012,229,152; (1928) $6,757,000,000.

New Zealand—(1926, U. S. Dept. of Commerce), £744,609,000; (1917), $1,500,000,000.

Poland—(1928) $14,000,000,000.

Russia (in Europe)—(1924, Central Statistical Bureau, Moscow), 100,843,000,000 gold rubles—about $50,000,000,000.

South Africa—(1917) $3,000,000,000.

Spain—(1928) $42,103,000,000.

United Kingdom—(1923, Shirras), £20,000,000,000; (1912), $70,500,000,000; (1917, statement in Parliament), $80,000,000,000. The officially estimated gross income in 1928 of the inhabitants was $14,520,000,000. Multiplied by 16 this would give an estimate of $232,320,000,000 as the national wealth on a basis of capitalized income.

In a statement in the U. S. Congress in 1929, the national wealth of Great Britain in 1925 was estimated at $119,200,000,000

Of the suspended banks in 1928 in the above table, 73 were members of the Federal Reserve System, with capital of $5,175,000, and deposits of $42,240,000; 5 of them reopened.

Of the 73 member banks suspended in 1928, National banks numbered 57 (deposits of $31,619,000); State banks, 16.

Suspension of National banks in the Federal Reserve System in prior years, (deposits in parenthesis)— (1921) 51 ($21,285,000); (1922) 45 ($19,092,000); (1923) 90 ($32,904,000); (1924) 122 ($60,889,000); (1925) 118 ($58,537,000); (1926) 125 ($47,866,000); (1927) 91 ($46,581,000).

Buildings of every type wear out. The largest part of buildings in the United States fall in that group of construction which shows a weighted average life of not more than sixty years, according to the Copper and Brass Research Association, which points out that this group represents a present worth of approximately $142,000,000,000.

Based on a life of sixty years, one-sixtieth of this value will be used up during 1929. Fire and storm losses destroy another $500,000,000 annually. Population is increasing, the estimated gain for 1929 being 1,650,000. Housings and a complement of all other types of structures must be provided to care for this population increase. In addition, current wear and tear of buildings expressed in alteration and repair jobs sets another huge demand to be met annually by the building industry.

Assuming average percentages to apply to all buildings built during the last sixty years, the following table represents a measure of value of existing structures in the United States by classes, on Jan. 1, 1929:

Classes.	*Dollars.*
Commercial	20,450,000,000
Hospitals	3,550,000,000
Hotels	3,850,000,000
Housings	79,000,000,000
Industrial	13,750,000,000
Public	1,700,000,000
Recreational	5,400,000,000
Religious	3,650,000,000
Schools	10,650,000,000
Total	142,000,000,000

ESTIMATED BUILDING ACTIVITY FOR 1930.

Classes.	*Dollars.*
Commercial	1,189,000,000
Hospitals	229,300,000
Hotels	237,900,000
Housings	4,733,000,000
Industrial	807,000,000
Public	110,400,000
Recreational	297,300,000
Religious	212,300,000
Schools	679,800,000
Total	8,496,000,000

EMBEZZLEMENT AND FRAUD LOSSES IN THE UNITED STATES.

(Figures show amounts paid by surety companies, covering losses by thefts.)

1906	$1,603,769	1911	$2,513,514	1916	$1,866,775	1921	$8,672,024
1907	1,251,430	1912	2,236,036	1917	1,921,388	1922	9,308,503
1908	1,901,650	1913	2,123,546	1918	2,472,385	1923	10,311,258
1909	2,104,718	1914	2,008,347	1919	3,704,717	1924	12,141,011
1910	1,871,028	1915	2,128,239	1920	4,406,923		

1925	$13,033,417		
1926	14,038,009		
1927	16,746,103		
1928	16,675,359		

The New York State Baumes Commission estimates that general crime, as distinguished from financial crime, costs $13,000,000,000 a year.

Chairman William B. Joyce of the National Surety Company, estimates the yearly losses of the American public from embezzlement at $125,000,000 a year.

Principal items are—

Stock frauds, $500,000,000; merchandise frauds, $500,000,000; credit frauds, $265,000,000; robbery, theft, hold-up, $250,000,000; insurance frauds, $200,000,000; embezzlement, $125,000,000; forgery, $100,000,000; real estate, $100,000,000.

Credit frauds, stock frauds and insurance frauds cost in the neighborhood of $1,000,000,000 a year.

Add to that the toll of a dozen lesser kinds of commercial stealing, the cost of credit insurance losses indirectly due to frauds, and the total will equal the $1,308,012,533 paid as corporation income taxes to the Federal Government in 1927, he added.

Forgery losses in 1928 were estimated at $200,000,000.

THE 25 WORDS MOST USED.

The following table compiled by experts shows, in Column A, the number of times the words in Column 1 were used among 79,390 words in 500 average telephone conversations.

In Column B is shown the number of times the words in Column 2 were used among 80,000 printed words in books, etc.

1	A	1	A	1	A	2	B	2	B	2	B

UNITED STATES MAPS STILL SHOW BLANK SPOTS.

In the heart of the United States are uninhabited areas, some even unseen for long periods by the eye of man, the National Geographic Society points out. In the forests of north central Maine, extensive regions, for many months of the year, still know only the hunter and the trapper. In certain sections of the high Appalachians live families of isolated mountaineers whose domains are seldom visited by outsiders. The only actual blank spots in the eastern United States, however, are in the swamp regions of southern Florida.

Portions of northeastern Minnesota are virtual wildernesses; but the areas are not great. The Bad Lands of southwestern South Dakota form a sizable area, largely barren, in which only a handful of people live; and similar areas are found in northern Nebraska, and eastern Wyoming and Montana.

All along the Rocky Mountains from Canada into New Mexico are uninhabited and practically inaccessible mountain fastnesses. In Texas there are still unfamiliar areas in the "Big Bend" region, close to the Mexican Border.

The maps showing the township surveys of the United States General Land Office cover all the States west of the Mississippi, except Texas. Texas has been excepted because none of that State's area was owned by the United States before it entered the Union, and all public lands were specifically retained by the State.

Only a few relatively small desert and mountain spaces in New Mexico have not been divided into townships by Land Office surveys. One of the largest of the blank spots on the map shows up in southwestern Arizona, north of the diagonal line that marks the Mexico-Arizona boundary from the 111th meridian westward to the Colorado River. The International Boundary Commission has surveyed the actual boundary and an adjoining strip two miles wide; but to the north lies a region nearly 200 miles from east to west and from 20 to 50 miles wide that has not been mapped.

Other relatively unknown regions of considerable size (aside from Alaska, where there are extensive unexplored tracts) lie in northwestern Arizona, north of the Grand Canyon; in southern Nevada and eastern California, along the boundary between the two States; in Utah, southwest of Great Salt Lake; and in southeastern Utah. The latter region was explored in 1924 by an expedition of the National Geographic Society.

In the following cases the present monetary unit with present par value was quoted for only a part of the period 1922-1928, and the averages given for earlier years are for the unit which has been superseded.

Country.	First Quoted in New York.	Previous Monetary Unit.	Par Value of Previous.
Austria	Mar. 13, 1926	Krone	20.26
Belgium	Oct. 25, 1926	Franc	19.30
Bolivia	Aug. 20, 1928	Boliviano	38.93
Brazil	Dec. 18, 1926	Milreis	32.44
Bulgaria	Nov. 22, 1928	Lev	19.30
Chile	Aug. 21, 1925	Peso	36.50
Ecuador	Mar. 19, 1927	Sucre	48.66
Finland	Dec. 21, 1925	Markka	19.30
France	June 25, 1928	Franc	19.30
Germany	Oct. 29, 1924	Mark	23.82
Greece	May 14, 1928	Drachma	19.30
Hungary	Jan. 2, 1926	Krone	20.26
India	Apr. 1, 1927	Rupee	48.66
Italy	Dec. 21, 1927	Lira	19.30
Poland	Oct. 13, 1927	Zloty	19.30

The zloty (par value 19.30 cents) superseded the Polish mark (par value 23.82 cents) May 26, 1924.

As to countries in table above which also are named below, the par of exchange represents gold value of unit in 1928 computed by multiplying silver content of unit by New York average price of silver for 1928, which was $0.58488.

Figures for Austria, Belgium, Bulgaria, China, Denmark, and Egypt cover state owned lines only. | Mileage figures for the United States cover total miles owned.

GOLD HOLDINGS OF THE WORLD.

Figures show thousands of dollars (.000 omitted); values represent par of exchange; compiled by the Federal Reserve Board, at Washington; data relates to gold of governments and central banks.

For example, figures for the United States cover only the gold of the Treasury and of the Federal Reserve Banks.

Some silver ($1,380,276) is included in Canadian figures.

The total gold holdings rose, in May, 1929, to $10,123,000,000, of which the United States Treasury and the Federal Reserve Banks held four-tenths, or $3,931,000,000; England, $795,000,000; France, $1,435,000,000, and Germany, $420,000,000.

Gold hoardings in India are not included in the above figures, because nobody has any accurate basis for estimating their total amount, which may be as much as $5,000,000,000.

Nor are gold hoardings in other countries included in the table, which is confined to gold available.

The people in every country, especially the peasants, hoard silver, so that the total thus out of circulation amounts to billions of dollars.

FOREIGN COINS VALUED IN UNITED STATES MONEY.

(Proclaimed by the Secretary of the Treasury as of Oct. 1, 1929.)

Argentine Republic, G., Peso, ($0.9648). Currency: Paper, normally convertible at 44 per cent. of face value.

Austria, G., Schilling ($0.1407).

Belgium, G., Belga, ($0.1390). One Belga equals 5 paper francs.

Bolivia, G., Boliviano ($0.3650). 13 1-3 bolivianos equal 1 pound sterling.

Brazil, G., Milreis ($0.5462). Currency: Government paper convertible at 4,567 paper milreis to the gold milreis ($0.1196).

British Colonies in Australasia and Africa, G., Pound sterling ($4.8665).

British Honduras, G., Dollar ($1.0000).

Bulgaria, G., Lev ($0.0072).

Canada, G., Dollar ($1.00).

Chili, G., Peso ($0.1217).

China, S., Tael, Haikwan (customs) ($0.6376). The tael is a unit of weight, not a coin. The customs unit is the Haikwan tael. The values of other taels are based on their relation to the value of the Haikwan tael. The Yuan silver dollar of 100 cents is the monetary unit of the Chinese Republic; it is equivalent to .637— of the Haikwan tael. Dollar, Yuan ($0.4061), Mexican silver pesos issued under Mexican decree of Nov. 13, 1918, are of silver content approximately 41% less than the dollar here quoted; and those issued under decree of Oct. 27, 1919, contain about 51% less silver.

Colombia, G., Peso ($0.9733). Currency: Government paper and silver.

Costa Rica, G., Colon ($0.4653); 4 Colons (non gold) equal 1 U. S. dollar.

Cuba, G., Peso ($1.0000).

Denmark, G., Krone ($0.2680).

Dominican Republic, G., Dollar ($1.0000). U. S. money is principal circulating medium.

Ecuador, G., Sucre ($0.2000).

Egypt, G., Pound (100 piasters) ($4.9431). The actual standard is the British pound sterling, which is legal tender for 97½ piasters.

Estonia, G., Kroon ($0.2680).

Finland, G., Markka ($0.0252).

France, G., Franc ($0.0392.) This value was established by the law of June 24, 1928.

Germany, G., Reichsmark ($0.2382).

Great Britain, G., Pound sterling ($4.8665).

Greece, G., Drachma ($0.0130). Value established by law of May 14, 1928.

Guatemala, G., Quetzal ($1.000).

Hayti, G., Gourde ($0.2000). Currency: National bank notes redeemable on demand in American dollars.

Honduras, G., Lempira ($0.5000). Legally established but not yet actually operative.

Hungary, G., Pengo ($0.1749).

India (British), G., Rupee ($0.3650). Value established by law, effective April 1, 1927.

Indo-China, S., Piaster ($0.4128).

Italy, G., Lira ($0.0526). Value established by decree effective on Dec. 22, 1927.

Japan, G., Yen ($0.4985).

Jugo-Slavia, G., Dinar ($0.1930).

Latvia, G., Lat. ($0.1930).

Liberia, G., Dollar ($1.0000). Currency: Depreciated silver token coins.

Lithuania, G., Litas ($0.1000). Currency: notes of the Bank of Lithuania.

Mexico, G., Peso ($0.4985).

Netherlands, G., Guilder (florin), ($0.4020).

Newfoundland, G., Dollar ($1.0000).

Nicaragua, G., Cordoba ($1.0000).

Norway, G., Krone ($0.2680).

Panama, G., Balboa ($1.0000).

Paraguay, G., Peso (Argentine), ($0.9648). Currency: Depreciated Paraguayan paper currency.

Persia, S., Kran ($0.0704). Currency: Silver circulating above its metallic value. Gold coin is a commodity only, normally worth double the silver of same denomination.

Peru, G., Libra ($4.8665).

Philippine Islands, G., Peso ($0.5000).

Poland, G., Zloty ($0.1122). Value established by decree on Oct. 13, 1927.

Portugal, G., Escudo ($1.0805). Currency: Inconvertible paper

Roumania, G., Leu ($0.0060. By law of 1929).

Russia, G., Ruble ($0.5146). Pre-war unit (one Soviet chervonetz = 10 gold rubles.)

Salvador, G., Colon ($0.5000).

Siam, G. (Baht), Tical ($0.4424). Value established by law of April 15, 1928.

Spain, G., Peseta ($0.1930). Valuation is for gold peseta: currency is notes of the Bank of Spain.

Straits Settlements, G., Dollar ($0.5678).

Sweden, G., Krona ($0.2680).

Switzerland, G., Franc ($0.1930).

Turkey, G., Piaster ($0.0440). (100 piasters equal to the Turkish £.).

Uruguay, G., Peso ($1.0342). Currency: Inconvertible paper.

Venezuela, G., Bolivar ($0.1930).

G, means gold standard country; S, silver. Value in U. S. money is stated in parentheses.

JAPANESE WEIGHTS, MEASURES AND MONEYS, WITH EQUIVALENTS.

(Revised from Financial and Economic Annual of Japan, 1928.)

JAPAN.	GREAT BRITAIN.	UNITED STATES.	FRANCE.	GERMANY.
Ri	2.44030 miles	2.44029 miles	3.92727 kilometres	3.92727 kilometre

Tsubo	3.95369 sq. yards	3.95367 sq. yards	3.30579 centiares	3.30579 quadrat-metre
Koku = 10 *To*.. = 100 *Sho* (Capacity of vessels)	4.96005 bushels	47.65389 gals. (liquid) 5.11902 bush. (dry)	1.80391 hectolitre	1.80391 hectolitre
Kwan = 1,000 *Momme*.	1-10 of one ton 8.26733 lb. (avoir.) 10.04711 lb. (troy)	1-10 of one ton 8.26733 lb. (avoir.) 10.04711 lb. (troy)	1-10 de tonne 3.75000 kilogrammes	1-10 tonne 3.75000 kilogramme
Kin = 160 *Momme*.	1.32277 lb. (avoir.) 1.60754 lb. (troy)	1.32277 lb. (avoir.) 1.60754 lb. (troy)	0.60000 kilogramme	0.60000 kilogramme
Momme	2.11644 drams 2.41131 dwts.	0.13228 oz. (avoir.) 0.12057 oz. (troy)	3.75000 grammes	3.75000 gramme
Yen = 100 *Sen*	2s. 0d. 582.	0.4984 dollar	12.7226 francs.	2.0924 mark.

The value of the yen is as follows: Prior to December, 1885, gold yen, 0.4 momme of pure gold; from January, 1886, to September, 1897, silver yen, 6.7 momme of pure silver; subsequent to October, 1897, gold yen, 0.2 momme of pure gold. The metric system was adopted in Japan by an act of April, 1921, and went into force on July 1, 1924, and is in daily use, especially in cities and in Government circles.

VALUE AND WEIGHT OF GOLD.

The unit in weighing gold is the troy ounce. A "fine" ounce means an ounce of pure gold. The mint value of gold does not fluctuate but remains constant at $20.67183462 per fine ounce. Troy measure is used in weighing gold. The grain is the same in both troy and avoirdupois measure but the ounce and the pound are not the same. The troy ounce contains 480 grains and the troy pound 5,760 grains, there being 12 ounces to the pound. The troy pound is never used in weighing gold, even when the weights of large quantities are to be computed. The avoirdupois ounce contains 437½ grains and the avoirdupois pound contains 7,000 grains, there being 16 ounces to the pound.

There is no standard bar, in the sense of the word, there being various sizes—jewelers preferring those valued at from $100 to $500.

The $10,000 bar is most frequently used for transfer purposes. It is about 3½ inches wide, 6¾ inches long, and 1¾ inches deep. The value of such a bar ranges from $10,000 to $11,000. It is the largest made.

For a gold bar valued at $50,000 (should there be such) the dimensions would be: 3½ inches wide, 6¾ inches long and 8¾ inches deep; the value $50,005.167, and the weight, 2,418.75 ounces.

A 17-inch cube of gold weighs a ton.

These dimensions are for pure gold bullion, called 1,000 fine, which is 999.99 fine, and are approximations only.

The development of trust operations by national banks showed continued and substantial progress throughout the nation from figures compiled as of June 29, 1929.

On that date 2,442 national banks, with a combined capital of $1,218,049,515, held permits to exercise trust powers, 1,734 of which had established trust departments and were administering 75,988 trusts, with individual trusts assets aggregating $4,237,648,633.

Seven hundred and thirty-six of these banks also were acting as trustees for bond and note issues aggregating $7,370,154,456.

Loans and discounts of national banks on June 29, 1929, totaled $14,801,130,000; United States Government securities owned, $2,803,860,000; other securities owned, $3,852,675,000; cash in vault, $298,003,000.

On June 29, 1929, surplus was $1,479,052; national bank notes outstanding, $649,452,000; certified checks outstanding, $2,548,482,000.

The deposits on that date were thus classified; demand, $10,504,268,000; time, including postal savings, $8,317,095,000; United States deposits, $228,243,000; total, $21,598,088,000.

The form of circulation statement was revised beginning June 30, 1922, so as to include in the holdings of the Federal reserve banks and agents, and hence, in the stock of money, gold bullion and foreign gold coin held by the Federal reserve banks and agents, and to include in the holdings of the Federal reserve banks and agents, and, hence, exclude from money in circulation, all forms of money held by the Federal reserve banks and agents whether as reserve against Federal reserve notes or otherwise. The form of the circulation statement was revised beginning December 31, 1927, so as to exclude earmarked gold coin from the stock of money, and, hence, from money in circulation, and to include in the holdings of the Federal reserve banks and agents, and, hence, in the stock of money, gold coin and bullion held abroad for the account of the Federal reserve banks. These changes do not affect the figures prior to the establishment of the Federal reserve system. For the sake of comparability the figures from 1915 on, as shown on this statement, have been compiled on the basis of the revisions mentioned. Beginning on December 31, 1927, the circulation statement was also revised to include throughout minor coin (the bronze 1-cent piece and the nickel 5-cent piece). For the sake of comparability the figures from 1900 on, as shown on this statement, have been revised to include minor coin. Satisfactory data on minor coin for earlier years were not available.

Beginning on December 31, 1927, the circulation statement is dated for the end of the month instead of the beginning of the succeeding month as was the practice theretofore.

The amount of money held in trust against gold and silver certificates and Treasury notes of 1890 should be deducted from these totals before combining them with total money outside of the Treasury to arrive at the stock of money in the United States.

STOCK OF MONEY, CLASSIFIED BY KIND, AT THE END OF EACH FISCAL YEAR.

June 30	Gold coin and bullion	Silver dollars.	Subsidiary silver.	Federal reserve notes.	National bank notes.	Other and total.	Pct. of gold to total money.

"Ordinary receipts" include receipts from customs and internal revenue; payments of principal and interest on account of obligations of foreign governments and railroad securities owned by the Government; and receipts from miscellaneous sources; but do not include postal revenue or receipts from issues of securities.

Panama Canal receipts in 1929, (year ending June 30) were $28,046,704, and expenditures were $9,045,-647.

Population estimate of Government Actuary used in per capita figures.

"Expenditures chargeable against ordinary receipts" cover the operating expenditures of the Government departments and establishments, interest on the public debt, refunds of customs and internal revenue receipts, postal deficiency, expenditures on account of operations in special accounts and for investments on account of various trust funds, and public debt retirements chargeable against ordinary receipts; but do not include public debt retirements from the surplus or from the balance in the general fund.

Figures in "War" column are on a warrant basis, and, up to and including the fiscal year 1922, include expenditures for rivers and harbors, but not expenditures on account of the Panama Canal or civil expenditures under the War Department at Washington.

Beginning with the fiscal year 1923, the figures include all expenditures, civil and military, under the War Department, exclusive of Panama Canal.

Figures in "Navy" column are on a warrant basis, and, up to and including the fiscal year 1922, do not include civil expenditures under the Navy Department at Washington.

Beginning with the fiscal year 1923, the figures include all expenditures, civil and naval, under the Navy Department.

COMPTROLLER GENERAL OF THE UNITED STATES.

The Comptroller General of the United States, as head of the General Accounting Office, is charged by law with the settlement and adjustment, independently of the executive departments, of all claims and demands whatever by the Government or against it, and all accounts whatever in which the Government is concerned, either as debtor or creditor, and is vested with all powers and duties previously conferred or imposed by law upon the former Comptroller of the Treasury and the six Auditors of the Treasury Department.

He superintends the recovery of all debts finally certified by audited settlements to be due the United States, and the preservation of all accounts, with their vouchers, etc., which have been finally adjusted, and countersigns all warrants authorized by law to be signed by the Secretary of the Treasury.

It is the duty of the Comptroller General to investigate at the seat of government or elsewhere all matters relating to the receipt, disbursement, and application of public funds.

General accounting office officials—*Comptroller General*—J. R. McCarl, Neb.; *Assistant Comptroller General*—Lurtin R. Ginn, Ind.; *General Counsel*—R. L. Golze, Pa.; *Executive Officer*—J. L. Baity, Mo.; *Counsel*—Charles M. Galloway, So. Car.; *Chief Clerk*—Reed F. Martin, West Va.; *Disbursing Clerk*—Carl Collier, Ohio.

Section 302 of the Budget and Accounting Act of June 10, 1921, provides that the Comptroller General and the Assistant Comptroller General shall hold office for fifteen years and that the Comptroller General shall not be eligible for reappointment. The terms of these two officers began July 1, 1921.

The figures above as to the gross debt do not include gold, silver or currency, certificates, or Treasury notes of 1890.

The interest-bearing debt on June 30, 1928, totaled $17,317,695,096; matured debt, $45,331,660; non-interest-bearing debt, $241,263,806.

The interest bearing debt is exclusive of bonds issued to the Pacific railways, and the Navy pension fund.

The non-interest bearing debt includes old demand notes; United States notes, less the amount of the gold reserve since 1900; postal currency and fractional currency, less the amounts officially estimated to have been destroyed; and also the redemption fund held by the Treasury to retire national bank notes of national banks failed, in liquidation, and reducing circulation, which prior to 1890 was not included in the published debt statements.

A large part of the appropriations made by Congress are annual appropriations, intended only to cover the running expenses of the Government during a specific fiscal year. Such appropriations can be used only to pay bills incurred during the fiscal year for which they were made, and if not required for this purpose, unless repealed before being entered on the books, are carried to the surplus funds at the end of the third fiscal year.

Appropriations for rivers and harbors work, lighthouses and public buildings are by law exempted from the fiscal year limitation, and are available until expended, as are also other appropriations when expressly exempted by law.

In the case of these appropriations the amount that can be expended during any one fiscal year is sometimes limited. If not limited the appropriation can all be used in one year or spread over a period of years according to the nature of the undertaking.

MONETARY SYSTEM OF THE UNITED STATES.

Gold Coin—Weight, 25.8 grains to the dollar; fineness, 900-1000, unlimited as to issue, denominations, $2.50, $5, $10, $20; legal tender, unlimited; receivable for all public dues; exchangeable for gold certificates and other forms of money.

Standard Silver Dollars—Weight, 412.5 grains; fineness, 900-1000; ratio to gold, 15.988 to 1; coinage ceased in 1905, resumed in 1921; legal tender, unlimited, unless otherwise contracted; receivable for all public dues; exchangeable for silver certificates and other forms of money.

Subsidiary Silver Coin—Weight, 385.8 grains to the dollar; fineness, 900-1000; ratio to gold 14.953 to 1. Limit of issue, needs of the people. Denominations 10 cents, 25 cents, 50 cents; legal tender not to exceed $10; receivable for all dues up to $10; exchangeable for minor coin; redeemable in "lawful money" at the Treasury in sums or multiples of $20.

Minor Coin—Weight, 5 cent piece, 77.16 grains, 75 per cent. copper, 25 per cent. nickel; 1 cent piece, 48 grains, 95 per cent. copper, 5 per cent. tin and zinc; limit of issue, needs of the people; legal tender not to exceed 25 cents; receivable for all dues up to 25 cents; redeemable in "lawful money" at the Treasury in sums or multiples of $20.

Gold Certificates—Limit of issue for gold bullion, to two-thirds of the amount of gold certificates outstanding; for gold coin, unlimited, unless gold coin reserve against United States notes (greenbacks) falls below $100,000,000; denominations, $10, $20, $50, $100, $500, $1,000, $5,000, $10,000; made legal tender by act Dec. 24, 1919; receivable for all public dues; redeemable in gold coin at the Treasury.

Silver Certificates—Unlimited as to issue for standard silver dollars; denominations, $1, $2, $5, $10, $20, $50, $100; not a legal tender; receivable for all public dues; redeemable in silver dollars at the Treasury.

United States Notes—Limit of issue, $346,681,016; denominations, $1, $2, $5, $10, $20, $50, $100, $500, $1,000; legal tender for all debts, public and private, except customs and interest on the public debt, receivable for all public dues; redeemable in gold at the Treasury.

Treasury Notes of 1890—No further issues, volume steadily diminishing by redemption in silver dollars; denominations, $1, $2, $5, $10, $20, $50, $100, $500, $1,000; legal tender, unlimited, unless otherwise contracted; receivable for all public dues; redeemable in gold or silver dollars at the Treasury.

National Bank Notes—Limit of issue subject to deposit of required security and not to exceed capital of banks; denominations, $5, $10, $20, $50, and $100; notes of denominations of $1, $2, $500 and $1,000 authorized, but few issued and none available for issue; not a legal tender; receivable for all public dues except customs; redeemable in "lawful money" at the Treasury or at bank of issue.

Federal Reserve Bank Notes—Issue unlimited, subject to deposit of the required security, and the discretion of the Federal Reserve Board; denominations, $1, $2, $5, $10, $20, $50, $100, $500, $1,000; not a legal tender; receivable for all public dues except customs; redeemable in "lawful money" at the Treasury or at bank of issue; only a small amount is outstanding.

Federal Reserve Notes—Limit of issue same as Federal Reserve Bank notes; denominations, $5, $10, $20, $50, $100, $500, $1,000, $5,000, $10,000; not a legal tender; receivable for all public dues; redeemable in gold at the Treasury, and in gold or "lawful money" at any Federal Reserve Bank.

SMALLER-SIZED PAPER CURRENCY.

The issue of the smaller-sized paper currency of the United States Government was begun by the Treasury Department on July 10, 1929, and thereafter progressed on the basis of retiring outstanding old-size currency unfit for circulation with the new reduced-size currency.

In due course all outstanding old-size currency were replaced with the new small-size, and this was accomplished, for the most part, before the end of the 1929 calendar year.

The initial issue of the new "shin plasters" was made through the Federal Reserve Banks and their branches.

The new size for the paper currency is 6 5-16 x 2 11-16 inches. The principle of denominational designs has been strictly followed. The back designs are uniform for each denomination irrespective of kind. The face designs, likewise, are characteristic for each denomination as regards the important protective features, with only sufficient variation in detail to indicate the kind

Five kinds of paper currency are now issued—United States notes, silver certificates, gold certificates, Federal reserve notes, and National bank notes. The new designs will be applied to all issuable denominations of all these kinds.

The portraits assigned to the faces, and the embellishments provided for the backs, of the several denominations, are as follows:

Denomination	*Portrait on face*	*Embellishment on back*
$1	Washington	Ornate ONE
$2	Jefferson	Monticello
$5	Lincoln	Lincoln Memorial
$10	Hamilton	U. S. Treasury
$20	Jackson	White House
$50	Grant	U. S. Capitol
$100	Franklin	Independence Hall
$500	McKinley	Ornate FIVE HUNDRED
$1,000	Cleveland	Ornate ONE THOUSAND
$5,000	Madison	Ornate FIVE THOUSAND
$10,000	Chase	Ornate TEN THOUSAND

The backs of the new currency are printed uniformly in green; the faces, in black; and the Treasury seals and the serial numbers are imprinted in the following colors:

Silver certificates, blue; United States notes, red; Gold certificates, yellow; Federal reserve notes, green; National bank notes, brown.

For the reduced size currency a new type of distinctive paper has been adopted. The paper basically is of the type developed during the past few years, with a higher folding endurance, particularly in the cross direction, than the paper formerly in use.

The use of small segments of silk fiber as a distinctive feature has been retained, but the segments are scattered throughout the sheet and not localized in rows as formerly.

The first issues of the new small size currency included all kinds except National bank notes, and all denominations from $1 to $20. Small size gold certificates and Federal reserve notes in denominations above $20 were issued at a later date. Small size National bank notes were printed and issued in order of charter numbers.

The U. S. Bureau of Engraving and Printing, at Washington, began printing the little notes on Aug. 6, 1928, and up to June 30, 1929 the Bureau had delivered 697,530,228 of the notes to the Treasury Department and the Federal Reserve Banks; and deliveries are officially expected to total 1,020,600,000 small notes by June 30, 1930.

HIGH PRICES FOR RARE COINS.

The George Alfred Lawrence collection of rare coins, sold at auction at New York City in 1929, fetched some record-breaking prices.

For a privately minted $5 gold piece issued in California in 1849, during the gold fever period, $7,900 was paid. According to Thomas L. Elder, the highest previous price was $6,000, paid at an auction in Europe. The purchaser was Henry Chapman, a Philadelphia dealer, acting for a private collector whose name was not divulged.

The coin was minted for the Massachusetts and California Co., and bears on its face a shield in which is depicted a cowboy throwing a lariat with a bear and deer at either side.

The next highest price of the sale also exceeded all former auction prices for coins in America when $7,000 was paid for the Wass, Molitor & Co.'s privately minted $20 gold piece, struck in San Francisco in 1855.

No less than eight of these privately minted California gold pieces brought $1,000 or more apiece, and for ten coins prices between $600 and $1,000 were paid.

Chapman got, on a bid of $3,900, the Dubosq & Co.'s $10 gold piece, struck in California in 1850, and he also paid $3,700 for a $5 gold coin issued by Schults & Co. in 1851, bearing on the reverse an eagle with the inscription, "Pure California Gold."

Of several $50 coins the only one to get in the thousand-dollar class was the $50 piece minted by Kellog & Co. in San Francisco in 1855, for which $2,150 was paid.

The Baldwin & Co. $10 gold piece, struck in San Francisco, 1851, sold for $1,550.

For a rare Mormon gold coin, $10, minted in Salt Lake City, 1849, $1,125 was paid, and the Moffat & Co. ingot of gold for $16, of which but ten are known to exist, sold for $1,000.

NOTES—Florida and Nebraska have no bonded indebtedness. Kentucky has no bonded indebtedness but in 1927 had outstanding warrants for miscellaneous purposes amounting to $10,887,000. Wisconsin has no bonded debt but the general fund of the State is indebted to the school fund of the State to the amount of $1,163,700, and to the normal fund to the amount of $500,000 in the form of 7% certificates of indebtedness which are being paid off at the rate of $100,000 or more each year.

"Education" includes universities, public school systems (cost of buildings and maintenance.)

"Welfare Institutions" includes special and general hospitals, insane asylums, penal institutions and reformatory schools.

"Highways" includes bridges and grade crossing elimination.

"Funding operations" includes refunding operations.

(*a*) are bond issues for waterways and harbors;

(*b*) are bond issues for physical improvements other than highways, waterways, harbors and buildings;

(*c*) are for agricultural aid;

(*d*) $6,172,000 for waterways and Boston Harbor, and $93,041,000 for metropolitan parks, metropolitan sewerage, and metropolitan water;

(*e*) $151,848,000 for State Barge (Erie) Canal, and $39,609,000 for parks, etc., and grade crossing elimination;

(*f*) $976,000 for harbor improvement, and $550,000 for parks;

(*g*) $39,000,000 for agricultural aid (rural credits and land settlements), and $2,000,000 for internal improvements;

(*h*) $5,000,000 for State flood relief.

PER CAPITA BONDED DEBT OF STATES IS $16.61.

From the fourth national survey of State debts and securities, made by the Bank of America, 44 Wall Street, New York City, The World Almanac by permission, reproduces the above table. The information was furnished the bank's statistician, with hardly an exception by State officials having financial operations in their charge and it is, therefore, believed to be as far as possible authoritative and complete. With few exceptions the individual tabulations of the States read as of January 1, 1928, or of more recent date.

The term "state debt" as used covers only funded or "bonded indebtedness" and excludes all items of unfunded or current indebtedness.

No attempt has been made to determine the net debt of the States of the Union. The methods of handling sinking funds and the arrangements for retiring bond issues differ in all the States. The "net funded debt" as returned by the several State Treasurers to The World Almanac is given in a State table elsewhere; also as returned by the Bureau of the Census (see Index).

The indebtedness of seven States remained unchanged since the last review (see The World Almanac for 1928, pages 290, 291); the 41 others have issued new bonds to an amount of some $197,000,000 and retired $70,000,000 worth, a net increase of 6.7%. Several bond issues have appeared too recently to be incorporated in the table. These comprise highway and bridge bonds of Alabama, Illinois and Tennessee; general construction bonds of Maryland, and bonds of North Carolina and South Dakota.

The per capita bonded debt in the above table is $16.61 an increase of 5.4% in the year. The total exceeds by $62,000,000 the public debt of the United States as it was on June 30, 1917, the year the country entered the World War. This State indebtedness is represented largely by obligations incurred during the past eight years, only 31% of the present gross debt existed prior to Jan. 1, 1920.

In connection with the total bonded indebtedness of the States due to expenditures for highways and bridges (45.7% of the total) it should be noted that from 1916 through 1927 the Federal Government assisted the States to the extent of more than half a billion dollars and in 1928 $71,000,000 additional was apportioned among the States under the Federal Highway Act.

POLITICAL AND FINANCIAL STATISTICS OF THE STATES.

State.	Ent'd Union.	Ar'a Sq. M.	Settled.	L'th, M.	Br'th M	Capital.	Sal. Gov.	Term

No allowance is made in net income column for credit for dividends or interest on U. S. obligations, if any, included in net income.

Amount of surtax is the total of the instalments for the income considered.

The new law for the year 1928, and thereafter, re-enacted, as fixed by the Revenue Act of 1926, the normal tax rates for individuals at 1½%, 3% and 5%; and the surtax rates, with a maximum of 20% on amounts in excess of $100,000.

PERSONAL EXEMPTIONS.

The personal exemption of a single person remains at $1,500 and a married person or head of a family at $3,500.

The maximum amount of income which may be considered as earned was increased to $30,000.

CORPORATION TAX REDUCED.

The corporation income tax was reduced to 12%. The credit allowed corporations having a net income of $25,000 or less was increased to $3,000.

The estate tax was retained, the maximum rate being 20% with an exemption of $100,000.

AUTO TAX REPEALED.

The excise tax on automobiles was repealed. The tax on the use of foreign built boats was repealed, to take effect July 1, 1928.

DUE DATES FOR RETURNS.

Returns, except those of non-resident aliens and foreign corporations not having an office or place of business in the United States, must be made on or before the fifteenth day of the third month following the end of the taxable year. Returns of non-resident alien individuals and of the foreign corporations above referred to, if made on the basis of the calendar year, must be made on or before the fifteenth day of June and, if made on a fiscal year basis, must be made on or before the fifteenth day of the sixth month following the close of the fiscal year. (*Secs.* 53 and 217.)

OTHER TAXES NAMED IN THE 1928 ACT.

Cigars, $0.75 to $13.50 per 1,000, according to size and retail selling price; the five-cent cigar is taxed at $2 a thousand; cigarettes, $3 to $7.20 per 1,000; tobacco and snuff, 18 cents a pound.

Admissions, 10 per cent. on tickets costing over $3; 5 to 50 per cent. on those sold by speculators at excess prices; boxes or seats at performances, 10 per cent.; cabaret admissions costing over 50 cents, 15 per cent. Prize fight tickets in excess of $5, 25 per cent.

Dues, 10 per cent.

On sales of pistols and revolvers by private persons or concerns, 10 per cent.

Brewers, distillers, liquor dealers, still makers, $1,000 a year.

Opium (including its derivatives) importers, manufacturers, producers or compounders, $24 a year; retailers, $3 a year; wholesalers, $12 a year; prescribers (doctors, etc.), $3 a year; opium, etc., leaves sold or removed, 1 cent an ounce.

Bonds, debentures, certificates of indebtedness, 5 cents per $100 of face value issued or reissued; capital stock, 5 cents per $100 of par or actual value issued; 2 cents per $100 value on each sale or transfer after issue.

Passage tickets (outside U. S., Canada, Cuba and Mexico), $1 on tickets costing $30 or less; $3 for tickets at over $30 and not over $60; $5 on tickets costing over $60. Tickets costing not over $10 are exempt.

Playing cards, 10 cents a pack.

Insurance policies, 3 cents per $1 premium.

Produce sales or exchanges for future delivery, 1 cent per $100.

Distilled spirits produced or imported, $2.20 per gallon until Jan. 1, 1927; thence, to Jan. 1, 1928, $1.65 per gallon; thence, $1.10 per gallon.

In the details contained in the compilation of tax statistics for 1926 New York State, with ninety-two, easily led all other States in the number of taxpayers who reported personal incomes of $1,000,000 or more. Figures by States for the "millionaire" class for 1926 follow:—

California—Two of $5,000,000 or more, one from $3,000,000 to $4,000,000.

Colorado—One from $1,000,000 to $1,500,000.

Connecticut—Two from $1,000,000 to $1,500,000.

Delaware—One from $2,000,000 to $3,000,000, two from $1,500,000 to $2,000,000, two from $1,000,000 to $1,500,000.

District of Columbia—Two from $1,000,000 to $1,500,000.

Florida—Four from $1,000,000 to $1,500,000.

Illinois—One of $5,000,000 or more, two from $2,000,000 to $3,000,000, five from $1,500,000 to $2,000,000, twelve from $1,000,000 to $1,500,000.

Indiana—Two from $4,000,000 to $5,000,000, four from $1,000,000 to $1,500,000.

Iowa—One from $1,000,000 to $1,500,000.

Maine—One from $2,000,000 to $3,000,000.

Maryland—One from $2,000,000 to $3,000,000, two from $1,000,000 to $1,500,000.

Massachusetts—One from $3,000,000 to $4,000,000, two from $2,000,000 to $3,000,000, three from $1,500,000 to $2,000,000, two from $1,000,000 to $1,500,000.

Michigan—Two of $5,000,000 or more, two from $3,000,000 to $4,000,000, one from $2,000,000 to $3,000,000, two from $1,500,000 to $2,000,000, five from $1,000,000 to $1,500,000.

Missouri—One from $2,000,000 to $3,000,000.

New Jersey—One from $2,000,000 to $3,000,000, four from $1,500,000 to $2,000,000, five from $1,000,000 to $1,500,000.

New York—Four of $5,000,000 or more, three from $4,000,000 to $5,000,000, nine from $3,000,000 to $4,000,000, seventeen from $2,000,000 to $3,000,000, fifteen from $1,500,000 to $2,000,000, forty-four from $1,000,000 to $1,500,000.

Ohio—One from $4,000,000 to $5,000,000, three from $1,500,000 to $2,000,000, five from $1,000,000 to $1,500,000.

Oklahoma—One of $5,000,000 or more, one from $2,000,000 to $3,000,000, one from $1,500,000 to $2,000,000.

Pennsylvania—Three of $5,000,000 or more, three from $4,000,000 to $5,000,000, one from $3,000,000 to $4,000,000, five from $2,000,000 to $3,000,000, six from $1,000,000 to $2,000,000, nineteen from $1,000,000 to $1,500,000.

Texas—One of $5,000,000 or more.

Wisconsin—One from $2,000,000 to $3,000,000, three from $1,000,000 to $1,500,000.

The estate tax in the year ended June 30, 1928, totaled $60,087,234; in the year ended June 30, 1929, it was $61,897,141.

The collection in chief states in 1929 was—California, $6,073,976; Florida, $5,129,551; Illinois, $3,444,314; Missouri, $3,119,091; New York, $14,380,929; Pennsylvania, $8,959,404.

The period, 1916-1921, covers Sept. 9, 1916 to Jan. 15, 1922, inclusive. The period, 1923-1927, covers Jan. 16-Dec. 31, inclusive. The figures thus offer a historical comparison.

The Federal Estate Tax, under the 1926 act (still in effect on Dec. 15, 1928) exempts estates not exceeding $100,000. The tax is 1% on the first $50,000 above the $100,000, and rises to 4% on $200,000 in excess of the exemption, and so on up to $10,000,000 on which the tax is 19%; on over $10,000,000 it is 20%.

AMERICAN AGRICULTURE: PREHISTORIC DECADENCE.

(By Vernon C. Allison)

The two most striking aspects of the ruins of former civilization in the Americas are that they are largely located in districts which are today probably incapable of supporting the population density which produced them, and they were based upon village life dependent upon maize.

A logical deduction is that the appearance, rise and decline of these civilizations are correlated with the appearance, rise and decline of conditions favoring the propagation of the maize plant.

Maize was first cultivated in Mexico or Central America about 7000 B. C. Evidence in favor of a world-wide climatic reversal within historic times is presented.

In 1226 a pulsating change occurred, involving *decrease* in precipitation in Yucatan and an *increase* over the remainder of the Americas.

Under these favorable conditions in Yucatan the Maya civilization developed, until 500 A. D. when with the return of modern conditions the Maya culture deteriorated.

After 500 A. D. increasing aridity in the Southwest impoverished the agriculture developed in the preceding era of greater moisture.

After this, nomadic pressure from more favored regions forced the consolidation of Southwestern civilization, and its restriction to that encountered by the Spaniards.

The exceptionally dry climate of the first five centuries A. D. encouraged the Ozark Bluff-Dwellers to leave the caverns and shelters. During these centuries the Mound Builders developed their civilization in the Mississippi River drainage.

With the return of moist conditions starting about 500 A. D. the Mound Builders fought a losing battle until about 1000 A. D.

They then scattered, retaining in peripheral regions a large share of their maize culture.

ESTIMATED GROSS VALUE OF FARM PRODUCTION.

(Values in thousands of dollars, i.e., 000 omitted; compiled by U. S. Dept. of Agriculture.)

Note.—The values shown above for feed and seed crops, horses, and mules, include sales by farmers in some States eventually bought by farmers in other States. These inter-farm sales tend to overstate the total income from farm production for the country as a whole.

THE MYSTERY OF SAP, IN WOOD.

Moisture in wood, or sap, is chiefly water with small percentages of organic and mineral matter present in soluble form. In the sapwood these materials are largely sugars, but in the heartwood they are principally tannins, resins, and dyestuffs.

For all practical purposes, in the drying of wood, sap can be considered as water, since only very small quantities of the other materials pass on in evaporation.

Moisture is held in green or wet wood in two ways. It is contained within the otherwise practically empty cell cavities, and it is absorbed in the cell walls.

The cell water is called "free" water; that in the cell walls may be termed "imbibed" water. Free water is found in the cell cavities only when the cell walls are fully saturated.

Shrinkage of wood takes place only with a loss of moisture and swelling with the absorption of moisture. But all loss of moisture is not accompanied by shrinkage. As wood dries, it first gives up its free water.

After the cell cavities become empty, the moisture in the saturated cell walls is drawn off. Wood does not start to shrink until the cell walls begin to lose moisture.

The point at which the cell cavities are empty but the cell walls are still saturated is thus an important one in drying. It is known as the fiber-saturation point. The moisture content at this point varies from 20 to 35 per cent, but for most woods is between 25 and 30 per cent.

In actual practice, of course, the cells near the surface fall below this point before those on the interior have reached it, and the outer wood tends to shrink before the inner. Such a state is often the cause of serious drying troubles.

Free water is present in both the heartwood and sapwood of most living trees but in greatly differing quantity. Sapwood usually contains more moisture than heartwood.

WILLIAMSBURG, VA.

(The ancient capital is to be restored to its Colonial appearance through the generosity of John D. Rockefeller, Jr.)

In 1623 Gov. Wyatt considered running a pale between the James and York Rivers from Martin's Hundred to Cheskiack. This plan was delayed. In 1632, Dr. John Pott received a patent for 1,200 acres of land, and erected palisades from Queen's Creek to Archer's Hope Creek. Between the two creeks a settlement was made on a ridge, known as Middle Plantation. In 1639 Middle Plantation was commanded by Lieut. Richard Popeley.

1674—Middle Plantation was included in a parish called Bruton.

1693—An act of the Assembly designated Middle Plantation as the site for the proposed "free school and college" of William and Mary.

October, 1698—Governor Nicholson made Middle Plantation the seat of the government, and in 1699 the Assembly approved the change. The place was newly called Williamsburg, after the reigning monarch, William, and the first survey was made by Theodorick Bland. The area of Williamsburg was 283 acres. The main street was named Duke of Gloucester Street in 1705 in honor of Queen Anne's eldest son.

1705—The General Assembly met in the new capitol building for the first time. The Governor's Palace was begun.

1706—Matley's Free School founded.

1715—Present Bruton church was finished on site of former church built in 1683.

1716—William Levingston built the first theatre in America.

1722—The last year of Spotswood administration, the town of Williamsburg was made "a city corporate," and John Holloway became first mayor.

1730—First printing office established by William Parks.

1736—The Virginia Gazette begun by William Parks.

1746—The capitol building burned.

May 30, 1765—Patrick Henry made his famous speech in the house of Burgesses at Williamsburg.

May 6, 1776—The fifth and most important of all revolutionary conventions in Virginia convened and adopted the Constitution of Virginia, the first written constitution of the New World.

1780—Thomas Jefferson became governor of Virginia in June, 1779, and remained in Williamsburg until April, 1780, when he went to Richmond, which had been selected as the seat of the government in place of Williamsburg.

July 4, 1781—Cornwallis and his army left Williamsburg.

There remain in the town more than 40 public buildings and private Colonial residences which stood before the Revolution. These have been bought and will be maintained.

The College of William and Mary of Williamsburg possesses what is believed to be the only building in the United States designed by Sir Christopher Wren.

The little old Colonial courthouse on Court Green still stands. Three or four more modern buildings will be razed to restore the Green.

Directly across from the courthouse stands a curious eight-sided tower called the Powder Horn. It was built in 1714 and was an ammunition house from which Washington supplied himself when he marched off to Braddock's relief.

Lord Dunmore's removal of the powder from this arsenal in April, 1775, precipitated the Revolution in Virginia, on the morning after the Battle of Lexington, but before the news of that encounter had reached the South.

Bassett Hall, one of the finest ancient buildings in the town, stands at the end of a long lane of trees. It was the property of Burwell Bassett, whose uncle, George Washington, was frequently a visitor. The great-grandfather of Martha Washington is buried in the Bruton Parish Churchyard.

In 1841, Vice-President John Tyler was living at Bassett Hall when the son of Secretary of State Daniel Webster galloped down the long lane of trees to bring him the news of the death of President Harrison and of his own succession. The house stands in a park of several hundred acres of woodland.

One of the famous buildings of Williamsburg, the Raleigh Tavern, was destroyed by fire in 1859. It is to be restored. The "ordinary" in this tavern was operated in colonial times by Henry Wetherburn, whose wares were so favorably known that William Randolph sold 200 acres of land to Thomas Jefferson's father for "Henry Wetherburn's biggest bowl of arrack punch."

Raleigh Tavern was twice used as an assembly place for the House of Burgesses, when the Royal Governor dissolved the Assembly for discussing disloyal petitions and resolutions, including the decision to set aside a day for fasting and prayer in 1774 when news of the blockade of Boston Harbor was received.

Raleigh Tavern was the birthplace of the Phi Beta Kappa, the first chapter of the well-known scholastic fraternity being established there on December 5, 1776.

Behind the clerk's house stands the old prison, which was built in 1701. In it were confined the associates of Black Beard, the pirate, who were executed in 1718. It is amusing to recall that £300 of the original subscriptions for founding the college were accredited to "several pirates" on the account books.

THE UNITED STATES CENSUS.

(From data supplied by the Bureau.)

The Constitution requires that a population census of the United States be taken decennially. The First Census was taken in 1790, and the most recent, the Fourteenth, in 1920. The Census Bureau was made a permanent organization in 1902, and since 1913 has been a branch of the Department of Commerce.

The scope of the decennial census, which at first was little more than a simple count of the population by family groups and by sex and color, has been extended from time to time until in 1920 it covered in detail the following subjects: (1) Population, including occupations; (2) Agriculture, including irrigation and drainage; (3) Manufactures; (4) Mines, quarries, and oil and gas wells. Approximately 87,000 enumerators, together with a large number of supervisors, clerks, and other employees, were engaged in the task of collecting the data, compiling the statistics, and preparing the reports for publication. A decennial census of the United States is the most extensive investigation of its character undertaken by any governmental or other agency in any country; and the Bureau of the Census is the largest statistical organization in the world.

In addition to the comprehensive decennial censuses, the Bureau carries on numerous other statistical inquiries of greater or less magnitude at intervals ranging in length from 10 years to one week. Of these inquiries, the most important are the following: Decennial—the blind and the deaf; institutional population (the dependent, defective, and delinquent classes); religious bodies; wealth, public debt, and taxation; transportation by water. Quinquennial—agriculture (decennial prior to 1920) electrical industries (electric light and power plantsr electric railways, telephones, and telegraphs). Biennial—manufactures. Annual—births; deaths; marriages and divorces; prisoners; insane in institutions; financial statistics of states and cities; forest products; clay and other refractory products; farm equipment; glue and gelatin. Other inquiries are made at semiannual, quarterly, monthly, and more frequent intervals, covering production of cotton, hides, leather, shoes, and many other commodities.

In 1927 the Bureau took for the first time a census of distribution or trade in some of the principal cities.

One of the important features of the Census Bureau's work is the montnly publication of the Survey of Current Business, which gives indices of current and past business conditions for the more important industries.

The Director of the Census is appointed by the President. The present Director is William M. Steuart of Michigan; the Assistant to the Director, Joseph A. Hill of New Hampshire. The permanent organization includes five chief statisticians, namely: for Population, Leon E. Truesdell; for Manufactures, Le Verne Beales; for Statistics of States and Cities, Starke M. Grogan; for Agriculture, Cotton and Tobacco, William L. Austin; for Vital Statistics, T. F. Murphy. The regular force of the Bureau at Washington during intercensal periods comprises about 700 persons, and in addition approximately 700 special agents are employed intermittently in the South for the collection of data in regard to cotton and cottonseed. During a decennial census period the office force in Washington reaches a maximum of about 6,000 employees.

INDEPENDENCE HALL NATIONAL MUSEUM, PHILADELPHIA.

Independence Hall was at first called "The State House of Pennsylvania." It now comprises the main or central building (Independence Hall), two arcades connecting it with two two-story buildings called the Wings or Province Halls, and two separate corner buildings, one Congress Hall, the other Old City Hall, one on the corner of Fifth Street and the other on the corner of Sixth Street, facing on Chestnut Street, Philadelphia. The State House group of buildings was designed and built by Andrew Hamilton, a Philadelphia lawyer, who bought the land, for which he created a trust. Congress and City Halls were in Hamilton's original scheme of the State House group, but were not built until after the close of the Revolution. The group of buildings covers a frontage of 396 feet on Chestnut Street.

ORIGINAL BUILDING.

The original building (Independence Hall) in the group was begun in 1732 and was opened and first put to use in September, 1736, when William Allen, Mayor and prominent merchant of Philadelphia, gave a dinner to the citizens. In October, 1736, the Legislature, of which Benjamin Franklin was clerk, moved into the completed part of the structure, then known as the "East Room." A new Province bell was ordered from and cast by Thomas Lister of Whitechapel, London, and arrived at Philadelphia, August, 1752. In a test the bell was cracked, and only after being re-cast twice (by Pass & Stow, two local workmen) was it finally successfully rung. This is the bell now known as the "Liberty-Bell." In June, 1753, Pass & Stow placed in position in the State House steeple the Liberty Bell, weighing 2,080 pounds. The State House was practically completed in 1759. Here are some of the historical events that have taken place in Independence Hall:

June 15, 1775, Washington accepted his appointment as General of the Continental Army.

July 4, 1776, Colonies issued the Declaration of Independence.

July 15, 1776, convention to form a new Constitution for Pennsylvania met here.

USED AS A PRISON.

September 11 and October 4, 1777, American officers captured at the Battles of Brandywine and Germantown were held prisoners in the building by the British.

Congress, which convened in Independence Hall March 4, 1777, left again on September 18, 1777; returned July 2, 1778, and continued to sit there until the close of the Revolution.

July 9, 1778, the Articles of Federation and Union between the States were signed in Declaration Chamber by eight States. The five remaining States signed later, the last, Maryland, on March 1, 1781.

CONSTITUTION FRAMED.

May 14, 1787, the Federal Convention to frame a Constitution for the United States assembled, sitting until September.

December 13, 1787, the Pennsylvania Convention met to ratify the Philadelphia Constitution.

In 1824 Lafayette was given a reception there.

December 6, 1790, the Congress of the United States occupied the County Building, now known as Congress Hall, one of the Independence Hall group, and remained there until the seat of Government was removed to Washington in 1800.

March 4, 1793, George Washington was inaugurated in Congress Hall, at the beginning of his second term as President; and John Adams was inaugurated there March 4, 1797. The House of Representatives occupied the lower floor and the Senate the second floor.

SUPREME COURT HELD THERE.

February 7, 1791, the Supreme Court of the United States held its first session on the second floor of the City Building, now known as Old City Hall, one of the Independence Hall group, and stayed there until August 15, 1800. The Supreme Court of Pennsylvania sat on the second floor of the building also. The City Building was used as the municipal headquarters until March 27, 1895.

In 1816 the City of Philadelphia bought the entire property.

There are many historic oil portraits in the National Portrait Gallery, including Washington and other early American public men.

Independence Hall was formally thrown open as a public historical museum July 4, 1876, although parts of this building were used as a museum as early as 1790. Cost of its annual upkeep is $25,000. Its art collection, made up in the main of original pictures of celebrities of Colonial and Revolutionary times, is worth over $500,000. The museum collection consists of furniture, manuscripts, musical instruments, water colors, missiles, maps, coins, currency, weapons, metals, prints, wearing apparel, utensils, and books.

There are no pay days. The National Museum is open to the public daily throughout the year, from 9 A. M. to 4 P. M.; including Sundays. The National Museum, Independence Hall group, is located on the south side of Chestnut Street, between Fifth and Sixth Streets.

UNITED STATES BUREAU OF ENGRAVING AND PRINTING.

(An official revision of the Bureau.)

The Bureau of Engraving and Printing of the Treasury Department manufactures all paper money of the Government, all stamps, including revenue stamps, all official checks, drafts, warrants, commissions, certificates, transportation requests, passports, and liquor permits.

The expenditures for the fiscal year ended June, 30, 1929, aggregated $10,603,971.77, an increase of 8.9% from the previous year.

The work is measured in the number of printed sheets delivered. The total number of sheets delivered for the year was 413,487,661.

Of these sheets 158,957 were for currency, 100,622,438 of which contained 4 notes each of the old size and 58,127,519 contained 12 notes each of the new small size; 7,090,000 and 3,523,000 were of U. S. notes, 4 and 12 notes each, respectively, 73,892,000 and 30,365,000 were of silver certificates, 4 and 12 notes each, respectively, 1,059,000 and 2,112,000 were of gold certificates, 4 and 12 notes each, respectively, 14,927,438 and 10,519 were of national bank currency, 4 and 12 notes each, respectively, and 3,654,000 and 22,117,000 were of Federal reserve notes, 4 and 12 notes each, respectively.

The total weight of this paper currency manufactured during the year would be about 1,300 tons. It would have loaded 32 forty-ton freight cars. Over half of these notes were one-dollar bills.

Of bonds, notes and certificates there were delivered 1,497,487 sheets.

Of the total number of sheets 240,381,375 were of postage and other stamps. In the year 1,800 tons of stamps were manufactured, about 45 carloads of them.

The other miscellaneous forms manufactured at this plant consumed 12,858,842 sheets, weighing about 195 tons, and would have made about 5 carloads.

The average number of employees during the year was 4,920. Of these 117 were in administrative offices, 200 were in the engraving division, 159 in the wetting division, 1,393 in the plate printing division, 419 in the numbering division, 1,009 in the examining division, 501 in the surface printing division, 226 in the postage stamp division, 323 in the engineering and machine division, and the remainder miscellaneously assigned.

The major task of the Bureau of Engraving and Printing is the production of paper money. The designing, engraving and printing of the new series of small-size currency in all denominations and kinds were performed during this fiscal year. The face value of the new notes printed aggregated nearly four billion dollars. The paper money is all printed from steel engraved plates. Since steel engravings are now little used except in printing money, practically all of the steel engravers in the country work here and for one private agency engaged in the manufacture of money for other nations.

The engravings are transferred to flat plates which now print twelve notes at an impression. Four of these plates are placed on a flat-bed power press.

Paper especially made for the Government is used. The method of printing is such as is employed almost nowhere else.

Infinite care is taken that every note shall be perfect and that none of the distinctive paper is lost in the process of manufacture. Each note is subjected to a score of examinations.

MOUNT VERNON AND THE TOMB OF WASHINGTON.

"Mount Vernon," on the west shore of the Potomac River, 15 miles below Washington, belongs to the Mount Vernon Ladies' Association of the Union.

It was built in 1743 by Lawrence, half brother of George Washington. On the death of Lawrence and of his only daughter, George Washington inherited the estate. He had lived there since 1747. He died and was buried there in 1799.

When Lawrence Washington went to Mount Vernon, the house consisted of two stories and an attic, with four rooms on each floor. When George married Martha Custis, the daughter of another wealthy planter, he enlarged the building. The mansion contains nineteen rooms.

Mount Vernon at its largest extent contained 8,000 acres of land and stretched 10 miles along the river. The plantation maintained over 300 persons, field laborers, servants, etc.

Plans to restore additional property formerly owned by George Washington near Mount Vernon omit one of the features of the old Dogue Run farm—the whiskey still, it is stated by the United Press.

At the Dogue Run farm, four miles across country from the Mansion estate, which overlooks the Potomac, the first President maintained and operated various enterprises incidental to his 8,000-acre farm. One of these was a mill which converted grain from the Washington farm into flour, and the other was a still which turned surplus grain into excellent corn and rye whiskey.

Foundations of both the mill and the still have been located. The flour mill is included in the restoration plan, but the still has been left out.

According to old records at Mount Vernon, George Washington's account sheets for 1798 show $1,700 profit from the still with "755 gallons still unsold."

Washington's early letters tell of the employment of a Scot named Anderson as manager of the Dogue Run farm. The first President remarked in one of his letters that Anderson was "a better distiller than he was a farmer" and complimented the manager as "an excellent judge of whiskeys."

Early records show that Anderson induced Washington to become a distiller. The farm manager pointed out the profits to be made by converting surplus grains into beverages and a first class still was erected at Dogue Run.

All grains raised on Washington's 8,000 acres were hauled to Dogue Run, where the best of the harvest was milled into flour and the remainder made into mash and later into whiskey.

Most of the whiskey from the Washington still was sold, but some of it was placed in barrels and taken to the Mansion house at Mount Vernon.

Prices were not high in those days and good quality rye whiskey brought from 75 cents to $1 a gallon.

One of the relics at Mount Vernon is a liquor and whiskey case, a gift to the first President from Lord Fairfax. This case consists of seven sections: one is for flasks of rye whiskey, another is for other blends, a third for choice liquors, and the four others contain various sized goblets.

Also in the Washington collection at Mount Vernon is a wine chest, the personal property of the first President. It contains sixteen one-gallon glass jugs, each designed to hold a different kind of wine.

Washington, in addition to his distilling activity, went into wine-making on an extensive scale. On the Mount Vernon, or Mansion farm, he cultivated a vineyard covering fifteen acres. All the wine presses have disappeared from the estate.

Washington's nearest neighbor, Lord Fairfax, lived 5 miles away, and George Mason, who also served his country with distinction, was still farther down the river. Fairfax's estate was known as "Belvoir," Mason's as "Gunston Hall." Mason and Washington were often associated in their public services. The three families were on most intimate terms, often visiting each other for days at a time.

Pohick P. E. church, which he and his family attended, was 7 miles away.

When the land "ran out" Washington experimented with fertilizer, practised rotation of crops and imported seed from Europe. He maintained a dock on the Potomac, exported flour and grain and imported articles from abroad. Wool, cotton and flax were raised and 1,365 yards of cloth were woven on the place one year.

In 1853 John Augustine Washington offered the Mount Vernon estate for sale. A patriotic daughter of South Carolina, Ann Pamela Cunningham, devoted herself to raising $200,000 required for the purpose.

In 1856 the Mount Vernon Ladies' Association of the Union was incorporated (it had existed since 1853) with Miss Cunningham as regent, and vice regents representing 12 States. Contributions were solicited and popular support was enlisted.

Portions of the original estate that had been sold have been acquired again; buildings which had fallen into ruin have been restored; the deer park under the hill has been restocked; the mansion has been repaired; many articles of furniture and adornment have been restored to the several rooms; numbers of valuable relics and mementos of George and Martha Washington and of their time have been deposited here, including the key of the Bastile, presented to Washington by Lafayette in 1789.

The area of the estate is about 260 acres, 23 acres having been given to the estate in 1926.

The regent is Mrs. Alice H. Richards, "Oakridge," Newcastle, Maine, elected in 1917; there are 36 vice-regents from as many States.

SALARY AND EXPENSES OF THE PRESIDENT.

The salary of the President was the cause of discussion in the First Congress.

The salary was finally placed at $25,000, and so remained until President Grant's second term (March 3, 1873), when it was increased to $50,000.

Chapter 2918 of the Laws of the Second Session of the Fifty-ninth Congress, approved March 4, 1907, appropriated "for traveling expenses of the President of the United States, to be expended at his discretion and accounted for by his certificate solely, $25,000."

In the Second Session of the Sixtieth Congress the President's salary was fixed at $75,000 a year.

The appropriation in 1907 of $25,000 for the President's traveling expenses covered only that one fiscal year. Annually since then Congress has made the same allowance, which now covers also "official entertainment" expenses.

The unexpended balance of an annual appropriation for one fiscal year may not be obligated in a succeeding fiscal year without legislative authority such as was given in the Deficiency Act of March 4, 1923.

The funds thus advanced are accounted for the same as funds advanced to other disbursing agents of the Government, all payments being supported by vouchers etc., approved and certified by the President.

The unexpended balances of the amounts thus advanced for disbursements are deposited in the Treasury and credited under the appropriation from which drawn, the unexpended balance of the appropriation from which the advances were made, being carried to the surplus fund and covered into the Treasury.

The President's use of any vessel of the Navy is pursuant to and by virtue of his authority as Commander-in-Chief of the Army and Navy of the United States.

The expenses of operating a vessel thus used are paid from the appropriations for the Navy.

The President's personal expenses of subsistence and entertainment while on the Mayflower are authorized to be charged under the appropriation for "traveling expenses of the President."

SMITHSONIAN INSTITUTION.

(Revised annually by the Institution.)

The Smithsonian Institution at Washington, D. C., was established by statute in 1846, under the terms of the will of James Smithson, an Englishman, who bequeathed his fortune in 1826 to the United States to found an institution for the "increase and diffusion of knowledge among men." From the income of the fund a building, known as the Smithsonian Building, was erected on land given by the United States.

The Institution is legally an establishment, having as its members the President of the United States, the Vice President, the Chief Justice, and the President's Cabinet. It is governed by a Board of Regents consisting of the Vice President, the Chief Justice, three members of the Senate, three members of the House of Representatives, and six citizens of the United States appointed by joint resolution of Congress.

The Regents are empowered to accept gifts without action of Congress, in furtherance of the purposes of the Institution, and to administer trusts in accord therewith. The Secretary of the Smithsonian Institution is its executive officer and the director of its activities. The Secretary is Dr. C. G. Abbot.

Its annual income is but $65,000 and effort is being made to add to its endowment,

The Smithsonian Institution throughout its history has conducted and encouraged important scientific researches and investigations, and its Secretaries—Joseph Henry, Spencer F. Baird, S. P. Langley, Charles D. Walcott and Dr. Abbot—have contributed largely to the advancement of knowledge.

The most important investigation now in progress by the Institution is the study of the radiation of the sun and its relation to life and to weather conditions on the earth, by the Secretary.

The Smithsonian issues 11 series of scientific publications which are distributed free to libraries, learned societies, and educational institutions throughout the world. It also maintains a library of 700,000 volumes, which consists mainly of transactions of learned societies, and scientific periodicals. While the body of the library is deposited in the Library of Congress and accessible to all its readers, a working library is maintained at the Institution.

The Institution has charge of the National Museum, the National Gallery of Art, including the Freer Gallery of Art; the International Exchange Service, the Bureau of American Ethnology, the National Zoological Park, the Astrophysical Observatory, and the United States Regional Bureau for the International Catalogue of Scientific Literature.

The United States National Museum is the depository of the national collections. It is rich in the natural history, geology, paleontology, archaeology and ethnology of America, and has collections illustrating American history, including large war collections illustrative of the part taken by the United States in the recent conflict, as well as many series relating to arts and industries. It is an educational and research museum, and issues scientific publications.

Its aeronautical collection includes *The Spirit of St. Louis*, deposited by Col. C. A. Lindbergh, in the Spring of 1928.

The National Museum occupies three special structures, built in 1881, 1911 and 1917 respectively, containing 650,000 square feet of floor space.

The buildings are opened to the public 9 A. M. to 4.30 P. M., week days, and Sundays, 1.30 P. M. to 4.30 P. M.

The National Gallery of Art contains numerous important art works acquired by the Smithsonian Institution during the first half century of its existence, including a valuable collection of etchings and engravings from George P. Marsh; more recent are the Harriet Lane Johnston bequest, comprising numerous portraits and other works by British, Flemish, Dutch, and Italian masters; the Ralph Cross Johnson collection of rare paintings by Italian, English, French, Flemish, and Dutch masters; the William T. Evans collection, comprising 150 examples of the works of contemporary American artists, and numerous collections of minor importance. A unit of the National Gallery is the Freer Gallery of Art, the gift of Charles L. Freer, comprising rich collections of Chinese and Japanese art in every branch, with many paintings and etchings by Whistler, and the famous "Peacock Room," besides works by Thayer, Dewing, Homer, and Tryon. The Freer collections are housed in a separate building.

The Bureau of American Ethnology, for the study of the American Indian; the *International Exchange Service* for the exchange of governmental and scientific publications between the United States and foreign countries; the *Astrophysical Observatory*, for the investigation of radiation phenomena; the *National Zoological Park*, at Washington, containing about 2,300 animals, and the U. S. Regional Bureau for the *International Catalogue of Scientific Literature*, are branches of the Institution.

8,607,805 HAVE ASCENDED WASHINGTON NATIONAL MONUMENT.

The Washington Monument, at the National Capital, has been called "one of the most stupendous works of man, and also one of the most beautiful of all human creations."

It is a tapering shaft or obelisk of white marble, 555 feet, 5 1-8 inches in height, and 55 feet 1 1-2 inches square at the base.

Visible for miles in every direction, it shares with the Lincoln Memorial Building, Continental Hall, and the Pan-American Union structure in the imposing development in that part of the Capital City which lies between the White House and the Potomac River and its Tidal Basin.

Shortly after the death of Washington in December, 1799, Congress passed a resolution, on the motion of John Marshall, which provided for the erection of a marble monument in the City of Washington and that the family of Gen. Washington be requested to permit his body to be deposited under it.

In 1816 and again in 1819 the matter was brought up, but nothing definite was done. At this time a vault was prepared for Washington's remains beneath the floor of the crypt under the dome of the Capitol.

In 1833 Chief Justice Marshall and others organized the Washington National Monument Society, which raised $88,000 by popular subscriptions and in 1848 was authorized by Congress to erect a shaft on plans prepared by Robert Mills, an architect.

The cornerstone was laid July 4, 1848.

Work progressed slowly until 1854, $300,000 having been subscribed, when a block of marble, which had originally stood in the Temple of Concord at Rome, and which had been sent by the Pope to be set in the wall in the Monument, was stolen. No trace of it ever was found. At the time, contributions of stones from societies, municipalities and the several States were being encouraged.

The disappearance of the stone angered and estranged a large body of citizens and discouraged the collection of public contributions so that all construction ceased when a height of 150 feet had been attained.

The United States Government, under an Act of Congress, took over the Monument in 1876, and, after enlarging and fortifying with concrete the old foundations, resumed work August, 1880.

The first 150 feet of the obelisk had been built of dressed white Maryland marble, in 2-foot courses.

Upon resumption, the first thirteen courses were built of white Massachusetts marble. All the courses above that are of white Maryland marble backed with New England granite up to 452 feet. Above that the walls are entirely of marble.

The capstone, which weighs 3,300 pounds, was set in place on Dec. 6, 1884, and marked the completion of the work.

The capstone is crowned by a small right pyramid of pure aluminum 5 6-10 inches at its base, 8 9-10 inches high, weighing 100 ounces.

On the faces of the aluminum point are inscribed dates and names of individuals connected with the erection of the Monument.

In the walls are 187 (May, 1928) memorial stones, with inscriptions, contributed by States, cities and organizations.

The cost of the foundations and shaft of the Monument amounted to $1,187,710. The total cost, including equipment and slopes, was $1,300,000.

The mound and slopes about the base of the Monument were constructed at a later date by Col. John M. Wilson, later Chief of Engineers, U. S. Army.

The Monument was dedicated on Feb. 21, 1885, and was opened to the public on Oct. 9, 1888.

The Monument is open from 9.00 A. M. to 4.00 P. M. daily and from 12.30 P. M. to 4.30 P. M. on Sundays and holidays, except Christmas Day.

A new elevator, capacity 35 passengers, was installed in 1926.

Ascent also by stairs (898) built between the walls and the elevator shaft.

Up to Jan. 1, 1929, visitors to the number of 8,607,805 had gone to the top of the monument.

UNITED STATES GOVERNMENT COMMERCE AGENTS.

(List Published Sept. 2, 1929, by the Department of Commerce.)

DISTRICT OFFICES AND MANAGERS.

Atlanta, Ga.: Harry O. Mitchell, 538 Post Office Bldg.
Birmingham, Ala.: Charles L. McLain, Post Office Building.
Boston, Mass.: Harvey A. Sweetser, 1801 Customhouse.
Charlotte, N. C.: C. Grant Isaacs, 1207 First National Bank Building.
Chicago, Ill.: Frederic L. Roberts, Room 577, 38 South Dearborn Street.
Denver, Colo.: Gustav E. Bittner, Chamber of Commerce Building.
Des Moines, Iowa: Buel A. Williamson, 121 Federal Building.
Detroit, Mich.: A. J. Barnaud, 607 Free Press Bldg.
Galveston, Tex.: Richard C. Long, Cotton Exchange Building.
Houston, Tex.: Ernest L. Tutt, Chamber of Commerce Building.
Indianapolis, Ind.: Kenneth H. Dame, Room 317, Chamber of Commerce Building.
Jacksonville, Fla.: W. N. Pearce, 13 Chamber of Commerce Building.
Kansas City, Mo.: J. E. Wrenn, Chamber of Commerce Building.
Los Angeles, Calif.: J. H. Smiley, 1163 South Broadway.
Louisville, Ky.: Prentiss M. Terry, Room 405, 421 West Market Street.
Memphis, Tenn.: W. B. Henderson, 266 South Main Street.
Milwaukee, Wis.: B. P. Boykin, 418 Post Office Bldg
Minneapolis, Minn.: Ernest M. Zwickel, 213 Federal Building.
Mobile, Ala.: A. E. Boadle, 154 St. Francis Street.
New Orleans, La.: John S. Goff, Room 225–A, Customhouse.
New York, N. Y.: James F. Hodgson, 734 Customhouse.
Norfolk, Va.: Herbert P. Van Blarcom, 406 E. Plume Street.
Philadelphia, Pa.: Edwin B. George, Room 812, 20 South 15th Street.
Pittsburgh, Pa.: Wilson K. Ray, Chamber of Commerce Building.
Portland, Oreg.: James E. Peebles, 215 New Post Office Building.
St. Louis, Mo.: T. L. Gaukel, 1216 Liberty Central Trust Co. Building.
San Francisco, Calif.: Wesley O. Ash, 310 Customhouse.
Seattle, Wash.: Shirl H. Blalock, 820 Skinner Bldg.
Wilmington, Del.: J. H. Farrell, 409 Equitable Bldg.

There are cooperative offices at Baltimore, Buffalo, Cincinnati, Cleveland, Hartford, Newark, N. J., New Haven, Richmond, Rochester, N. Y., Spokane, Toledo, and every other American city of consequence where there are commercial or trade bodies or associations of merchants or manufacturers.

FOREIGN OFFICES AND REPRESENTATIVES IN CHARGE.

The initials C. A., T. C., and A. T. C., after name stand for commercial attaché, trade commissioner, and assistant trade commissioner, respectively.

Acora, Gold Coast Colony, West Africa: J. Francis Foy, A. T. C.
Athens, Greece: Frederick Lyon, C. A., 17 Bucharest Street.
Barcelona, Spain: Evett D. Hester, T. C., Fontanella 10, 2°.
Batavia, Java: Thomas C. Barringer, T. C., Kali Besar, West 3.
Berlin, Germany: Fayette W. Allport, C. A., 21 Friedrich Ebertstrasse.
Berne, Switzerland: Charles E. Lyon, C. A., 26 Bundesgasse.
Bogota, Colombia: Walter J. Donnelly, C. A., Edificio del Banco de Colombia, Carrera 8. (Mail: Apartado 798.)
Bombay, India: Norman C. Stow, A. T. C., Rooms 5 and 6 Rustom Building, Churchgate Street.
Brussels, Belgium: Raymond C. Miller, C. A., 25 Place de l'Industrie.
Bucharest, Rumania: Sproull Fouché, C. A., Episcopei 6.
Budapest, Hungary: William A. Hodgman, C. A., V, Nador ucca 2, 11/5.
Buenos Aires, Argentina: Alexander V. Dye, C. A., Room 421, Boston Bank Building.
Cairo, Egypt: Charles E. Dickerson, C. A., No. 2 Sharia Soliman Pasha.
Calcutta, India: Robert C. Cockburn, A. T. C., Room 29, Grosvenor House, 21 Old Court House Street.
Caracas, Venezuela: Halbert E. Watkins, C. A., Edificio Washington, Plaza Bolivar. (Mail: Apartado 501).
Constantinople, Turkey: Julian Gillespie, C. A. American Embassy.
Copenhagen, Denmark: Harry Sorensen, C. A., Toldbodvey 7.
Guatemala, Guatemala: Merwin L. Bohan, C. A., 6a Avenida Sur No. 6, "Edificio Hispania."
Habana, Cuba: Frederick Todd, C. A., Horter Building, 326, Obispo 7. (Mail: Apartado 844.)
The Hague, Netherlands: Jesse F. Van Wickel, C. A., 1, Beguidenhoutscheweg.
Hamburg, Germany: James T. Scott, T. C., 31 Moenckebergstrasse.
Helsingfors, Finland: O. S. Watson, C. A., Henriksgatan No. 22.
Johannesburg, South Africa: Samuel H. Day, T. C., 42 Standard Bank Chambers, Commissioner St.
Lima, Peru: Oliver C. Townsend, C. A., Edificio Italia, Calles de Coca y Jesus Nazareno.
London, England: William L. Cooper, C. A., Bush House, Aldwych, London, W. C. 2.
Madrid, Spain: Charles A. Livengood, C. A., Avenida Conde de Penalver 18.
Manila, P. I.: George C. Howard, T. C., 510–512 Masonic Building.
Melbourne, Australia: Sherman R. Peabody, T. C., Chancery House.
Mexico City, Mexico: George Wythe, C. A., Callejon de Condesa No. 3, Apartada 2097.
Milan, Italy: DeForest A. Spencer, T. C., Via Dante, No. 18.
Montevideo, Uruguay: Spencer B. Greene, Acting C. A., Calle Uruguay, Esquina Ciudadela.
Montreal, Canada: E. G. Sabine, T. C., 915 Royal Bank Building, 360 St. James Street. (Mail: Box 2894.)
Mukden, Manchuria, China: John J. Ehrhardt, T. C.; U. S. Department of Commerce, Ssu Djing Lu.
Oslo, Norway: Marquand H. Lund, C. A., Karl Johans Gate 35.
Ottawa, Canada: Lynn W. Meekins, C. A., 321 Metropolitan Building. Mail: Box 547.)
Panama City, Panama: George C. Peck, C. A., National City Bank Building, Avenida Central. (Mail: Box 346.)
Paris, France: D. J. Reagan, A. C. A., 5 Rue de Chaillot.
Peking, China: A. Bland Calder, Acting C. A., American Legation.
Prague, Czechoslovakia: Karl L. Rankin, C. A., Vaclavske Namesti 7, Prague II.
Riga, Latvia: Lae C. Morse, C. A., Doma Laukum.
Rio de Janeiro, Brazil: Carlton Jackson, C. A., Avenida Rio Branco 109, Sala 20.
Rome, Italy: A. A. Osborne, Acting C. A., American Embassy, Rome 30.
San Juan, P. R.: J. R. McKey, T. C., P. O. Box 1033.
Santiago, Chile: Ralph H. Ackerman, C. A., rooms 5, 7, 9, and 11, 8th floor, Edificio Ariztia.
Sao Paulo, Brazil: Walter G. McCreery, T. C., Rua Libero Badaro, 51, Sebrado—7° andar, Caixa Postal 2817.
Shanghai, China: Frank S. Williams, T. C., Box 605, 3 Canton Road.
Singapore, Straits Settlements: Don C. Bliss, T. C., Room 7–a Ocean Building.
Stockholm, Sweden: T. O. Klath, C. A., Kungsgatan 30.
Sydney, Australia: Earl C. Squire, T. C., Yorkshire House, corner Pitt and Spring Streets.
Tokyo, Japan: Joseph H. Ehlers, Acting C. A., Teikoku Seimeikan, 1 Marunouchi Itchome, Kojimachi-ku.
Toronto, Canada: Harvey A. Sweetser, T. C., 1507 Daily Star Building, Toronto 2.
Vancouver, Canada: Ellwood G. Babbitt, T. C., 1527 Standard Bank Building.
Vienna, Austria: John A. Embry, Acting C. A., I. Bosendorferstrasse 13.
Warsaw, Poland: Clayton Lane, C. A., 36 Aleje Ujazdowskie, Apt. 3.
Wellington, New Zealand: Charles F. Kunkel, A. T. C., Dominion Building, Wakefield Street.
Winnipeg, Canada: Charles E. Brookhart, Acting T. C., 507 Electric Railway Chambers.

THE CAPITOL AT WASHINGTON.

The Capitol is situated in latitude 38° 53′ 20.4″ north and longitude 77° 00′ 35.7″ west from Greenwich. It fronts east.

The southeast cornerstone of the original building was laid on Sept. 18, 1793, by President Washington, with Masonic ceremonies.

The original designs were prepared by Dr. William Thornton, and the work was done under the direction of Stephen H. Hallet, James Hoban, George Hadfield, and B. H. Latrobe, architects.

The cornerstone of the extensions was laid on July 4, 1851, by President Filmore, Daniel Webster officiating as orator.

The material used in the walls is white marble from the quarries at Lee, Mass., and that in the columns from the quarries at Cockeysville, Md.

The Dome of the original central building was constructed of wood, covered with copper. This was replaced in 1856 by the present structure of cast iron. It was completed in 1865.

The Dome is crowned by a bronze statue of Freedom, modeled by Crawford.

The Senate Chamber is 113 feet 3 inches in length by 80 feet 3 inches in width and 36 feet in height.

The Representatives' Hall is 139 feet in length by 93 feet in width and 36 feet in height.

The tax assessors value the Capitol and grounds at over $53,000,000.

FACTS AND FIGURES ABOUT THE UNITED STATES CAPITOL.

Area of Capitol Building	153,112 sq. ft.
Area of floors Capitol (over 14 acres)	627,334 sq. ft.
Area of Capitol Grounds	58.8 acres.
Corner stone of Capitol laid	Sept. 18, 1793.
Corner stone of extensions laid	July 4, 1851.
Central portion old Capitol comm'd	1818.
Central portion old Capitol compltd	1827.
Capitol burned by the British	Aug. 24, 1814.
Capitol, north wing, completed	1800.
Capitol, south wing, completed	1811.
Cost of Capitol Building	$14,000,000.
Cost of House Office Building	$4,369,559.55.
Cost of Senate Office Building	$4,512,251.09.
Cubic contents, Capitol Building	13,780,080 cu.ft.
Diameter of rotunda	97 ft. 6 in.
Hgt. Capitol Plaza above Potomac.	88 ft.
Height of Statue of Freedom above east base line of Capitol	287 ft. 5½ in.
Height of Statue of Freedom	19 ft. 6 in.
Height from rotunda floor to top of canopy	180 ft. 3 in.
Length of Capitol Building	751 ft. 4 in.
Present House of Repres. first occup.	Dec. 16, 1857.
Present Senate Chamber first occup.	Jan. 4, 1859.
Statue of Freedom placed in position	Dec. 2, 1863.
Width of Capitol Bldg. (ext. width)	350 feet.
Weight of Statue of Freedom	14,985 pounds.
Weight of dome	8,909,200 lbs.

NATIONAL STATUARY HALL.

The National Hall of Statuary, formerly the Hall of the United States House of Representatives in the Capitol at Washington, was established by Congress July 2, 1864. Each State was invited to contribute marble or bronze statues of her two most distinguished deceased citizens.

The Legislature of California in 1927, named Junipero Serra, Franciscan missionary of 1769, and Rev. Thomas Starr King of Civil War days, as that state's representatives in Statuary Hall.

THE WHITE HOUSE.

The site was selected by President Washington and Major Pierre Charles l'Enfant when they laid out Washington, 1791; architect, James Hoban of Dublin; plans chosen by competition closed July 15, 1792. Cornerstone laid Oct. 13, 1792. First occupants—President and Mrs. John Adams, November, 1800. Burned by British in 1814. Mr. Hoban superintended the restoration. South portico finished 1823; cost $19,000. East Room finished and furnished by appropriation made in 1826. North portico added; cost $24,769 in 1829.

The principal apartments in the White House are officially designated: the East Room, Red Room, Blue Room, Green Room, State Dining Room, Family Dining Room, and Usher's Lobby.

The dimensions of the White House, in 1840, were length or frontage, 170 feet; depth or width, 86 feet. The mansion was built of gray sandstone, which was painted white after the fire, hence the name "the White House."

Maj. l'Enfant, the architect, had studied in Paris under the celebrated Brongniart, whose masterpiece is the well-known Hotel de Bourbon-Condé in the Rue Monsieur in the old Faubourg Saint-Germain quarter. This house was built in 1786 for the Princess Louise Adelaide de Bourbon-Condé. After its confiscation by the Revolutionary Government in 1790 it became the property of an American, Joseph Sands, who paid 156,000 francs for it.

On leaving Paris for New York in 1798, he disposed of it to the notorious Comte Paul de Barras for 44,000 francs.

Major l'Enfant copied minutely this Bourbon-Condé house when planning a house for the President, and reproduced the Blue Room, the East Room and other rooms now used for White House receptions.

The President's Office Building is located at the West of the White House. It was built and occupied in 1902, and was enlarged later. The building contains the President's Room, the Cabinet Room, a room for the President's Secretary, etc.

In 1927, the White House was repaired at a cost of $400,000. A new roof was put on, the upper part of the building was made safe with steel beams, the attic was converted into rooms, and the whole Executive Mansion was redecorated.

The White House and grounds are valued by the tax assessors at over $22,000,000.

NATIONAL GEOGRAPHIC SOCIETY, WASHINGTON, D. C.

(Prepared for The Almanac by the President, Gilbert Grosvenor, LL.D., Litt.D.)

The National Geographic Society, founded in 1888 "for the increase and diffusion of geographic knowledge," has filled such an important role in the encouragement of science and the support of its application to human welfare that its membership exceeds 1,300,000, its researches and explorations stretch to the ends of the earth, and its facilities for the diffusion of geographic and other scientific knowledge extend to every community in the world.

In the promotion of its work of pushing back the horizon of geographic knowledge, the Society pioneered in the study of Alaska and in the encouragement of the opening up of that territory; supported Peary in his expeditions that ended in the attainment of the North Pole; investigated the problems of vulcanism and seismology at Mont Pelee, Messina, and Mt. Katmai, discovering, through Dr. Robert F. Griggs, in the latter region, the great Valley of Ten Thousand Smokes, which the President of the United States has since proclaimed a National Monument, and which throws great light on the processes of vulcanism and how they affected the geography of bygone geological ages; studied the processes of glaciation in Alaska, and through these studies brought to light new data on the work of ice in the processes of earth sculpture in geologic times; opened up the famous Carlsbad Caverns in New Mexico, the world's greatest known underground labyrinth.

Furthermore, in this work it has accomplished much in the field of ethnographic and economic geography, unearthing the ancient city of the Incas of Peru—Machu Picchu, and their marvelous staircase farms that far eclipse the Hanging Gardens of Babylon; studying the remnants of long-forgotten chapters of human history in different parts of west and north China, including devil worship, pre-Buddhist religions, and ancient manuscripts, with the bringing to America of several new species of rhododendrons as a major by-product of these researches; uncovering a New World Pompeii in the Valley of Mexico, where tangible evidence of a civilization 7,000 years old has been found beneath the lava flow of the Pedregal; and unearthing the city of Pueblo Bonito in Chaco Canyon, New Mexico.

An expedition financed by the Society, headed by Dr. Joseph F. Rock, explorer-biologist, is now in the interior of China.

The Society has made a grant of $65,000 to the United States Astrophysical Observatory, of the Smithsonian Institution, for the pursuit of its studies on the determination of the laws of solar radiation and the relation thereof to terrestrial weather changes. A grant of $25,000 was made toward the Byrd Antarctic Expedition.

In its work of diffusing geographic knowledge the Society relies principally on its leading publication, the National Geographic Magazine. That periodical goes into 1,300,000 homes, and also is made wide use of in the schools.

It also issues a series of monographs known as Contributed Technical Papers in which the scientific work of its expeditions are dealt with in their purely scientific aspects.

Through the columns of more than 500 leading American daily newspapers and the large plate-matter syndicates, the Society's Geographic News Bulletins are reaching into more than half the homes of the United States.

A further educational activity, undertaken by the Society is its Pictorial Georgraphy. The Society has compiled and distributed among its entire membership a noteworthy series of maps of the continents. Each of these contains the latest topographic and political data including numerous changes in place names and readjustments of boundaries. It also has published a series of regional maps, including those on the Caribbean, the South Pacific, which shows postwar mandate areas, and the Arctic regions. For two years The Society's cartographic department worked upon the New Map of Europe, the first to be published which contains all official spellings of place names adopted by the various nations along with the designations more familiar to Americans. This data was collected in cooperation with European governments and geographical societies. The last data to be received was the complete modernized nomenclature made known in Turkey by the adoption of the Latin alphabet. From time to time The Society is issuing detailed maps of the States of the United States containing latest highway, rail and topographical data and these in conjunction with the large map of the United States, already published, will form a complete and detailed gazetteer of our own country. Many small sketch maps also are published in the National Geographic Magazine itself to explain and locate the places mentioned in The Geographic's articles.

In its recognition of the services to mankind of those who labor to push back the horizons of geography, the Society has awarded the Hubbard Gold Medal to Peary, Amundsen, Gilbert, Shackleton, Stefansson, Bartlett, Byrd, and Lindbergh. It also awarded special gold medals to Peary, Amundsen, and Goethals, and a gold medal to Floyd Bennett.

For a review of the Society's scientific work in the past year reference is made to the article on "Scientific Progress in 1928," in this Almanac.

The officers and editorial staff are: *President and Editor*, Gilbert Grosvenor; *Vice President and Associate Editor*, John Oliver La Gorce; *Secretary*, O. P. Austin; *Associate Secretary*, George W. Hutchison; *Treasurer*, John Joy Edson; *Assistant Editors*, William J. Showalter and Ralph A. Graves; *Chief of Illustrations Division*, Franklin L. Fisher; *Chief of School Service*, J. R. Hildebrand.

THE AMERICAN LAW INSTITUTE.

The American Law Institute was organized at a meeting of about 350 judges, lawyers and law teachers at Washington, Feb. 23, 1923. The officers are:

Honorary President, Elihu Root; *President*, George W. Wickersham; *Vice Presidents*, James Byrne and Judge Benjamin N. Cardozo; *Treasurer*, George Welwood Murray; *Director*, Dr. William Draper Lewis, 3400 Chestnut St., Philadelphia, Pa.; Adviser on Professional and Public Relations, Herbert F. Goodrich, 3400 Chestnut St., Philadelphia. There is a Council of thirty-three members of Nation-wide prominence, and about 675 life members, and 203 official members.

The Institute received from the Carnegie Corporation a gift of $1,075,000, payable over a period of ten years, thus giving an income in excess of $100,000 a year. In 1926, the yearly payments were increased to $140,000 a year at the request of the Council of the Institute. The work has thus been accelerated and the Institute will have accomplished in about seven years what it expected to accomplish in ten years.

The primary purpose of the Institute is to make a Restatement of the Law—that is, the setting forth of the fundamental principles primarily of the common law. It is not desired that the Restatement shall be adopted by the Legislatures as a code.

It is realized that the multiplication of jurisdictions, courts and decisions makes it necessary to preserve the common law system.

The work was begun on June 1, 1923. Four persons, called reporters, who are primarily responsible for the production of drafts of the Restatement on different topics, were appointed: Samuel Williston, of Harvard, as Reporter for Contracts; Joseph H. Beale, also of Harvard, as Reporter for Conflict of Laws; Warren A. Seavey, of Harvard Law School, as Reporter for Agency, and Francis H. Bohlen, of the University of Pennsylvania, as Reporter for Torts.

The restatement of the Law of Business Associations has since been undertaken with the Director, William Draper Lewis, as Reporter; the restatement of the law of Property, with Richard R. Powell, of the Columbia University School of Law as Reporter; the restatement of the law of Trusts, with Austin W. Scott, of Harvard Law School as Reporter. Each has a body of experts for advisory legal assistance.

Preliminary drafts are distributed to members for tentative consideration, suggestion and criticism. This process is continued until each group is satisfied that a correct statement of the law has been reached.

If approved by the Council and by the Institute, such statement will be published officially by the Institute.

A model code of criminal procedure for recommendation to State Legislatures has been undertaken also. William E. Mikell, former Dean of the University of Pennsylvania Law School, and Edwin R. Keedy, also of the University of Pennsylvania Law School, are drafting this code with the assistance of a group of experts.

Tentative Drafts of two-thirds of the Code have already been submitted to the last two Annual Meetings of the Institute. It is expected that the Official Draft of the Code can be published during the summer of 1930. The work has been financed by the Laura Spelman Rockefeller Memorial which has appropriated $117,000 for the work.

AMERICAN GEOGRAPHICAL SOCIETY.

(Headquarters, Broadway and 156th St., N. Y City.)

The American Geographical Society was established in 1852 for the advancement of geographical science. It maintains a large geographical library, an extensive collection of maps and a yearly program of lectures.

In recognition of special distinction in the field of exploration and geographical research the Society awards four gold medals: the Cullum Geographical Medal and the Charles P. Daly Medal for distinguished geographical service in any field, the David Livingstone Centenary Medal, founded by the Hispanic Society of America, for scientific achievement in the geography of the southern hemisphere, and the Samuel Finley Breese Morse Medal for exceptionally distinguished work in geographical research.

A program of research in the geography of Hispanic America, inaugurated by the Society in 1920, is being advanced satisfactorily. Its published results include monographs, articles, hand books, and maps, the principal feature being a map of Hispanic America on the millionth scale, drawn and printed in close conformity with the standards of the International Map of the World on the scale of 1:1,000,000. When completed this map will comprise approximately 100 sheets, thirty of which have already appeared.

The Society is engaged in studies of pioneer settlement in undeveloped lands and of the population of New England.

A School of Surveying was inaugurated in 1921 under the Society's auspices.

The Society's publications consist of books and maps and a quarterly journal, the *Geographical Review*, a scientific periodical devoted to the publication of original articles, notes, and book reviews.

In connection with the compilation of its Millionth Map of Hispanic America the Society sent two expeditions into the field in 1927–1928 to make original surveys of selected areas in Ecuador and Peru. Colonization and climatological studies have been undertaken in Hispanic America; and at Trujillo, Peru, the Society has established its own meteorological station in order to secure regular reports on the special conditions that mark the coast of Peru.

The scientific work in the Arctic of Sir Hubert Wilkins was carried out under the auspices of the American Geographical Society, which also sponsored his flight from Pt. Barrow (Alaska) to Spitzbergen.

The Society cooperated with Commander R. E. Byrd in the organization of his expedition for the exploration by airplane of the Ross Sea area in Antartica.

The Officers of the Society for 1928 were: *Honorary President*, John Greenough; *President*, John H. Finley; *Vice Presidents*, W. Redmond Cross, Philip W. Henry, Alexander Hamilton Rice, M.D.; *Foreign Corresponding Secretary*, Frederic C. Walcott; *Domestic Corresponding Secretary*, Paul Tuckerman; *Recording Secretary*, Hamilton Fish Kean; *Treasurer*, Henry Parish; *Director and Editor*, Isaiah Bowman, Ph.D.

CULLUM GEOGRAPHICAL MEDAL.

1896, Robert E. Peary; 1897, Fridtjof Nansen; 1899, Sir John Murray; 1901, T. C. Mendenhall; 1902, A. Donaldson Smith; 1903, Luigi Amedeo, Duke of the Abruzzi; 1904, G. von Neumayer; 1904, Sven Hedin; 1906, Robert F. Scott; 1906, Robert Bell; 1908, Wm. Morris Davis; 1909, F. P. Moreno; 1909, Sir E. H. Shackleton; 1910, Hermann Wagner; 1911, J. B. E. A. Charcot; 1914, Ellen C. Semple; 1914, Sir John S. Keltie; 1917, Geo. W. Goethals; 1918, Frederick H. Newell; 1919. E. de Margerie; 1919 Henry F. Osborn; 1921, Albert I., Prince of Monaco; 1922, Edward A. Reeves; 1924, Jovan Cvijic; 1925, Pedro C. Sanchez, Harvey C. Hayes, Lucien Gallois.

CHARLES P. DALY MEDAL.

1902, Robert E. Peary; 1906, Thor. Thoroddsen; 1908, George Davidson; 1909, William W. Rockhill; 1909, Chas. Chaille-Long; 1910, Grove Karl Gilbert; 1912, Roald Amundsen; 1913, Alfred H. Brooks; 1914, Albrecht Penck; 1915, Paul V. de la Blache; 1917, Geo. G. Chisholm; 1918, Vilhjalmur Stefansson, 1920, George Otis Smith; 1922, Sir F. Younghusband; 1922, E. de K. Leffingwell; 1922, Adolphus W. Greely; 1924, Claude H. Birdseye; 1925, Knud Rasmussen; 1925, Robert A. Bartlett, David L. Brainard; 1928, Alois Musil.

DAVID LIVINGSTONE CENTENARY MEDAL.

1916, Sir Douglas Mawson; 1917, Theodore Roosevelt; 1917, Manuel Vicente Ballivian; 1918; Candido Mariano da Silva Rondon; 1920, Wm; Speirs Bruce; 1920, Alexander H. Rice; 1923, Griffith. Taylor; 1924, Frank Wild; 1925, Louis Riso Patron; 1926, Eric von Drygalski.

SAMUEL FINLEY BREESE MORSE MEDAL

1928. Sir Hubert Wilkins.

CABINET HOLDOVERS WITHOUT REAPPOINTMENT.

The practice of holding over without reappointment was general until the passage of the act of March 2, 1867, limiting the term of heads of departments to four years and one month.

This provision of law was in force only two years when it was repealed.

The following table, prepared by Mr. Cozier, assistant clerk of the United States Senate Judiciary Committee, shows the instances where heads of departments have held office without reappointment, after the expiration of the term of the President by whom they were appointed.

Washington, 1793: State, Treasury, War, Attorney General, and Postmaster General.

Adams, 1797: State, Treasury, War, Attorney General, and Postmaster General.

Jefferson, 1801: Treasury, Navy, and Postmaster General.

Jefferson, 1805: State, Treasury, War, Navy, and Postmaster General.

Madison, 1809: Treasury, Navy, Attorney General, and Postmaster General.

Madison, 1813: State, Treasury, War, Navy, Attorney General, and Postmaster General.

Monroe, 1817: Navy, Attorney General, and Postmaster General.

Monroe, 1821: State, Treasury, War, Navy, Attorney General, and Postmaster General.

Adams, 1825: Navy, Attorney General, and Postmaster General.

Jackson, 1829: Postmaster General.

Jackson, 1833: State, Treasury, War, Navy, Attorney General, and Postmaster General.

Van Buren, 1837: State, Treasury, War, Navy, Attorney General, and Postmaster General.

Harrison, 1841: None.

Tyler, 1841: State, Treasury, War, Navy, Attorney General, and Postmaster General.

Polk, 1845: None.

Taylor, 1849: None.

Fillmore, 1850: None.

Pierce, 1853: None.

Buchanan, 1857: None.

Lincoln, 1861: None.

Lincoln, 1865: State, War, Navy, Interior, Attorney General, and Postmaster General.

Johnson, 1865: State, Treasury, War, Navy, Interior, Attorney General, and Postmaster General.

Grant, 1869: None.

Grant, 1873: None.

Hayes, 1877: None.

Garfield, 1881: None.

Arthur, 1881: War, Navy, and Interior

Cleveland, 1885: None.

Harrison, 1889: None.

Cleveland, 1893: None.

McKinley, 1897: None.

McKinley, 1901: None.

Roosevelt, 1901: State, Treasury, War, Navy, Interior, Agriculture, Commerce, Labor, and Postmaster General.

Roosevelt, 1905: None.

Taft, 1909: None.

Wilson, 1913: None.

Wilson, 1917: State, War, Treasury, Navy, Interior, Agriculture, Commerce, Labor, and Attorney General.

Harding, 1921: None.

Coolidge, 1921: State, War, Treasury, Navy, Interior, Agriculture, Commerce, Labor, Attorney General, and Postmaster General.

Coolidge, 1925: Treasury, War, Navy, Interior, Commerce, and Labor.

Hoover, 1929: Treasury and Labor.

Note.—Table does not include instances where officers held over for only a few weeks or less.

During the second term of President Washington, Timothy Pickering, of Pennsylvania, was appointed Secretary of State. He held the position during the remainder of Washington's term and continued without reappointment after the inauguration of John Adams.

After he had served as such Secretary of State during three years of Adam's administration he was asked to resign and refused to do so. He was dismissed by President Adams on May 12, 1800.

HIGH BLOOD PRESSURE.

Many business men, including brokers, bankers, and others subjected to daily nervous strain, are afflicted with high blood pressure.

In a recent statement issued by the U. S. Health Service, considerable encouragement is given to persons having a high blood pressure if they will adopt proper treatment, which consists principally of a proper regimen.

Any individual so afflicted who takes reasonable care of himself under the direction of his physician may usually expect many years of comfortable existence.

And the importance of treatment is emphasized by the fact that the complications and conditions associated with high blood pressure, grouped as a single cause of death, lead the list of causes of death in our mortality statistics.

Every living person has blood pressure. A certain amount of pressure is necessary in order to make the blood flow through the circulatory vessels of the body. The actual pressure depends on four physical factors: (1) the force of the heart beat; (2) the resistance caused by friction through the vessels; (3) the elasticity of the vessel walls; and (4) the amount of blood.

An average blood pressure has been established by thousands of examinations made on normal persons. This average pressure varies according to age. However, perfectly healthy individuals may deviate from this average. It also shows marked variation in the same individual from hour to hour throughout the day. The upper limit of normal blood pressure for the average individual has been stated to be equal to his age in years plus 100.

The factors which influence blood pressure are many and varied.

Exercise, excitement, and anger cause increased pressure, whereas nervous depression often causes the blood pressure to fall.

Certain diseases, notably Bright's disease, various chronic infections, and chronic poisonings raise the blood pressure, while debilitating diseases, such as tuberculosis, are often associated with low blood pressure.

Heredity is also a factor. Blood pressure depends partly upon the amount of elastic tissue in our arteries. Some families noted for their longevity constitute a group having especially good arteries. Other family groups are unfortunate enough to inherit and transmit poor arteries, that is, arteries which have too little elastic tissue in them.

As age advances, thickening of the arteries inevitably occurs, and persons who have the best heritage in this respect have the best chances for old age.

Sometimes a certain amount of increased pressure is necessary, and in this case there is ground for optimism; but there are limits beyond which the rise may become dangerous in itself. This limit varies quite markedly with different persons, but is it generally considered that if the pressure can be kept below 200 the individual is relatively safe from dangerous developments due directly to the high blood pressure.

Treatment consists principally in a proper regimen, directed chiefly toward preventing the complications and relieving the symptoms.

With the heart under increased strain, it is evident that rest constitutes the greatest protection for this organ.

The amount of exercise should be decided upon by the family physician.

Food is a factor in treatment; but it is now believed that a consideration of the quantity of food—a restriction in amount—rather than quality is of the greater importance.

The giving of drugs is usually disappointing, but in emergencies they may be life saving.

The person with a high blood pressure should not become a "high blood pressure fiend," constantly thinking, talking, and living his high blood pressure.

He should adopt a cheerful frame of mind, shun too frequent estimations of the pressure, avoid physical and mental, particularly emotional, excesses, and get plenty of rest, and he may live happily with his blood pressure to a ripe old age.

HEART DISEASE A MENACE OF CHILDHOOD.

Special reports obtained by the United States Public Health Service from certain States, for 1928, with an aggregate population of approximately 25,000,000, showed that 228 persons out of every 100,000 died from heart disease, as compared with 106 from kidney disease, 105 from cancer, and 100 from pneumonia—the four great killers of mankind.

Moreover, these figures do not tell the whole story, because the number of deaths from heart disease is increasing. During the eight years from 1917 to 1925, in the registration area of the United States, the population increased by about one-third, deaths from heart disease practically doubled, and the number caused by heart diseases as a contributing factor increased 81 per cent, although the number of deaths from all causes increased only about 14 per cent.

Heart disease is particularly a disease of early life. Practically 75 per cent of all cases of heart disease develop in children under 10 years of age, as compared with about 12 per cent in persons over 40 years of age.

In the period 1921 to 1927, 20 out of every 100,000 children from 5 to 19 years of age died of heart disease annually in the registration area of 1920. In other words, in the area comprising 37 States and 82 per cent of the total population of the country, heart disease was the third highest in the list of the causes of death among children.

Moreover, of 17,974 school children carefully examined by medical officers of the United States Public Health Service in Florida, Illinois, and Missouri, over 3 out of every 100 had heart disease in the proportion of two functional disorders to one due to an organic lesion.

Heart disease may be congenital or acquired. Little can be done to prevent the development of congenital cases beyond increasing attention to the supervision of expectant mothers.

Acquired heart disease is most frequently due to improper habits of living and to the infections, particularly those of the rheumatic group.

It has been shown that the incidence of certain infections and rheumatic diseases in association with damaged hearts is very high—scarlet fever in 12 per cent, diphtheria in 16 per cent, chorea in 15 per cent, rheumatism in 44 per cent, and tonsillitis in 66 per cent of the cases.

Diphtheria may act in two ways; in one way, to cause permanent damage to the heart, and in the other, by paralyzing the enervation of the heart, to cause sudden death.

Therefore, special watchful supervision should be maintained over children recovering from diphtheria to prevent any undue strain, either physical or mental, for some weeks after an attack of diphtheria.

Neglect of this precaution has resulted in the sudden death of children who apparently were far advanced toward recovery.

HOMICIDES AND SUICIDES IN BIG UNITED STATES CITIES.

	Homicides.		Suicides.			Homicides.		Suicides.			Homicides.		Suicides.	
	No.	Rate.	No.	Rate.		No.	Rate.	No.	Rate.		No.	Rate.	No.	Rate.

1909..	1,252	6.9	3,772	20.9	1919..	2,006	8.9	3,229	14.3					

The figures in the above table were compiled by the United States Census Bureau (except 1926-1928, which are by F. L. Hoffman, in The Spectator, New York).

The homicide figures for 1928 cover 30 cities; suicide figures for 1928 cover 97 cities.

Homicides in 1928 in big cities, by Hoffman's count, were—New York, 401; Chicago, 498; Philadelphia, 182; Boston, 27; Buffalo, 30; Baltimore, 75; Cincinnati, 73; Cleveland, 134; Detroit, 228; Indianapolis, 34; Jersey City, 8; Kansas City, Mo., 99; Los Angeles, 70; Milwaukee, 16; Minneapolis, 24; Newark, N. J., 29; New Orleans, 111; Pittsburgh, 65; Richmond, Va., 23; Rochester, N. Y., 10; St. Louis, 138; St. Paul, 13; Salt Lake, 5; San Francisco, 33; Toledo, 36; Washington, D. C., 58.

MASONIC MEMBERSHIP BY STATES.

Mexico (York G. L.), 943, Panama, 346; Cuba, 12,829; Chile, 4,500; Ecuador, 536; Guatemala, 612; San Salvador (Cuscatlan), 210;—total for Latin-America, 50,000.

New South Wales, 67,273; New Zealand, 25,579; Queensland, 21,000; South Australia, 13,658; Tasmania, 3,332; Victoria, 46,771; Western Australia, 8,117—Total Australasia, 186,230.

England, 328,700; Ireland, 50,000; Scotland, 85,000.

Austria, 1,652; Czechoslovakia, 1,022; Denmark; 7,156; Finland, 279; France, 1,472; Germany, 29,500, Netherlands, 7,503; Norway, 10,000; Switzerland, 4,800; Turkey, 2,600.

Total Masons in English speaking lodges—4,150,000.

All others, approximately, 260,000.

GRAND LODGE F. AND A. M., STATE OF NEW YORK.

Grand Master—John A. Dutton, New York.
Deputy Grand Master—Charles H. Johnson, Albany.
Senior Grand Warden—R. Elliott Owens, Cortland.
Junior Grand Warden—Dana B. Hellings, Buffalo.
Grand Treasurer—Frederick G. Lemmermann, Brooklyn. *Grand Secretary*—Robert Judson Kenworthy, Masonic Hall, New York City.

In England the King, the Prince of Wales, and other members of the reigning family, with many other noblemen, are Freemasons.

Their membership is traditional from the time when Parliament proscribed Roman Catholicism as the religious faith of the rulers of Great Britain.

THE DEGREES IN MASONRY.

Lodge—1. Entered Apprentice. 2. Fellow Crafts. 3. Master Mason.

York Rite.	SCOTTISH RITE, NORTHERN MASONIC JURISDICTION.		
Chapter.	*Lodge of Perfection.*	*Councils of Princes of Jerusalem (Continued).*	*Consistories of Sublime Princes of the Royal Secret (Continued).*
4. Mark Master.	4. Secret Master.	16. Prince of Jerusalem.	25. Knight of the Brazen Serpent.
5. Past Master.	5. Perfect Master.	*Chapters of Rose Croix.*	26. Prince of Mercy.
6. Most Excellent Master.	6. Intimate Secretary.	17. Knight of the East and West.	27. Commander of the Temple.
7. Royal Arch Mason.	7. Provost and Judge.	18. Knight of the Rose Croix of H. R. D. M.	28. Knight of the Sun.
Council.	8. Intendant of the Building.	*Consistories of Sublime Princes of the Royal Secret.*	29. Knight of St. Andrew.
8. Royal Master.	9. Master Elect of Nine.	19. Grand Pontiff.	30. Grand Elect Knight K-H, or Knight of the White and Black Eagle.
9. Select Master.	10. Elect of Fifteen.	20. Master ad vitam.	31. Grand Inspector Inquisitor Commander.
10. Super Excellent Master.	11. Sublime Master Elected.	21. Patriarch Noachite.	32. Sublime Prince of the Royal Secret.
Commandery.	12. Grand Master Architect.	22. Prince of Libanus.	33. Sovereign Grand Inspector-General.
11. Illustrious Order of the Red Cross.	13. Master of the Ninth Arch.	23. Chief of Tabernacle.	
12. Knight of Malta.	14. Grand Elect Mason.	24. Prince of the Tabernacle.	
13. Knight Templar.	*Councils of Princes of Jerusalem.*		
	15. Knight of the East, or Sword.		

ANCIENT ACCEPTED SCOTTISH RITE MASONS.

Supreme Councils of Sovereign Grand Inspectors-General of the Thirty-third and Last Degree.

Officers of the Northern Masonic Jurisdiction—M.P. Sovereign Grand Commander, Leon M. Abbott, Mass.; P. Gr. Lieut. Commander, Frederic B. Stevens, Mich.; Gr. Minister of State, Harry C. Walker, N. Y.; Gr. Treasurer-General, Leroy A. Goddard, Ill.; Gr. Secretary-General, Charles H. Spilman, Boston, Mass.

Officers of the Southern Masonic Jurisdiction—M.P. Sovereign Grand Commander, John H. Cowles, Ky.; Lt. Grand Commander, Charles E. Rosenbaum, Ark.; Gr. Minister of State, Edward C. Day, Mont.; Gr. Treasurer-General, Garnett N. Morgan, Tenn.; Gr. Secretary-General, Hyman W. Witcover, D. C.

ROYAL ARCH MASONS.

Officers of the General Grand Chapter, 1927-1930. Charles Clark Davis, *General Grand High Priest*, Centralia, Ill.; John William Nellson, *Deputy General Grand High Priest*, Concordia, Kan.; William Tecumseh Sherman O'Hara, *General Grand King*, Nicholas Building, Toledo, O.; Mattison Boyd Jones, *General Grand Scribe*, 1227 Citizens Nat. Bank Bldg., Los Angeles; Gustav Adolph Eitel, *General Grand Treasurer*, Masonic Temple, Baltimore; Charles Arthur Conover, *General Grand Secretary*, 95 West Chicago St., Coldwater, Michigan; John Huske Anderson, *General Grand Captain of Host*, Fayetteville, North Carolina; George Allison Holland, *General Grand Principal Sojourner*, Lexington, Ky.; William Edward Goff, *General Grand Royal Arch Captain*, Battle Creek, Mich.

KNIGHTS TEMPLAR.

Officers of the Grand Encampment of the United States of America: *Grand Master*, Wm. L. Sharp, Ill.; *Deputy Master*, Perry W. Weidner, Calif.; *Generalissimo*, Harry C. Walker, N. Y.; *Captain General*, Isaac H. Hettinger, Mo.; *Senior Warden*, Andrew D. Agnew, Wis.; *Junior Warden*, Mark Morris, Mich.; *Treasurer*, Louis L. Emmerson, Ill.; *Recorder*, Adrian Hamersly, Ind.

The office of the Grand Master is at Chicago, Illinois, and of the Grand Recorder at 110 Chamber of Commerce Bldg., Indianapolis, Indiana.

The number of Commanderies under the jurisdiction of the Grand Encampment is 1702, membership 449,696.

CHROMIUM, BERYLLIUM, AND CADMIUM.

(From the October 12, 1929 Issue of Skillings, Mining Review.)

Articles of commerce that are daily becoming more common are implements and tools and utensils made from so-called stainless steel. In the past when one wanted a bright knife, with which to cut his food, someone had to devote considerable time frequently to rubbing and polishing the steel or silver from which it was made.

Today steel knives are made which can be washed easily and given the drying that they get in the average kitchen and still retain their smooth, untarnished finish. This is due to the fact that they are alloyed with a certain amount of the metal, chromium.

Chromium is rapidly becoming an important metal because of its ability to impart to its alloys strength, hardness, and resistance to abrasion and corrosion. It has been known as a chemical element since its discovery by Vauquelin about 1800 but was little used until after 1827, says Fred M. Becket in Research Narratives.

Then a young man named Tyson, who had experience with a British metallurgical company, noticed while in the Farmer's Market in Baltimore, Maryland, a farmer who had propped his cider barrel with chunks of a black mineral which Tyson recognized as chromite. Inquiry led him to the finding of this ore in northern Maryland and in Pennsylvania. With the financial assistance of his father he organized the chromite industry of the Maryland-Pennsylvania district.

For nearly fifty years they dominated the world supply. In those days chromium was largely used for making chemicals which by their brilliant color gave the element its name, from chroma, Greek for color.

About 1869 metallurgical use began to be made of chromium in the manufacture of steel in this country. The first ferro-chromium was made in crucibles at Brooklyn. Later the French devised a way for manufacturing ferro-chromium in blast furnaces and in 1896 the first ferro-chrome was made at Spray, North Carolina in an electric furnace. This latter method enabled an alloy richer in chromium to be made and more uniform in grade, with lower costs.

The first important use of chromium in steel was in that for the Eads Mississippi river bridge at St. Louis, which is still in constant use and was completed in 1874.

Even below 1 per cent chromium confers strength, hardness and resistance to abrasion. Such steels are most usual in ball and roller bearings, case-hardened gears and mining and milling machinery subjected to hard duty.

Nickel, vanadium and molybdenum often participate in low-chromium steels, special to the automobile, materials which successfully resist terrific strains imposed by a hard-driving public.

The method of making stainless steel was discovered about 1913. Rustless irons are similar in chromium content but, are soft enough, through reason of low carbon to be formable for use about acid plants and in seamless tubing for special uses and for steam turbine blades, which must stand high stresses.

Chromium combined with nickel forms the heating units used in toasters and various similar utensils about the house and factory. It is also used in alloys to form corrosion resisting vats and vessels in dairies, chemical plants and places where the product must be kept clean and the containers unattacked. Chromium is now plated on various metals giving a high, elastic covering that resists tarnish and abrasion, and affords a permanently bright and shining surface to plumbing fixtures, lamp reflectors, trimmings, and all the many things for which a smooth and permanent surface is required.

The bulk of our chromium comes from Rhodesia in Africa, in the form of ore, which is reduced to ferro-chromium in this country.

Another metal, which has been slow in developing and which may be as important as chromium, but for different properties, is beryllium. This metal sold in 1922 at the rate of $5,000 a pound, though there were only a few ounces available at the time.

In 1916 Hugh S. Cooper devised a method for producing metallic beryllium of 99.5 per cent purity, permitting sale at $50 a pound. Still lower costs will probably bring the metal into general use for many things.

In its metallic state it weighs only about two-thirds as much as aluminum and about the same as magnesium; it is the world's lightest inert metal, only about twice as heavy as water. It is hard enough to scratch glass easily and is much harder than aluminum or magnesium. Temperature changes cause it to expand and contract at about the same rate as iron.

It takes a high polish and is untarnished by the air. It is gray in color and has a melting point close to that of steel. Beryllium alloyed with aluminum gives greater strength and resistance to corrosion to the aluminum. It adds stiffness to copper. In iron it acts as a powerful hardening agent.

Beryllium derives its name from beryl, a hard gem stone of which emerald and aquamarine are varieties. Beryls contain about 14 per cent of beryllium oxide. Beryl occurs with feldspar in New Hampshire and is wasted today. A shipment was made very recently of 1,000 lbs. of beryl from Manitoba to New York. It is associated with tin ore at Shatford Lake and will be shipped as a by-product.

Another metal which is still quite new industrially is cadmium. This is associated with zinc and is recovered from the zinc smelters and electrolytic zinc plants. Cadmium was discovered in 1817 but it was not recovered commercialy in this country until 1906.

Cadmium is a soft heavy metal, ductile enough to be beaten out into thin foil or drawn into wire. It is harder than tin but softer than zinc.

Cadmium salts are all poisonous, which makes it unavailable as a substitute for tin in many instances.

Its principal use is in making fusible plugs for automatic sprinklers, steam boilers and fire alarms and safety fuses in electric circuits and is a constituent of other varieties of metals with low fusing points in company with lead, tin and bismuth.

It is used in making stereotype plates. Added to copper wire cadmium improves the strength and wearing qualities of the wire and raises the annealing temperature without greatly reducing the conductivity. It is used in rustproofing light steel hardware for automobiles and refrigerators.

During the World War the metal was used in the manufacture of smoke bombs and as bands on hard-jacketed bullets.

FEDERAL POWER COMMISSION.

(Headquarters, Interior Department Building, Washington, D. C.)

Commissioners—James W. Good, Secretary of War, chairman; Ray L. Wilbur, Secretary of the Interior; Arthur M. Hyde, Secretary of Agriculture.
Executive Secretary—F. E. Bonner. *Chief Engineer* Lt. Col. M. C. Tyler, U. S. Army. *Chief Counsel*—Thad H. Brown. *Solicitor*—Chas. A. Russell. *Chief Accountant*—Wm. V. King. *Chief Clerk*—F. W. Griffith.

MINERAL PRODUCTS—STATES THEY COME FROM.

(Data on this page are from the U. S. Bureau of Mines.)

Mineral.	Chief States.
Aluminum	N. Y., N. C., Tenn.
Antimony ore	Idaho
Arsenious oxide	Nev., Utah, Mont., S. D.
Asbestos	Md., Cal., Ga., Ariz.
Asphalt	Cal., Tex., Ill., Ky., Utah, Okla.
Barytes (crude)	Ga., Mo., Tenn., Va.
Bauxite	Ark., Ga., Tenn., Ala.
Borates	Cal., Nev.
Bromine	Mich., W. Va., Ohio.
Cadmium	Not separable by States.
Calcium-magnes. chloride	Mich., W. Va., Ohio.
Cement	Pa., Cal., Ind., Mich.
Chromite	Md., Cal., Ore.
Clay products	Ohio, Pa., N. J., Ill.
Clay, raw	N. J., Pa., Mo., Ga.
Coal:	
Bituminous	Pa., W. Va., Ill., Ky.
Anthracite	Pa.
Coke	Pa., Ind., Ohio, Ill., Ala.
Copper	Ariz., Mont., Utah, Mich
Diatomaceous earth	Cal., Okla., Ill., Mo.
Emery	Va., N. Y.
Feldspar (crude)	N. C., Me., N. H., N. Y.
Ferroalloys	Pa., N. Y., Md., Ohio.
Fluospar	Ill., Ky., Col., N. M.
Fuller's earth	Fla., Ga., Tex., Ill.
Garnet, abrasive	N. Y., N. H., N. C.
Gold	Cal., Col., S. D., Alaska.
Graphite	Ala., Tex., R. I., Mich.
Grindstones and pulpstones	Ohio, W. Va., Mich., Wash.
Gypsum	N. Y., Iowa, Ohio, Mich.
Iron ore	Minn., Mich., Ala., N. Y.
Iron, pig	Pa., Ohio, Ill., Ind., Ala.
Lead	Mo., Idaho, Utah, Okla.
Lime	Ohio, Pa., Mass., Mo.
Magnesite (crude)	Cal., Wash.
Magnesium	N. Y., Mich.
Magnesium chloride	Mich., Cal.
Magnesium sulphate	Mich., Wash., Cal.
Manganese ore	Mont., Ark., Va., Col.
Manganiferous ore	Minn., Wis., Mich., Colo.
Magnaniferous zinc	N. J.
Mica	N. C., N. H., N. M., Va.
Millstones	N. Y., Va., N. C., N. H.
Mineral paints	Pa., Ill., Col., Ohio.
Mineral waters	Wis., N. Y., Cal., Me.
Natural gas	W.Va., Pa. ,Okl., Cal.,Tex.
Natural gas gasoline	Okla., Cal., Tex., W. Va.
Oilstones, etc	Ark., Ind., Ohio, N. H.
Peat	Ill., N. J., Cal., Ind.
Petroleum	Okla.,Cal.,Tex., Ark.,Kan.
Phosphate rock	Fla., Tenn., Idaho, Ky.
Platinum and allied metals	Cal., Ore , Alaska, Utah.
Potash (K2O)	Cal., Md., Pa., Ind.
Pumice	Kan., Neb., Cal., Utah.
Pyrites	Cal., Va., N. Y., Wis.
Quicksilver	Cal., Tex., Nev., Ore.
Salt	Mich., N. Y., Ohio, Kan.
Sand and gravel	Ill., N. Y., Ind., Mich.
Sand-lime brick	Mich., Mass., Wis., N. J.
Silica (quartz)	Wis., Md., Cal., Nev.
Silver	Utah, Mont., Nev., Idaho.
Slate	Pa., Vt., N. Y., Me.
Stone	Pa., Ind., Ohio, N. Y.
Sulphur	Tex., La., Nev., Utah.
Talc and soapstone	N. Y., Va., Vt., Cal.
Tin	Alaska.
Titanium ore: Rutile	Fla., Va.
Tungsten	Nev., Calif., Colo., S. D.
Uranium, vanadium ores	Utah, Col.
Zinc	Okla., Kan., N. J., Mont.

MINERAL PRODUCING STATES AND THEIR LEADING MINERAL PRODUCTS.

State.	Products
Ala	Coal, iron ore, cement, clay products.
Alaska	Copper, gold, coal, silver.
Ariz	Copper, gold, silver, lead.
Ark	Petroleum, coal, natural gas, bauxite.
Cal	Petroleum, cement, natural gas, clay products.
Col	Coal, gold, clay products, silver.
Conn	Clay products, stone, lime, sand and gravel.
Del	Clay products, stone, sand and gravel.
D. of C.	Sand and gravel, clay products, sand-lime brick, stone.
Fla	Phosphate rock, stone, Fuller's earth, sand and gravel.
Ga	Clay products, stone, cement, Fuller's earth.
Idaho	Lead, silver, zinc, gold.
Ill	Coal, clay products, petroleum, cement.
Ind	Coal, cement, stone, clay products.
Iowa	Coal, cement, clay products, gypsum.
Kan	Petroleum, zinc, coal, natural gas.
Ky	Coal, petroleum, clay products, natural gas.
La	Petroleum, sulphur, natural gas, natural-gas gasoline.
Me	Stone, lime, clay products, slate.
Md	Coal, clay products, cement, sand and gravel.
Mass	Stone, clay products, lime, sand and gravel.
Mich	Iron ore, copper, cement, salt.
Minn	Iron ore, stone, cement, clay products.
Miss	Sand and gravel, clay products, mineral waters, stone.
Mo	Lead, clay products, cement, coal.
Mont	Copper, silver, coal, zinc.
Neb	Cement, clay products, sand and gravel, stone.
Nev	Copper, silver, gold, gypsum.

Of the iron ore mined in 1928 the Lake Superior district supplied 52,517,175 long tons.

Pig iron figures do not include ferro-alloys, which in 1928 totaled 754,066 long tons.

Iron ore mined in the United States (1810-1928) 1,854,797,088 long tons (2,240 lbs.)

UNITED STATES PRODUCTION OF OTHER METALS IN 1928.

(Values in Parenthesis. S. T., Short Tons; L. T., Long Tons.)

Metallic—($47,899,000); ferro-alloys, 794,659 l. t. ($66,578,039); platinum and allied metals, 59,039 troy oz., ($4,692,786).

Non-Metallic—gypsum, 5,102,250 s. t. ($32,036,169); mineral paints (zinc and lead pigments) 201,495 s. t. ($25,893,125); phosphate rock, 3,439,921 l. t. ($12,339,850); salt, 8,074,700 s. t. ($26,772,568); sand, (molding, bldg., gravel), 194,000,000 s t., ($109,000,000); sand lime brick, 313,553,000 ($3,654,590); slate, 646,360 s. t. ($11,472,291); sulphur, 2,082,924 l. t. ($37,500,000); sulphuric acid (from copper and zinc smelters), 1,140,268 s. t. ($9,007,809).

Two-thirds of the rails produced now weigh 85 pounds or over a yard, and one-quarter of the rails weigh 100 pounds or over a yard. Four-fifths of the rails are by open-hearth process. Girder and high T rails for electric and street railways are included in the figures given above. No iron rails have been produced since 1911.

Of the 1928 rolled iron and steel production, 37,177,939 tons were rolled *steel*.

Tin plate production in 1928 totaled 3,672,797,065 lbs.; tern plates, 278,241,691 lbs.; galvanized sheets, 3,040,763,695 lbs.

Iron means pig iron and ferro alloys.

Steel means steel ingots and castings.

German figures, 1900-1917 represent the German Customs Union (Germany, Luxemburg, Alsace-Lorraine, and the Saar); German figures, 1918 and since, exclude Alsace-Lorraine and the Saar.

French figures, 1919 and since, include Alsace-Lorraine.

Alsace-Lorraine figures for 1918 were January-October only.

In 1928 Luxemburg produced 2,571,777 metric tons of steel; the Saar, 2,073,051 tons.

Production of pig iron in 1927, in certain other countries (metric tons) was—Australia, 518,000; Austria, 432,749; Brazil, 70,000; China, 300,000; Czechoslovakia, 1,300,000; Hungary, 299,332; India, British, 900,000; Italy, 529,433; Japan (1928) 1,507,764; Poland, 618,186; Roumania, 63,498; Russia, 2,947,000; Spain, 593,070; Sweden, 500,000; Jugoslavia, 22,651.

World production, yearly averages—pig iron, 75,000,000 long tons; steel, 89,500,000 long tons; lead, 1,135,000 metric tons; aluminum, 117,000 metric tons; platinum, 60,000 metric tons; tin, 131,000 metric tons; zinc, 1,000,000 metric tons; tungsten, 4,000 metric tons.

Iron Ore Unmined (millions of tons)—America, 9,855; France, 4,369; Great Britain, 2,254; Sweden, 1,548; Germany, 1,374; Russia, 1,032; Spain, 610; Norway, 367; Austria-Hungary, 284; Luxemburg, 270; Asia, 260; Africa, 225; Australia, 136; Greece, 100; world total—23,000.

WORLD PRODUCTION OF COAL OF ALL GRADES, 1914-1927.

Year.	Production, in part estimated (metric tons).	Percentage produced by United States.	Year.	Production, in part estimated (metric tons).	Percentage produced by United States.
1914	1,207,000,000	38.7	1921	1,135,000,000	40.5
1915	1,193,000,000	40.5	1922	1,226,000,000	35.3
1916	1,291,000,000	41.5	1923	1,359,000,000	43.9
1917	1,356,000,000	43.6	1924	1,357,000,000	38.2
1918	1,333,000,000	46.3	1925	1,372,000,000	38.5
1919	1,173,000,000	42.8	1926	1,365,000,000	43.7
1920	1,320,000,000	45.3	1927	1,470,000,000	36.9

Includes lignite and sub-bituminous coal as reported, without attempting to reduce to equivalent tonnage of bituminous coal.

COAL, COKE AND PETROLEUM PRODUCTION IN THE UNITED STATES.

(Anthracite figures by Penna. State Dept. of Mines; rest by U. S. Bureau of Mines.)

Year (Cal.)	Anthracite Produced.	Anthracite Shipped.	Bituminous Produced.	Coke Produced.	Total Coal Production.	Petroleum Produced.

1926	734,301,000	44,963,000	299,734,000	61,768,000	365,195,000	32,293,000
1927	778,729,000	50,106,000	330,435,000	56,113,000	393,066,000	31,721,000
1928	835,157,000	77,674,000	377,183,000	60,156,000	425,755,000	34,659,000

Imports of petroleum in 1928 were 79,766,672 barrels; exports of domestic petroleum, 18,961,362 barrels; imports of gasoline, 4,297,774 barrels; exports of gasoline, 51,756,533 barrels.

There are over 90,000 miles of petroleum pipe lines in this country with a carrying capacity at any one time of 15,750,000 barrels of crude oil. The first pipe line opened in April, 1874, was from Millerstown, Pa., to Clairview, Pa., 35 miles. It carried 3,500 barrels a day to the Pittsburgh refineries. Oil was pumped to Bayonne in 1888.

The tankage capacity at wells and refineries exceeds 800,000,000 barrels of 42 gallons each.

In 1927, gasoline produced from natural gas totaled 1,641,144,000 gallons.

WORLD PRODUCTION OF PETROLEUM.

(The figures represent thousands of 42-gallon barrels.)

Total United States production (1857-1928)—11,250,346,000 bbls. (42-gal. each); total **Mexican** (1901-1928), 1,515,277,000 bbls. (42-gal. each).

Total world production, up to end of 1928—17,134,333,000 (42-gal. each).

Mexico supplies most of the petroleum imported into the United States.

The United States exports domestic crude petroleum chiefly to Canada—15,431,230 barrels in 1928, out of total exports of 18,961,362 barrels.

DEEPEST WELLS IN THE WORLD.

The deepest hole in the world, and also the deepest producing oil well in the world, is the University 1 B., at Big Lake, in Reagan County, Texas—8,523 ft.

The deepest gas well in the world was drilled by the People's Natural Gas Company at Longbridge, near Ligonier, Pa. Drilling commenced in May, 1922, and ceased in August, 1925, reading a total depth of 7,756 feet.

The deepest oil well, completed in 1925, at 7,591 feet, is in California and was drilled by the Miley Oil Company at Athens, in the Los Angeles basin.

There were drilled in 1928, in the United States, 22,331 wells, of which 12,357 produced oil, with an average initial production of 343 bbls. In 1927 there were drilled 14,179 producing wells.

There are approximately 350,000 oil wells in this country, of which 250,000 are averaging not over one barrel each a day. Drilling, each year, costs $500,000,000.

A lake that is really a well, deeper than it is wide, has recently been investigated by Russian geologists in Leningrad. It is known as Cerik-kol, or the Blue Lake, and is south of the health resort of Nalchik.

It is 235 meters long and 130 meters wide, but has the depth of 258 meters, with practically vertical walls.

Except at its surface, the water temperature remains constant the year round, at about 17 degrees Fahrenheit higher than the annual temperature of the air. The lake has no surface inlets, not even the smallest of brooks, but a little river flows out of it.

The lake is charged with hydrogen sulphide and also contains gypsum, so that nothing can live in it.

There are several of these "dead" wells or lakes in the United States.

Production includes wastage.

The amount of coal still in reserve in the ground is the difference between total original stock and total production—3,189,381,367,000 short tons.

This coal reserve total is thus divided (short tons)—anthracite 16,999,959,000; semi-bituminous, 55,031,875,000; bituminous, 1,359,608,317,000; sub-bituminous, 818,238,781,000; lignite, 939,502,436,000.

The total for California is to end of 1923, since then included under "Miscellaneous," which also includes Idaho, and Oregon, 1921-1926.

COAL RESERVES OF THE WORLD.

The coal reserves of the world, at the beginning of 1929, totaled, and is officially estimated, 7,863,556,000,000 metric tons.

These reserves, at the beginning of 1928, excluding above production figures for that year, were estimated for chief countries, as follows:

North America—United States and Alaska, 3,536,000,000,000 (of which 16,000,000,000 is anthracite); Canada, 1,361,000,000,000 (of which 2,000,000,000 is anthracite); Mexico and Central America, 10,000,000,000; total for North America—4,871,000,000,000.

South America — Colombia, 30,000,000,000; Brazil, Chile, Peru and Venezuela, 100,000,000,000; total for South America—130,000,000,000.

Europe—British Isles, 166,000,000,000; Germany, 148,200,000,000; Poland, 68,800,000,000; Ukrainia, 55,000,000,000; Czechoslovakia, 24,500,000,000; France, 18,600,000,000; Belgium, 11,000,000,000 Norway and Spitzbergen, 8,750,000,000; Spain 5,500,000,000; Holland, 5,000,000,000; Russia in Europe, 12,000,000,000; Austria and Hungary, 1,000,000,000; other and total for Europe—522,200,000,000.

Asia—China, 1,100,000,000,000 (of which 427,000,000,000 is anthracite); Siberia, 192,000,000,000; India, 87,000,000,000; Indo-China, 22,000,000,000; Japan, 9,000,000,000; other and total for Asia, 1,900,000,000,000.

Australasia — 200,000,000,000 (of which 183,000,000,000 is in the Commonwealth of Australia).

Union of South Africa—62,000,000,000.

Coal unmined in Pennsylvania is estimated at 16,000,000,000 tons anthracite and 108,000,000,000 tons bituminous; in West Virginia, 150,000,000,000 tons, bituminous.

THE ORIGIN OF COAL.

Recent researches and discoveries, particularly in Australia and the United States have led some geologists to discard the theory that coal is the decayed or preserved remains of ancient peats and ferns located in the places where the coal is now found.

On the contrary, these geologists say, most of the coal in both the northern and southern hemispheres is what remains of pine or cedar trees that were washed down from the hills by water or were carried there by ice drifts.

The only exceptions, it is asserted, are the coal beds that lie under some lakes and ponds.

WORLD PRODUCTION OF COAL AND LIGNITE IN 1928.

World production of coal in 1928 in chief foreign countries (metric tons, of 2,204.6 lbs.), estimated—Canada, 15,900,000; Belgium, 27,500,000; Czechoslovakia, 35,881,000; France, 52,400,000; Germany, 317,000,000; Saar Valley, 13,131,000; Hungary, 7,300,000; Holland, 10,920,000; Poland, 40,600,000; Russia (all), 34,102,000; Spain, 6,550,000; United Kingdom, 241,590,100; India, 21,871,000; Japan, 33,700,000; Union of South Africa, 12,570,700; Australia, 9,550,000; world total—1,444,000,000 metric tons.

GOLD AND SILVER PRODUCTION AND PRICES.

According to the Director of the Mint, 2,233,251 ounces of refined gold, valued at $46,165,400 and 58,462,507 of refined silver, valued at $34,200,567, were produced in the United States in the calendar year 1928.

The figures indicated a $746,800 gain in gold production over the prior year and a reduction of 1,971,934 ounces in silver.

Among the gold producing states California led with 513,249 ounces valued at $10,609,800, while Alaska was second with 330,604 ounces valued at $6,834,200 and South Dakota third with 318,095 ounces worth $6,575,000. Colorado was fourth, and Utah was fifth.

Utah led the silver producing states with 17,749,317 ounces valued at $10,383,350, while Montana was second with a production of 10,681,675 ounces worth $6,248,780.

Idaho was third in silver production, turning out 8,949,716 ounces valued at $5,235,584.

The Mint Bureau rated the silver at the average New York price of bar silver of 58¼ cents an ounce.

MIGRATORY CHILD LABOR.

(By Prof. G. B. Mangold, University of Southern California.)

Entire families are still transported from New York City, Syracuse, Rochester and Buffalo to the bean and pea fields of central New York and to the orchards and tomato farms of other parts of the State.

The imported workers are drawn principally from the Italian and the Slavic colonies of the cities mentioned.

The States adjacent to New York City obtain much migratory child labor from that city.

Baltimore, Philadelphia, and other cities furnish many families for work in the regions where fruit and vegetables and other products are raised and prepared for the market.

In the Middle West the beet fields and the truck farms in the neighborhood of the large cities call for migratory labor. The children of the immigrant are in the great majority. Here too a new type enters. Many Mexican families are now brought from the southwestern States.

In the South the burden rests largely on the Negro child and on the Mexicans.

In southern California and in Arizona, migratory child labor is largely of Mexican origin.

The disinclination to work by the side of the Mexican or the Oriental is also in part responsible for the deflection of such families to regions farther north.

The truck farms in certain sections of the western coast also furnish additional opportunities. Here to a larger extent than elsewhere may be found employment for a large part of the year, provided a family is willing to roam about from five hundred to more than a thousand miles each season.

In northern California and in the Pacific Northwest, a larger proportion of native child workers may be found, although all of California is fairly well covered with Mexican migratory labor.

Washington and Oregon have proved less accessible to the immigrant but have been reached by the automobile driver and his family.

MANUFACTURES IN CONTINENTAL UNITED STATES, 1849-1925.

All figures on manufactures are by the Bureau of the Census, of the U. S. Dept. of Commerce.

Those for 1927 are final and revised.

Those for 1899-1914 are also final and revised, and remain as published in the 1929 Almanac.

But those for 1921-1925, though now final, have been readjusted by the Census Bureau, and therefore do not agree with the figures in the 1929 Almanac.

These adjustments were rendered necessary, the Bureau states, (1) because the "poultry killing and dressing" industry, which had been canvassed at the censuses for 1925 and earlier years, was not canvassed at the census for 1927; and (2) because statistics for the "coffee and spice, roasting and grinding" industry were compiled for 1927 and for 1923 and prior years but not for 1925.

Therefore the totals for the United States in the table that follows have been adjusted by subtracting the data for the "poultry killing and dressing" industry for all years prior to 1927 and by including for 1923, 1921 and 1919, the data for the "coffee and spice, roasting and grinding" industry, which had been subtracted from the figures for those years as given in the report for 1925.

The statistics for States for 1925, 1923 and 1921 have been adjusted in the same manner as those for the United States totals; but the State statistics for 1919 have not been adjusted.

Horsepower was not counted in 1921.

The number of wage earners is the average number.

YEAR.	No. Estab.	No. Wage Earners.	Capital.	Wages in the Year.	Cost of Materials.	Value of Products.
1849	123,025	957,059	$533,245,351	$236,755,464	$555,123,882	$1,019,106,616

The figures for years above cover not only factories but also "hand and neighborhood and building industries."

Value figures for 1869 are on a gold basis.

The figures below, 1899-1927, exclude the hand-and neighborhood, and building industries.

1899	207,514	4,712,763	8,975,256,496	2,008,361,119	6,575,851,491	11,406,926,701

Year.	No. Estab.	No. Wage Earners.	Horsepower.	Wages in the Year.	Cost of Materials.	Value of Products.
1919	214,188	8,997,921	29,323,697	10,459,741,826	37,196,688,773	62,000,093,444
1921	196,098	6,944,315		8,200,359,380	25,291,734,235	43,618,565,920
1923	196,182	8,776,646	33,092,222	11,007,851,450	34,683,915,155	60,529,574,115
1925	187,224	8,381,511	35,766,944	10,727,337,625	35,896,886,428	62,668,259,991
1927	191,866	8,353,977	39,045,940	10,848,802,532	35,133,136,889	62,718,347,289

In 1927, in addition to wage earners, there were 132,668 proprietors and firm members, and 1,301,002 salaried officers and employees.

Salaries totaled in the year, $3,229,524,618. Fuel and power (included in "cost of materials" in the table above) cost $1,897,337,523.

MANUFACTURES IN THE U. S. BY GREAT GROUPS, 1927-1925.

The figures for 1925 for "All industries" and for "Food and kindred products," in this table, differ from those in the table on the next page, because of the exclusion here and the inclusion in the 1925 report of data for the poultry killing and dressing industry. The figures for the "Textiles and their products," "Lumber and allied products," "Leather and its manufactures," "Rubber products," and "Miscellaneous industries" for 1925 differ somewhat also, because of the transfers of establishments manufacturing certain classes o products from one group to another.

WATER POWER HERE AND ABROAD.

The United States Geological Survey estimates the developed water power in this country, as of Jan. 1, 1929, at 13,571,530 horsepower.

The potential water power is estimated at 38,110,000 horsepower, available 90 per cent of the time; and 59,166,000 horsepower, available 50 per cent of the time—in each case at an overall efficiency of 70 per cent of all developed and undeveloped sites.

Developed water power on Jan 1, 1927 was 11,720,938 h.p., on Jan. 1, 1926, it was 11,176,596 h.p.; (Mch. 1925) 10,037,655 h.p.; (Mch. 1924) 9,086,958 h.p.; (Nov. 1921) 7,926,958.

DEVELOPED AND POTENTIAL WATER POWER OF THE WORLD, JAN. 1, 1929.

The Geological Survey estimates the developed water power of the world, including the United States, at 34,575,000 horsepower; and the potential (available at ordinary low water) at 459,000,000 horsepower. This is divided by continents (potential in parenthesis) as follows—

North America—Mexico, 300,000 (6,000,000); United States, 11,721,000 (35,000,000); Alaska, 43,000 (1,000,000); Newfoundland, 160,000 (400,000); Canada, 4,556,000 (18,250,000); Costa Rica, 15,000 (1,000,000); Guatemala, 4,000 (1,500,000); Honduras, 3,000 (1,000,000); Nicaragua, 400 (800,000); Salvador, 2,700 (200,000); Panama, 13,300 (500,000); West Indies, 19,350 (150,000); Total, 17,700,000 (71,000,000).

South America—Argentina, 25,000 (5,000,000); Bolivia, 13,500 (2,500,000); Brazil, 500,000 (25,000,000); British Guiana, (2,500,000); Dutch Guiana, (800,000); French Guiana, (500,000); Chile, 114,000 (2,500,000); Colombia, 25,000 (4,000,000); Ecuador, 5,500 (1,000,000); Paraguay, 200 (2,000,000); Peru, 55,000 (4,500,000); Uruguay, (300,000); Venezuela, 13,000 (3,000,000); total—750,000 (54,000,000).

Europe—Sweden, 1,350,000 (8,000,000); Norway, 1,900,000 (9,500,000); Finland, 220,000 (1,800,000); Russia, 230,000 (3,000,000); Estonia, 16,950 (125,000) Latvia and Lithuania, 5,000 (100,000); Poland, 90,000 (1,400,000); Ukraine, 40,000 (425,000); Region of the Caucasus, 5,000 (5,000,000); Hungary, 3,000 (175,000); Czechoslovakia, 155,000 (1,000,000); Yugoslavia, 180,000 (3,000,000); Austria, 325,000 (1,660,000); Rumania, 30,000 (1,600,000); Bulgaria, 18,000 (1,200,000); Greece, 8,000 (250,000); Turkey, (Small); Albania, 1,000 (500,000); Italy, 2,300,000 (3,800,000); Switzerland, 1,850,000 (2,500,000); Germany, 1,100,000 (2,000,000); France, 2,000,000 (5,400,000); British Isles, 250,000 (850,000); Belgium, 700 (Small); Denmark, 11,000 (9,000); Netherlands, 150 (Small); Spain, 1,000,000 (4,000,000); Portugal, 10,000 (300,000); Iceland, (500,000); total—13,100,000 (58,000,000).

Asia—Chinese Republic, 1,650 (20,000,000); India; 200,000 (27,000,000); Asia Minor, 500 (500,000); Arabia, (No data); Persia, (200,000); Afghanistan, 2,000 (500,000); Siberia, 90,800 (8,000,000); French Indo-China, (4,000,000); Siam and Malay States, 4,500 (4,000,000); Chosen, 18,300 (500,000); Japan, 1,750,000 (4,500,000); total—2,100,000 (69,000,000).

Africa—Tangier, (50,000); Morocco, (250,000); Algeria, 130 (200,000); Tunisia, (30,000); Tripoli, (Small); Eritrea, (Small); British Somali, (Small); Italian Somali, (Small); Gold Coast and British mandate in Togo, (1,450,000); Liberia, (4,000,000); Sierra Leone, (1,700,000); Senegal, (250,000); Rio de Oro, (Small); Gambia, (Small); Portuguese Guinea, (Small); Union of South Africa, 5,000 (1,600,000); Angola, 4,000 (4,000,000); Southwest Africa (Union of South Africa mandate), (150,000); Belgian Congo and Belgian mandate, 250 (90,000,000); French Congo, (35,000,000); French mandate in Cameroon, (13,000,000); Nigeria and British mandate in Cameroon, (9,000,000); Rhodesia, 2,500 (2,500,000); Tanganyika (British mandate), 800 (2,700,000); British Central Africa, (1,200,000); British East Africa, 900 (4,700,000); Portuguese East Africa, (3,700,000); Bechuanaland, (20,000); Abyssinia, (4,000,000); Egypt, (600,000); Ivory Coast, Dahomey and French mandate in Togo, (2,850,000); French Guinea, (2,000,000); French Sudan, (1,000,000); Madagascar, 100 (5,000,000); total—14,000 (190,000,000).

Oceania—Australia, 2,000 (600,000); New Zealand, 60,000 (2,500,000); Philippines,)1,5000.00); Sumatra, 20.000 (2,000,000); Java, 60,000 (750,000); Borneo, including New Guinea and Papua, (7,500,000); Tasmania, 75,000 (700,000); Celebes, 500 (1,000,000); Hawaii, 25,000.(100,000); total 240,000 (17,000,000).

Potential figures for the United States in the above table represent power available 90 per cent of the time at 70 per cent efficiency.

UNITED STATES ORANGE PRODUCTION

In the five-year period 1923 to 1927, says the Department of Commerce, United States orange production averaged 35,500,000 boxes a year, of which California contributed 23,500,000 boxes, Florida 10,500,000, Porto Rico 1,000,000, and other States around 500,000 boxes.

The other States consist of Alabama, with an average yearly production of say 250,000 boxes, Louisiana 120,000, Arizona 70,000, Mississippi 50,000, and Texas 15,000.

California produced 31,000,000 boxes of oranges in 1928 as against 23,000,000 boxes the previous year, and an average crop of 23,500,000 boxes in 1923 to 1927.

Florida accounted for 12,000,000 boxes of oranges in 1928, as against 8,200,000 boxes the previous year and an average crop of 10,500,000 boxes.

Though statistics of production in Porto Rico are not available, there were shipped to continental United States during 1923 to 1927 from 200,000 to 730,000 boxes of oranges a year, which would indicate a normal commercial production of around 1,000,000 boxes a year.

WORLD AREA, AND IRRIGATED ACREAGE.

Continent.	Area.			Irrigated Area.
	Amount.	% of total.	Rank.	Amount.

The sun draws every day from the earth 37 inches of water, of which 29.5 inches are evaporation from the oceans, etc., and 7.5 inches are from the land surface.

Precipitation balances evaporation, and averages 115,391 cubic miles of water daily.

Irrigated acreage in the United States, in acres—(1889) 3,631,381; (1899) 7,782,188; (1902) 9,487,077; (1909) 14,433,285; (1919) 19,191,716; (1926) 20,471,000.

In North America the irrigated acreage, in so far as reported to the United States Department of Agriculture is—United States, 20,471,000; Barbados, 500; Canada, 400,000; Cuba, 50,000; Dominican Republic, 25,000; Guatamala, 41,000; Haiti, 52,000; Honduras, 5,000; Jamaica, 16,000; Mexico, 5,700,000; Nicaragua, 3,000; Panama, 500; Porto Rico, 70,000—total, 26,834,000.

In Canada, the irrigated acreage, by provinces, was—Alberta, 251,645; British Columbia, 42,519.

Lower California—The most extensive irrigation development in Mexico is that south of the international boundary line which divides the Mexicali and Imperial Valleys, the former being in fact a continuation of the latter. The Mexicali Valley contains about 1,000,000 acres, of which 200,000 are available for irrigation.

The development on the Mexican side of the boundary line began when the first water crossed the line in canals on June 20, 1901.

IRRIGATED ACREAGE, BY CONTINENTS.

South America—Argentina, 3,000,000; Brazil, 1,000; British Guiana, 100,000; Chile, 2,458,000; Colombia, 51,000; Curacao, 1,000; Ecuador, 1,000; Peru, 1,000,000; Venezuela, 1,000.

Oceania—Australia, 1,000,000; Hawaii, 200,000; New Zealand, 70,000.

Africa—Algeria, 400,000; Angola, 1,000; Congo, 3,000; Egypt, 5,000,000; Madagascar, 1,500,000, Morocco, 1,500,000; Mozambique, 10,000; Nigeria, 1,000; Senegal, 5,000; Sudan, 450,000; Tunisia, 140,000; Union of South Africa, 800,000

Asia—Afghanistan, 10,000; Arabia, 1,000; Ceylon, 350,000; China, 50,400,000; Chosen, 2,000,000; Formosa, 750,000; India (provinces) 47,565,781; India (states), 8,191,916; Indo-China, 3,470,000; Iraq, 1,550,000; Japan, 6,675,000; Java and Madura, 8,350,000; Malay States (Fed.), 100,000; Palestine, 25,000; Persia, 25,000; Philippines, 750,000; Russia, 8,000,000; Siam, 1,750,000; Straits Settlements, 100,000; Syria and Lebanon, 400,000; Turkey, 300,000.

Europe—Albania, 50,000; Bulgaria, 20,000; Czechoslovakia, 15,000; Finland, 4,000; France, 6,000,000; Germany, 1,000; Greece, 1,000; Hungary, 35,000; Italy, 3,900,000; Malta, 1,000; Poland, 500; Portugal (incl. Azores and Madeira), 1,206,000; Roumania, 1,000; Russia, 50,000; Spain (incl. Canaries), 3,500,500; Switzerland, 3,000· Yugoslavia, 12.000.

SEED PLANTING IN THE UNITED STATES.

(Compiled from reports of the Department of Agriculture.)

NEW ENGLAND.

Kind of Crop.	Date of Planting.	Best Soil.	Manure per Acre.	Seed per Acre.	Weeks Maturity.
Corn	May 10 to 30	Sandy or clay loam	8 to 12 tons	8 to 12 qts	14–17
Wheat	Fall or Spring	Clay loam	18 tons	2 bush	20
Oats	Apr. to May	Strong loam	6 to 8 tons	2 to 3 bush	11–15
Barley	Apr. to June 20	Strong loam	7 to 8 tons	2 to 3 bush	10–15
Rye	Apr. to May, Sept.	Medium loam	7 to 8 tons	6 to 5 pecks	40
Buckwheat	June 1 to 20	Light loam	4 to 6 tons	1 to 1¼ bush	10–15
White beans	May to June	Sandy loam	7 to 8 tons	8 to 16 qts	8–14
Potatoes	Apr. 15 to May 1	Rich loam	15 to 20 tons	8 to 20 bush	2–20
Turnips	July 1 to Aug. 3	Sandy loam	10 tons	1 lb	10
Mangels	Apr. 15 to May 5	Strong heavy loam	8 to 15 tons	4 to 6 lbs	17–22
Tobacco	Seed bed Apr.	Sandy loam	8 to 12 tons		9–12
Hay					

MIDDLE STATES.

Corn	Apr. 20 to May 30	Medium loam	8 to 12 tons manure	6 to 8 qts	16–18
Wheat	Sept. 20 to Oct. 20	Loam	8 tons; 300 lbs. fer	2 bush	41–43
Oats	Mar. to May	Moist clay loam	8 tons; 300 lbs. fer	2 to 2½ bush	16–17
Barley	Mar. to May	Clay loam	8 tons; 300 lbs. fer	2 to 2½ bush	13–16
Rye	Sept. 1 to Oct. 1	Sand or gravel loam	8 tons; 300 lbs. fer	1 bush	40–43
Buckwheat	June to July	Loam	5 tons	½ to 1½ bush	8–10
White beans	May to June	Sandy loam	8 tons	1½ bush	13–14
Potatoes	Mar. to May	Loam	10 to 18 tons	8 to 15 bush	14–22
Sweet potatoes	May to June	Sandy loam		10 to 12 bush	10–15
Cabbage	Mar. to July	Clay or sandy loam	300 to 600 lbs. fer	4 to 8 oz	8–15
Turnips	July	Loam		2 to 5 lbs	10–12
Mangels	May	Loam	10 to 20 tons	10 to 15 bush	15–18
Flax	May	Limestone loam		20 qts	8–10
Tobacco	Seed bed Mar.	Sandy loam	Commercial fer		15–20
Hay, timothy	Aug. to Oct.	Clay loam		6 to 8 qts	
Hay, clover	Feb. to Apr.	Clay loam		6 qts	

CENTRAL AND WESTERN STATES.

Corn	Apr. 1 to June 1	Black or sandy loam	5 to 10 tons	6 qts	16–20
Wheat	Fall or Spring	Strong loam	8 tons	2 bush	40–42
Oats	Apr. 1 to May 1	Clay loam	8 tons	2 to 3 bush	12–14
Barley	Fall or Spring	Clay loam	8 tons	2 bush	11–13
Rye	Sept. 1 to 30	Light loam	8 tons	1 to 2 bush	35–40
Buckwheat	June	Clay loam	5 tons	1 to 2 bush	10–12
White beans	May 10 to June 10	Clay loam	8 tons	1½ bush	12
Potatoes	Mar. 15 to June 1	Sandy loam	5 to 10 tons	5 to 10 bush	10–20
Turnips	July 15 to Aug. 30	Loam or muck	8 to 10 tons	1 to 6 lbs	10–16
Mangels	Apr. 1 to May 15	Sandy loam	8 to 12 tons	6 to 8 lbs	22–24
Flax	Mar. 15 to May 15	Loam	10 to 15 tons	2 to 3 pecks	15–20
Tobacco	Seed bed, Mar.	Sandy loam	8 to 10 tons	Oz. to 6 sq. rds	15–18
Hay	Apr. to May	Clay loam	10 tons	8 to 15 lbs	

SOUTHERN STATES.

Cotton	Feb. to May 15	Sandy loam		1 to 3 bush	20–30
Corn	Feb. to June	Rich loam	10 bush. cot. seed	8 qts	18–20
Wheat	Sept. to Nov.	Clay loam	8 tons	2 bush	43
Oats	Feb., May, Sept.	Clay loam	8 to 10 tons	2½ bush	17
Barley	Apr. to May	Clay loam	8 to 10 tons	2½ bush	17
Rye	Sept. to Oct.	Clay loam	10 tons	1½ bush	43
White beans	Mar. to May	Light loam	8 tons	1 to 2 bush	7– 8
Cabbage	Oct., Mar. to May	Light loam	6 to 10 tons	¼ to ½ lbs	14
Watermelons	Mar. 1 to May 10	Rich, light loam	5 tons; 300 lbs. fer	2 to 7 lbs	16–20
Onions	Feb. 1 to Apr. 10	Loam or muck			16–24
Potatoes	Jan., Feb. to Apr.	Light loose loam	8 to 12 tons	8 to 10 bush	11–15
Sweet potatoes	May to June	Sandy loam		10 to 12 bush	12–15
Pumpkins	Apr. 1 to May 1	Rich, light loam		4 to 7 lbs	17–20
Tomatoes	Jan. 1 to Feb. 19	Rich, sandy loam		4 to 9 oz	14–20
Turnips	Feb., Aug., Apr.	Rich, light loam		2 to 6 lbs	8–12
Tobacco	Seed bed, Mar.	Sandy loam	8 to 15 tons	Oz. to 6 sq. rds	18–20
Cow peas	May 1 to July 15	Sandy loam	200 to 300 bs. phos	2 to 5 pecks	6– 8

PHOSPHATES AND OTHER FERTILIZERS.

The world production of nitrogen is estimated at six to seven million short tons a year, of which one-third comes from the Chilean deposits, and one-sixth is an ammonia by-product from coal.

The production of fertilizer in the United States was over 7,800,000 short tons in 1927, and over 8,000,000 short tons in 1928, valued at more than $200,000,000. There are over 600 establishments.

The bone phosphates come also from Germany, India, and Argentina.

Potash materials are imported mostly from Germany and Belgium.

PRINCIPAL CROP-PRODUCING STATES.

(Dept. of Agriculture Figures; 1928 total yield in parenthesis.)

Corn (bushels)—Iowa (476,012,000; Illinois (367,488,000); Nebraska (212,701,000); Missouri (181,540,000); Kansas (179,118,000); Indiana (161,322,000); Minnesota (143,115,000); Ohio (136,725,000); Texas (99,162,000); So. Dakota (93,849,000); Wisconsin (91,203,000); Oklahoma (70,150,000).

Wheat (bushels)—Kansas (177,833,000; No. Dakota (142,923,000); Montana (77,218,000); Nebraska (69,919,000); Oklahoma (59,576,000); Washington (48,644,000); So. Dakota (34,546,000); Idaho (28,792,000); Illinois (24,200,000).

Barley (bushels)—Minnesota (60,000,000); No. Dakota (55,564,000); So. Dakota (35,675,000); California (31,842,000).

Rye (bushels)—No. Dakota (12,710,000); Minnesota (5,950.000); Nebraska (3,486,000).

Oats (bushels)—Iowa (240,040,000); Illinois (174,338,000); Minnesota (153,338,000); Wisconsin (108,532,000); Indiana (93,684,000); Ohio (89,281,000); Nebraska (78,936,000); No. Dakota (59,954,000); So. Dakota (59,211,000).

Buckwheat (bushels)—Pennsylvania (3,802,000); New York (3,457,000); Minnesota (1,074,000).

Rice (bushels)—Louisiana (18,392,000); California (8,073,000); Arkansas (7,708,000); Texas (7,308,000).

Soy Beans (bushels)—Illinois (3,630,000); No. Carolina (2,940,000); Indiana (1,754,000); Missouri (1,425,000); Tennessee (1,254,000).

Hay, tame (tons)—New York (6,439,000); California (5,104,000); Wisconsin (5,017,000); Pennsylvania (4,645,000).

Tobacco (pounds)—No. Carolina (475,230,000); Kentucky (306,000,000); Virginia (111,600,000). Tennessee (88,459,000); Georgia (84,387,000); So. Carolina (82,288,000); Pennsylvania (49,580,000); Wisconsin (49,025,000).

Cotton (bales)—Texas (5,150,000); Mississippi (1,470,000); Arkansas (1,215,000); Oklahoma (1,180,000); Alabama (1,090,000); Georgia (1,020,000); No. Carolina (840,000); So. Carolina (725,000); Louisiana (685,000).

Potatoes, white (bushels)—Minnesota (38,940,000); Maine (37,840,000); Michigan (35,802,000); New York (32,376,000); Pennsylvania (31,980,000); Wisconsin (31,970,000).

Apples (bushels)—Washington (33,500,000); New York (21,900,000); Virginia (16,100,000); California (12,282,000).

Peaches (bushels)—California (25,752,000); Georgia (10,000,000); Arkansas (3,000,000); No. Carolina (2,590,000); New York (2,400,000); Tennessee (2,190,000).

Pears (bushels)—California (9,126,000); Washington (3,500,000); Oregon (2,700,000); New York (1,000,000).

Grapes (tons)—California (2,331,000); New York (85,476); Michigan (72,800); Ohio (28,700); Pennsylvania (22,680).

WHEAT HARVEST SEASONS OF THE WORLD.

January—Australia, New Zealand and Chili.

February and March—East India, Upper Egypt.

April—Lower Egypt, Syria, Cyprus, Persia, Asia Minor, India, Mexico and Cuba.

May—Algeria, Central Asia, China, Japan, Morocco, Texas and Florida.

June—Turkey, Greece, Italy, Spain, Portugal, South of France, California, Louisiana, Mississippi, Alabama, Georgia, Carolinas, Tennessee, Virginia, Kentucky, Kansas, Arkansas, Utah, Missouri.

July—Roumania, Bulgaria, Austria-Hungary, South of Russia, Germany, Switzerland, France, South of England, Oregon, Nebraska, Minnesota, Wisconsin, Colorado, Washington, Iowa, Illinois, Indiana, Michigan, Ohio, New York, New England and Upper Canada.

August—Belgium, Holland, Great Britain, Denmark, Poland, Lower Canada, Columbia, Manitoba, North and South Dakota.

September and October—Scotland, Sweden, Norway, and North of Russia.

November—Peru, South Africa and Argentina.

December—Burmah and Argentina.

In 1910, native white farmers numbered 4,771,063; foreign-born white, 669,556; colored, 920,883.

In 1920 Negro farmers, included in "colored," numbered 25,708; Indian, 16,680; Japanese, 6,892.

FARM POPULATION SMALLEST IN TWENTY YEARS

The farm population of the United States is the smallest in 20 years, according to the Department of Agriculture, at Washington, which estimates the number at 27,511,000 persons on January 1, 1929. compared with a peak of 32,000,000 persons in 1909.

The department's estimate also shows a decrease in farm population during 1928, despire improved agricultural conditions and a slight slackening in industrial employment, the January 1, 1929, figure comparing with a farm population of 27,699,000 persons on January 1, 1928.

The decrease in farm population in 1928 would have been much greater were it not offset by an excess of births over deaths, the figures revealing that in the movement of population from and to farms 1,960,000 persons left farms during the year and 1,362,000 persons moved from cities to farms.

The movement away from farms slowed up somewhat compared with immediately preceding years, but the movement from cities to farms was also smaller.

Thus it is shown that 1,960,000 persons left farms during 1928, compared with 1,978,000 in 1927 and with 2,155,000 in 1926.

The movement from cities to farms was 1,362,000 persons in 1928, 1,374,000 in 1927, and 1,135,000 in 1926.

The large farm birth rate of 23 births per 1,000 persons and small death rate of 8 deaths per 1,000 persons has been a large factor offsetting the farm to city movement,so that the net loss of farm population in 1928 was 188,000 persons, compared with 193,000 in 1927 and with 649,000 in 1926.

There are not available estimates of the world's production of rayon prior to 1920, except as to 1913, as, especially for the years 1914 to 1920, absolutely no data obtainable.

In the main producing countries of Europe most of the Rayon plants were working either on munitions or textile substitutes, in World War days.

There are 165,000,000 cotton spindles in the world, of which 35,000,000 are in the United States.

Cuba, in the 1924-25 season produced 5,126,000 tons of cane sugar—a record for that island.
Beet sugar is mostly produced in Europe.

THREE KINDS OF SUGAR.

There are three carbohydrates of vital importance as food, namely, dextrose (corn sugar), sucrose (ordinary sugar), and levulose. All have about equal food value. There is, however, a difference of fundamental importance between them. Dextrose has a low sweetening power, whereas levulose has a very high sweetening power.

In appearance, dextrose cannot be distinguished from ordinary granulated sugar and is on the market in three sizes of grain, namely, coarse, fine, and standard granulated.

A bushel of corn (60 pounds) produces approximately 25 to 27 pounds of dextrose; 5 pounds of hydrol (molasses); one pound of oil, and 27 pounds of feed.

Dextrose, or corn sugar, while originally developed by the U. S. Bureau of Standards for its low sweetening power, has received a greatly increased rating in relative sweetening power since it has been produced in the form of granulated sugar.

The latest scientific data give the following relative sweetness: dextrose, 74.3; sucrose, 100; levulose, 173.3

Dextrose crystallizes in two forms: the anhydrous and the hydrate.

Levulose is the finest of all the sugars. It has long been scientifically the most fascinating and elusive. The human race consumes large quantaties of it in honey and in sirup. Physiologically it is probably the most easily assimilable of the sugars.

The Bureau of Standards is making levulose from the tubers of Jerusalem artichoke, which grows anywhere in the United States and produces 10 to 20 tons to the acre.

In recent years it has been found by various individuals independently that the artichoke tuber possesses attractive posibilities as a vegetable. A number of food products made from it are being marketed and in numerous instances diabetics seem to have found them a valuable auxiliary to their regular diet.

Cake is said to have been invented by a certain Thearion, a baker who lived in Sicily in the fifth century B. C. The Romans are known to have been fond of pastry. Cakes appeared on the altars of the wealthy and even in some homes of the poor.

When the Romans invaded England they brought with them the custom of breaking a cake or a biscuit over the bride's head. The fragments were picked up and given to her to distribute among friends.

The custom became popular as a sign of hospitality and remained as the vogue in England many years after the Romans left.

In later years the custom began of beautifying the cakes with icings and adding rich ingredients.

CONSUMPTION OF SUGAR, COFFEE AND TEA IN THE UNITED STATES.

Note—Sugar figures are for fiscal, coffee and tea for calendar years.

The Department of Commerce announces that the establishments engaged in the refining of cane sugar in 1927 reported products valued at $597,445,632.

Beet Sugar—The establishments engaged primarily in the manufacture of beet sugar in 1927 reported products valued at $104,926,584.

There were (1927) 79 plants, as against 89 in 1925.

Ice Cream—The production in the United States in 1927 was 335,703,610 gallons, or a per capita consumption of 2.85 gallons, as compared with 2.77 gallons in 1926, the Bureau of Agricultural Economics of the Department of Agriculture states.

Ice cream was popular in Italy in the Fifteenth Century.

Chewing Gum—Establishments engaged in manufacture of chewing gum in 1927 reported a total output valued at $61,722,467.

Sheep include lambs. The above figures are estimates by the Bureau of Animal Industry, U. S. Dept. of Agriculture, based on the number of animals slaughtered under Federal inspection.

THE LIVE STOCK DOLLAR.

(From a Bulletin of the Bureau of Railway Economics, Washington, D. C.)

The data covers the five-year period, 1924 to 1928, inclusive, and embrace the sales of 23,377 carloads of live stock shipped from 4,384 points located in forty States. The 1,609,790 head contained in the 23,377 cars consisted of 390,363 cattle and calves, 558,063 hogs and 661,364 sheep.

For the three classes of live stock combined, on the average 5.6 cents out of every dollar paid by the purchaser of live stock was absorbed by freight charges in 1924; 4.5 cents in 1925; 4.3 cents in 1926; 3.8 cents in 1927; and 3.6 cents in 1928. Other costs of distribution absorbed 3 cents in 1924; 2.5 cents in 1925; 2.3 cents in 1926; 2.2 cents in 1927, and 2 cents in 1928.

The net return to the seller at shipping point was 91.4 cents in 1924; 93 cents in 1925; 93.4 cents in 1926; 94 cents in 1927, and 94.4 cents in 1928.

Of the dollar paid by the purchaser in 1924, for cattle and calves, 5.8 cents were absorbed by freight charges. This declined to 5 cents in 1925, 4.7 cents in 1926, 3.9 cents in 1927 and 3.1 cents in 1928. Other costs of distribution declined from 2.8 cents in 1924 to 2.5 cents in 1925, 2.4 cents in 1926, 2 cents in 1927 and 1.6 cents in 1928. The net proceeds to seller rose from 91.4 cents in 1924 to 92.5 cents in 1925, 92.9 cents in 1926, 94.1 cents in 1927, and 95.3 cents in 1928.

Of the dollar paid by the purchaser for hogs, 5.1 cents were absorbed by freight charges in 1924, 3.3 cents in 1925, 3 cents in 1926, 3.5 cents in 1927, and 3.9 cents in 1928. Other costs of distribution absorbed 3.2 cents in 1924, 2.3 cents in 1925, 1.9 cents in 1926, 2.3 cents in 1927, and 2.8 cents in 1928. The net proceeds to seller at shipping point rose from 91.7 cents in 1924 to 94.4 cents in 1925 and to 95.1 cents in 1926, but dropped to 94.2 cents in 1927 and to 93.3 cents in 1928.

Of the dollar paid by the purchaser for sheep, 6 cents were absorbed by freight charges in 1924, 5.2 cents in 1925, 5.3 cents in 1926, 4.4 cents in 1927, and 5.2 cents in 1928. Other costs of distribution required 3 cents in 1924, 2.7 cents in 1925, 2.9 cents in 1926, 2.8 cents in 1927, and 2.8 cents in 1928. The net proceeds to seller at shipping point rose from 91 cents in 1924 to 92.1 cents in 1925, dropped to 91.8 cents in 1926, were 92.8 cents in 1927, and 92 cents in 1928.

The Alaska seal herd in 1928 numbered 871,513, and 31,099 were killed for their skins.

The U. S. Pacific Coast salmon pack in 1928 amounted to $9,254,258; the Alaska, to $45,383,885.

There were 481 fish canneries in the U. S. and Alaska in 1928, and their output was 15,629,980 standard cases, containing 617,327,527 pounds of products.

Of the by-products, there were 12,145,577 gallons of fish and whale oils, valued at $5,149,618; 306,013 tons of oyster shell products, valued at $2,459,424.

Fish oil production in 1928 (pounds)—cod and cod liver, 1,873,085; menhaden, 27,752,302; whale, 10,233,735; herring and sardine, 49 266,382; sperm, 703,125; all other, 1,987,702.

The consumption of fish oils is double that of the native production, therefore the imports are large and growing.

The value of shad and shad roe, canned in 1928, amounted to $233,846.

The U. S. Bureau of Fisheries in the fiscal year 1929, distributed 2,861,236,000 eggs, 4,062,948,000 fry, and 136,185,500 fingerlings. The majority of the total output consisted of cod, flounders, haddock, pollock, cisco, lake trout, pike perch, yellow perch, salmon and whitefish.

1929 fish catch—**Broad Bill Swordfish** 430 lbs , off Long Island, N Y., by Charles Lehmann; **Great Northern Pike**, 20 lbs., 8 oz., Hudson River, north of Glens Falls, N. Y., by Charles Gilman; **Wahoo**, 78 lbs., Long Key, Fla., by Thos Cardeza; **Kingfish**, 40 lbs. 8 oz. off Palm Beach, Fla., by Otto H. Kahn; **Spanish Mackerel**, 31 lbs. (4 ft. long). Amoy, China, by I. D. Harris, of the Standard Oil Co.; **Grouper**, 46 lbs., Long Key, Fla., by Miss D. Haase; **Grapple**, 3 lbs., 8 oz., at Kelly Byne, Ind.

By a Federal law of Feb. 28, 1929, it is unlawful to preserve for sale as food for human consumption any salmon unless it shall have been canned, salted, iced, frozen, smoked, or dried within forty-eight hours after being killed.

Exports in 1928 of fish from the United State were valued at $20,786,101, and included 40,951,505 lbs. of canned salmon ($7,661,536); and 80,253,474 lbs. of sardines ($6,522,711).

Imports of fish in 1928 totaled 373,876,263 lbs. ($38,556,325).

Many fisherman say it is doubtful if a muskallunge ever was caught that weighed as much as 50 lbs.

WHERE EELS COME FROM

"It is not generally known," says Pauline H. Dederer, in the N. Y. Herald Tribune, "that neither the eggs nor embryos of eels had ever been seen until their discovery in 1925 by Dr. Marie Poland Fish, a member of Dr. William Beebe's expedition to the Sargasso Sea.

"In the oozy 'sea soup,' or plankton, scooped up in nets from the ocean surface, larvae of eels were relatively abundant, varying in size from a quarter of an inch to three inches in length, about the shape of a willow leaf, and incredibly thin. Since Dr Schmidt's discovery of the breeding grounds and migration routes of eels had been published just before the Arcturus expedition started out it was hoped to unravel the mystery of the origin of these larvae.

"In a dish of sea water containing various minute animals of the plankton four pinhead dots of living stuff were found, which proved to be the elusive eggs, long sought after. In the course of a few days of study one of these dots was observed to transform into a larval eel.

"Thus for the first time the entire life history was made known."

BIG GAME TROPHIES OF NOTE.

The Almanac presents herewith measurements of a few of the largest and finest big game trophies in collections noted throughout the world, being culled from the great authoritative work, Roland Ward's Record of Big Game, Eighth Edition (marked Ward), and from the famous national collection of heads and horns at the New York Zoological Gardens by Dr. William T. Hornaday (marked Zoo). The abbreviations in the measurements of horns, &c., are: b. c., indicates basic circumference; l., length; and spd., widest spread of the horns. Wherever known the territory where the specimen was shot is given.

Buffalo (Cape), Wakamba, Africa—41 in. l., 56¼ in. spd. Ward

Buffalo (Cape), Uganda, Africa—37½ in. l., 53 in. spd. Ward

Buffalo (Cape)—38 in. l., 38 in. spd. Zoo

Buffalo (Soudan), White Nile—32¼ in. l., 44 in. spd. Ward

Giraffe, Kenya Col., Africa—Maximum height, 19 ft. 3 in. Ward

Giraffe, Southeast Africa—Maximum height, 18 ft. 7 in. Ward

Hippopotamus—(Full grown bull weighs at least three tons, length about 14 ft., height at shoulder about 4 ft. 10 in. The trophy is the lower curved tusk; largest at Kenya, Africa, measured 7¾ in. b. c., 64½ in. l. on outside curve.) Ward

Indian Wild Boar, Gosrama, India—Tusk, 12½ in. l. Ward

Wart-hog, Africa—Tusk, 24 in. l. Ward

Rhinoceros (Indian), Assam—Horn, 24¾ in. b. c., 24 in. l. Ward

Rhinoceros (Black), Kenya, Africa—Front horn, 18¼ in. b. c., 53½ in. l. Ward

Rhinoceros (White), South Africa—Front horn, 22¼ in. b. c., 62¾ in. l. Ward

Elephant (Asiatic) (Burma—Maximum height at shoulder, 10 ft. 6 in.)—Terai, India—Tusks, 21¾ in. and 22 in. b. c., 8 ft. 9 in. and 8 ft. 6½ in. l. on outside curve, weight, 161 lbs. and 160 lbs. Ward

Elephant (African), Abyssinia—Maximum height, 11 ft. 8½ in.; Tusks (Kenya), 18½ in. b. c. each, 11 ft. 5½ in., and 11 ft.; weight, pair, 293 lbs. Ward

Lion, Kenya, Africa—10 ft. 7 in. l.; two others, 10 ft. 5 in. Ward

Tiger, India—11 ft. 5½ in. l.; 11 ft. 1 in. l.; 11 ft. 0 in. l., and two 10 ft. 7 in. l. Ward

Leopard, Kashmir, Asia—9 ft. 1 in.; gabalior, 8 ft. 0 in.; dhar, 9 ft. 0 in. Ward

Snow leopard, Central Asia—Two measured 8 ft. 8 in. l. Ward

Alaskan Brown Bear, Alaska—19¼ in. ear to end of nose, 4¼ in. in breadth of jaw, 26½ in. circumference of jaws, 16½ in. between ears at base. Zoo

Bear (Kodiak), Alaska—Length of skin, 13 ft. 6 in. Ward

Bear (Grizzly), Cassiar—Length of skin, 9 ft. 1 in. Ward

Bear (Black), Wyoming—Length of skin, 7 ft. 5½ in. Ward

Bear (Polar), Greenland—Length of skin, 9 ft. 7 in. Ward

Walrus (Pacific), Alaska—15 in. width, 45¾ in. circumference of muzzle, 15½ in. width of muzzle, 59¼ in. circumference at back of head. Zoo

Walrus (Pacific), Behring Sea—Tusk measure 31½ in. l. (after about 3½ in. had been sawn off), 8½ in. circumference. Zoo

Walrus (Pacific), Kaschatka—Tusk measure, 36½ in., 9¾ in. c. c. Ward

Walrus, Greenland—Tusk measures 37¼ in., 7¼ in. b. c. Ward

GAME LAW OFFICIALS, UNITED STATES, CANADA, MEXICO.

UNITED STATES.

Alabama—Department of Game and Fisheries, Montgomery.

Alaska—Executive Officer, Alaska Game Commission, Juneau; or Secretary of Agriculture, Washington, D. C.

Arizona—State Game Warden, Phoenix.

Arkansas—Secretary, Game and Fish Commission, Little Rock.

California—Executive Officer, Fish and Game Commission, Postal Telegraph Building, San Francisco.

Colorado—State Game and Fish Commissioner, Denver.

Connecticut—Superintendent of Fisheries and Game, Hartford.

Delaware—Chief Game and Fish Warden, Dover.

District of Columbia—Superintendent Metropolitan Police, Washington.

Florida—State Game Commissioner, Tallahassee.

Georgia—Game and Fish Commissioner, Atlanta.

Hawaii—Chief Territorial Fish and Game Warden, Honolulu.

Idaho—Fish and Game Warden, Boise.

Illinois—Director, Department of Conservation, Springfield.

Indiana—Superintendent, Division of Fisheries and Game, Dept. of Conservation, State House, Indianapolis.

Iowa—State Game Warden, Des Moines.

Kansas—State Fish and Game Warden, Pratt.

Kentucky—Executive Agent, Game and Fish Commission, Frankfort.

Louisiana—Commissioner of Conservation, Court Building, New Orleans.

Maine—Commissioner of Inland Fisheries and Game, State House, Augusta.

Maryland—State Game Warden, 514 Munsey Building, Baltimore.

Massachusetts—Director, Division of Fisheries and Game, Dept. of Conservation, State House, Boston.

Michigan—Director, Department of Conservation, Lansing.

Minnesota—Game and Fish Commissioner, Department of Conservation, St. Paul.

Mississippi—Secretary of State, Jackson; or Sheriff or County Clerk.

Missouri—Game and Fish Commissioner, Jefferson City.

Montana—State Fish and Game Warden, Helena.

Nebraska—State Game Warden, Lincoln.

Nevada—Secretary, State Fish and Game Commission, Reno.

New Hampshire—Fish and Game Commissioner, Concord.

New Jersey—Secretary, Board of Fish and Game Commissioners, Trenton.

New Mexico—State Game Warden, Santa Fe.

New York—Secretary, Conservation Department, Albany.

North Carolina—Director, Dept. of Conservation and Development, Raleigh.

North Dakota—Secretary, Game and Fish Board Devils Lake.

Ohio—Chief Game Warden, Department of Agriculture, Columbus.

Oklahoma—State Fish and Game Warden, Oklahoma City.

Oregon—State Game Warden, Portland.

Pennsylvania—Executive Secretary, Board of Game Commissioners, Harrisburg.

Rhode Island—Chairman, Commissioners of Birds, Providence.

South Carolina—Chief Game Warden, Columbia.

South Dakota—Director of Game and Fish, Pierre.

Tennessee—State Game and Fish Warden, Department of Agriculture, Nashville.

Texas—Game, Fish and Oyster Commissioner, Austin.

Utah—State Fish and Game Commissioner, Salt Lake City.

Vermont—Fish and Game Commissioner, Montpelier.

Virginia—Executive Secretary, Department of Game and Inland Fisheries, Richmond.

Washington—Supervisor of Game and Game Fish, Box 384, Seattle.

West Virginia—Game and Fish Commission, Charleston.

Wisconsin—Conservation Director, Madison.

Wyoming—State Game and Fish Commissioner, Cheyenne.

CANADA.

The Commissioner of National Parks of Canada, Department of the Interior, Ottawa, administers the Migratory Birds Convention Act.

Alberta—Game Commissioner, Department of Agriculture, Edmonton.

British Columbia—Provincial Game Warden, Game Branch, Victoria.

Manitoba—Chief Game Commissioner, Winnipeg.

New Brunswick—Chief Game Warden, Department of Lands and Mines, Fredericton.

Northwest Territories—Director, Northwest Territories and Yukon Branch, Department of the Interior, Ottawa.

Nova Scotia—Chief Cl'k, Dept. of Lands and Forests, Halifax.

Ontario—Deputy Minister of Game and Fisheries, Toronto.

Prince Edward Island—Deputy Minister of Agriculture, Charlottetown.

Quebec—Superintendent of Fisheries and Game, Department of Colonization, Mines and Fisheries, Quebec.

Saskatchewan—Game Commissioner, Regina.

Yukon—Gold Commissioner, Dawson City, Y. T.

NEWFOUNDLAND.

Secretary, Game and Inland Fisheries Board, St. Johns.

MEXICO.

Mexico—Secretary of Agriculture, City of Mexico.

FEDERAL GAME AND FISH LEGISLATION, 1929.

Amendments to the Migratory Bird Treaty Act Regulations were approved by the President on April 23, 1929. Wilson snipe, or jacksnipe, and woodcock are the only shore birds that may be killed during the hunting season 1929-30.

The open seasons on waterfowl, coot, and Wilson snipe remain the same as in 1928 except in the following States: Illinois and Missouri, where the season has been changed to the period September 24-January 7; Oklahoma, where the new season is from October 16 to January 31; and that portion of Washington lying east of the summit of the Cascades, where the season has been changed to the period September 16-December 31, the season west of the summit of the Cascades continuing as previously, October 1-January 15.

In New York the open season for hunting woodcock has been changed to the period October 1 to 31.

A separate season from November 1-January 31 has been established for mourning doves in the counties of Mobile and Baldwin in the State of Alabama; in North Carolina the dove season has been changed to the period November 20-January 31; and Georgia has been included in the group of southern States having a split season on mourning doves from September 1 to 30 and from November 20-January 31.

The taking of migratory game birds by scientific collectors is restricted to the period on any day from one-half an hour before sunrise to sunset. Applications to take or possess migratory birds for scientific or educational purposes will now be accepted when endorsed by ornithologists or certain persons engaged in scientific work or in wild-life conservation.

Taxidermists engaged in receiving and mounting migratory birds are now required to keep accurate records of all such transactions.

The hunting of migratory birds from automobiles is not permitted. The use of sinkboxes on inland waters is still prohibited, but they may be used on coastal waters such as Great South Bay, New York; Barnegat Bay, New Jersey; Susquehanna Flats, Maryland; Back Bay, Virginia; and Currituck Sound, North Carolina.

The bag limits remain the same as in 1928.

A new act of great importance in the conservation of migratory birds was approved February 18, 1929, authorizing the establishment of a national system of inviolate refuges to furnish in perpetuity reservations for the adequate protection of such birds. The act authorizes appropriations totaling $7,800,000 over a period of ten years for the purchase and acquisition of marsh and water areas for sanctuary purposes.

It has been estimated by John C. Phillips, president of the American Wild Fowlers' Club, that 8,000,000 geese and ducks are killed by sportsmen in the United States every year.

To this must be added a large number of wild turkeys and pheasants, quail, partridge, and grouse.

BIRD CENSUS IN NORTH AMERICA.

In order to obtain accurate information regarding the abundance, distribution, and migration of waterfowl and other birds, the U. S. Biological Survey is conducting monthly censuses of waterfowl and yearly censuses of breeding birds at important points in the United States, Canada, Newfoundland and Alaska.

In the case of waterfowl these censuses are taken, of both migrating, wintering, and breeding birds; of other birds, only those that are breeding.

The purpose of the waterfowl censuses is to aid in the administration of the migratory-bird treaty act which enforces the treaty with Great Britain for the protection of birds that migrate between the United States and Canada.

From these monthly waterfowl censuses the movements and the increase or decrease of each species of waterfowl are being traced, and the concentration areas that exist in different parts of the North American Continent are being determined.

The waterfowl censuses were inaugurated in August, 1927. The censuses of breeding land birds have been in progress since 1914.

It has been ascertained through counts of breeding birds that birds in the agricultural districts in the Northeastern United States average slightly more than a pair to the acre, though in parts of the arid West and on the treeless plains this number dwindles to an average of half a pair, or even less, to the acre.

By far the most abundant birds in the United States are the robin and the English sparrow, but several others are common enough to make their total numbers run well into the millions.

The counts so far show that the most abundant bird on farms in the Northeastern States is the robin; next to this is the English sparrow, and following these are the song sparrow, chipping sparrow, meadow lark and catbird, in the order named.

The densest bird population anywhere recorded is on the suburban estate of Gilbert Grosvenor, near Washington, D. C., where a careful count showed, in 1915, one hundred and thirty-five pairs of forty species on five acres.

Congress has established national game refuges (acreage in parenthesis) wholly or in part in the following National Forests—Cherokee No. 1 (30,000) Tenn.; Cherokee No. 2 (14,000) Ga.; Custer State Park (44,360) S. Dak.; Grand Canyon (886,208) Ariz.; Ozark (21,500) Ark.; Pisgah (98,513) N. Car.; Sequoia (15,770) Calif.; Medicine Bow (Sheep Mt.) (23,318) Wyo.; Wichita (60,800) Okla.; Black Hills (5,548) S. Dak.; Manzano (Zuni) (52,007) N. Mex.; Medicine Bow (Pole Mt.) (56,132) Wyo.; Mich. (Brady Dist.) (2,680 Mich.

Edward W. Bok, of Philadelphia, has established in Florida, and dedicated to public use a bird refuge, called the Mountain Lake Sanctuary and Singing Tower. The tract covers 48 acres and entirely covers Iron Mountain, the highest point of land in Florida. The Carillon has 61 bells, cast in England, ranging in weight from 16 lbs. to 23,000 lbs.

In Wisconsin, the 42,000-acre Horicon Marsh is being drained by the State and converted into a wild waterfowl refuge.

Georgia is establishing a chain of game refuges and public shooting grounds.

The heath hen has vanished except at Martha's Vineyard. The reclamation of marsh lands is exterminating the sandhill crane, the white pelican, the curlews and many species of sandpipers and plovers.

The establishment of extensive sanctuaries on the public lands and waters of Canada for preserving valuable varieties of game has long been an established policy in the Dominion. The total area so reserved exceeds 300,000 square miles and includes zones segregated for the protection of buffalo, elk, mountain sheep, moose, deer, caribou and birds.

There is much controversy in England as to whether a woodpecker actually makes a pecking noise with its beak, or with its throat.

The total number of foreign birds imported into the United States in 1928 was 682,308, including 458,449 canaries, 56,307 parrots, 84,915 quail and 82,637 representatives of miscellaneous species.

Permits were also issued for the entry of 4,956 eggs of game birds, as against 530 in 1927. These shipments were principally pheasant eggs from England. Eggs of ducks and grouse were also entered from Alberta.

Very few parrots breed in captivity in the United States, but some live for a number of years. The largest number come from Australia and tropical America, especially Cuba, Panama and Mexico.

Cage birds still come from Mexico, but in smaller numbers, because the Mexican Government now requires export permits for cardinals, mocking birds and certain other species, and authority for possession must also be obtained from the State to which they are consigned.

FEDERAL AND STATE FOREST LANDS IN THE UNITED STATES.

(The figures, compiled by the U. S. Forest Service, are revised as of April 1, 1929.)

Areas of the National Forests are as of June 30, 1928. The true forest land in the National Parks totals about 81,200,000 acres.

In 1928 there were 177,362 forest fires in the United States, causing an estimated direct damage of $82,934,220.

These totals do not take into account the vast amount of intangible and indirect damage resulting from forest fires, such as that through decay of damaged timber, replacement of desirable species of trees by less desirable but more fire resistant ones, soil deterioration and erosion, loss of wild life, uncertain stream flow, interrupted tourist traffic and the like.

The two largest national forests are in Alaska—Tongass, 16,547,294 acres; Chugach, 4,799,803 acres.

Other large national forests (net acres in parenthesis) are: Tonto, Ariz., (2,261,792); Chelan, Wash., (1,809,072); Teton, Wyo., (1,881,212); Shoshone, Wyo., (1,619,657); Coconino, Ariz., (1,717,697); Santa Barbara, Calif., (1,775,098); Idaho, Idaho, (1,734,182); Nezperce, Idaho, (1,661,107); Salmon, Idaho, (1,708,015); Selway, Idaho (1,689,157); Flathead, Mont., (1,719,112); Toiyabe, Nev., (1,883,661).

Datil, N. M., (1,748,648); Gila, N. M., (1,596,234); Olympic, Wash., (1,529,530); Wyoming, Wyo., (1,668,048); Apache, Ariz.—N. M., (1,717,542); Coronado, Ariz.—N. M., (1,537,721); Inyo, Calif.—Nev., (1,631,285); Klamath, Calif.—Oreg., (1,743,558); Siskiyou, Calif.—Oreg., (1,669,522).

FOREST AREAS OF THE WORLD (ACRES).

(Compiled by U. S. Dept. of Agriculture from "Forest Resources of the World.")

Asiatic Russia, 1,136,153,150; India, 260,139,520; China, 190,000,000; Dutch East Indies, 154,339,000; Japan, 90,484,640; total Asia, 2,096,014,590.

Brazil, 1,000,000,000; Argentina, 264,000,000; Peru, 224,000,000; Colombia, 150,000,000; Bolivia, 128,000,000; Venezuela, 103,840,000; total South America, 2,092,690,000.

Canada, 596,746,000; United States, 550,000,000; Alaska, 95,000,000; Mexico, 74,100,000; total North America, 1,443,957,000.

Belgian Congo, 180,000,000; Rhodesia, 170,304,000; Nigeria, 139,776,000; French Congo, 80,000,000; Cameroon, 35,000,000; Ivory Coast, 30,000,000; total Africa, 797,458,000.

Russia, 440,000,000; Sweden, 55,550,000; Finland, 49,410,000; Germany, 30,905,840; France, 25,508,420; total Europe, 774,118,460.

New Guinea, 160,020,000; Australian Commonwealth, 90,291,500; New Zealand, 17,073,920; total Australia and Oceania, 283,458,720.

Total world divisions, 7,487,696,770.

PRODUCTION OF LUMBER IN THE UNITED STATES.

(Figures, by United States Census Bureau and United States Forest Service, show *millions of board feet.*)

1869	12,755	1905	30,503	1910	40,018	1915	37,012	1920	33,799	1925	38,339
1879	18,091	1906	37,551	1911	37,003	1916	39,807	1921	26,961	1926	36,936
1889	23,842	1907	40,256	1912	39,158	1917	35,831	1922	31,569	1927	34,532
1899	35,078	1908	33,224	1913	38,387	1918	31,980	1923	37,166	1928	34,142
1904	34,135	1909	44,510	1914	37,346	1919	34,552	1924	35,931		

Figures for 1889 and 1904, 1910 and since, exclude customs mills and other small plants, which, in 1924, cut about 53,680,000 board feet.

In 1927 there were sawed 2,372,333,000 lath and 6,443,868,000 shingles; 1928 production was less.

None of the above figures includes Alaska, where, in 1926, the lumber cut and sawed totaled 47,960,000,000 board feet, of which 40,871,000 was spruce, and 5,767,000 was hemlock; shingles, 5,420.000.

LUMBER CUT BY STATES, 1927. (Thousands of Board Feet.)

Preliminary figures for 1928 show a total of 34,142,123 m. ft., with smaller cost than in 1927 in most of the states.

United States	34,529,450	Illinois	28,663	Montana	396,267	South Car.	817,016
		Indiana	148,492	New Hamp.	215,912	South Dakota	46,909
Alabama	2,171,687	Iowa & Kans.	14.012	New Jersey	5,044	Tennessee	595,297
Arizona	169,085	Kentucky	197,618	New Mexico	172,517	Texas	1,446,460
Arkansas	1,229,481	Louisiana	2,385,724	New York	142.505	Utah	6,152
Calif. & Nev.	2,070,811	Maine	263,818	North Car.	1,055,222	Vermont	90,880
Colorado	67,321	Maryland	67,541	Ohio	127,880	Virginia	535,616

Delaware	16,824	Michigan	578,254	Oregon	3,992,852	West Virginia	541,870
Florida	907,128	Minnesota	396,891	Pa.	277,722	Wisconsin	819,507
Georgia	1,201,008	Mississippi	2,556,612	Rhode Island	6,815	Wyoming	12,863
Idaho	923,986	Missouri	189,136				

LUMBER CUT, BY SPECIES, 1927. (Thousands of Board Feet.)

Total	34,529,450	Chestnut	263,771	Lodgepole pine	13,255	Tupelo	267,192
		Cottonwood	103,215	Maple	774,000	Walnut	62,111
Ash	136,820	Cypress	609,682	Oak	2,013,053	West. yel. pine	2,798,754
Balsam fir	15,939	Douglas fir	8,443,053	Red gum	1,101,112	White fir	279,737
Basswood	145,921	Elm	160,536	Redwood	569,605	White pine	1,344,661
Beech	154,158	Hemlock	2,070,812	Spruce	529,294	Yellow pine	10,891,172
Birch	326,788	Hickory	51,584	Sugar pine	282,217	Yellow poplar	334,604
Cedar	305,964	Larch	288,377	Sycamore	29,487	All other	162,576

In 1928 the cost of yellow pine was slightly reduced.

Furniture manufactured in this country in 1927 was valued, the United States Census Bureau states, at $879,706,306, of which household articles accounted for $634,003,122.

Wood Pulp Production, net tons—(1920) 3,821,704; (1921) 2,875,601; (1922) 3,521,644; (1923) 3,788,672; (1924) 3,723,266; (1925) 3,962,217; (1926) 4,394,766; (1927) 4,313,403; (1928) 4,427,000.

The total American newsprint paper production in 1928 was 1,415,000 short tons.

Production of other kinds of paper in 1928 was, in net tons—book, 1,409,000; paper board, 4,000,000; wrapping 1,600,000; bag 204,618; fine, 525,000; tissue, 325,000; wall, 111,000; felts and building, 570,000; total, all grades—10,250,000 short tons.

Fires, storms, and insects destroy, each year, in the United States, 7,000,000,000 board feet of standing timber.

Timber sawn in the world in 1927 (cubic feet)—North America, 14,986,000,000; Europe, 9,160,000,000; Asia, 1,556,000,000; South America, 259,000,000; Africa, 62,000,000; Oceania, 93,000,000; world total—26,116,000,000 (exclusive of firewood cut, which totaled in that year, 30,106,000,000 cubic feet.

A cubic foot equals 12 board feet.

BIG GAME IN THE UNITED STATES, AND IN THE NATIONAL FORESTS.

About 70 per cent of total number of the wild deer, bears, goats and sheep in the United States live or range in the National Forests, according to estimates by Government Forestry experts.

In these forests, on January 1, 1929, there were living and ranging—antelope, 8,494; bear black or brown, 52,331; bear, grizzly, 3,447; caribou, 23; deer, 748,003; elk, 78,218; moose, 6,971; mountain goats, 19,298; mountain sheep, 13,824.

There are over 10,500 elk in Yellowstone Park.

Alaska forests contain (included in totals above) 6,100 black bear, 2,500 grizzlies, 20 caribou, 60,350 deer, 10 elk, 550 moose, 9,500 mountain goats, 2,000 mountain sheep.

California has 11,200 black or brown bears, 245,400 deer, and 191 elk. The rest of the big game are in the National forests in Alabama, Arizona, Arkansas, Colorado, Florida, Idaho, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Mexico, Nevada, North Carolina, Oklahoma, Oregon, Pennsylvania, South Dakota, Tennessee, Utah, Virginia, Washington, West Virginia and Wyoming.

There is no longer a grizzly bear in any National Forest in California.

Moose are becoming scarce. In New Brunswick, in 1928, hunters killed 885 moose and 7,757 deer.

Beaver are increasing in many sections of the West.

OVER SIX MILLION HUNTING LICENSES.

During the season of 1927–28 more than 6,450,000 hunting licenses for the taking of wild game were issued to sportsmen throughout the United States, including Alaska, and the revenue to the states amounted to more than $9,300,000.

New York State, with 675,780 licenses and $699,873 in money returns, and Pennsylvania, with 517,729 licenses and a revenue of $1,006,159, headed the list. Detailed figures of the season, compiled by the Bureau of Biological Survey of the United States Department of Agriculture, show substantial increases in numbers of licenses issued and fees received over the preceding three years.

In the 1924-25 season, 4,904,740 hunters paid for their licenses a total of $6,190,863, while in 1925-26 hunting licenses to the number of 5,168,353 were issued, bringing a revenue of $6,872,812 to the states. Licenses issued in 1926–27 numbered 5,897,505 and the fees paid were $8,155,535.

HOW LONG IT TAKES TREES TO GROW.

Species.	Pulp Fuel.	Species.	Pulp Fuel.
	Years		*Years*
Northern:		Maple, silver	20–30
Aspen	30–40	Walnut, black	20–30
Beech	80–95	*Southern:*	
Birch, paper	50–55	Cottonwood	10–20
Birch, yellow	60–70	Ash, white	20–30
Hemlock	35–50	Cedar, red	35–45
Maple, sugar	70–85	Cypress	20–30
Pine, jack	30–40	Gum, red	15–25
Pine, red	25–35	Pine, lobi	20–30
Pine, white	35–45	Pine, long	25–35
Spruce, red	45–55	Pine, scrub	20–30
Tamarack	45–55	Pine, short	15–25
Central hardwood:		Pine, slash	20–30
		Rocky Mountain:	
Chestnut	25–35	Fir, Douglas	25–35
Hickory	50–60	Pine, lodge	50–60
Oak, black	35–45	Pine, yellow	35–50
Oak, red	35–45	*Pacific:*	
Oak, white	40–50	Fir, white	70–80
Poplar, yellow	22–50	Hemlock	45–55
Catalpa	.....	Pine, sugar	45–55
Larch, Euro	25–35	Redwood	20–30

One northern hardwood tree of any variety 21 inches in diameter 5 feet above the ground will yield one cord of wood. A southern softwood tree 23 inches in diameter will yield a cord.

THE NATIONAL PARKS.

Administered by the National Park Service, Department of the Interior. They number 21; total area 12,113 square miles; visitors last year, over 2,000,000.

National Parks in Order of Creation.	Location.	Area in Sq. Miles	Distinctive Characteristics.
Hot Springs, 1832...	Middle Arkansas.....	1½	46 hot springs said to possess healing properties.
Yellowstone, 1872...	No'western Wyoming.	3,426	Geysers; boiling springs; mud volcanoes; petrified forests; Grand Canyon of the Yellowstone.
Sequoia, 1890.....	Middle eastern California.	604	Scores of sequoia trees 20 to 30 feet in diameter, and thousands over 10 feet in diameter; Mt. Whitney, highest point in continental United States.
Yosemite, 1890.....	Middle eastern California.	1,126	Valley of world-famed beauty; lofty cliffs; many waterfalls of extraord'y height; 3 groves of big trees.
General Grant, 1890.	Mid. east'n California.	4	Created to preserve Gen. Grant Tree, 40.3 ft. in diam.
Mount Rainier, 1899	W. central Washington	325	28 glaciers; 48 sq. miles of glacier, 50 to 500 ft. thick.
Crater Lake, 1902...	Southwestern Oregon..	249	Lake of extraordinary blue in crater of extinct volcano; sides 1,000 feet high; lava; fishing.
Wind Cave, 1903....	South Dakota.....	17	Miles of galleries and chambers containing peculiar formation.
Platt, 1902.....	Southern Oklahoma...	1⅓	Many sulph. and oth. springs possess medicinal value.
Sullys Hill, 1904....	North Dakota.....	1½	An important wild animal preserve.
Mesa Verde, 1906...	So'western Colorado..	77	Most notable, best preserved prehistoric cliff dwellings.
Glacier, 1910.....	No'western Montana..	1,534	250 glacier-fed lakes; 60 small glaciers; precipices thousands of feet deep.
Rocky Mount'n, 1915	North middle Colorado	378	Heart of the Rockies; snowy range, peaks 11,000 to 14,255 feet altitude.
Hawaii, 1916.....	Hawaii.....	245	Kilauea & Mauna Loa on Hawaii, Haleakala on Maui.
Lassen Volcano, 1916	Northern California...	163	Only active volcano in U. S. proper; hot springs; mud geysers.
Mt. McKinley, 1917.	South central Alaska..	2,645	Highest mountain in North America.
Grand Canyon, 1919.	North central Arizona.	1,009	Greatest example of erosion in the world.
Acadia, 1919.....	Maine coast.....	15	Group of granite mountains on Mt. Desert Island
Zion, 1919.....	Southwestern Utah....	120	Zion Canyon 1,500 to 2,500 feet deep.
Bryce Canyon, 1928..	Southwestern Utah....	22	Eroded pinnacles, vivid colorings.
Grand Teton, 1929...	Northwest Wyoming..	150	Spectacular Teton Mountains.

There are also eleven national military and other parks under the jurisdiction of the Secretary of War. They are as follows: Chickamauga and Chattanooga, Georgia and Tennessee: Shiloh, Tennessee: Gettysburg, Pennsylvania; Vicksburg, Mississippi: Antietam Battlefield, Maryland; Guilford Court House, Moores Creek, North Carolina, Petersburg, Va. Fredericksburg and Spotsylvania, Va., and Stone's River, Tenn.

There were in the Yellowstone National Park at a recent census, 13,309 elk, 1,060 deer, 77 mountain sheep, 1,061 buffalo, 350 black bear, 100 grizzly bear, 700 antelope, and 675 moose.

Wild animals in the National Parks are not included in the National Forest census.

NATIONAL MONUMENTS (YEAR IS THAT OF ESTABLISHMENT.)

Administered by the National Park Service—Devils Tower, Wyo., 1906; Montezuma Castle, Ariz., 1906; El Morro, New Mex., 1906; Petrified Forest, Ariz., 1906; Chaco Canyon (chä'kō), New Mex., 1907; Muir Woods (mūr), Calif., 1908; Pinnacles Calif., 1908; Natural Bridges, Utah, 1908.

Lewis and Clark Cavern, Mont., 1908; Tumacacori (Tū-ma-kä'-kō-rē), Ariz., 1908; Navajo (näv'-ä-hō), Ariz., 1909; Shoshone Cavern (shō-shō'-nē), Wyo., 1909; Gran Quivira (grän kē-vē'-rä), 1909; Sitka, Alaska, 1910; Rainbow Bridge, Utah, 1910; Colorado, Colo., 1910;

Papago Saguaro (pä'-pä-gō säg-wä'rō), Ariz., 1914; Dinosaur (di'nō-sôr), Utah, 1915; Capulin Mountain (käpū'lin), New Mex., 1916; Verendrye (vér-ron-drē), No. Da., 1917; Casa Grande (kä'-sä grän'dä), Ariz., 1918; Katmai (kät'mī), Alaska, 1918; Scotts Bluff, Neb., 1919.

Yucca House (yūc-cä), Colo., 1919; Fossil Cycad So. Da., 1922; Aztec Ruins, New Mex., 1923; Hovenweep, Utah-Colo., 1923; Pipe Spring, Ariz., 1923; Carlsbad Cave, New Mex., 1923; Craters of the Moon, Idaho, 1924; Wupatki, Ariz., 1924; Glacier Bay, Alaska, 1925; Wichos, Utah; Arches, Utah, 1929.

Administered by the Department of Agriculture—Gila Cliff Dwellings (he'lä), New Mex., 1907; Tonto, Ariz., 1907; Jewel Cave, So. Da., 1908; Wheeler, Colo., 1908; Mount Olympus, Wash., 1909; Oregon Caves, Ore., 1909; Devil Postpile, Calif., 1911.

Walnut Canyon, Ariz., 1915; Bandelier (Băn-dē-lēr'), New Mex., 1916; Old Kasaan (kä-sän), Alaska, 1916; Lehman Caves, Nev., 1922; Timpanogos Cave Utah, 1922; Chiricahua, Ariz., 1924; Lava Beds, Calif., 1925.

Administered by the War Department—Chalmette, La., 1907; Big Hole Battle Field, Mont., 1910; Cabrillo, Calif., 1913;

Mound City Group, Ohio, 1923; Fort Wood, N. Y., 1924; Castle Pickney, So. Caro., 1924; Fort Pulaski, Ga., 1924; Fort Marion, Fla., 1924; Fort Matanzas, Fl., 1924; Meriwether Lewis, Tenn., 1925; Fort Niagra, N. Y., 1924;

Fort McHenry, Md., 1925; White Plains Battle Field, N. Y., 1926; Kennesaw Mt., Ga., 1928; Lincoln Birthplace Memorial, Ky.

Population (1920) of outlying possessions—*Alaska*, 55,036; *American Samoa*, 8,056; *Guam*, 13,275; *Hawaii*, 255,912; *Panama Canal Zone*, 22,858; *Porto Rico*, 1,299,809; *Philippines* (Dec. 31, 1918), 10,350,640; *Virgin Islands of the United States* (Nov. 1, 1917), 26,051.

The total in the table includes for 1920, 117,238 persons in military and naval service abroad.

ESTIMATED UNITED STATES POPULATION JULY 1, 1928.

The Department of Commerce announces an estimate of the population of the United States by the Bureau of the Census. This gives a total estimated population of 120,013,000 on July 1, 1928, as compared with 105,710,620 on January 1, 1920.

The total is arrived at by estimating the increase since 1920 upon the basis of the available data regarding births, deaths, immigration and emigration.

The population of the several states is then estimated by distributing the total increase for the United States upon the basis of the increase by states from 1910 to 1920 or, where there has been a state census, from 1920 to 1925, except that where there was a decrease between 1910 and 1920 or between 1920 and 1925, the 1920 or 1925 census figure is retained, and no estimate is made.

Baltimore (1752), 200; (1775), 5,934; (1780), 8,000; (1790), 13,502; (1800), 26,514; (1810), 46,555; (1820), 62,738; (1830), 80,620; (1840), 102,313; (1850), 169,054.

Boston (1680), 4,500; (1690), 7,000; (1700), 6,700; (1710), 9,000; (1720), 11,000; (1730), 13,000; (1740), 17,000; (1750), 15,731; (1760), 15,631; (1770), 15,520; (1780), 10,000; (1790), 18,320; (1800), 24,937; (1810), 33,787; (1820), 43,298; (1830), 61,392; (1840), 93,383; (1850), 136,881.

Philadelphia (1683), 500; (1700), 4,400; (1730), 8,500; (1740), 10,500; (1750), 13,400; (1760), 18,756; (1770), 28,000; (1780), 30,000; (1790), 28,522; (1800), 41,220; (1810), 53,722; (1830), 80,462; (1840), 93,665; (1850), 121,376.

The United States Census Bureau made no estimates of the 1929 population of states or cities.

This, the bureau explained, was because of the impending official census of 1930, preliminary figures from which will be available this year.

RANK OF THE STATES IN POPULATION, 1790-1920.

POPULATION OF THE AMERICAN COLONIES, 1610-1790.

Total—(1610), 210; (1620), 2,499; (1630), 5,700; (1640), 27,947; (1650), 51,700; (1660), 84,800; (1670), 114,500; (1680), 155,600; (1690), 213,500; (1700), 275,000; (1710), 357,500; (1720), 474,388; (1730), 654,950; (1740), 889,000; (1750), 1,207,000; (1760), 1,610,00; (1770), 2,205,000; (1780), 2,781,000.

The population in 1790 was composed as follows—free white males, 16 yrs. and over, 807,094; free white males under 16 yrs., 791,850; free white females, 1,541,263; all other free persons, 59,166; slaves, 694,264.

New Hampshire, not including Vermont towns—(1641), 1,000; (1675), 4,000; (1689), 6,000; (1716), 9,000; (1732), 12,500; (1742), 24,000; (1761), 38,000; (1767), 52,700; (1773), 79,092; (1775), 81,000; (1786), 96,755. Figures, 1767-1786 are censuses.

Massachusetts, including Maine—(1632), 2,300; (1643), 16,500; (1675), 33,000; (1692), 60,000; (1721), 94,000; (1735), 145,000; (1742), 165,000; (1755), 200,000. The 1735 figures include 2,600 Negroes. Census figures were—(1764-'5), 269,711; (1776), 338,667; (1784), 408,059.

Maine, estimate based on the Massachusetts census of 1764-1784—(1764-5), 23,993; (1776), 47,520; (1784), 61,406.

Connecticut—(1643), 5,500; (1665), 9,000; (1679), 14,000; (1689), 20,000; (1713), 34,000; (1730), 51,600; (1749), 100,000; (1756), 130,612; (1761), 146,520; (1774), 196,088; (1782), 208,870. Figures 1756-1782 are censuses. Figures for 1761 include 930 Indians.

New York, including Vermont—(1664), 7,000; (1673), 10,500; (1689), 20,000; (1771), 168,006; (1775), 190,000. Figures for 1771 are census, and include 4,669 for Vermont towns.

New York, census figures—(1698), 18,067; (1703), 20,748; (1712), 22,608; (1723), 40,564; (1731), 50,289; (1737), 60,437; (1746), 70,000; (1749), 73,448; (1756), 96,790; (1786), 238,895.

New Jersey—(1702), 15,000; (1726, census), 32,442; (1737, census), 47,369; (1745, census), 61,383; (1749), 60,000; (1754), 78,500; (1774), 120,000; (1784), 149,434. The 1745 figures include 4,606 slaves; 1749 figures exclude slaves; 1754 figures include 5,500 Negroes; 1784 figures include 10,500 Negroes.

Pennsylvania and Delaware—(1681), 500, mainly Swedes on the banks of the Delaware; (1685), 7,200; (1700), 20,000; (1715), 45,800; (1730), 49,000; (1731), 69,000; (1740), 100,000; (1750), 150,000; (1757), 200,000; (1760), 220,000.

Pennsylvania—(1770), 250,000; (1775), 302,000; (1782), 350,000.

Delaware—(1770), 25,000; (1780), 37,000.

Maryland—(1660), 8,000; (1676), 16,000; (1701), 32,258; (1712, census), 46,073; (1715), 50,200; (1719), 61,000; (1748), 130,000; (1755, census), 153,564; (1761), 164,007; (1775), 200,000; (1783), 254,000. The 1712 figures include 8,330 Negroes; those for 1755 include 42,764 Negroes and 3,592 mulattoes; those for 1761 include 49,675 Negroes.

Virginia—(1616), 351; (1620), 2,400; (1628), 3,000; (1635, census), 5,119; (1640), 7,647; (1648), 15,000; (1659), 30,000; (1671), 40,000; (1689), 60,000; (1717), 100,000; (1754), 284,000; (1772), 475,000; (1775), 550,000; (1782, census), 567,614. In 1782, according to returns gathered by Thomas Jefferson, there were in all but 8 of the counties, 53,289 free males, 21 yrs. and over 211,698 slaves, and 23,766 "tithable slaves."

North Carolina—(1677), 4,000; (1701), 5,000; (1710), 7,000; (1717), 10,000; (1732), 36,000; (1754), 90,000; (1764), 135,000; (1774), 260,000. The 1732 figures include 6,000 Negroes; those for 1754 include 20,000 Negroes.

South Carolina—(1682), 2,200; (1708), 9,500; (1714), 16,300; (1720), 20,328; (1749), 64,000; (1763), 105,000; (1773), 175,000. The 1708 figures include 5,500 Negroes; those for 1773 include 110,000 Negroes.

Georgia—(1752), 5,000; (1760), 9,000; (1766), 18,000; (1773), 33,000; (1776), 50,000. The Negroes in 1790 numbered 29,662.

DENSITY OF POPULATION PER SQUARE MILE IN UNITED STATES.

The areas and population of Alaska, Hawaii, and Porto Rico in 1900, 1910, and 1920, of Alaska and Hawaii in 1890, and of Indian Territory in 1860, 1870, and 1880, are not considered.

1916	141,390	229	12,428	124	7,955	1929	158,238	76	5,002	50	2,590

Other ports (1929)—Portland, Me., 10; New Bedford, Mass., 2; Providence, R. I., 1,719; Norfolk, Va., 2; Savannah, Ga., 11; Miami, Fla., 108; Key West, Fla., 1,428; Tampa, Fla., 394; Pensacola, Fla., 5; Mobile, Ala., 17; New Orleans, 817; Galveston, 330; Portland, Oreg., 6; Seattle, Wash., 584.

Of those who in 1929 went abroad 431,842 were American citizens; of those who arrived from abroad 449,955 were American citizens.

During the year, 299,528 aliens of all classes were admitted at New York, the major portion of whom, or 266,515, were of European birth, while 25,452 were natives of the Western Hemisphere, 5,202 of Asia, 842 of Africa, and 1,517 of Australia and the Pacific Islands.

Over two-thirds of the 74,386 aliens entering the country via the northern land border were of Canadian birth, 51,571 coming in that way giving Canada as their country of birth, and of the remainder 21,089 were born in Europe and 1,726 in other countries.

The bulk of the Mexican border arrivals were Mexicans, 43,078 aliens coming in that way, of whom 40,544 were natives of Mexico, while 1,329 were born in Europe, and 1,205 in China and the other countries.

Nearly three-fourths of the 24,632 aliens admitted at Gulf of Mexico and Pacific coast ports came in under the act of 1924 as visitors, transients and returning residents.

Immigration from the Irish Free State dropped from 24,544 in 1928 to 17,672 in 1929, or 28 per cent; from Canada it dropped from 73,154 to 64,440, or 12 per cent; and from Mexico from 59,016 to 40,154, or 32 per cent.

There was an increase from nearly all of the other countries, particularly from England, Scotland, and Sweden, the total immigrants from all Europe being 158,513 in 1928 and 158,598 in 1929.

IMMIGRATION QUOTAS.

The following table shows the number of immigrant aliens admissible to the United States in each fiscal year, ending June 30.

The "new" column gives the number allowable in each year beginning on July 1, 1929.

The "old" column shows the number admissible in the fiscal years up to and ending on June 30, 1929.

Country.	New Quota	Old Quota	Country.	New Quota	Old Quota	Country.	New Quota	Old Quota
Afghanistan	100	100	Hungary	869	473	Poland	6,524	5,982

ROMAN ROADS.

The Romans had roads exclusively military, as well as all those which are known among ourselves.

Their military roads were called Praetorian roads, as being under the immediate government of the Praetors, or military superiors; while their public or high-roads were called Consular, because made and maintained by the authority of the Consuls: and to each of these respectively was usually given the name of the particular Consul under whom it was first made; as in the examples of the *Via Aurelia*, or Aurelian road, made under the Consul Aurelius; and the *Via Appia*, or Appian road, made under the Consul Appius.

Their by-roads, or roads leading from the Consular roads only to small places, or vicinities, or neighborhoods out of the great lines, were called Vicinal roads, or *Viae Vicinales*.

What was peculiar consisted in the usage of keeping the Praetorian, or military roads, or roads designed for the marching of soldiery and armies, entirely distinct from the Consular, or public, or high-roads—roads designed for traffic and for general purposes

The objects of the first were military dominion, and the immediate affairs of state, while the objects of the second concerned commerce and the general intercourse of Romans and strangers; and the separation was so strict, that where roads for all these purposes were wanted to and from the same places, still the two different descriptions of road were formed and carried more or less by the side of each other; as in the modern world we may now sometimes see our roads and canals, common roads and railroads, running side by side.

But the manner of making the Praetorian and Consular roads differed as much as the purposes for which they were made. The Consular roads were often more remarkable for their magnitude and breadth, for the persevering boldness with which they were carried in straight lines.

The Via Appia, which departing from Rome extended to the distance of 350 miles, and then terminated at Naples, had a causeway or pavement twelve feet broad, composed of square blocks of freestone, each for the most part a foot and a half in measure; and this road is still, for several miles together, in many parts of its line, as sound as when first made.

It is not everywhere the smoothest of roads, but this it never was. Horace himself was of opinion that it was best to go slowly over it; and this was at all times the case with the Consular roads in general.

Baltimore (1752), 200; (1775), 5,934; (1780), 8,000; (1790), 13,502; (1800), 26,514; (1810), 46,555; (1820), 62,738; (1830), 80,620; (1840), 102,313; (1850), 169,054.

Boston (1638), 700; (1675), 4,000; (1680), 4,500; (1690), 7,000; (1700) 6,700; (1710) 9,000; (1720), 11,000; (1730), 13,000; (1740), 17,000; (1750), 15,731; (1760), 15,520; (1770), 15,520; (1780), 10,000; (1790), 18,320; (1800), 24,937; (1810), 33,787; (1820) 43,298; (1830), 61,392; (1840), 93,383; (1850), 136,881.

New York City, in 1750, had about 10,000 people, of whom 2,000 were slaves, according to figures published at the time. In 1790, the Federal Census gave Manhattan Island 33,131 population, with 1,761 in what is now the Bronx; 4,495 in what is now Brooklyn; 6,159 in Queens; and 3,835 in Staten Island—total, 49,401 of the inhabitants in 1790 in Manhattan. Negroes numbered 3,262, of whom 2,184 were slaves.

Philadelphia (1683), 500; (1700), 4,400; (1730), 8,500; (1740), 10,500; (1750), 13,400; (1760) 18,756) (1770), 28,000; (1780), 30,000; (1790), 28,522; (1800: 41,220; (1810), 53,722; (1820), 3,802; (1830), 80,462; (1840), 93,665; (1850), 121,376.

ORIGIN OF FAMILIAR FOODS.

(From the General-Famer, Published in 1838.)

The potato is a native of South America, and is still found wild in Chili, Peru, and Monte Video. In its native state the root is small and bitter. The first mention of it by European writers is in 1582—it is now spread over the world.

Wheat and rye originated in Tartary and Siberia, where they are still indigenous (natural production).

The only country where the oat is found wild is in Abyssinia, and thence may be considered a native.

Maize or Indian corn is a native of Mexico, and was unknown in Europe until after the discoveries of Columbus.

The bread-fruit tree is a native of the South Sea Islands, particularly Otaheite.

Tea is found a native nowhere except in China and Japan, from which countries the world is supplied.

The cocoanut is a native of most equinoctial countries.

Coffee is a native of Arabia Felix, but is now spread into both the East and West Indies. The best coffee is brought from Mocha, in Arabia, whence about fourteen millions of pounds are annually exported. St. Domingo furnishes from sixty to seventy millions of pounds yearly.

All the varieties of the apple are derived from the crab-apple, which is found native in most parts of the world.

The peach is derived from Persia, where it still grows in a native state, small, bitter, and with poisonous qualities.

Tobacco is a native of Mexico and South America, and lately one species has been found in New Holland.

Tobacco was first introduced into England from North Carolina in 1586, by Walter Raleigh.

Asparagus was brought from Asia; cabbage and lettuce from Holland; horseradish from China; rice from Ethiopia; beans from the East Indies;—onions and garlic are natives of various places, both Asia and Africa.

The sugar-cane is a native of China, and the art of making sugar from it has been practised from the remotest antiquity.

POPULATION OF INCORP. PLACES OF 5,000 OR MORE PEOPLE.

(U. S. Census of Jan. 1, 1920. See also 1925 censuses of Fla., Kan., Mass., N. Y., R. I., Dak., and Wyo.)

The term "family," as used in the census, signifies a group of persons, whether related by blood or not, who live together as one household, usually sharing the same table. One person living alone is counted as a family, and, on the other hand, all the occupants and employees of a hotel or boarding house, or lodging house, if that is their usual place of abode, and all the inmates of an institution, however numerous, are treated as constituting a single family.

The members of a natural family, in many cases do not live together in the same private family. In particular, the older sons and daughters are likely to be members of other households.

AGE GROUPS IN U. S. POPULATION, 1880-1920.

The total population in 1920 included 2,257,255 infants under 1 year. The percentage for infants under 1 was 2.1 in 1920, as against 2.4 in 1910. The decrease in the proportions of young children and infants between 1910 and 1920 is due, in whole or in part, to decline in the birth rate.

The proportion of persons at and above the age of 25 has become larger from census to census since 1880, the increase between 1910 and 1920 having been noteworthy in the case of persons aged 45 and over.

The number of centenarians reported in 1920 was 4,267, as against 3,555 in 1910. Of the persons reported as centenarians in 1920, 1,561 were men and 2,706 were women.

INDIAN POPULATION OF UNITED STATES.

The Indian population in the present century as compared with their numbers when first the white men came in contact with them is shown in the following data, supplied by the Smithsonian Institution at Washington.

The first date in each case is that of original contact with the whites.

North Atlantic States, including New England, New York, New Jersey, and Pennsylvania—(1600) 55,600; (1907) 21,900.

South Atlantic States, including Maryland, Delaware, Virginia, North Carolina, South Carolina —(1600) 52, 00; (1907) 2,170.

Gulf States, including Georgia, Alabama, Tennessee, Florida, Mississippi, Arkansas and Louisiana—(1650) 114,400; (1907) 62,700.

Central States, including Ohio Valley and Lake region, from the Alleghenies to the Mississippi—(1650) 73,300; (1907) 46,126.

Plains territory, from Canada border to the Gulf—Northern (1780) 100,000; (1907) 50,477; Southern, (1690) 41,000; (1907) 2,861.

Columbia region, including Washington, Montana, Idaho, and Oregon—(1780) 89,300; (1907) 15,431.

California—(1769) 260,000; (1907) 18,797.

Control Mountain region, including Nevada, Utah, Western Colorado and Wyoming, Southern Idaho, Southeast Oregon, Southwest Montana, and small parts of New Mexico and Arizona—(1845) 19,300; (1907) 11,544.

New Mexico and Arizona—(1680) 72,000; (1907) 53,832.

Greenland—(1721) 10,000; (1907) 11,000.

Eastern Canada—(1600) 54,200; (1906) 27,000.

Central Canada—(16 0) 50,950; (1906) 28,770.

British Columbia—(1780) 85,800; (1906) 25,588.

Alaska—(1740) 72,600; (1900) 28,310.

There are now two theories as to the origin of the North American Indians: (1) They came across Bering Strait from North Asia, and moved South; (2) They came from the South Seas to South America and spread north.

The number of Indians in 1492 in the territory now constituting the Continental United States was estimated at 846,000 by James Mooney of the Smithsonian Institution at Washington.

The number of Indians in the United States as it was constituted in 1789 was estimated at 76,000 by Gen. Henry Knox, secretary of war under President Washington. Of this number he located 20,000 between the Great Lakes and the Ohio River, and 56,000 south of the Ohio and east of the Mississippi.

The warriors—or gun men, as they were termed at that time—were assumed to represent one fourth of the total Indian population.

The Creeks in 1789, were estimated at 22,000, including 11,000 Seminoles, Choctaws, 15,000; Chickasaws, 3,500; Cherokees, 3,000; Senecas, 2,000; Delawares, 1,300; rest, scattering.

The figures in the following table are compiled from his own sources by the United States Commissioner of Indian affairs.

1882..	326,039	1892..	248,340								

The Indian population in 1920, as enumerated by the Census Bureau was 244,437. They do not include mixed breeds to much extent.

WHENCE CAME THE REDSKINS?

Members of the International Congress of Americanists held at N. Y. City in 1928 were unable to agree whether the North American Indian's ancestors wandered from Asia over the islands connecting Siberia and Alaska, or came in canoes from the South Sea Islands.

It was contended by some scientists that the Indian was indigenous, by others that he was distinctly Asiatic in origin and by still others that his source, like that of mankind in general, was likely to remain an enigma.

In opposition to the opinion of Dr. Max Uhle, of the Academy of History, of Ecuador, that the Indian's progenitor came from China and India by way of Siberia and Alaska, and of the opinion of Dr. Franz Boas, anthropologist of Columbia University, that the culture of prehistoric tribes in Central America showe devidence of being independently developed, Dr. Wilhelm Koppers, of the University of Vienna, told the congress he believed Australia and the South Sea Islands had been the base from which the aboriginal Indians pushed off for America.

Dr. Koppers said there were strong resemblances between the tribes of southeastern Australia and the tribes of Terra del Fuego, southernmost South America. The resemblances existed in industry, family customs, social organizations and religious rites, he said, and they were supported by similarities in body structure and linguistic traits.

"The common basis of ancient Australian and Tierra del Fuegian culture requires a single point of origin somewhere in southern or southeastern Asia," said Koppers. Resemblances between tribes in California and those of Terra del Fuego were not the result of mere chance, he added, the tribes from South America gradually pushing themselves northward.

The finding among American Indian relics of an ax similar to those used in Polynesia and New Zealand, said Dr. J. Imbelloni, of the University of Argentina, seemed to support the theory of a South Sea origin for the Indian.

Blowguns, arrows and quivers used by primitive tribes in Indonesia, Oceania and South America indicated a common origin, Dr. N. G. Sprinzin, of the Academy of Sciences, Leningrad, said.

Dr. George F. Kunz, research curator of precious stones in the American Museum of Natural History, told the congress that the early natives of North America were far behind those of Eurasia and Africa in the working of precious stones and metals.

"The exceptions," said Dr. Kunz, "were the wonderful gold ornaments in Costa Rica and Florida. In each region they adapted themselves to the materials obtainable. In Alaska they had jade, in the Lake Superior region copper, in Minnesota catalinite, in the Ohio Valley pearls, in New Mexico turquoise and in Chile lapis-lazuli.

"Ignorant of powder or dynamite, the natives did little mining. The copper and gold were those which were picked up in streams.

Diamonds, Dr. Kunz said, were found in thirty-five localities in the United States, but were never worked by prehistoric Indians; and pearls by the bushel were found along the Ohio Valley.

Connecticut figures for 1840 exclude 37 slaves captured in the slave trader Amistad.

New Jersey figures for 1860 relate to "colored apprentices for life" by the act to abolish slavery, passed April 18, 1846.

Maryland figures include the District of Columbia.

Maryland and Virginia figures, 1800-1840, include Alexandria County, Va., which then was a part of the District of Columbia.

Illinois figures for 1800 related to Randolph County, then in Indiana Territory.

Wisconsin figures for 1830 were for Brown, Crawford and Iowa Counties, then in Michigan territory.

Alabama figures for 1800 were for Washington County, then in Mississippi territory; the figures for 1810 were for Baldwin, Madison and Washington Counties, then in Mississippi territory.

Louisiana in 1810 was called Orleans territory.

Arkansas figures for 1810 were for certain settlements then in Louisiana territory.

Missouri figures for 1810 were for settlements in Louisiana territory other than those covered by the Arkansas figures.

There were, in 1790, in the United States, 168 slaveholding families, or 17.2 per cent of the entire number of families.

Each slaveholding family had, on an average, 7.3 slaves.

The slaveholding families in 1850 numbered 347,725, or 9.7 per cent of all families; and the slaves averaged 9.2 per cent per slaveholding family.

There were, in 1790, seven families owning 300 slaves and over per family. In 1850 there were 67 families each of which owned 300 slaves and over.

The average value of a slave in 1790 varied from $150 to $200.

At the former figure the slaves in the United States, in 1790, were worth $104,643,600.

Slavery was introduced into the American colonies in August, 1619, when 20 African negroes were brought into Jamestown, Va., by Dutch traders and sold to the planters.

It is estimated that 333,000 slaves were imported to the United States between 1619 and 1808, when slave trading was barred by Congress. By 1790 the survivors and descendants of the African slaves imported numbered 757,208.

By 1750 negro slavery was recognized by law in every North American colony.

The table does not include free colored people, who numbered as follows—(1790) 59,557; (1800) 108,435; (1810) 186,446; (1820) 233,634; (1830) 319,599; (1840) 386,293; (1850) 434,495; (1860) 488,070.

Ohio disfranchised free negroes in 1803, Connecticut in 1818, Illinois in 1819, Rhode Island in 1822, North Carolina in 1835, Indiana in 1851.

Minnesota voted against negro suffrage in 1865 and in 1867, but voted for it in 1868, when there were 411 negroes in the State.

All the anti-slavery movements of early date were launched by religious sects. The first was set going by the Quakers, but it was peaceful. They spent much money, not in helping slaves to escape from their masters, but to transport free negroes and in bringing suits, where necessary, to guarantee freedom to slaves already manumitted. They preached emancipation, but they lived, hundreds of them, in Virginia and North Carolina, in peace and friendliness with their slave-holding neighbors.

The first forcible effort to free the slaves was begun at Baltimore at the first national conference of Methodist leaders in 1780, and was thereafter kept going. This was aided by the Presbyterian Synod in 1787. The Baptists became active, and shortly thereafter the Congregationalists, at their Hartford convention added slavery to the vices of "profanity, Sabbath breaking, use of intoxicating drinks, covetousness, gambling, breaches of the Seventh Commandment, attendance upon the theater, dancing, gayety and extravagance in dress, novel reading, and sleeping in church."

In 1811, Lilburn Lewis and his brother, Isham, said to be nephews of Thomas Jefferson, planters in the county of Livingston, Ky., cut off the feet and legs of a living slave and burned the members before the slave's eyes, afterwards dispatching him and burning the rest of the body. Lilburn Lewis killed himself to avoid trial and Isham was convicted and sentenced to be hung.

In 1834, at New Orleans, a woman known as Mme. La Loire, or Laurie, beat and mauled a number of negro slaves and chained them in a room to die.

In 1850, out of 3,204,313 slaves, 1,011 were fugitives, and 1,467 were, in the year, voluntarily freed by their owners. The yearly number of manumitted slaves, until 1831, exceeded the runaways.

William Lloyd Garrison, the Abolitionist, in the initial issue of his paper, the Liberator, Jan. 1, 1831, said his efforts in the north had met "contempt more bitter, opposition more active, detraction more relentless, prejudice more stubborn, and apathy more frozen, than among the slave owners themselves."

Garrison, in his early days of crusading, was mobbed at Boston and dragged through the streets. Many New England textile mill owners then believed that slave labor kept down the price of raw cotton.

In the Civil War conscription days at New York City, a negro orphan asylum was burned and adult negroes were strung up on lamp posts.

LYNCHINGS IN THE UNITED STATES SINCE 1885.

(Compiled for the ALMANAC by Monroe N. Work, head of the Research and Record Department of the Tuskegee Normal and Industrial Institute and editor of the Negro Year Book.)

1896..	51	80	131												

According to the records compiled in the Department of Records and Research of the Tuskegee Institute, there were 11 persons lynched in 1928. This is 5 less than the number 16 for 1927, 19 less than the number 30 for 1926, 6 less than the number 17 for 1925 and 5 less than the number 16 for 1924. Six of the persons lynched were taken from the hands of the law, one from jail and 5 from officers of the law outside of jails.

There were 24 instances in which officers of the law prevented lynchings. 3 of these were in Northern States and 21 in Southern States. In 23 of the cases the prisoners were removed or the guards augmented or other precautions taken. In 1 other instance, armed force was used to repel the would-be lynchers. 14 white men, 1 white woman and 25 negro men were thus saved from death at the hands of mobs.

Of the 11 persons lynched 10 were negroes and 1 white (Mexican). The offenses charged were: murder, 2; rape, 3; wounding men in altercation, 2; killing officers of the law, 3; charge not reported, 1.

The States in which lynchings occurred and the number in each State are as follows: Louisiana, 2; Mississippi, 5; Missouri, 1; New Mexico, 1; Texas 2.

WHEN NEW JERSEY WAS A "FOREIGN STATE".

(Contributed by the State Library at Trenton.)

Various writers on early New Jersey history say that New Jersey was called a foreign state, not an outlaw state, and sometimes was called New Spain, because of the fact that in 1817 the Legislature passed a law authorizing aliens to purchase and hold real estate within the state.

It seems to be the opinion of these writers that this law was passed specifically to meet the case of Joseph Bonaparte, oldest brother of Napoleon I, who had been made King of Spain, but who subsequently fled to this country.

He acquired a tract of about 1,400 acres of land at Bordentown near Trenton, where he made his home for many years. Prior to the passage of this act the law of New Jersey permitting aliens to own property required them to declare their purpose of becoming naturalized.

Under the 1817 act it was not necessary for Joseph Bonaparte to become naturalized and there is no record that he ever did.

While in New Jersey Bonaparte went by the title Count de Survilliers. He lived in this country until about 1840, when he returned to Europe and died at Florence, Italy, in 1844.

He was still a resident on this side of the Atlantic when he visited Europe in 1832.

Louis Napoleon, who was a nephew of Joseph Bonaparte, was in this country for a time, but only on a visit to his uncle, and he does not figure in the legislation referred to, nor in the characterizing of New Jersey as a foreign state.

THE "BONAPARTE LAW."

Following is a copy of the act to enable Napoleon's brother to become a landed proprietor of New Jersey. The law was passed on Jan. 22, 1817.

An Act to authorize aliens to purchase and hold real estate within this state.

Sec. 1. BE IT ENACTED by the Council and General Assembly of this State, and it is hereby enacted by the authority of the same, That it shall and may be lawful for any alien, not being the subject of any state or power which shall be at the time of such purchase at war with the United States, to purchase lands, tenements, and hereditaments, within this state, and to have and to hold the same to them, their heirs and assigns forever, as fully to all intents and purposes as any natural born citizen of the United States may or can do:

Provided always, That nothing in this act shall be so construed, as to entitle any alien to be elected into any office of trust or profit in this state, or to vote at any town-meeting or election of members of the legislative Council and General Assembly, sheriff and coroners within this state, or for representatives in Congress, or electors of the President and Vice-President of the United States.

Sec. 2. And be it enacted, That all purchases of lands, tenements, and hereditaments within this state, which may have been made by aliens before the passing of this act, shall be deemed, and held, as good and effectual, to all intents and purposes as if the same had been made after the passing thereof.

Napoleon was next to Joseph in age.

The third brother was Lucien, who was captured in 1810 by the British when on the way to the United States, and whose oldest son Charles Lucien, lived at Philadelphia (1822-1828) and was known as a naturalist.

Charles Lucien's brother, Pierre, lived for a while in the United States but returned to France in 1848 and in 1870 killed Victor Noir, Paris journalist, in a duel.

Next youngest was Marie Bonaparte, sister of Napoleon, and next was Louis, sometime King of Holland. Napoleon had two younger sisters, Marie and Caroline.

His youngest brother was Jerome (later King of Westphalia) who in 1803 fled from the West Indies to New York City and married Elizabeth Patterson, daughter of William Patterson of Baltimore. By her he had one child, Jerome, who was born in England in 1805, and died at Baltimore in 1870.

This Jerome married, in 1829, Susan Williams of Baltimore. The couple had two children, Jerome and Charles Joseph. The latter became U. S. Secretary of the Navy, and U. S. Attorney General.

The youngest brother of Napoleon, Jerome, returned in 1805 from America to France where Napoleon annulled the union with Miss Patterson.

Jerome, in 1807, married a daughter of the King of Wurttemberg. Out of this alliance came the line of Napoleonic Pretenders to the throne of France.

1904 figures are exclusive of prisoners committed for non-payment of fine.
In Delaware and District of Columbia there are no state prisons or reformatories.

FEDERAL PRISONS.

The Federal prisons are located at Leavenworth, Kan., at Atlanta, Ga., and at McNeil Island, State of Washington.

The Federal Industrial Reformatory for Men is at Chillicothe, O. The Federal Industrial Institution for Women is at Alderson, W. Va.

There is a Federal Prison Farm on the Missouri River, in Platte County, Nebr.

No federal prisoners would be kept in city prisons, the United States Department of Justice announced, after October 1, 1928.

The Federal House of Detention, opened in March, 1919, is at West and 11th Streets, New York City.

DOES CRIME PAY?

Answering this question in 1929, at New York City, at the Boys' Work Conference of the Welfare Council at the Town Hall Club, Warden Lewis E Lawes of Sing Sing, fixed the net haul in the "average robbery during 1927" at $30.75.

"The total haul," said Lawes, "of approximately 900 men committed to Sing Sing in 1927 was $368,574.

The sentences imposed for these offences totaled 12,389 years, an average of $29.07 a year.

Sentences for robbery totaled 6,545 years, or at the rate of $1.30 a year; for larceny, 1,680 years, or $38 a year; for forgery, 448 years, or $642 a year, and for burglary 3,716 years, or $2 a year.

12,000 MURDERS A YEAR?

Wade H. Ellis, of the American Bar Association's Crime Commission, in an address given over the radio at Washington, D. C., on June 24, 1929, said that crime costs the United States $13,000,000,000 a year; that 12,000 murders were committed in America annually, fifty times the number recorded in Great Britain; and that 30,000 criminals are at large in New York and 10,000 in Chicago.

The annual murder rate in this country has increased 350 per cent since 1900, he said. In other words, while two persons in every 100,000 were murdered in 1900, the proportion is now seven in every 100,000.

PATIENTS IN STATE HOSPITALS FOR MENTAL DISEASES.

Figures reported in the columns headed "Net quantity" represent exact quantities of narcotic drugs both in pure state and as part content of compounds and preparations. Tax is paid by stamps at the rate of 1 cent per ounce or fraction thereof for the entire contents of each package or bottle.

A compound or preparation containing a narcotic drug in a quantity exceeding the statutory exemption is taxed the same as the pure drug.

The number of "taxable" ounces reported has been determined from the value of stamps required.

100,000 DRUG ADDICTS IN UNITED STATES.

The Prohibition Commissioner, in his report to the Secretary of the Treasury, for the year ending June 30, 1928, said:

"The consensus of opinion among these officers, who may well be termed experts as to this field of inquiry, is that the total number of narcotic drug addicts in the United States is decreasing, and that the average age of such addicts is increasing, indicating that few if any recruits are being made to the ranks of the habitues and perhaps none of the more youthful.

"Based upon the particular inquiry mentioned, and the result of two surveys made by field officers some two to four years ago, the Government is inclined to the opinion that there are not more than 100,000 narcotic drug addicts in the continental United States at present, these figures representing a very liberal estimate."

Total enumerated blind census in previous years—(1830) 5,444; (1840) 6,936; (1850) 9,794; (1860) 12,658; (1870) 20,320; (1880) 48,928; (1890) 50,568; 01900) 64,763; (1910) 57,272.

The total *estimated* number of blind—(1880) 49,000; (1890) 56,600; (1900) 63,000; (1910) 70,300; (1920) 74,400.

Of the *enumerated* blind in 1920, whites numbered 45,737; negroes, 6,302; Indian, 488; other (Chinese, Japanese, etc.) 40.

Of the blind enumerated in 1920 over one-third (36.9 per cent) of the blind lost their sight in childhood or youth, or before 20 years; over two-fifths (43.4 per cent) during early and middle adult life, or between 20 and 64.

REGISTERED HOSPITALS IN THE UNITED STATES AND THEIR CAPACITY.

(From 1928 data gathered by the Amer. Medical Assoc., and Published in its Journal.)

Since 1918, in the United States, the medical schools have graduated 71,015 physicians; in 1908 they numbered 7,376.

There are more than 85,000 physicians regularly connected with hospitals in this country.

Results in the column at the right are obtained by applying the percentages to the number of beds given in the column at the left. It is assumed that the average percentage of beds occupied in 1928 would be the same as in 1927, since that percentage varies little (less than 1) from one year to another.

GROWTH OF HOSPITALS, 1909 TO 1928.

THE ROMANCE OF QUININE.

(From a Bulletin of the New York City Department of Health.)

In Astorga, Spain, in the year 1599, at the palace of her father, the Marquis de Astorga, was born the Lady Ana de Osorio and became by marriage the Countess of Chinchon, a judicial district southeast of Madrid. In 1628 the Count was appointed Viceroy of Peru, his jurisdiction extending over all of South America except Brazil.

After ten years' residence in Lima, the Vice-Queen fell ill of ague. News of her illness reached the ears of Don Francisco Lopez de Canizares, who was then Mayor of Loxa, a town in the Andes. Canizares had learned shortly before from an Indian the virtues of a bark which had wrought a cure upon a Jesuit in 1600. He accordingly sent a parcel of this bark to the Vice-Queen. In the hands of her physician, Don Juan de Vigo, the powdered bark accomplished a cure.

When the Count and Countess returned to Spain in 1640 they carried with them a large supply of the precious bark, which the Countess had the avowed intention of distributing among the poor peasants at Chinchon, where the river marshes were rife with malarial infection.

While Juan de Vigo was selling the powdered bark to druggists in Seville at 100 reals a pound, this lady was distributing it gratis all over her husband's estate, and earning the gratitude of the peasant population. Not only to these impoverished tenants did she give freely of her powders, but also to the students at the University of Alcala, that they might be the means of its wider spread.

By degrees the fame of the *pul·vera Comitessæ*, or Countess's powders, as they came to be called, spread all over the kingdom, and thence to other countries of Western Europe. Their merits were also proclaimed throughout France by members of the Jesuit Order, among whom the Cardinal de Lugo, Procurator of the Order, was notable.

Under the name of Jesuits' or Cardinals' powders, missionaries actively promoted their sale, developing a trade, which reached its height about 1649. The remedy was introduced into English practice by Sydenham and Morton.

The tree from whose powdered bark cinchona was obtained remained unclassified by scientists until it was brought to the attention of Linnaeus in 1742 by Condamine, who with scientific men had visited the forests of Loxa and brought back samples, which he asked Linnaeus to name.

Through a misunderstanding of the Countess's true name, which he desired to honor, Linnaeus called the plant Cinchona officinalis,* omitting the first *h*. It is said that he died without learning of his error. To the Indians of Peru it became known as quinquina. Spanish botanists of the eighteenth century spelt it correctly, and in the South American regions where it grows it is to this day called Chinchona.

Gomez of Lisbon succeeded in 1810 in obtaining a mixture of alkaloids from cinchona, to which he gave the name cinchonino. From this mixture quinine and cinchonine were isolated in 1820 by Pelletier and Caventou, and the other alkaloids somewhat later.

The demand for quinine was so great and the price so exorbitant that within 6 years of its isolation no less than 132 substitutes were offered on the market.

EXPECTATION OF LIFE IN THE UNITED STATES.

The following Life Tables, prepared by the Bureau of the Census, are based on the 1920 enumerated population and on the births and deaths that occurred in 1919 and 1920 in registration area and relate to about 74 per cent. of the total number of inhabitants.

State.	At Birth.		At 22 Yrs.		At 32 Yrs.		At 42 Yrs.		At 52 Yrs.		At 62 Yrs.

Expectation of life at birth in England, based on the 1921 census, is—for males, 55.62 years; for females, 59.58 years.

THE SPAN OF LIFE IS NOT LENGTHENING.

In an address on Oct. 3, 1929, to the American Public Health Association, at Minneapolis, Dr. Louis I. Dublin, insurance statistician, of New York City, said:

"The expectation of life has increased, but the span of life has remained stationary.

"A fundamental distinction must be made between these two. The former, which is the average length of life of people in a stationary population, has shown appreciable gains and will continue to increase as public health improves and more and more diseases are brought under control.

"The latter has remained stationary for a long time and it is altogether unlikely that man will be able to do anything to change it.

"The span of life seems to be fixed by the nature of man himself. His internal structure wears out after so many years of work and use and he appears unable to master its weakness or give it stamina to last longer.

"The breakdown of the human body occurs well on this side of the century mark, except in a few isolated instances. We hear much about the number of centenarians in the United States. There are about 5,000 persons in this country claiming they have reached this age, but the great majority are mistaken as to their age—most of them honestly so.

"Practically every investigation of centenarians has disclosed the woeful lack of reliable records of their true ages.

"The span of life for the great majority of persons seems to be closer to eighty years than a hundred. In the population of the United States, which numbers 120,000,000, there are only a little more than 700,000 who have attained the age of 80, or six-tenths of 1 per cent of the population—and this proportion will probably grow less.

"That twenty years have been added to the average length of human life, since public health work began to be actively practiced in the early 80's of the last century, is true.

"But this gain can be traced to the reduced mortality of infants and to the cutting down of the unnecessary and preventable deaths of young people from typhoid fever, diphtheria, scarlet fever, smallpox and a host of other diseases which, for the most part, affects persons under 40 years of age.

"Improvement, after the age of 40, has been slight, and almost altogether limited to women.

"Such campaigns as center around the annual physical examination are very desirable, but their value, so far as they go to extending the life span, is questionable. Their greatest worth is in making old age freer of discomfort."

Accidents snuffed out the lives of nearly 96,000 persons during 1928 in the United States, according to the report to the National Safety Council presented at Chicago, in September, 1929, by Dr. Louis I. Dublin, insurance statistician:

"The fatal accident experience of the United States is made up of five important factors," the speaker said. "Automobile accidents come first with 28 per cent of the accident toll; falls account for 18 per cent; these are followed by drowning with 9 per cent; then by burns with 7 per cent, and by railroad accidents with 6 per cent of the accident total."

One-fourth of the fatal accidents in the United States happen to persons in their own homes, according to officials of the New York State Insurance Fund.

DEPTH OF CHEST DETERMINES HUMAN WEIGHT.

The theory behind weight machine diagrams and medical charts which for years have dictated what a person should weigh according to his height, is inaccurate, Dr. Mary Louise Boillin, research worker at Teachers College, Columbia University, reported in September, 1929, adding that a survey had shown that height is an almost negligible factor in determining weight.

Working in cooperation with the American Child Health Association, she observed a group of 815 students of Wellesley College.

The only accurate method for determining weight, she discovered, is from a combination of five skeletal dimensions, shoulder width, width of hips, chest width, chest depth and height.

Of all the measurements used, chest depth was found to be more closely associated with weight than any other factor.

Shoulder width was the least important, and height the next lowest.

Shoulder width and depth, Dr. Boillin declared, are responsible for more than one-half of the difference in weight between persons of approximately the same height.

Chest depth alone, she said, is twice as important in determining average weight as any other factor.

If a person is underweight according to his chest dimensions, there is more indication of malnutrition than if he is underweight according to his height, Dr. Boillin asserted.

Underweight, as indicated by the height charts, usually means that the person has small chest dimensions. Consequently, she explained, he usually is not underweight at all.

A chart prepared by Dr. Boillin to coincide with the findings of her study reveals the importance of each weight determining factor, as follows:

Biacromial or shoulder width, 9 per cent; height, 16 per cent; width of hips, 20 per cent; width of chest, 23 per cent, and depth of chest, 32 per cent.

DEATH RATES THROUGHOUT THE WORLD.

(Compiled from published data by John K. Gore, Vice Pres. and Actuary, Prudential Life Ins. Co., of Amer.)

Death rates "all causes" are per 1,000 population; all the others are per 100,000 population.

Country.	All Causes.		Tuberculosis.		Heart Diseases.		Diabetes.		Cancer.		Nerves.		Respiratory.		Digestive.

It is estimated by the U. S. Public Health authorities that 50,000,000 people suffer in an average year from colds and bronchitis; 17,000,000 from influenza and grippe; 11,000,000 from diseases of the digestive system; 8,000,000 from tonsilitis and sore throat, and 5,000,000 from diseases of the nervous system.

Cost of illness in an average year in this country has been estimated as follows: physicians and quacks, $865,000,000; dispensaries, $2,300,000; hospital care, $404,500,000; nurses at home, $152,000,000; medicines, $700,000,000; dentists, $285,000,000; loss of wages, $1,245,000,000; other and total,—$3,730,000.

U. S. Rate per 1,000 estimated population—Births (1928) 19.7; (1927) 20.6. Deaths (1928) 12.0; (1927) 11.4.

Infant mortality (deaths under 1 year per 1,000 births)—(1928) 67.9; (1928) 64.6.

In 1927, as shown by a Government census, 869,346 caskets and coffins were manufactured by establishments engaged primarily in that cheerful line of business.

The total wholesale value of these cases for the dead was $53,824,822.

Shipping boxes, and other supplies used by undertakers, who now are called morticians, raised the coffin total to $74,890,850.

In addition, outsiders in that year made coffins and caskets valued at $1,177,420.

COULD ACCIDENTS BE PREVENTED?

(From the California Safety News, September, 1929.)

About eighteen months ago a man tailing off behind the matcher in a box factory noticed a large sliver back of the process saw of the machine. He stopped the feed rolls, and as the regular machine operator was not right at the machine, he reached into the matcher to remove the sliver.

This caught on the saw, pulled his hand in and cut it off at about the wrist.

A few days ago the blower fan broke down, and when it was raised out of its casing this hand was found in the bottom of the casing shell, cured and dried as nice as if it had been embalmed by one of the ancient Egyptians.

A man was tailing off behind a band resaw. They were setting up to resaw a 6-inch x 6-inch piece, and the machine operator wanted to withdraw this piece after the saw had started the cut, so the tail-off man thought he could help shove the stock back out of the machine.

He stuck his right foot into the machine and gave a push, the piece went back all right, but his foot passed the saw and when he withdrew it he cut off the little toe.

A boiler maker wanted to test a tank he had just finished building. The tank was constructed to carry about 15 pounds pressure per square inch.

He connected it up to a 95-pound pressure air line, and never will know how much pressure he had in it. When one head was blown out it nearly killed him.

An oiler in a certain sawmill did almost the same stunt, with more disastrous results.

A part of his duties was to keep a small reservoir, about 5 feet above the mill basement floor, filled with oil, from a barrel close by. In order to save time and labor, he connected this barrel to an 85-pound pressure air line, no reducing pressure or safety valves, and over to the oil reservoir.

The barrel was standing on end, it blew up, left the bottom head, and as it went up to the ceiling it caught the oiler under the chin and took away about one-half of his head.

AGAR-AGAR.

Agar-agar, sometimes called Japanese gelatin or vegetable isinglass, is a glutinous substance made from certain of the cartilaginous species of seaweeds.

The term "agar-agar" apparently is derived from a Malay word meaning "vegetable." In Japanese it is known as "kanten," equivalent of "cold sky," presumably because cold, clear weather is necessary for its production.

"Kanten" is the ordinary commercial grade of agar-agar, but there is also another product, "funori," an algae-glue, which is used in certain kinds of work as a glue or sizing.

The highest grade of Japanese agar-agar (No. 1) is sent to China, where it is in demand as a food, chiefly as a basis for soups. The lower grades, used industrially as a sizing for textiles and in the manufacture of candy, foodstuffs, medicinal preparations, and other products, are sent to Europe and America.

Agar-agar comes on the market in shriveled strips about 11 inches long and an eighth of an inch square. The colors vary from almost a pure white to a dark amber. The lighter colors constitute the better grades, although the chemical components of the different grades are the same. Agar-agar has no odor and is practically tasteless.

There are a number of varieties of the algae or seaweeds from which agar-agar is made. These are found and used for the manufacture of agar-agar principally in the Malay Archipelago, and along the coasts of China and Japan, although, in recent years, the seaweed growing in abundance along the Californian coast has been used in the manufacture of agar-agar in that State.

1928 full figures—general imports, $4,091,120,064; exports, $5,128,809,279 (domestic, $5,029,682,396); foreign, $99,126,883).

The above figures include the trade of Alaska, Hawaii and Porto Rico, with foreign countries, but do not include the trade of those territories with the United States, which is set forth below for the last three calendar years.

TRADE BETWEEN THE UNITED STATES AND ITS TERRITORIES, AND GUAM AND SAMOA.

(Shipments to and from Philippine Islands are included in statements of imports and exports to United States)

The value of imported merchandise is the foreign value as shown on the entry and consular invoice, representing the market value or the price at which the merchandise, at the time of exportation to the United States, is offered for sale in the principal markets of the country from which exported, including the cost of containers or coverings and all expenses incident to placing the merchandise in condition ready for shipment to the United States.

The statistics foreign commerce include the trade of Alaska, Hawaii, and Porto Rico, with foreign countries, but not the trade of these Territories with the United States.

In the statistics of foreign commerce the Philippine Islands are treated as a foreign country. The trade of these islands with foreign countries is, therefore, not included in the foreign commerce of the United States, but is published separately by the Philippine government.

TRADE OF CONTINENTAL UNITED STATES.

The table below shows the trade of Continental United States, whereas other foreign trade statistics of the United States are compiled on the basis of the customs area.

In order to obtain the foreign trade of Continental United States the trade of the United States with Alaska, Hawaii, Porto Rico, Guam and American Samoa is added to the total for the customs area, while the trade of Alaska, Hawaii and Porto Rico with foreign countries is subtracted from the total.

Practically all other nations calculate their foreign trade in this manner; that is, by totaling the trade of the home country with foreign countries and with all outlying possessions.

Year.	Exports.			Imports.

Figures for calendar year 1918 are for last six months of that year.

General imports and imports for consumption for any period will differ to the extent that the value of entries for warehouse for the period differs from the value of withdrawals from warehouse for consumption. The term "entry for consumption" is the technical name of the import entry made at the custom house, and implies that the goods have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion. Some of them may be afterwards exported.

IMPORTS AND EXPORTS, BY COAST AND BORDER DIVISIONS.

(Figures show millions and tenths of millions of dollars: thus, 1,918.2 = 1,918,200,000.)

Domestic exports.—The statement of domestic exports exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials.

The value of exports of domestic merchandise is the actual cost or the value at the time of exportation in the ports of the United States whence they are exported, as declared by the shippers on the export declarations.

The figures represent the actual tonnages handled at the ports and on the rivers, canals and connecting channels. The grand total figures do not represent an addition of the several elements, but do show the actual tonnages floated on the waters of the United States after eliminating certain traffic common to both ports and internal waterways.

CONSOLIDATED SUMMARY OF CARGO TONNAGE, WITH NET TOTALS.

Year. (Calendar.)	Foreign.		Domestic, Coastwise.		Other Domestic.	Total Eliminating (!) Duplications.

A considerable amount of cargo traffic on the Detroit River, according to statements of the federal prohibition enforcement agents, is not openly accounted for in the navigation returns, or on ship manifests.

The Erie (Barge) Canal in 1929 handled a large quantity of grain from the far northwest that got to New York City via the Panama Canal and was distributed to Ohio and other north-central states by the Barge Canal.

VESSELS ENTERED AND CLEARED AT UNITED STATES PORTS.

Included in above, on June 30, 1929, were 253 canal boats of 32,279 gross tons and 5,043 barges of 1,457,475 gross tons.

Motor ships, included in steam, numbered 11,919, of 861,001 gross tons.

Figures for 1840 are for year ended Sept. 30.

Figures for licensed steam vessels under 20 tons include gasoline craft since 1897.

Deadweight tonnage expresses tons of 2,240 pounds a vessel can transport of cargo, etc.

Gross tonnage applies to vessels, not to cargo. It is determined by dividing by 100 the contents, in cubic feet, of the vessel's closed-in spaces. A vessel ton is 100 cubic feet.

Net tonnage is a vessel's gross tonnage minus deductions of space occupied by crew, machinery, engine room, fuel, etc.

Displacement of a vessel is the weight, in tons of 2,240 pounds, of the vessel and its contents.

Tax receipt figures exclude refunds. The tax was laid on 10,178,344,771 gallons of gasoline.

In the States without a tax the gasoline used was estimated by the Bureau of Public Roads at 1,381,841,273 gallons. These States were Massachusetts and New York. New York's share was one billion gallons.

Figures for Illinois receipts cover only Jan., 1928. The law was found invalid by the Supreme Court on Feb. 24, 1928. The tax in Jan. 1928 was laid on 41,841,273 gallons; estimated consumption for the other 11 months was 671,000,000 gallons. In 1929 the Legislature authorized a tax of 3 cents a gallon, in effect Aug. 1.

Of the total receipts, $362,076 represented license fees.

The total receipts were thus disposed of—cost of collection, $694,601; for construction and maintenance of rural roads, $268,427,492 (state highways $211,046,591; local roads, $57,380,901); payments on road bonds, $17,619,995; miscellaneous, $18,491,754.

The Massachusetts gasoline tax began on Jan. 1, 1929; that of New York on May 1, 1929.

A State has no power to fix the price of gasoline within its borders, the U. S. Supreme Court ruled, on Jan. 2, 1929, in an opinion holding invalid a statute passed by Tennessee in 1927 giving its authorities control over the selling price of gasoline.

The Supreme Court's opinion holds that the court is not concerned with the character of the business. Gasoline, the court says, is a commodity of trade, differing, so far as the question at issue is concerned, in no essential respect from a great variety of other articles commonly bought and sold by merchants and private dealers in the country.

Of the gross receipts, $258,527,541 came from motor cars; $1,704,324 from dealers licenses; $14,725,475 from chauffeur and operator permits.

The gross receipts were thus disposed of—cost of collection and administration, $15,132,999; for highway purposes, $301,105,292 (state highways, $208,880,272; local roads, $60,399,109; paying on road bonds, $31,825,911); other purposes, $6,390,734.

WORLD CENSUS OF AUTOMOBILES.

There is now 1 automobile for every 61 persons, or 16 vehicles per thousand of population; and in the United States there is 1 car for every 5 persons, according to figures collected by the United States Department of Commerce.

The following table shows the number of passenger motor vehicles in use in the different countries, as of Jan. 1, 1929.

Country.	Private.	For hire.	Country.	Private.	For hire.	Country.	Private.	For hire.

World production of motorcycles in 1928 was estimated by the U. S. Department of Commerce at 400,080, of which 37,500 were made in the United States; in the United Kingdom, 120,000; in France, 115,000; in Germany, 84,000; in Belgium, 15,000; in Switzerland, 12,000. Motorcycles in use in the world in 1929 numbered 2,263,000.

How to compute automobile horsepower. The only standardization as to horsepower is that known as the National Automobile Chamber of Commerce rated horsepower. This is used as a basis for computing the taxable horsepower in the United States. The N. A. C. C. horsepower formula is: $D^2N \div 2.5$, where D equals the bore in inches and N the number of cylinders.

U. S. IMPORTS AND EXPORTS OF AUTOS, RUBBER AND TIRES.

THE SAFEST WAY TO TRAVEL—WHICH?

(Washington Star Editorial, Quoted in Domestic Air News.)

Statistics of the Interstate Commerce Commissions show that 6,500 persons were killed and 85,560 injured as a result of operation of railroads in 1928. During the year passenger trains traveled 521,349,000 miles and freight trains 601,648,000 miles, making a total of 1,122,997,000.

Dividing this figure by the number of persons killed, we have one fatality for every 172,768 miles traveled by rail.

Turning now to civil air transportation, the Department of Commerce estimates that planes flew approximately 70,472,000 miles during 1928. The total loss of life in civil aviation was 368 and 672 persons were injured.

This means that in flying one life was lost for every 191,500 miles traveled, which is a slightly better record than was made by the railroads.

The American Automobile Association estimates that the average car travels 6,750 miles per year, which multiplied by more than 21,202,000 licensed automobiles in the country gives a total of 143,115,477,750 miles traveled by motor in 1928. This tremendous distance is more than 125 times the mileage traveled by rail and is 2,044 times greater than the total airplane travel.

The loss of life from automobile traffic is also large, amounting to approximately 23,000 deaths and 700,000 injuries during the last calendar year, but because of the great distance traveled the fatalities amount to only one for every 6,222,412 miles.

It should be noted, however, that the number of miles per death does not accurately represent the risk involved to passengers, since the figure for railroads includes 2,496 fatalities at grade crossings.

Likewise the figures for automobiles include the number of pedestrians killed, while the danger from operation of airplanes is confined almost exclusively to the persons in the plane.

The railroad figure includes all the employees.

AMERICAN RAILWAY STATISTICS.

Figures for miles owned cover classes I, II, and III, also non-operating subsidiaries.

Figures for freight carried (1913) cover classes I and II roads, and this is true for that year as to number of employees and employees' wages.

Average capacity of freight cars, in tons—(1903) 29.4; (1910) 35.9; (1915) 39.7; (1920) 42.4; (1923) 43.8; (1924) 44.3; (1925) 44.8; (1926) 45.1; (1927) 45.5; (1928) 45.8.

Average annual compensation per employee—(1917) $1,003.81; (1918) $1,419.34; (1919) $1,485.89; (1920) $1,820.12; (1921) $1,666.28; (1922) $1,623.29; (1923) $1,617.11; (1924) $1,613.47; (1925) $1,639.96; (1926) $1,655.79; (1927) $1,677.24; (1928) $1,706.45.

Return for employees and employees' wages, 1917 and since, cover Class I only.

Net income figures (1913) cover classes I and II roads and non-operating subsidiaries; most of the other figures, that year, exclude non-operating subsidiaries.

Dividend figures (1023) include $50,417,400 of stock dividends authorized by the Interstate Commerce Commission.

Average dividend rate, counting all stock—(1890) 1.97; (1900) 2.39; (1910) 5.00; (1916) 4.19; (1920) 3.74; (1923) 4.53; (1924) 4.14; (1925) 4.35; (1926) 5.06; (1927) 5.95; (1928) 5.25.

Average dividend rate on dividend-paying stock—(1890) 5.45; (1900) 5.23; (1910) 7.50; (1916) 6.75; (1920) 6.52; (1923) 7.30; (1924) 6.37; (1925) 6.52; (1926) 7.32; (1927) 8.47; (1928) 7.12. The peak, 9.02, was in 1921.

Operating revenues in 1928 for Class I roads, amounting to $6,111,735,511, were derived from the following chief sources: freight, $4,680,455,593; passenger, $901,018,801; mail, $104,385,255; express, $142,579,632.

Operating expenses in 1928 for Class I roads, amounting to $4,427,995,036, were divided as follows: maintenance of way and structures, $837,-905,747; maintenance of equipment, $1,166,941,920; traffic, $125,007,867; transportation, $2,069,927,168.

Figures for 1913-1914, except in first and last columns, cover classes I and II roads and non-operating subsidiaries.

"Net Capitalization" is total capital outstanding minus capital securities owned by railways. Thus, in 1928, of the $18,510,582,609 of American rail securities in the hands of the public, stocks totaled $7,084,045,045; bonds, $11,426,537,564.

The number of stockholders in chief railway companies Dec. 31, 1928, was—Pennsylvania, 154,008; Atchison, 60,643; Union Pacific, 49,096; Southern Pacific, 57,165; Baltimore & Ohio, 35,782; New York Central, 52,875; Great Northern, 42,748; Northern Pacific, 36,535; New Haven, 27,143.

Investment in road and equipment for 1925 and since, include the investment of proprietary companies.

Interest on funded debt (1890) $221,499,702, (1900) $252,949,616; (1910) $399,582,056; (1920) $500,353,547; (1923) $551,705,157; (1924) $588,-301,048; (1925) $583,875,012; (1926) $581,708,760; (1927) $583,451,540; (1928) $578,831,358.

Figures in columns 2—5 include nominally outstanding.

Total railway mileage in the United States—(1830) 23; (1840) 2,818; (1850) 9,021; (1860) 30,626; (1870) 52,922; (1880) 93,267; (1890) 167,191; (1900) 198,964; (1910) 249,992; (1915—June 30) 253,789; (1916—June 30) 254,251; (1917—Jan. 1) 254,037; (1918—Jan. 1) 253,626; (1919—Jan. 1) 253,529; (1920—Jan. 1) 253,152; (1921—Jan. 1) 252,845; (1922—Jan. 1) 251,176; (1923—Jan. 1) 250,413; (1924—Jan. 1) 250,222; (1925—Jan. 1) 250,156; (1925—Dec. 31) 249,398; (1926—Jan. 1) 249,398; (1926—Dec. 31) 249,138; (1927—Jan. 1) 249,138; (1927—Dec. 31) 249,1310; (1928—Dec. 31) 249,309.

Mileage in Alaska and Hawaii not included in any of the above totals.

WIDTH OF STANDARD GAUCE RAILWAYS.

The *standard gauge* of railways is 4 feet 8½ inches in the United States, Great Britain, Canada, France, Germany, Austria, Holland, Belgium, Denmark, Hungary, Italy, Switzerland, Sweden, and European Turkey. That is to say it is 56½ inches from the inside of one rail to the inside of the opposite rail, about five-eighths of an inch below the top of the rail head. This measurement holds good on rail heads with slanted sides as well as on rail heads with straight sides.

Broad gauge is 6 feet and was used in the South.

Narrow-gauge:- A gauge narrower than the standard gauge, such as the meter gauge used largely in Latin American countries; 3 ft. gauge frequently employed in construction tracks; or 3-ft. 6-in gauge standard on the British South African Railways, etc. A gauge of 24 in. or less is commonly employed for industrial railways.

Total number of bus passengers	398,323,932	16,109,836	16,120,115	....
Number of revenue bus passengers	325,919,601	12,783,202	12,791,308	....

The 1927 figures are based on reports for that year received prior to September 14, 1928.

The 1922 (A) figures represent an adjustment for comparison with 1927; the 1922 (B) figures are as originally published, and are comparable with 1917.

The 1922 (A) figures also include those concerns which operated in 1922 but went out of existence as separate companies prior to January 1, 1927.

The 1922 figures for the companies which are believed to have operated in 1927, but which had not reported prior to September 14 1928, are as follows: Number of operating companies, 32; total number of employees, 7,899; number of bus employees, 4; total miles of track operated, 1,557.87; miles of first track, 1,193.92; total number of cars (all types), 3,324; total number of car miles operated, 57,196,219; total number of car passengers, 449,542,321; number of revenue car passengers, 331,271,092; miles of bus route, 1.5; number of busses, 2; total number of bus miles, 15,780; total number of bus passengers, 10,279; number of revenue bus passengers, 8,016.

The 1927 figures as to number of employees, and as to miles of bus routes are not strictly comparable with 1922.

ROMAN CATHOLIC HIERARCHY.

At the head of the Roman Catholic Church is the SUPREME PONTIFF, PIUS XI., Achille Ratti, born at Desio, Italy, May 31, 1857, made Archbishop of Milan, April, 1921; Cardinal, June 13, 1921; elected Pope, as successor of Benedict XV., Feb. 6, 1922; crowned, Feb. 12, 1922. The Pontiff is, in orders, a Bishop. His ecclesiastical title is: His Holiness, the Pope; Bishop of Rome and Vicar of Jesus Christ; Successor of St. Peter, Prince of the Apostles; Supreme Pontiff of the Universal Church; Patriarch of the West; Primate of Italy; Archbishop and Metropolitan of the Roman Province; Sovereign of the Temporal Dominions of the Holy Roman Church. The American Cardinals reached Rome too late to cast their ballots for a successor to Benedict XV. In consequence, the new Pope, Pius XI., has made a change in the regulations, extending the interval between the death of a Pope and the election of his successor, so as to give the foreign Cardinals a chance to take part. (See also State of Vatican City.)

THE COLLEGE OF CARDINALS.

The College of Cardinals, when complete, is made up of 70 members, of whom 6 are Cardinal-Bishops, 50 are Cardinal-Priests, and 14 are Cardinal-Deacons. The College is the Senate of the Roman Church. The Cardinals advise the Pope and elect his successor. The Cardinal-Bishops take their titles from the Suburban Sees of Rome: Ostia and Palestrina, Porto and Santa Rufina, Albano, Sabina, Frascati, and Velletri. Where no office or dignity is shown none is held.

NAME.	Office or Dignity.	Nationality	Year of Birth.	Year of Creation.
Cardinal-Bishops—				
Vincenzo Vannutelli	Bishop of Ostia and Palestrina, Dean of the Sacred College, Datary of the Pope	Italian	1836	1889

NATIONAL CATHOLIC WELFARE CONFERENCE.

(Headquarters, 1312 Massachusetts Ave., Washington, D. C.)

The Conference is incorporated under the laws of the District of Columbia and has for its objects the unifying of the Catholic people of the United States in works of education, social welfare, immigrant aid, Americanization and other activities.

Administered by a committee of seven Archbishops and Bishops, elected by the Bishops in annual meeting; Most Rev. Edward J. Hanna, D. D., Archbishop of San Francisco, Chairman; Rev. John J. Burke, C. S. P., S. T. D., General Secretary.

The Executive Department maintains the following bureaus, the titles of which indicate their special fields of activity: Immigration, Publicity and Information, Motion Pictures, Historical Records, Civic Education, Business and Publications.

The official publication of the conference is the *N. C. W. C. Bulletin*, Charles A. McMahon, Editor.

Education—Most Rev. Austin Dowling, D. D., Archbishop of St. Paul, Chairman; Rev. George Johnson, Ph.D., Executive Secretary.

Organized to serve as a clearing house of information concerning Catholic education; an advisory agency in the development of Catholic schools and the Catholic school system.

Divisions—Statistics and Information, Teachers' Registration Section, Health Education, Research Catholic Education, Library.

Press and Publicity—Rt. Rev. Philip R. McDevitt, D. D., Bishop of Harrisburg, Chairman; Justin McGrath, Director.

The N. C. W. C. News Service serves ninety Catholic daily and weekly newspapers published in the United States and elsewhere.

Aside from its headquarters staff it maintains correspondents in the principal American cities and leading foreign capitals. The service enjoys the privilege of the Press Galleries of Congress.

Legal—Right Rev. John G. Murray, D.D., Bishop of Portland, Chairman; William F. Montavon, Director.

It maintains a Nation-wide scrutiny of legislation affecting public moral and religious welfare.

Social Action—Right Rev. Thomas F. Lillis, D. D., Bishop of Kansas City, Chairman; Rev. John A. Ryan, Director.

Lay Organizations—Right Rev. Joseph Schrembs, D. D., Bishop of Cleveland, Chairman.

This department consists of two co-ordinate branches—the National Council of Catholic Men and the National Council of Catholic Women.

These co-ordinate branches have local units in every one of the 104 dioceses and have affiliated with them the leading national, State, diocesan and local organizations of Catholic men and women throughout the United States.

ROMAN CATHOLIC STATISTICS FOR THE UNITED STATES.

Italics denote archdioceses. There are Cardinals at New York City, Chicago, Philadelphia and Boston.

Archbishops number 17; bishops, 104; secular clergy, 18,722; religious clergy, 7,631. Of the churches 11,903 have resident priests. There are 136 seminaries with 14,686 students; 237 colleges for boys and 734 academies for girls. There are 7,063 parishes with schools; 357 orphan asylums with 54,350 inmate orphans; 150 homes for the aged; 624 hospitals.

Converts in the last year numbered 36,376.

KNIGHTS OF COLUMBUS.

(Contributed by the Supreme Council of the Organization.)

The Knights of Columbus, an organization, was founded in 1882 as a fraternal benefit association for Catholic men by Rev. Michael J. McGivney and nine parishioners of St. Mary's R. C. Church in New Haven, Conn.

It now operates in every state of the Union, every province in Canada and Mexico, Cuba, Philippine Islands, Porto Rico, Alaska, Panama and Newfoundland.

Its charter permits engaging in public welfare, relief, educational and boys work.

During the World War the Order was officially recognized as a welfare organization by the United States Government and collected and distributed several million dollars while acting in that capacity, and all administration or executive expense was borne by the Order.

It has also made large contributions to flood, hurricane and other disaster sufferers.

In 1923 the Order entered the field of Boys Work and now sponsors the only post graduate university course in boys work in the World, at Notre Dame University. It also provides leaders for ten-night intensive training courses in boy leadership. These courses are open to all men.

The total membership as of July 1, 1929, was 637,122 members in 2,544 subordinate councils.

Assets of the Order were $30,256,393.03, and insurance reserve liabilities as of Jan. 1, 1929 were $21,853,440.65.

Insurance in force was $278,235,306 and the surplus or margin of Safety was $6,885,337.78 or 31.51 per cent above statutory requirements.

Supreme Officers are: Supreme Knight, Martin H. Carmody, Grand Rapids, Mich.; Deputy Supreme Knight John F. Martin, Green Bay, Wisc.; Supreme Secretary, William J. McGinley, New Haven, Conn.; Supreme Treasurer, D. J. Callahan, Washington, D. C.; Supreme Advocate, Luke E. Hart, St. Louis, Mo.; Supreme Physician, Edward W. Fahey, St. Paul, Minn.; Supreme Chaplain, Rev. John J. McGivney, Bridgeport, Conn.; Supreme Warden, David F. Supple, San Francisco, California.

Supreme Directors are Edward Houlihan, Chicago, Ill.; Leo F. Craig, Sioux Falls, S. D., James W. Gibbons, Topeka, Kans.; Edward P. Ryan, Los Angeles, Calif.; Patrick H. Rice, Augusta, Ga.; Charles P. McAlevy, Pawtucket, R. I.; Daniel A. Tobin, Brooklyn, N. Y.; Thomas J. Duffy, Columbus, Ohio; William J. Guste, New Orleans, La.; John H. Reddin, Denver, Colo.; John F. O'Neill, Jersey City, N. J.; Francis P. Matthews, Omaha, Nebr.; Dr. Claude Brown, London, Ontario; John E. Swift, Boston, Massachusetts.

BISHOPS OF THE PROTESTANT EPISCOPAL CHURCH.

(Most Rev. Charles Palmerston Anderson, Presiding Bishop, 281 Fourth Avenue, New York City. His assistant is Bishop Hugh L. Burleson of South Dakota.

Alabama—William G. McDowell, Birmingham.

Alaska—Peter Trimble Rowe (miss.), Seattle, Wash.

Arizona—Walter Mitchell (miss.), Phoenix.

Arkansas—James R. Winchester, Little Rock; E. W. Saphore, Suffragan, Little Rock; E. T. Demby, Suffragan, Little Rock.

California—E. L. Parsons, San Francisco, Sacramento: W. H. Moreland. San Joaquin, L. C. Sanford (miss.), Fresno. Los Angeles: W. B. Stevens, Los Angeles.

Colorado—I. P. Johnson, Denver; Fred Ingley, Coadjutor, Denver.

Connecticut—E. C. Acheson, Middletown.

Dakota, North—J. Poyntz Tyler (miss.), Fargo.

Dakota, South—H. L. Burleson, Sioux Falls. W. B. Roberts, Suffragan, Sioux Falls.

Delaware—Philip Cook, Wilmington.

District of Columbia—James E. Freeman, Washington.

Florida—F. A. Juhan, Jacksonville, South Florida; Cameron Mann, Winter Park; John D. Wing, Coadjutor, Winter Park.

Georgia—Frederick F. Reese, Savannah. Atlanta. Henry J. Mikell, Atlanta.

Idaho—Middleton S. Barnwell (miss.), Boise.

Illinois—Charles Palmer Anderson; S. M. Griswold, Suffragan, Chicago. Quincy: Edward Fawcett, Quincy, Springfield: John C. White, Springfield, Ill.

Indiana—Joseph M. Francis, Indianapolis. Northern Indiana. Campbell Gray, Mishawaka.

Iowa—Theodore N. Morrison, Davenport. Harry S. Longley, Coadjutor, Des Moines.

Kansas—James Wise, Topeka. Salina: Robert H. Mize, Salina.

Kentucky—Charles Edward Woodcock, Louisville. Lexington; Henry P. A. Abbott, Lexington.

Louisiana—Davis Sessums, New Orleans.

Maine—Benjamin Brewster, Portland.

Maryland—Edw. T. Helfenstein, Coadjutor, Baltimore. Easton: Geo. W. Davenport, Easton.

Massachusetts—Charles L. Slattery, Boston. S. G. Babcock, Suffragan, Boston. Western: Thomas F. Davies, Springfield.

Michigan—Herman Page, Detroit. Marquette: R. Le R. Harris, Marquette. Western: J. N. McCormick, Grand Rapids.

Minnesota—Frank A. McElwain, Minneapolis. Duluth: Granville G. Bennett, Duluth.

Mississippi—Theodore D. Bratton, Jackson. Wm. Mercer Green, Coadjutor, Meridian.

Missouri—F. F. Johnson, St. Louis. Western: Sidney C. Partridge, Kansas City.

Montana—William F. Faber, Helena; H. H. H. Fox, Coadjutor, Billings.

Nebraska—Ernest Vincent Shayler, Omaha. Western: George A. Beecher (miss.), Hastings.

Nevada—Thomas Jenkins (miss.), Reno.

New Hampshire—John Thomson Dallas, Concord.

New Mexico—F. B. Howden (miss.), Albuquerque.

New Jersey—Paul Matthews; Albion W. Knight, Coadjutor, Trenton. Newark: Wilson R. Stearly, Newark, N. J.

New York—Wm. T. Manning, New York City. Arthur S. Lloyd and Herbert Shipman, Suffragans. Central: Charles Fiske, Utica; Edward H. Coley, Suffragan. Utica. Western: D. L. Ferris, Cameron J. Davis, Coadjutor, Buffalo. Albany: G. A. Oldham, Albany. Long Island: Ernest M. Stires, Garden City. John I. B. Larned (Suffr.), Brooklyn.

North Carolina—Joseph Blount Cheshire, Raleigh. Edwin A. Penick, Coadjutor, Charlotte. East Carolina: T. C. Darst, Wilmington. Western North Carolina: J. M. Horner, Asheville.

North Dakota—(See Dakota, North.)

Ohio—William Andrew Leonard, Cleveland; W. L. Rogers, Coadjutor, Cleveland. Southern: Boyd Vincent, Cinn.

Oklahoma—Thomas Casady (miss.), Oklahoma City.

Oregon—Walter Taylor Sumner, Portland. Eastern: W. P. Remington (miss.), Pendleton.

Pennsylvania—Thos. J. Garland, Philadelphia; Francis M. Tait, Coadjutor. Pittsburgh: Alexander Mann, Pittsburgh. Bethlehem: Frank W. Sterrett, Bethlehem. Harrisburg: James H. Darlington, Harrisburg. Erie: John G. Ward, Erie.

Rhode Island—J. De W. Perry, Providence.

South Carolina—Albert S. Thomas. Upper South Carolina: Kirkman G. Finlay, Columbia.

South Dakota—(See Dakota, South.)

Tennessee—Thomas F. Gailor, Memphis. J. M. Maxon, Coadjutor, Nashville.

Texas—Clinton S. Quin, Houston. Dallas: H. T. Moore, Dallas. Western: William T. Capers, San Antonio. Northern: E. Cecil Seaman, Amarillo.

Utah—Arthur W. Moulton (miss.), Salt Lake City.

Vermont—Arthur C. A. Hall, Burlington; Samuel B. Booth, Coadjutor, Burlington.

Virginia—H. St. George Tucker, Richmond. Southern: B. D. Tucker, Norfolk; A. C. Thomson, Coadjutor, Portsmouth. Southwestern: Robert C. Jett, Roanoke.

West Virginia—W. L. Gravatt, Charleston; Robert E. L. Strider, Coadjutor, Wheeling.

Wisconsin—William Walter Webb, Milwaukee; Benjamin F. P. Ivins, Coadjutor, Milwaukee. Fond du Lac: Reginald H. Weller, Fond du Lac; Eau Claire: Frank E. Wilson.

Washington—Olympia: S. Arthur Huston, Seattle; Edward M. Cross, (miss.) Spokane.

Wyoming—Elmer N. Schmuck (miss.).

Africa — Liberia: Robert E. Campbell (miss.). Monrovia; Theo. M. Gardiner (miss.), Suffragan, Cape Palmas.

Brazil—Southern: William M. M. Thomas (miss.). Rio Grande do Sul.

China—Frederick R. Graves (miss.), Shanghai; Logan H. Roots (miss.), Hankow; Alfred A. Gilman (miss.), Suffragan, Wuchang; D. Trumbull Huntington (miss.), Anking.

Haiti—H. R. Carson (miss.). Port au Prince.

Panama Canal Zone—James C. Morris (miss.), Ancon.

Cuba—Hiram R. Huse (miss.), Havana.

Virgin Islands—C. B. Colmore, in charge.

Dominica—H. R. Carson in charge.

Japan—John McKim (miss.), Tokio. North Tokio: C. F. Reifsnider (miss.), Suffragan, Tokio. Shirley H. Nichols (miss.), Kioto. Norman S. Binsted (miss.), Tohoku.

Hawaiian Islands—Samuel H. Littell (miss).

Mexico—Frank W. Creighton (miss.), Mexico City.

Philippines — Gouverneur F. Mosher (miss.). Manila.

Porto Rico—Chas. B. Colmore (miss.), San Juan; M. Ferrando, Suffragan, Ponce.

RETIRED BISHOPS.

A. R. Graves, late Bishop of Kearney, Sonora, Cal.
Lemuel H. Wells, late Bishop of Spokane, Tacoma. Wash.

Note by the Bureau of the Census—As the term "members" has a variety of uses, each church was requested to report the number of members according to the definition of membership in that church or organization. In some religious bodies the term member is limited to communicants; in others it include all baptized persons; and in still others it covers all enrolled persons.

There are several denominations shown at this census not reported in 1916. All of them are not new, however, as a number were created by divisions in denominations which were shown as units in 1916. This has resulted in a net gain of 12 denominations.

At the census of 1926 the total expenditures were $817.214,528, as compared with $328,809,999 in 1916. Under this item are included the amount expended for salaries, repairs, etc., for payments on church debt; for benevolences, including home and foreign missions, for denominational support, and for all other purposes.

The value of church edifices in 1926 was $3,839,500,610 as compared with $1,676,600,582 in 1916. This item includes any building used mainly for religious services, together with the land on which it stands and all furniture and furnishings owned by the church and actually used in connection with church services. It does not include buildings hired for religious services or those used for social or organization work in connection with the church.

THE VOLUNTEERS OF AMERICA.

A Christian, philanthropic, benevolent organization, under the presidency of Gen. Ballington Booth, incorporated in 1896. While its government is modeled on the United States Army, yet its rules and regulations are made by the Grand Field Council composed of officers of and above the rank of Major.

The Volunteers of America is established in upward of 100 of the principal centres of America, and has the indorsement of leading Cabinet and State officials.

Its homes and institutions provide food and lodging for the destitute. It gives poor mothers and children summer outings.

During the last year the Volunteer Homes and Institutions provided 503,607 lodgings. During this term 1,417,577 free meals were given out and were paid for. Employment was given 53,802. There were 197,654 families assisted. Thousands were assisted during the Christmas holiday season.

The Volunteer Prison League has enrolled over 100,000 and has enabled many thousands of discharged men to secure work.

During the holiday and Christmas season in the work among the destitute, special dinners and provisions are sent into the homes of families who without this aid and thought would have spent cheerless holiday seasons.

The Volunteers' Gazette is the official organ, and national headquarters is maintained in their own building at No. 34 West 28th Street, New York City, N. Y.

WASHINGTON CATHEDRAL.

(Contributed to the Almanac by the staff of the institution.)

Washington Cathedral, Washington, D. C., is being erected on the most commanding elevation in the nation's capital to symbolize and stimulate the religious life of the American people. It is 14th Century Gothic in design and will be larger than any English cathedral of similar architectural style.

Because of its location on Mount Saint Alban, 400 feet above the city proper, its great central tower, when completed, will rise 109 feet higher above the Potomac River than the Washington Monument. The entire foundations; the crypt, with three beautiful chapels and many arched passageways; the apse, and the choir, are structurally complete, as is a major portion of the Children's Chapel. Present construction is concerned with the two great transepts which are to form the arms of the cross-shaped edifice.

In the Spring of 1929 a nation-wide movement was initiated by a group of laymen, headed by General John J. Pershing, as National Chairman; former United States Senator George Wharton Pepper as Executive Chairman, and Secretary of the Treasury Andrew W. Mellon as Campaign Treasurer, to hasten the completion of Washington Cathedral and its associated institutions for Christian service. More than 100 other men and women of prominence, residing in all parts of the land, are actively associated with the Right Rev. James E. Freeman, Bishop of Washington, in this endeavor. The response has been noteworthy. Gifts and pledges in excess of $4,000,000 have been received from more than 6,000 men and women and a host of churches, Sunday schools, and patriotic organizations. Since its inception the Cathedral has been the recipient of all offerings, large and small, from 33,000 benefactors. The Cathedral Book of Remembrance shows that these have come from every state, and even from foreign lands.

The present aim is to complete the two transepts by 1932, in time for a religious commemoration in the Capital City of the two hundredth anniversary of George Washington's birth. More than 250,000 cubic feet of stone will be required, and the cost is expected to exceed $4,000,000. The idea of a "church for national purposes" as a symbol of religion at the heart of the Republic is frequently attributed to the First President.

During 1929 Washington Cathedral was visited by more than 300,000 worshippers and pilgrims.

It is being built by the Protestant Episcopal Cathedral Foundation of the District of Columbia, which was granted a charter by Congress in 1893, providing authority for the erection in the District of Columbia of "a cathedral and institutions of learning for the promotion of religion and education and charity."

The crypt contains the tombs of Woodrow Wilson, Bishop Henry Yates Satterlee, Admiral George Dewey, Bishop Alfred Harding, Melville E. Stone and other distinguished Americans.

Dimensions of Washington Cathedral, as planned, are: length 534 ft.; span of nave, 40 ft.; height of nave, 95 ft.; area, 71,000 sq. ft.

Although "Washington Cathedral" is the approved nomenclature, it has been formally designated as the Cathedral of St. Peter and St. Paul.

Washington Cathedral Close, in which Washington Cathedral is situated, is a 67½-acre tract on the summit of Mt. St. Alban, and contains, in addition to the Cathedral, the National Cathedral School for Girls, founded by Mrs. Phoebe Hearst in 1900; St. Albans, the National Cathedral School for Boys, founded in 1904 through the bequest of Mrs. Harriet Lane Johnston, a niece of President James Buchanan; the memorial wing of Washington Cathedral Library, the gift of Mrs. Violet Blair Janin in memory of her mother, Mary Jesup Blair; the Bishop's House, containing the Chapel of the Annunciation, the Peace Cross, commemorating the ending of the war between Spain and the United States; and St. Alban's Parish Church.

A handsome collegiate gothic building, designed for the use of the College of Preachers of Washington Cathedral, is also situated on the Cathedral Close, adjacent to the central edifice. It was completed during the summer of 1929, and was the gift of the late Alexander Smith Cochran, of Yonkers, N. Y., who also provided an endowment of $1,000,000 by bequest. The Right Rev. Philip M. Rhinelander former Bishop of Pennsylvania, is the Warden

THE SALVATION ARMY (INCORPORATED IN 1899)

(Data and Sketch Contributed by that Organization.)

A religious and charitable organization founded by William Booth in London, England, in 1865 under the name of East London Mission, later changed to the Christian Mission.

In 1878 the title of The Salvation Army was adopted and a world-wide crusade commenced.

The work in the United States was founded in 1880 by one man and seven women.

The government is on military lines, the head of the movement being known as General.

The present occupant of that office is Edward J. Higgins, third in succession, and the first General to be elected. He takes the place of Gen. Bramwell Booth, O. M., who died in 1929.

The National Leader in the United States is Commander Evangeline Booth, daughter of William Booth.

America is divided for close supervision into four territories—Eastern with headquarters at New York, N. Y., Central at Chicago, Ill., Western at San Francisco, Calif. and Southern at Atlanta, Ga. Each territory has a resident Commissioner who is directly responsible to Commander Evangeline Booth.

From its modest beginnings the Salvation Army in America has grown in numbers and influence until to-day it covers the land, with a network of religious and benevolent institutions, as will be seen from the following figures for the last available year.

Corps and outposts 1,735, officers wholly employed in the service 4,814. Total issues of the "War Cry" 12,857,833. 558,171 indoor services held resulting in 109,296 converts. 67 men's hotels and 9 women's hotels, and boarding houses with accommodation for 7,048. 124 men's Social Service Centers, through which 21,826 men passed. 10 Children's Homes with a capacity of 848. 35 Women's Homes and Hospitals sheltering 2,333. 12 Settlements and Day Nurseries. 21,063 prisoners assisted on discharge and situations found. 760,361 Christmas dinners and toys given to the poor and destitute. 42,848 mothers and children given summer holidays. 3,517,602 needy persons given temporary relief. 126,346 men and women found employment. 16 general hospitals treated 49,224 patients.

Further statistics and information will be gladly given if desired. Apply to Commander Evangeline Booth, National Headquarters, The Salvation Army, 122 W. 14th St., New York City.

YOUNG WOMEN'S CHRISTIAN ASSOCIATION.

A world organization for women and girls. It has for its purpose to advance the physical, social, intellectual, moral and spiritual interests of young women. It has developed a specialized service for girls and women for which the Blue Triangle is now the insignia the world over.

In sixty countries there are now Y. W. C. A.s, many of which are affiliated with the World's Committee, Y. W. C. A. in London, England.

In sixteen countries the Y. W. C. A.s of the United States assist in supporting the work and have one hundred six American workers on the staff of the thirty-seven Associations in these sixteen countries. Financial aid is transferred as quickly as possible when the work can be carried on alone.

The work in the United States had its beginning in New York in 1858 under the name of The Ladies' Christian Association. During the next fifty years local work under the same name was established independently in cities throughout the United States.

It was not until 1906 that the national body under the name "National Board, Y. W. C. A." was founded. Its purpose was to "establish, unite and develop Young Women's Christian Associations" as well as to participate in the work of the World's Y. W. C. A.s and to advance the physical, social, intellectual, moral, and spiritual interests of young women.

Its headquarters are at 600 Lexington Avenue, New York, New York. Its policy, program, and budget is largely controlled and supplied by the local Associations through its bi-ennial convention.

In 1928 membership of the Associations in the United States was nearly 609,739.

There are more than 1,100 Associations in addition to more than 900 branches and centers and more than 400 Girl Reserve Clubs of the Y. W. C. A. in the United States.

Officers of the National Board are: Mrs. Robert E. Speer, New York, President; Mrs. John French, Greenwich, Conn., chairman Executive Committee; Mrs. John H. Finley, New York, 1st vice president; Mrs. John D. Rockefeller, Jr., 2nd vice president; Mrs. Howard G. Myers, New York, 3rd vice president; Miss Katharine Lambert, New York, secretary; Mrs. Samuel Murtland, New York, treasurer; Mrs. George W. Davidson, Greenwich, Conn., ass't treasurer; Mrs. William Hencken, Greenwich, Conn., ass't treasurer; Miss Anna V. Rice, Gen. Sec.; Miss Helen A. Davis, Asso. Gen. Sec., Miss Emma P. Hirth, Asso. Gen. Sec.

On the World's Committee of the Y. W. C. A. are: the Hon. Mrs. Montagu Waldegrave, President; Miss Charlotte T. Niven, General Secretary; 13 Grosvenor Crescent, Hyde Park Corner, London, S. W. 1.

The gross budget of the local Associations for 1927 were estimated at approximately $25,900,000 about 75 per cent. of which was met by earnings from cafeterias, boarding homes, etc.

The National Board budget for the year 1929 is $2,244,390, of which $372,070 is for promoting work in China, Japan, India, South America, Mexico, Philippines, Syria, Turkey, Estonia and Latvia.

The National Board has endowments yielding approximately $140,000 annually, and income producing and business features which in 1928 represented a gross income of about $967,000. Contributions in 1928 totaled $1,102,500.

THE YOUNG MEN'S CHRISTIAN ASSOCIATION OF NORTH AMERICA.

The annual report for 1929 contains the following data.

The National Council of the United States. General Offices. 347 Madison Avenue, New York city. President, W. Spencer Robertson, Madison, N. J.; General Secretary, Fred. W. Ramsey, N. Y. City. A National Council meets annually, consists of 357 prominent Christian leaders, two-thirds of whom must be laymen. It has four major divisions; Domestic or Home, which includes service for men and boys in cities, transportation centers, army and navy. In all industries, among colored men; Foreign, which conducts work among men and boys in 30 other countries; Student, which serves young men in colleges and universities, and Personnel, which supervises the training, placement and retirement of secretaries.

This United States organization is also linked with Associations in other nations and countries through a World's Alliance with headquarters in Geneva, Switzerland.

The Ys of the United States have 1,496 Associations on the Official Roster; 5,282 employed officers, 951,964 members, of which 257,872 are boys 12–17; $224,552,600 net property and funds; with $60,682,200 operating expenditures.

Its activities include 458,563 men and boys in gymnasium classes; 70,227 men and boys in regular educational courses; and 210,750 men and boys in Bible study groups.

The National Council of Canada. General Offices, 40 College St., Toronto, Ont.; President, R. F. McWilliams, Winnipeg, Man.; General Secretary, Harry Ballantyne. There are 74 Associations on the Official Roster in Canada with 50,392 members, of which 18,830 are boys 12–17; $6,945,900 net property and funds; and $2,117,700 operating expenditures.

The State Executive Committee of New York. General Offices, 2 West 45th St., New York City; Chairman, James H. Post; State Secretary, F. I. Eldridge. The report shows 138 Associations on the Official Roster; 124,261 members; $30,562,300 net property and funds; $8,524,000 operating expenditures.

THE AMERICAN BIBLE SOCIETY.

The American Bible Society was organized by action of a group of local and State Bible Societies on May 8, 1816, its first public meeting being held in the City Hall in New York and its Centennial being celebrated in the same room of that City Hall on May 9, 1916.

It was incorporated under the laws of New York State in 1841.

The officers are: E. Francis Hyde, President; Rev. Gilbert Darlington, Treasurer; Rev. Eric M. North, and Rev. George William Brown, General Secretaries; Rev. L. B. Chamberlain, Recording Secretary.

Its purpose is to accomplish a wider circulation of the Holy Scriptures without note or comment.

It handles only Bibles, Testaments and Portions, selling them without profit and donating to those in need.

It is unsectarian and interdenominational.

Together with other Bible Societies, it has helped to print the Scriptures in over eight hundred languages and dialects.

It also publishes the Scriptures in seven systems for the blind.

It cooperates with missionary societies, its operations being strictly benevolent and its sale of Scriptures yielding no profit.

Twenty-nine denominations, including practically all the larger ones, have through their official bodies taken action recognizing this Society as their channel of Scripture circulation, including it in their church budgets or otherwise.

Through ten Home Agencies, it supplies Scriptures throughout the United States, and abroad it does like service through twelve Foreign Agencies: West Indies; Mexico; Caribbean or Central America with Colombia and Venezuela; Upper Andes, covering Ecuador, Peru and Bolivia; La Plata, covering Argentina, Uruguay, Paraguay, Chile. Brazil; Levant, covering the republic of Turkey and adjacent states in Europe and Asia, including Bulgaria, Greece and the republics of the Caucasus; Arabic-Levant, which serves Syria, Palestine, Arabia, Mesopotamia or Iraq, Egypt and the Soudan; Philippine Islands; Siam; China; and Japan; and through correspondents in other countries in Asia, Europe, Africa, and islands of the seas.

During 1928 there were issued by it 11,032,494 volumes of Scriptures; 6,484,626 in its foreign fields and 4,547,368 in the United States.

In China, for the third year in succession, over three million copies of the Scriptures have been circulated by the Society.

A new Bible House was dedicated in Nov., 1928, on one of the leading streets in Peking.

The first complete New Testament in Ragoli was issued last year, for benefit of a people occupying a large region on the western border of Kenya Colony, East Africa.

A translation of the Four Gospels into the Eskimo British Bay dialect is in progress.

Its total of issues during its 113 years of activity, has been 105,096,251 volumes of Bibles, Testaments and Portions.

The receipts for 1928, including legacies, etc., were $1,077,097, its disbursements were $1,075,849, not including moneys received and spent in foreign fields.

The headquarters are at the Bible House, Astor Place, New York City.

HEADQUARTERS OF RELIGIOUS DENOMINATIONS.

Adventists, Seventh Day, General Conference, Takoma Park, Washington, D. C.

Universalist. *President,* Rev. Frank D. Adams, D. D., Detroit. Mich. *Secretary,* Rev. Roger F. Etz., 176 Newbury St., Boston, Mass.

THE CHRIST OF THE ANDES.

(Alice Stone Blackwell, of Dorchester, Mass., in The World)

President-elect Hoover while in Chile was invited to visit one of the most remarkable monuments in the world.

In 1902 Chile and Argentina were making great preparations to go to war over a boundary dispute.

Chiefly through the efforts of the women and the clergy they were persuaded to settle the question by arbitration instead and to use the money thus saved for better roads and harbors.

Part of it built the great trans-Andean Railway, connecting Santiago with Buenos Ayres, over which Mr. Hoover has traveled.

The women of both countries, led by Senora Angela de Oliveira Cesar de Costa of Argentine, raised the money for a colossal statute of Jesus Christ, made of bronze obtained by melting down old cannon taken from Spain in the War of Independence.

It was set up on the highest accessible point on the disputed boundary.

It is twenty-six feet high and stands on a tall granite pillar, surmounted by a globe on which a map of the world is outlined. A tablet at the base bears the inscription:

"Sooner shall these mountains crumble into dust than Argentines and Chileans break the peace to which they have pledged themselves at the feet of Christ the Redeemer."

The statue stands near the old trail leading from Chile down into Argentina, a trail now almost disused since a tunnel has been made through the mountains.

YOUNG PEOPLE'S SOCIETY OF CHRISTIAN ENDEAVOR.

Officers of the International Society of Christian Endeavor (Prior to 1927, the United Society of Christian Endeavor): *President*, Rev. Daniel A. Poling, D.D.; *Vice-presidents*, Rev. Howard B. Grose, D.D., and Rev. William Hiram Foulkes, D.D.; *General Secretary*, Edward P. Gates; *Treasurer and Field Secretary*, Alvin J. Shartle; *Superintendent of Christian Vocations*, Stanley B. Vandersall; *Publication Manager*, C. C. Hamilton; *Editorial Secretary*, Robert P. Anderson; *Citizenship Superintendent*, Rev. Ira Landrith, D.D.; *Extension Secretary*, Carlton M. Sherwood; *Travel and Recreation Superintendent*, Carroll M. Wright; *Pacific Coast Secretary*, Paul C. Brown; *Mid-west Secretary*, Harold Singer; *Southern Secretary*, W. Roy Breg; *Army and Navy Superintendent*, S. C. Ramsden; *Social Service and Prison Work Superintendent*, Frederick A. Wallis; *Manager of Western Office*, Charles F. Evans.

The headquarters of the movement are in the World's Christian Endeavor Building, Mount Vernon and Joy Streets, Boston, Massachusetts. This building was erected in 1918 by the contributions of one hundred thousand young people throughout the world.

The first society of Christian Endeavor was formed on February 2, 1881, in the Williston Congregational Church, Portland, Maine, by Rev. Francis E. Clark, pastor, for the purpose of training a large number of young people in the duties of church membership and the activities of the Christian life. The early societies were for young people approaching maturity, but on March 29, 1883, the first Junior Christian Endeavor society was organized, and in 1891 the first Intermediate society had its birth. Now, under graded Christian Endeavor, there are societies adapted to all ages, beginning with Juniors and including adults and graduate members who are called Alumni.

Most of the societies are formed in local churches and exist as a part of the activity of the church. Some, however, exist in unusual places, as in hospitals, aboard ship, in army camps, in public institutions, in prisons, in schoolhouses, and in homes where no church building is available.

The purpose of the society is, as expressed in its constitution, "to promote an earnest Christian life among its members, to increase their mutual acquaintance, to train them for work in the church, and in every way to make them useful in the service of God and their fellow men." It is the church training the young, and its motto is "For Christ and the Church."

Its cardinal principles are stated thus: (1) Open confession of Christ, (2) active service for Christ, (3) loyalty to Christ's church, (4) fellowship with Christ's people.

Its activities are built around a weekly prayer meeting for young people and detailed committee service in which all the members have a part, the principal committees being the Lookout, Prayer-meeting, Social, Missionary, with others optional. The Christian Endeavor pledge and the consecration meeting occupy important places in the society's program.

The International Society of Christian Endeavor is the clearing-house for all forms of Christian Endeavor activity. It publishes and circulates various literature, including the Christian Endeavor World, the official organ of the movement.

The International Society is supported by voluntary gifts, bequests, and annuities from individuals and the sale of literature, badges, etc., although the latter feature is largely a service rendered to the societies and unions.

The International Society is managed by a board of trustees representing evangelical denominations. It holds biennial conventions. The World's Christian Endeavor Union comprises all the national unions throughout the world. Of this organization, Daniel A. Poling is the president, Edward P. Gates is secretary, and Stanley B. Vandersall is treasurer. Its conventions are held quadrennially.

NEW TESTAMENT CHRONOLOGY.

Zahn, one of the most important of German New Testament scholars, published (1907) his conclusions as to the chronology of New Testament literature and leading New Testament events, in substance as follows:

	Year A.D.
Death and Resurrection of Christ	Probably 30
The events recorded Acts 1.-viii., 1 to about 30-34	
Conversion of St. Paul	Beginning of 35
Three years' sojourning of Paul in Damascus, interrupted once by a journey to Arabia. Flight from Damascus, first visit to Jerusalem, and stay at Tarsus	38
Peter at Joppa and Caesarea	Beginning 40
Luke, a church member at Antiochia. Paul brought from Tarsus to Antiochia by Barnabas, either Summer or Autumn of	43
Death of James Zebedai, imprisonment of Peter, flight of the latter and other Apostles from Jerusalem	Easter 44
Visit of Peter and others from Jerusalem to Antiochia. Letter of St. James	50
First mission tour of Paul, Spring 50 to Fall	51
Apostles convene in Jerusalem	Beginning of 52
Start of second mission tour of St. Paul, Spring of	52
Arrival at Corinth	About November 52
Epistle to the Galatians	Beginning of 53
First Epistle to the Thessalonians	Spring of 53
Second Epistle to Thessalonians	Summer 53
Journey from Corinth to Ephesus, before Pentecost	About May 54
Beginning of the third mission tour from Antiochia to Ephesus	Probably Summer 54
Arrival at Ephesus	About February 55
Short visit to Corinth from Ephesus. Last Epistle of St. Paul to the Corinthians,	End of 56 or beginning of 57
Letter of the Corinthians to St. Paul. First Epistle of Paul to the Corinthians	Easter 57
Departure of Paul and Timothy from Ephesus by way of Troas to Macedonia,	About or after Pentecost 57
Second Epistle to the Corinthians,	About November or December 57
Journey of Paul from Macedonia to Corinth.	About New Year 58

	Year A.D.
Epistle to the Romans during a three months' stay in Greece and Corinth	About February 58
Journey by way of Macedonia, Troas, Miletus, etc., to Jerusalem. Arrival in Jerusalem and beginning of captivity in Caesarea,	About Pentecost 58
Defence before Festus	60
Depature from Caesarea	September 60
Arrival at Rome	March 61
Epistles to Ephesians, Colossians, and Philemon,	Summer 62
Second Epistle of St. Peter	Beginning 62
Matthew writes his Aramaic Gospel,	Beginning 62
Epistle to Philippians	Summer of 63
Paul free again	Late in Summer of 63
Journey of Paul to Spain	Fall 63 or Spring 64
Arrival of Peter in Rome	Fall 63 or Spring 64
First Epistle of Peter	Spring of 64
Mark in Rome, engaged on the completion of his Gospel	Summer of 64
Persecution under Nero and crucifixion of Peter,	Fall of 64
Return of Paul from Spain and visitation of the Eastern congregation, I. Timothy and Titus,	Spring to Fall of 65
Stay at Nicopolis	Winter of 65-66
Return of Paul to Rome	Spring of 66
Arrest of Paul, II. Timothy	Summer of 66
Paul beheaded	End of 66 or beginning 67
Publication Gospel of Mark	Beginning 67
Departure of St. John and other disciples to the province of Asia	Beginning 68
Epistle of Jude	Beginning 75
Gospel and Acts of St. Luke	Beginning 75
Epistle to the Hebrews	Beginning 80
Origin of the Greek Matthew	Beginning 85
Gospel and the Epistles of John	Between 80-90
Apocalypse of St. John	Beginning 95
Death of St. John	Beginning 100

CATHOLIC BOYS' BRIGADE OF THE UNITED STATES.

Founded in 1916, with the approval of the late Cardinal Farley, New York City—a national official organization for Catholic boys. National office: National Catholic Welfare Council, 1312 Massachusetts Ave., N. W., Washington, D. C. General Executive Headquarters, 260 West 34th Street, New York. This movement aims to improve, it is announced, the religious and civic character of boys. It has a program of athletics, sports, military exercises, signalling, first aid, civics, music, entertainments, hikes, camping, parades, contests and employment; it aims to promote patriotism, religious practices and higher education. Membership is open to all manly boys 10 years of age or over. *Junior and Senior division* branches all over the country and has its own uniform. Executive officers, N. Y. General headquarters, 217 West 30th St., New York City; Rev. Fr. Kilian, O. M. Cap., Chief Commissioner; Michael F. Lonergan, Executive Secretary.

DAUGHTERS OF THE AMERICAN REVOLUTION.

Headquarters of the National Society—Memorial Continental Hall, 17th and D Streets N. W., Washington, D. C.

Constitution Hall, the new addition, containing the auditorium and library, was dedicated on Oct. 23, 1929. The seats in the auditorium rise in tiers on three sides, and hold 4,000 persons.

National Board of Management—(1929-1930), *President General*, Mrs. Lowell Fletcher Hobart, Memorial Continental Hall, Washington, D. C.

Vice-Presidents General, (Term of office expires 1930)—Mrs. William Sherman Walker, Memorial Continental Hall, Washington, D. C.; Mrs. John P. Mosher, 11 Livingston Park, Rochester, N. Y., Miss Isabel Wyman Gordon, 35 Whitman Road, Worcester, Mass.; Mrs. William B. Burney, 8 University of South Carolina, Columbia, S. C.; Mrs. Samuel Preston Davis, 523 East Capitol Ave., Little Rock, Ark.; Mrs. Clarence S. Paine, 1735 S. 20th St., Lincoln, Nebr.; Mrs. Herbert Backus, 816 Oak St., Columbus, Ohio.

Term of office expires 1931—Mrs. Charles Burton Jones, 1121 Park Ave., Greenville, Texas; Mrs. James Lathrop Gavin, 228 E. 15th St., Indianapolis, Ind.; Mrs. Henry B. Joy, 301 Lake Shore Rd., Grosse Pointe Farms, Mich.; Mrs. H. Eugene Chubbuck, Grand View Drive, Peoria, Ill; Mrs. Waiteman Harrison Conaway, 109 Virginia Ave., Fairmont, W. Va.; Mrs. Robert Howe Munger, 1625 Grand View Blvd., Sioux City, Iowa; Mrs. Brooke G. White, Jr., 2331 River Blvd., Jacksonville, Fla.

Term of office expires 1932—Mrs. Daniel Mershon Garrison, 26 Thompson St., Annapolis, Md.; Mrs. Ralph Van Landingham, 1730 The Plaza, Charlotte, N. C.; Mrs. William Leonard Manchester, 33 Central St., Bristol, R. I.; Mrs. Katharine White Kittredge, "Whitesacres," Springfield, Vt.; Mrs. William Smith Shaw, 240 Cottage Road, So. Portland, Me.; Mrs. Robert Bruce Campbell, 1255 Riverside Drive, Wichita, Kan.; Mrs. N. Howland Brown, 1213 DeKalb St., Norristown, Pa.

Chaplain General—Mrs. William Rock Painter, Memorial Continental Hall; *Recording Secretary General*—Mrs. Charles Humphrey Bissell; *Corresponding Secretary General*—Miss Margaret B. Barnett, *Organizing Secretary General*—Mrs. William A. Becker; *Treasurer General*—Mrs. Harriet Vaughn Rigdon; *Registrar General*—Mrs. Josiah A. Van Orsdel; *Historian General*—Mrs. Flora Myers Gillentine.

Reporter General to Smithsonian Institution—Miss Anne Margaret Lang; *Librarian General*—Mrs. Russell William Magna; *Curator General*—Mrs. Samuel Jackson Kramer.

HONORARY OFFICERS ELECTED FOR LIFE

Honorary President General—Mrs. William Cumming Story; Mrs. George Thacher Guernsey; Mrs. George Maynard Minor; Mrs. Anthony Wayne Cook; Mrs. Alfred J. Brosseau.

Honorary President Presiding—Mrs. Mary V. E. Cabell.

Honorary Vice-Presidents General—Mrs. Mildred Mathes, 1899; Mrs. William Lindsay, 1906; Mrs. J. Morgan Smith, 1911; Mrs. Theodore Bates, 1913; Mrs. Drayton W. Bushnell, 1914; Mrs. John Newman Carey, 1916; Mrs. George M. Sternberg, 1917; Mrs. William Butterworth, 1923; Mrs. Julius J. Estey, 1923; Mrs. John Campbell, 1926; Mrs. Eleanor Washington Howard, 1927; Mrs. Thomas Kite, 1927.

THE PULITZER SCHOLARSHIPS.

Desirous of aiding a number of boys of exceptional ability to gain an education that would fit them for careers of leadership and usefulness, the late Joseph Pulitzer founded in 1889 the notable scholarships that bear his name.

For a time the boys selected went to the College of the City of New York, but the lack of suitable preparatory schools at that time caused a new arrangement to be made in 1893 for a seven years' course for the students selected, three years in Horace Mann High School and four in Columbia University.

In that year Columbia, in return for a gift of money, undertook to carry ten boys a year, forty in all, upon its scholarship rolls without tuition fee.

Still later, as the public high schools multiplied in number in the city, the scholarships were thrown open to graduates of the high schools—those of Kings, Queens and Richmond being later added to the list.

To the holders of the scholarships, never fewer than forty, a stipend of $250 each, available in any American college of the first class, was annually paid by Mr. Pulitzer during his lifetime, and payment is now continued by Columbia University under the terms of his will out of the income of a fund provided for the purpose.

PUBLIC SCHOOLS IN THE UNITED STATES.

ATTENDANCE, TEACHERS, EXPENDITURES.

(By U. S. Bureau of Education. Private schools not included. Salaries cover teachers and superintendents only.)

Data collected by the U. S. Bureau of Education for 1926-27 show 20,984,002 pupils enrolled in public and 2,143,100 in private elementary schools, including kindergartens; 3,786,071 in public and 346,054 in private secondary schools; 252,907 in public and 17,209 in private teacher-training institutions; and 280,437 in public and 486,704 in private colleges and universities, excluding preparatory students.

The total number of teachers employed in all types of schools is 977,291.

The total cost of maintaining and operating these schools is reported as $2,744,979,689; and the total value of school property is $8,125,085,472, which amount includes endowments valued at $1,061,589,042.

The nurse-training schools had 77,768 students in 1927, schools for the blind 6,084, schools for the deaf 84,844, industrial schools for delinquents 84,317, and schools for the feeble-minded and subnormal 104,021.

The total cost of public elementary and high schools in 1903 was $251,457,625; by 1913 this amount had doubled, being $521,546,375; by 1920 it had doubled again, $1,036,151,209; and in 1926 again doubled to $2,026,308,190.

The cost per pupil in average daily attendance was $95.17 in 1924, $98.45 in 1925, and $102.05 in 1926.

Expenditures per capita of population for these years are $16.25, $17.15, and $17.50.

Pupils in public high schools now exceed 3,800,000.

The number of one-teacher schools has decreased from 189,000 in 1920 to 161,000 in 1926—an average annual decrease for the six years of 4,600.

The number of consolidated schools increased during the six-year period 6,000, which is an average yearly increase of 1,000.

The change in numbers of the two types of rural schools, a decrease on the one hand and an increase on the other, indicates that nearly 30,000 small rural schools have been closed since 1920, and that as a result 6,000 larger rural schools have been established to take their places.

From reports received by the Bureau of Education from typical consolidated schools in the various States it is estimated that approximately 4,500,000 boys and girls attend these schools and 150,000 teachers are employed in them.

COST OF PUBLIC SCHOOL EDUCATION, BY STATES—1925-26.

COLORS OF ACADEMIC DOCTORS' HOODS.

Arts and letters	White	Music	Pink	Veterinary science	Gray
Theology	Scarlet	Commerce	Drab	Forestry	Russet
Law	Purple	Physical education	Sage green	Library science	Lemon
Philosophy	Blue	Public health	Salmon pink	Pedagogy	Light blue
Science	Golden yellow	Engineering	Orange	Oratory	Silver gray
Fine arts	Brown	Pharmacy	Olive green	Humanics	Crimson
Medicine	Green	Dentistry	Lilac		

These hoods are lined with the color, or colors, of the institution granting the degree. Where there are two colors, a chevron or band of the second is used.

Academic custom in this matter had become somewhat confused so in 1894 a commission representative of the leading colleges met and prepared a code which has been adopted by over seven hundred institutions in the United States and Canada.

Under its regulations the bachelor wears a gown of black worsted stuff with open or closed front and long, pointed sleeves, the Oxford style of gown being most popular in American colleges. The gown of the master is made with open front and preferably of silk. It has long, closed sleeves with squared ends falling well below the knees and a slit for the arms near the elbow. The gown worn by the doctor is also of silk and with the open front, but has full bell-shaped sleeves. The front is faced with velvet and on each sleeve are three bars of velvet, black or the color of the hood trimming.

The Oxford or mortarboard cap, worn for each degree, is of black cloth with black tassel, except that the doctor's cap may be of velvet with tassel of gold in whole or in part.

JULIUS ROSENWALD FUND.

The Julius Rosenwald Fund, in cooperation with 14 southern states, has aided in the building of 4,464 schools, 183 teachers' homes, and 82 shops for industrial training. These schools have a teacher capacity of 12,594 and a pupil capacity of 566,730. Their total cost was over $23,000,000.

The schools aided are a regular part of the public, tax supported school system. Contributions to their construction come from Negroes and white friends and from the county funds. The total cost as of July 1, 1929, of $23,182,238, was provided as follows: By public funds, $14,299,824; by Negroes, $4,220,746; by whites, $1,004,366; by the Julius Rosenwald Fund, $2,660,302.

The Julius Rosenwald Fund (incorporated in 1917 under the laws of the State of Illinois) has recently been reorganized with a self-perpetuating board of eleven trustees, and a staff of officers giving their full time to the work.

Edwin R. Embree is president of the Fund; Alfred K. Stern is director; and William B. Harrell is secretary-controller.

The capital of the Julius Rosenwald Fund as of June 30, 1929, is approximately $30,000,000.

Mr. Rosenwald in establishing the Fund, provided that capital as well as income may be spent at any time in the discretion of the Trustees, and that the entire Fund, both capital and income, must be spent within twenty-five years of his death.

Under the new organization the Fund is extending its activities to include other aspects of Negro education, and to aid in the distribution of medical services, especially to the man of moderate means, and in considering other general social problems.

In the school year 1927-28 there were 767,141 students in colleges and universities, of which number 280,437 were in public and 486,704 were in private institutions.

If to the above figures were added the students in junior colleges and teachers' colleges, the total would be 878,088.

Nearly one-half (46 per cent) of all college men, and 25 per cent of college women are earning a part at least of the cost of their tuition.

THE PULITZER SCHOOL OF JOURNALISM.

The School of Journalism at Columbia University, founded and endowed by the late Joseph Pulitzer, opened in September, 1912, and a year later entered its new building at 116th Street and Broadway. The Director is Dr. J. W. Cunliffe. There were 164 students in 1929-30. The school has a reference library of 15,000 books, a file of fifty daily papers (American and foreign) and a "morgue" of 700,000 newspaper clips, of which Dr. Talcott William's choice private collection was the basis.

Advisory Board—Nicholas Murray Butler, Columbia University, N. Y. City; Julian Harris (1927-1931). *Columbus (Ga.) Enquirer-Sun*; John Langdon Heaton, *The World*, N. Y. City; Arthur M. Howe (1927-1931), *Brooklyn Daily Eagle*; Robert Lincoln O'Brien (1927-1931); Frank R. Kent, *Baltimore Sun*; Kent Cooper, Associated Press, N. Y. City; Ralph Pulitzer, *The World*; Joseph Pulitzer jr., *The St. Louis Post-Dispatch*; Casper S. Yost (1926-1930), *The St. Louis Globe-Democrat*; Rollo Ogden (1926-1930), *The New York Times*; Alfred Holman (1926-1930), *The San Francisco Argonaut*; and Stuart H. Perry (1926-1930). *Adrian (Mich.) Daily Telegram*.

PULITZER PRIZES.

(Awarded, 1929, for work done in the year 1928.)

For the most disinterested and meritorious public service rendered by an American newspaper during the year—$500 gold medal to *The New York Evening World* for its effective campaign to correct certain evils in the administration of justice in New York City.

Previous awards: 1918, *The New York Times* for its publication in full of so many official reports, documents and speeches relating to the World War; 1919, *Milwaukee Journal* for its campaign for Americanism; 1920, no award; 1921, *The Boston Post* for its work in exposure of Get-Rich-Quick Ponzi; 1922, *The New York World* for its work in exposing the operations of the Ku Klux Klan; 1923, *The Memphis Commercial Appeal* for "its courageous attitude in the publication of cartoons and the handling of news in reference to the operations of the Ku Klux Klan"; 1924, *The New York World* for its work in connection with the exposure of the Florida peonage evil; 1925, no award; 1926, *The Enquirer-Sun*, Columbus, Ga.; 1927, *The Camden (O) Daily News*; 1928, *The Indianapolis Times*, for exposing political corruptions in Indiana.

For the best example of a reporter's work during the year, the test being strict accuracy, terseness, the accomplishment of some public good commanding public attention and respect—$1,000, to Paul Y. Anderson of *The St. Louis Post-Dispatch* for work in connection with the naval oil leases.

Previous awards: 1917, Herbert Bayard Swope, for his articles in *The New York World* on conditions in the German Empire during the World War, Oct. 10, Oct. 15, and from Nov. 4 daily until Nov. 22 of that year; 1918, Harold A. Littledale, *New York Evening Post*, for articles leading to reforms in the New Jersey prison system; 1919, no award; 1920, John J. Leary jr. for his articles in *The New York World* during the national coal strike in the winter of 1919; 1921, Louis Seibold, *The New York World*, for his interview with President Wilson, published June 18, 1920; 1922, Kirke L. Simpson of the Washington staff of the *Associated Press* for his articles on the burial of the Unknown Soldier; 1923, Alva Johnston for his reports on the proceedings of the convention of the American Association for the Advancement of Science held in Cambridge, published in *The New York Times*, Dec. 27-30, 1922; 1924, Magna White, for his story of the eclipse of the sun in the *San Diego Sun*, Sept. 10 1923; 1925, in duplicate to James W. Mulroy and Alvin H. Goldstein of the *Chicago Daily News* for work in solving the Franks murder case; 1926, William Burke Miller, of the *Louisville Courier-Journal*, for work on the trapping in Sand Cave of Floyd Collins; 1927, John T. Rogers of the *St. Louis Post-Dispatch* for inquiry leading to the impeachment of U. S. Judge English; 1928. No award.

For the best example of correspondence during the year—$500 to Paul Scott Mowrer of *The Chicago Daily News*.

For the American novel published during the year, preferably one which shall best present the whole atmosphere of American life—$1,000 to Julia Peterkins author of *Scarlet Sister Mary*.

Previous awards: 1918, to Ernest Poole, *His Family*; 1919, Booth Tarkington, *The Magnificent Ambersons*; 1920, no award; 1921; to Edith Wharton, *The Age of Innocence*. 1922, to Booth Tarkington, *Alice Adams*; 1923, to Willa Cather, *One of Ours*; 1924, Margaret Wilson, *The Able McLaughlins*; 1925, Edna Ferber, *So Big*; 1926, to Sinclair Lewis, *Arrowsmith* (he declined the prize); 1927, Louis Broomfield, *Early Autumn*; 1928, Thornton Wilder, *The Bridge of San Luis Rey*.

For the best book of the year upon the history of the United States—$2,000 to Fred Albert Shannon, author of *The Organization and Administration of the Union Army*, 1861-1865.

Previous awards: 1917, to His Excellence J. J. Jusserand, the French Ambassador, *With Americans of Past and Present Days*; 1918, James Ford Rhode, *A History of the Civil War*; 1919, no award; 1920, to Justin H. Smith, *The War With Mexico*; 1921, to Rear Admiral William Snowden Sims, *The Victory at Sea*; 1922, to James Truslow Adams, *The Founding of New England*; 1923, to Charles Warren, *The Supreme Court in United States History*; 1924, Charles Howard McIlwain, *The American Revolution*; *a Constitutional Interpretation*; 1925, Frederick L. Paxson, *A History of the American Frontier*; 1926, Edward Channing, *History of the United States*, Vol. VI; 1927, Samuel Flagg Bemis, *Pickney's Treaty*; 1928, Vernon Louis Parrington, *Main Currents in American Thought*.

For the best American biography teaching patriotic and unselfish services—$1,000 to Burton J. Hendrick, author of *The Training of an American, the Earlier Life and Letters of Walter H. Page*.

Previous awards: 1917, to Laura E. Richards and Maude Howe Elliott, assisted by Florence Howe Hall, *Julia Ward Howe*; 1918, William Cabell Bruce, *Benjamin Franklin, Self-Revealed*; 1919, to Henry Adams (post-obit), *The Education of Henry Adams*; 1920, to Albert J. Beveridge, *The Life of John Marshall*; 1921, to Edward Bok, *The Americanization of Edward Bok* (autobiography); 1922, to Hamlin Garland, *A Daughter of the Middle Border*; 1923, to Burton J. Hendrick, *The Life and Letters of Walter H. Page*; 1924, Prof. Michael Pupin, *From Immigrant to Inventor*; 1925, M. A. DeWolfe Howe, *Barrett Wendel and His Letters*; 1926, Dr. Harvey Cushing, *The Life of Sir William Osler*; 1927, Emory Holloway, *Whitman*; 1928, Charles Edward Russell, *The American Orchestra and Theodore Thomas*.

For the original American play performed in New York which shall best represent the educational value and power of the stage (produced up to April 1, 1929) —$1,000 to Elmer L. Rice, author of *Street Scene*.

Previous awards: 1918, to Jesse Lynch Williams, *Why Marry?*; 1919, no award; 1920, Eugene O'Neill, *Beyond the Horizon*; 1921, Miss Zona Gale, *Miss Lulu Bett*; 1922, to Eugene O'Neill, *Anna Christie*; 1923, to Owen Davis, *Icebound*; 1924, Hatcher Hughes, *Hell-Bent fer Heaven*; 1925, Sidney Howard, *They Knew What They Wanted*; 1926, George Kelly, *Craig's Wife*; 1927, Paul Green, *In Abraham's Bosom*; 1928, Eugene O'Neill, *Strange Interlude*.

For the best editorial article written during the year, the test of excellence being clearness of style, moral purpose, sound reasoning and power to influence public opinion in what the author conceives to be the right direction—$500 awarded to Louis Isaac Jaffe of *The Norfolk Virginian-Pilot*.

Previous awards: 1917, to an editorial in *The New York Tribune* on the first anniversary of the sinking of the *Lusitania*; 1918, to the Louisville (Ky.) *Courier-Journal*, for the editorial article *Vae Victis*, by Henry Watterson; 1919, no award; 1920, to Harvey E. Newbranch of *The Evening World-Herald*, Omaha, Neb., for *Law and the Jungle*: 1921, no award; 1922, to Frank M. O'Brien for an article entitled *The Unknown Soldier*, printed in *The New York Herald*, Nov. 11, 1921; 1923, to William Allen White for *To an Anxious Friend*, printed in *The Emporia (Kan.) Gazette*; 1924, *The Boston Herald*, *Who Made Coolidge?*; 1925, the *Charleston (S. C.) News and Courier* for *The Plight of the South* (written by Robert Latham); 1926, the *New York Times* for *The House of a Hundred Sorrows* (written by Edward M. Kingsbury); 1927, the *Boston Herald*, for *We Submit* (written by F. Lauriston Bullard); 1928, Grover C. Hall of the *Montgomery (Ala.) Advertiser* for his editorials on gangism, flogging and racial and religious intolerance.

For the best cartoon published in any American newspaper during the year, the determining qualities being that the cartoon shall embody an idea made clearly apparent, shall show good drawing and striking pictorial effect, and shall be helpful to some commendable cause of public importance—$500 awarded to Rollin Kirby, *The New York World*.

Previous awards: 1922, to Rollin Kirby of *The New York World*; 1923, no award; 1924, J. N. Darling, *The New York Tribune*; 1925, Rollin Kirby, *The New York World*; 1926, D. R. Fitzpatrick, *The St. Louis Post-Dispatch*; 1927, Nelson Harding, *The Brooklyn Eagle*; 1928, Nelson Harding, *The Brooklyn Eagle*.

For the best book of verse by an American author—$1,000 to Stephen Vincent Benet, for *John Brown's Body*.

Previous awards: 1922, Edwin Arlington Robinson; 1923, Edna St. Vincent Millay; 1924, Robert Frost; 1925, Edwin Arlington Robinson; 1926, Amy Lowell; 1927, Leonora Speyer; 1928, Edwin Arlington Robinson.

SCHOOLS THEN, AND NOW.

(From a Bulletin of the U. S. Dept. of Labor.)

When Massachusetts Bay Colony passed a law in 1647 requiring towns of 50 householders "to appoint one within their towne to teach all such children as shall resort to him to write and read," the towns experienced considerable difficulty in finding teachers who were willing to undertake the task at the wages offered. Competence was a secondary consideration. Wages, under the law, were to be paid "either by ye parents or masters of such children, or by ye inhabitants in general, by way of supply."

Most towns combined these methods of payment, and appropriated a small sum of money from the town treasury, or barter in stated amounts, to pay the schoolmaster, while the pupils paid him a tuition fee in addition.

Dedham, Mass., had a "free school" supported wholly out of tax funds before the colonial law was passed, and paid the schoolmaster £20 ($66.80) per annum.

In the New Haven and Connecticut colonies schools were established almost at once, parents paying a stated sum for each child. At Guilford this fee was 4s. (67 cents) per quarter for each pupil. The New Haven colonial court ordered in 1657 that each town not already maintaining a school should open one and pay one-third of the cost of operation, the rest to be carried on a per capita basis by the families using it.

Plymouth Colony leased its fisheries on the cape coast and gave the proceeds to the support of the public schools. In the period between 1684 and 1693 the rental averaged £30 a year.

The salary of President Rogers of Harvard as fixed by the court in 1682 was £100 ($344) in money and £50 in commodities, while each of his assistants received £50 in money.

The rules of the Dorchester school in 1645 required that school be kept from 7 o'clock in the morning until 5 in the afternoon seven months in the year, and from 8 to 4 in the winter months. There was a midday intermission from 11 to 1 except on Monday, when it was required that—

"The master should call his scholars together between 12 and 1 of the clock to examine them what they have learned, at which time he shall take notice of any misdemeanor or outrage that any of his scholars shall have committed on the Sabbath, to the end that at some convenient time due admonition and correction may be administered."

The women who taught the "dame schools" received about 10 shillings ($1.67) a year. These schools were usually held in the women's homes, and were casual affairs.

Public schools did not develop in the south during the colonial period. Planters often sent their sons back to England for their schooling, but when instruction was undertaken at home, it was either through private tutors, or by groups of families combining to engage a teacher for the purpose of taking care of the educational needs of their children.

These teachers were almost entirely indentured servants, bound to servitude for a certain number of years in consideration of their passage money to America, and their maintenance during the period of service. Sometimes a servant schoolmaster was given a sum of money—£5, £6, or possibly £10—at the expiration of his term.

Jonathan Boucher, a Maryland rector who tutored Washington's stepson, makes the statement, after an investigation of the matter, that "at least two-thirds of the little education we receive are derived from instructors who are either indented servants or transported felons."

AMERICAN COLLEGES AND UNIVERSITIES.

This list is based on the 1929 Education Directory of the United States Bureau of Education, Department of the Interior. The number of students is of those studying for degrees and does not include those taking extension courses or casual courses in the summer schools. The number of teachers is for the regular courses leading to degrees. The data are from questionnaires returned by the institutions in the year 1929.

The abbreviations following the names of the colleges indicate: C., co-educational; E, has extension courses; S, summer school; W, women only. Colleges marked a star (*) are land grant colleges.

RHODES SCHOLARSHIPS.

Two Rhodes Scholarships to the University of Oxford are assigned to each State in the Union.

These scholarships, which have the value of £400 a year, may be tenable for 3 years. Since, however, the majority of Rhodes Scholars obtain standing which enables them to take a degree in two years, appointments are made for two years in the first instance, and Rhodes Scholars who wish to remain for a third year will be expected to present a definite plan of study for that period satisfactory to the Colleges and to the Rhodes Trustees. To be eligible a candidate must be—(a) A male citizen of the United States; (b) Over nineteen and not over twenty-five years of age; (c) Above sophomore standing in some recognized degree granting university or college in the United States. Candidates may apply either from the State in which they have their ordinary private domicile, home, or residence, or from the State in which they have received at least two years of their college education.

Selections are made on the basis of the candidate's record in school and college, supplemented by references of persons who know him and by a personal interview with the Committee of Selection.

There is no written examination. Elections are made on the basis of—(1) Qualities of manhood, force of character, and leadership; (2) Literary and scholastic ability and attainments; (3) Physical vigor, as shown by interest in outdoor sports or in other ways. No restriction is placed on a Rhodes scholar's choice of studies. He may read for the Oxford B. A. in any of the Final Honor Schools, he may enter for any one of the so called Diploma Courses, or, if qualified by previous training, may be admitted to read for advanced degrees such as the B. Sc., B. Litt., B. C. L., or Ph. D.

An election is held each year in two thirds of the States of the Union.

Application blanks and further information may be obtained from the officers of any college or university in the United States or from President Frank Aydelotte, American Secretary to the Rhodes Trustees, Swarthmore College, Swarthmore, Pa.

PRESIDENT HOOVER AND FELLOW MEDALISTS.

Following are the names of the distinguished persons [on whom the Mining and Metallurgical Society of America has conferred gold medals:

1914 Herbert Hoover and Lou Hoover, "Contributions to the Literature of Mining."
1915, Robert Hallowell Richards, "Advancement in the Art of Ore Dressing."
1916, James Furman Kemp, "Advancement of the Science of Economic Geology."
1917, Edward Payson Mathewson, "Art of Non-ferrous Metallurgy."
1918, Pope Yeatman, "Administration of Mines."
1919, Charles Eugene Schneider, "Metallurgy of Iron and Steel."
1920, E. A. Cappelen Smith, "Art of Hydro-Metallurgy."
1921, Charles Warren Goodale, "Increasing the Safety of Men in Mining and Metallurgical Operations.
1922, Robert Peele, "Literature of Mining."
1924, Frederick Gardner Cottrell, "Development of a Method of Electrical Precipitation of Solid and Liquid Particles from Smelter Smoke, and in Recognition of his Public Spirit in making a gift of the Proceeds of his invention for the support of Scientific Research."
1926, Daniel Cowan Jackling, "Development of Low-grade Mines."
1929, Cornelius Francis Kelley, "Expansion and Stabilization of the Mining Industry."

ASSOCIATIONS AND SOCIETIES IN THE UNITED STATES.

The year of establishment is in parentheses. The other figures are those of membership. For organizations not in this list, see Index. Some appear elsewhere with more detail. N. Y. C. is New York City.

Abolish Capital Punishment, Inc., Amer. League to (1925), 104 Fifth Ave., N. Y. C.; membership in 34 states; Pres., Clarence Darrow; Sec., Vivian Pierce.

Accountants, Amer. Inst. of (1916), 135 Cedar St., N. Y. C., 2,185; Pres., Frederick H. Hurdman; Sec., A. P. Richardson.

Actors Equity Association (1913), 45 W. 47th St., N. Y. C.; 13,000; Pres., Frank Gillmore; Exec. Sec., Paul Dullzell.

Manchester Unity—*Grand Master*, John Brown 501 John St., E. Newark, N. J.; *Dep. Grand Master*, Edward Thompson, 238 Essex St., Beverly, Mass.; *Grand Secretary*, J. S. B. Clarke, Swansea, Mass.. *Grand Treasurer*, W. A. Bedworth, 1055 Morris Park Ave., N. Y. City; *I. P. Grand Master*, James R. Stewart, 1931 E. Wensley St., Philadelphia.

Board of Directors: John Ed. Aram, 3446 Bowman St., Philadelphia; James MacGowan, 21 Waldo Ave., White Plains, N. Y.; J. S. D. MacMillan, 279 Devon St., Kearny, N. J.; Thomas Turner, Oakville, Conn.; George W. Emsley, Winter Hill, Somerville, Mass.

WOODROW WILSON FOUNDATION.

(National Headquarters are located at No. 6 E. 39th St., New York City)

Officers: Newton D. Baker, *President;* Henry Morgenthau and Hamilton Fish Armstrong, *Vice-Presidents;* Katherine C. Blackburn, *Secretary;* Central Hanover Bank & Trust Co., New York, *Treasurer*.

Acclaimed by 1,500 men and women for his services to international friendship, particularly between the United States and Latin America, Col. Charles A. Lindbergh on March 19, 1928 received the Woodrow Wilson medal and the Woodrow Wilson Foundation's $25,000 peace award at a dinner at New York City.

Two other men have been similarly honored—Viscount Cecil of Chelwood for his work in behalf of the League of Nations and Elihu Root for his part in the creation of the Permanent Court of International Justice.

The awarding of the Nobel Peace Prize in 1920 to Woodrow Wilson gave Mrs. Charles E. Simonson and Mrs. Charles L. Tiffany, both of New York, the idea that a similar foundation should be established in this country in recognition of the national and international services of Mr. Wilson.

The Foundation was established Dec. 23, 1920. The first appeal for funds was made Jan. 16, 1922, when the permanent organization of the Foundation was accomplished; it was announced that the contributions to the proposed $1,000,000 fund at that time amounted to over $800,000.

FRANKLIN INSTITUTE MEDAL WINNERS.

(15 South Seventh Street, Philadelphia, Pa.)

The Franklin Institute awards eight medals for accomplishment in different fields.

The Franklin Medal, the highest award, is made for an outstanding career in physical sciences; the Elliott Cresson Medal, for discovery and original research; the Howard N. Potts Medal for important inventions; the Louis Edward Levy Medal for the paper of highest merit published in the Journal of The Franklin Institute during the preceding year; the George R. Henderson Medal for inventions or discoveries in railway engineering; the Walton Clark Medal for advances in the gas industry; the John Price Wetherill Medal for discoveries, inventions, and utilization of facts already known; and the Edward Longstreth Medal for elementary inventions or discoveries in physical science.

Franklin Medals have been awarded to the following scientists:

Arrhenius, Svante August (1920).
Berliner, Emile (1929).
Bohr, Prof. Niels (1926).
Brush, Charles F. (1928).
Carty, John J. (1916).
Dewar, Sir James (1919).
Edison, Thomas Alva (1915).
Fabry, Charles (1921).
Ferrie, Auguste Gustave, General (1923).
Hale, Dr. George Ellery (1927).
Howard, Sir Esme (1929).
Lorentz, Hendrik Antoon (1917).
Marconi, Guglielmo (1918).
Mendenhall, Thomas Corwin (1918).
Michelson, Albert A. (1923).
Modjeski, Ralph (1922).
Nernst, Prof. Walter. (1928).
Onnes, Heike Kamerlingh (1915).
Parsons, Sir Charles Algernon (1920).
Planck, Prof. Dr. Max (1927).
Rea, Samuel (1926).
Richards, Theodore William (1916).
Rutherford, Sir Ernest (1924).
Sprague, Frank J. (1921).
Squier, George Owen (1919).
Taylor, David Watson (1917).
Thomson, Prof. Elihu (1925).
Thomson, Sir Joseph John (1922).
Weston, Edward (1924).
Zeeman, Prof. Pieter (1925).

The Cresson Medal of the Institute was awarded in 1928 to Henry Ford, "in consideration of his rare inventive ability and power of organization, by means of which he was able to effect high-speed production of automobiles, revolutionizing the industry, and his outstanding executive powers and industrial leadership."

METROPOLITAN MUSEUM OF ART.

(Revised by the Staff of the Institution.)

The Metropolitan Museum of Art, on Fifth Avenue, opposite East 80th to 84th Street, New York City, was incorporated April 13, 1870, "for the purpose of establishing and maintaining . . . a Museum and a library of art, of encouraging and developing the study of the fine arts, and the application of the arts to manufactures and practical life, of advancing the general knowledge of kindred subjects, and, to that end, of furnishing popular instruction."

After one-half century of growth it has today, through bequests, gifts, and purchases, collections of incalculable value, embracing both fine and decorative arts. They comprise objects in almost every material—marble, stone, wood, pottery, porcelain, glass, metals, lace, textiles, etc.—and embody man's attempts throughout the ages to achieve his ideals of beauty.

In date they range from 3000 B.C. to the twentieth century and represent the ancient world—Assyria, Babylonia, Cyprus, Egypt, Greece, and Rome; the Orient, including China, Japan, Korea, India, Persia, and Asia Minor; Europe from the Early Christian and Byzantine through the Romanesque, Gothic, and later periods; and our own country.

These collections are housed in a building erected by the City in Central Park, affording 313,572 square feet of exhibition floor space.

THE COLLECTIONS.

There are comprehensive collections of Egyptian and classical antiquities, the latter grouped about the reproduction of a Roman court. Among the more noteworthy individual objects or collections dating from antiquity are the mastaba tomb erected about 4,500 years ago in the Egyptian cemetery of Sakkara, for a Theban dignitary named Perneb, and re-erected here in its original form, with its painted scenes in low relief still preserved; the Carnarvon Collection of Egyptian art; six large alabaster reliefs from the palace in Nimroud of Ashur-nasir-pal, who reigned over Assyria from 885-860 B.C.; an Etruscan bronze chariot of the sixth century B. C., the only complete ancient bronze chariot known; the Cesnola antiquities from Cyprus; a group of Roman fresco paintings from Boscotrecase and Boscoreale, especially those on the walls of a reconstructed cubiculum (bedchamber), and a gathering of ancient glass, "one of the richest and most important in the world." A representative collection of classical casts occupies ten galleries.

In the accumulations of Near Eastern art of special interest are the domed room from a Jain temple in India, the gift of Robert W. and Lockwood de Forest, which represents the wood carving of India; an extensive collection of Indian and Thibetan jewelry; the Indian miniatures in the Alexander Smith Cochran Collection, and some remarkable examples of early Indian stone carving; the Persian miniatures and manuscripts in the Cochran Collection; twenty-four manuscripts and a number of single sheets representing such masters of decoration as Behzad and Mirak, and some of the greatest names in Persian calligraphy from the fifteenth to the eighteenth century.

The Department of Far Eastern Art includes early paintings, bronzes, sculpture, and the ceramic wares of China, Japan, and Korea; Siamese, Thibetan, and Cambodian sculpture; the Heber R. Bishop Collection of jades; and the Benjamin Altman Collection of seventeenth- and eighteenth-century Chinese porcelains and snuff-bottles.

The paintings, over fourteen hundred in number, represent the Italian, Spanish, German, Dutch, Flemish, French, English, and American schools. There is an unusual showing of works by Rembrandt, twenty in all, thirteen received in the bequest of the late Benjamin Altman. Through the gift of J. Pierpont Morgan the Museum possesses a Raphael, the so-called Colonna altarpiece, a Virgin and Child Enthroned with Saints, and by recent purchase Titian's Portrait of Alfonso d'Este. Groups of paintings kept together by the conditions under which they were received are: the George A. Hearn Collection, principally American in character; the Benjamin Altman Collection, strongest in its Dutch paintings, but including four Memlings, a Durer, a Giorgione, a Fra Angelico, two Velasquezs, and other works of rare excellence; the Michael Dreicer Collection of Italian and northern primitives in which such artists as Memling, Roger van der Weyden, Schongauer, and Piero di Cosimo are represented; and the Catharine Lorillard Wolfe Collection, consisting largely of works by French artists of the early and middle years of the nineteenth century.

The Dreicer Collection also contains valuable examples of Gothic and Renaissance sculpture and decorative arts. Other collections of special note are the Crosby Brown gathering of 3,600 musical instruments, including representative specimens of all nations, among them the earlier of the two existing pianos by Bartolommeo di Francesco Cristofari, the inventor of the pianoforte and the Edward C. Moore Collection of Oriental art, classical pottery, and glass.

The Altman Collection, assembled in seven rooms of Wing K, includes, besides the paintings and the Chinese porcelains already noted, examples of goldsmith's work and rock crystals, Renaissance and eighteenth-century furniture, tapestries, and sculpture, Limoges enamels, and Oriental rugs. Notable are the Rospigliosi Cup, attributed to Cellini, and the enameled terracotta relief of the Madonna and Child by Luca della Robbia.

The Pierpont Morgan Collection, the gift of J. Pierpont Morgan, father and son, fills an entire wing and is a priceless gathering of the decorative arts of Europe from Gallo-Roman and Merovingian periods to the end of the eighteenth century. The rarest and most precious section of the collection represents the supreme work of the goldsmiths and Byzantine and mediaeval enamelers and ivory carvers. The most comprehensive gathering included in the Pierpont Morgan Wing is that brought together by Georges Hoentschel of Paris, the collector, and consisting of two parts: sculpture, furniture, textiles, ivories, woodwork, and architectural fragments of the Gothic period, chiefly of French, Flemish, Dutch, German, Spanish, and Italian origin; and French decorative arts of the seventeenth and eighteenth centuries—furniture and woodwork, many samples from historic buildings, decorative paintings, and ormolu fittings. Among the treasures of the Pierpont Morgan Collection are also five Gothic tapestries, known as the Sacrament Set because they picture the sacraments of the church; two sculptured groups, an Entombment and a Pietà, from the famous Château de Biron in southwestern France; superb examples of the goldsmith's craft from the fifteenth to the eighteenth century; a unique collection of snuff boxes, vanity boxes, scent bottles, and dance programs, signed by famous jewelers of the eighteenth century; and a large collection of watches representative of the work of the best craftsmen in Europe from the sixteenth to the nineteenth century.

Through the gift of Mr. and Mrs. Robert W. de Forest the Museum now has a wing devoted entirely to American decorative arts of the Colonial and Early Republican periods. It contains the original woodwork of fifteen rooms representative of early American architecture in the territory occupied by the thirteen colonies.

Unique in this country is the collection of arms and armor—European, Japanese, and Oriental. The European section, consisting primarily of the William H. Riggs Benefaction, together with the Ellis and Dino Collections, contains over 300 specimens with historical associations, and many of the highest artistic merit. For the study of the development of armor from the fifteenth to the eighteenth century the present collection is second to none as a representative whole, and it is admirably supplemented by one of the best libraries on the subject.

The Museum's collection of prints, one of the largest and most broadly conceived in the country, includes examples of representative masters, rare illustrated books, and a collection of early ornament or pattern designs.

SERVICE AND PRIVILEGES.

A reference library and collection of photographs and departmental study rooms are open to the public and various handbooks as well as photographic and other reproductions are on sale. Expert guidance may be secured. Lecture courses are offered, both free and with charge. Lantern slides, cinema films, photographs, and postcards may be rented from the Museum Extension Division. Through its Educational Department the Museum cooperates with schools and universities, and through its Associates in Industrial Arts with manufacturers, dealers, and designers. Opportunities are granted to copy objects in the collections.

THE CLOISTERS.

The Cloisters, 698 Fort Washington Ave., formerly the Barnard Cloisters, purchased through the gift of John D. Rockefeller, Jr., is a branch of the Museum devoted to European mediaeval art. An interesting feature is the reconstructed Cuxa Cloister, of the Romanesque period.

AMERICAN MUSEUM OF NATURAL HISTORY.

(Revised annually by the Staff of the Institution.)

The American Museum of Natural History located at 77th Street and Central Park West, N. Y. City, was founded and chartered in 1869 for the purpose of encouraging and developing the study of natural science, of advancing the general knowledge of kindred subjects, and to that end of furnishing popular instruction. It is open free every day in the year from 9 A. M. to 5 P. M., on Sundays from 1 to 5 P. M.

The Museum is under the control of a self-perpetuating Board of thirty-three Trustees, including the Mayor, the Comptroller and the President of the Department of Parks, *ex-officio*. The Trustees have entire direction of all the activities of the Museum, as well as the guardianship of the collections and exhibits.

Through gifts by the Trustees, members and friends of the institution, all the exhibition and study collections are obtained, explorations to many parts of the world are conducted, scientific papers are prepared and published, and the library is enlarged. The contributions which make possible all these activities are divided into three classes: (1) The Endowment Fund; (2) The Membership Fund; (3) Voluntary Subscriptions.

The application of the Endowment Fund, which now totals, in book value, upwards of $13,000,000, is limited in the main to research, the purchase of collections, and the issuing of publications. The Membership Fund, derived from subscriptions, is of particular importance in the educational work of the Museum.

Voluntary contributions may be used for general purposes, or for such special objects as the donors may specify.

The Museum building has been erected from funds voted by the City of New York. It is one of the largest municipal structures of the City and has cost upward of $11,000,000, and has, including the new section recently completed, fifteen acres of floor space, nine of which are devoted to exhibits.

It is intended that the building, when completed, shall cover Manhattan Square. The present south facade is 710 feet in length from tower to tower.

The School Service Building, for cooperation between the Museum and the schools, was opened in 1926.

Four additional sections will be under construction in 1930, three by appropriation of the City of New York and private gift, and the fourth, the Roosevelt Memorial, provided by the State of New York, will when completed be the central and dominant feature of the eastern façade on Central Park West.

The membership totals 14,180; the attendance, all free, was 901,231 in 1928.

First Floor—Collections illustrating the life of the Indians of the North Pacific Coast, the Eskimo, Indians of the woodlands, plains and Southwest. Two new and large groups (Hopi and Apache) in the Southwest Hall. Forestry Hall—Sections of trees, including one from a big tree of California which measures 16 feet in diameter and is 1,341 years old. Natural woods, with specimens of their leaves and flowers, and sections of the finished woods. Darwin Hall—Specimens, models and groups showing invertebrate life, the Nahant Tide-pool, the new Hall of Fishes, and the Wharf-Pile Groups.

Second Floor—Collections from Africa. Material illustrating the life of prehistoric man of North America. Ancient monuments of Mexico and Central America. Bird Dome. Birds of the world. Mammals of North America.

Third Floor—Collections from the living tribes of Asia, including Chinese bamboos, porcelain, basketry, inlaid work, embroidery, cloisonne enamel, agricultural implements, carvings in wood, ivory and stone and an especially valuable collection of ancient bronzes and pottery; material illustrating the mode of living, costumes and war implements of Siberia. Large and fine collections from the Indians of South America. Hall of Primates—Monkeys, apes and primitive man. Mammals of the world, including whales. Insect life. Birds of North America (the famous habitat groups).

The new Reptile Hall reptile and amphibian material, including a number of beautiful groups (Lower California lizard, bullfrog, great salamander and New England spring groups), and Komodo Lizard group.

Fourth Floor—Collections from the Philippine Islands and the South Seas. Mineral and gem collections. Hall of Gems, the gift of J. Pierpont Morgan—Collections including practically every variety of known gem, cut and uncut, some of remarkable size and purity of color; largest perfect crystal in the world, mounted on bronze base supported by three Chinese figures; exceptionally fine cameos, carved jade, etc. Hall of Fossil Invertebrates and Historical Geology—Large collections and models of caves and of Copper Queen Mine, showing cross sections and surrounding country. Halls of Fossil Vertebrates devoted to the great collections of the remains of creatures which lived from 30,000 to 20,000,000 years ago. These collections, by right of extent, variety, quality and methods of preparation and exhibition, are the finest in the world. The collections illustrating the evolution of the horse approach in importance and value the combined collections of this sort to be found in all other institutions. Hall of the Age of Man—Casts of prehistoric men and skeletons of the animals of their time (mammoths, mastodons and giant ground sloths). In the adjoining hall are fossil camels, giant pigs, a pygmy hippopotamus and primitive rhinoceros-like animals; fossil lemurs and monkeys which have an important bearing on the ancestry of man. Dinosaur Hall—Remains of fossil reptiles and fishes which lived from three million to ten million years ago. "Mummy" of dinosaur (trachodon) in which the texture of the skin has been preserved and the famous dinosaur eggs found by the Museum's Third Asiatic Expedition in 1923. Fossil aquarium.

Fifth Floor—Public reference library. Osborn Library of Vertebrate Paleontology.

In the course of its development, the American Museum has done an unusual and important work throughout the civilized world, in research and publication, and in education from the primary school to the highest university grade, not alone in America but in distant countries like Russia, Mongolia and China.

It is no exaggeration to say that no school, college or university in the entire civilized world to-day is untouched by current American Museum discoveries and exploration, by profound and far-reaching American Museum research, and by the ever-widening knowledge of Nature in all its phases, obtained by its adventurous and highly trained explorers.

The American Museum has contributed so largely to the educational activities of the City of New York that it has been called, "The Biggest Schoolhouse in the World," for in addition to its scientific activity in securing and exhibiting natural history specimens, the Museum maintains a department of Public Education which works in conjunction with the City's public schools and institutions for the blind, giving lectures and circulating loan collections, slides and motion picture films.

Through its contact with the schools, the Museum has brought thousands of children within its walls.

Officers of the Museum for 1928 are: *President*, Henry Fairfield Osborn; *Secretary*, Percy R. Pyne; *Treasurer*, James H. Perkins; *First Vice President*, George F. Baker; *Second Vice President*, J. P. Morgan.

THE NEW YORK AQUARIUM IN BATTERY PARK.

The New York Aquarium is one of the largest in the world and the oldest in the United States. It has 7 large floor pools, 89 large wall tanks and 30 smaller tanks. There are also 26 reserve tanks containing specimens not on exhibition. The building is circular in form, with a diameter of 205 feet. The largest pool is 37 feet in diameter and 7 feet deep. During 1924 the space available for exhibits was increased by one-fifth. The exhibits include fishes, turtles, crocodilians, frogs, salamanders, marine mammals and invertebrates, and are both northern and tropical in character. There are usually about 200 species of fishes and other aquatic vertebrates on exhibition. The total number of specimens, exclusive of invertebrates and young fry in the hatchery, varies from 3,000 to 7,000.

The fish hatchery, maintained as a fish-cultural exhibit, produces yearly about one million young food and game fishes, which are afterward deposited in New York State waters.

The Aquarium is equipped for heating sea water for tropical fishes in winter, and has a refrigerating plant for cooling fresh water in summer. Flowing fresh water is supplied from the city water system, while the pumps circulate about 200,000 gallons of salt water daily.

An increase of 20 per cent in the exhibits is being made.

The building is open, free, every day in the year—9 A. M. to 5 P. M., April-Sept.; 10 A. M. to 4 P. M., Oct.-March.

The United States of America.

(FEDERAL REPUBLIC.)

	Continental.	*Total*
AREA; square miles	3,026,789	3,738,371
POPULATION, 1920	105,710,620	117,859,495
POPULATION, 1923, est.	120,013,000	39.6 to sq. m.
WEALTH, 1923 Census, est.	$320,803,862,000	

The United States of America, oldest republic, is bounded on the north by Canada, on the east by the Atlantic Ocean and the Gulf of Mexico, on the south by the Gulf of Mexico and Mexico, and on the west by the Pacific Ocean. It comprises 48 States and the Federal District of Columbia. This is called for convenience in reference Continental United States. Its non-contiguous areas are the Territories of Alaska and Hawaii; Porto Rico, the Philippine Islands, the Virgin Islands of the United States, American Samoa, Guam, Wake and scattered islands in the Pacific; and the Panama Canal Zone, all aggregating 711,582 square miles, which, added to the 3,026,789 square miles of Continental United States, give a total of 3,738,371 square miles.

The population of Continental United States, Census of 1920, was 105,710,620; of the non-contiguous areas (partly estimated) 12,148,875, the grand total being 117,859,495. The estimate of the Census Bureau of the population of Continental United States for July 1, 1928, is 120,013,000, for it is growing by about 1,400,000 a year. The Census Bureau estimate for July 1, 1930, is 123,283,325. A total of 392,668 Americans were residing abroad permanently or semi-permanently in 1929, according to computations made by 330 American consulates.

TOPOGRAPHY.

The general topography of Continental United States is so varied, and the climate, natural resources and racial elements also, that the country may be said to be several countries articulated in one national body. In the eastern part, excepting in the south, are several mountain ranges of the Appalachian system, rising never to more than 6,000 to 7,000 feet of altitude, and ranging north and south. The Adirondacks, in northern New York State, are declared by the United States Geological Survey to have been the first land that rose from the original chaos in the western world.

Sweeping westward from the eastern mountains is a vast, fertile plain, the valley of the Mississippi River, a thousand miles wide and about as long, to where the mountain formation again is found, the Rocky Mountain range, highest in North America, beyond which westwardly is a tableland of mean elevation of 3,000 to 5,000 feet, and still further to the westward are other mountain ranges of lesser altitudes, with a low coast range skirting the shores of the Pacific Ocean.

The United States has seven great rivers—the Hudson, entering the Atlantic at the harbor of New York City in the northeastern corner of the country; the Delaware, entering the Atlantic through Delaware Bay, midway down the coast; the Potomac, entering the Atlantic through Chesapeake Bay, just south from Delaware Bay; the Mississippi, greatest of North American rivers in its relationship to civilization, rising in Minnesota, near to Canada, entering the Gulf of Mexico on the southern side of the country; the Ohio, flowing from the eastern mountains westwardly to join the Mississippi in the east central part of the country; the Missouri, which flows from the northwestern mountains eastwardly to the Mississippi, being confluent with that stream just north of where the Ohio joins it; the Columbia, which rises in British territory, and flows across a vast tableland west of the Rocky Mountains, into the Pacific Ocean one-third of the way down that coast; the Colorado, non-navigable, which rises in the State of Colorado, flows in general course southwestwardly through Utah and Arizona, and between Arizona and California, into the Gulf of California, in Mexico.

Besides these streams, there are many of considerable and navigable size in the areas east from the Rocky Mountains, and the great St. Lawrence River, the outlet of the Great Lakes on the northern border between the United States and Canada.

The Great Lakes, Superior, largest inland body of fresh water in the world; Michigan, Huron, Erie, and Ontario, are a striking phase of the geological formation, and carry immense passenger and freight tonnage. The Mississippi, Potomac, Delaware, Hudson and Columbia Rivers are navigable for considerable distances inland from the sea, and the Missouri for light-draught craft quite a distance up from the Mississippi. The Sacramento in California, navigable for 180 miles, carries over 1,000,000 tons of freight and over 100,000 passengers annually.

Of the lesser rivers, the most important are the Connecticut, Susquehanna, James, Cumberland, Tennessee, Tombigbee, Warrior, in the eastern half of the country and the Arkansas and Red west of the Mississippi. The Rio Grande, rising in Colorado, non-navigable, save for 61 miles from its mouth, is in the eastern half boundary between the United States and Mexico.

The Yukon in Alaska, which rises in small lakes in the Dominion of Canada, flows northwestwardly into Alaska, then westwardly and then southwestwardly into Norton Sound, which in turn makes into Bering Sea. It is 1,765 miles long and navigable for 1,200 miles.

NATURAL RESOURCES.

In natural resources, the United States is one of the richest countries in the world. Its coal, oil, timber and precious metals exist in vast natural stores, and practically every base mineral known to civilization is deposited in its areas. The timber resources have been depleted seriously; but the Federal Forest Service has begun reforestation, and has matured plans to make the natural timber lands perpetual by replanting. Of the original area of forests, 822,238,000 acres, 469,475,000 remain (1922), of which 138,160,000 are virgin forests. There are 158,800,424 acres in the 160 national forests and about 7,280,000 in the 19 national parks.

The potential value of the 193,847,240 acres of public lands remaining July 1, 1928, under care of the General Land Office of the Interior Department is estimated at $26,000,000,000.

The climate of the United States is of every gradation, from the north temperate, with rather cold winters and pleasant summers, to the sub-tropical, with every variety of flora adapted to so wide a range of latitude. Eastwardly and westwardly, even greater variation is found. For there are regions of normal moisture precipitation in the northeast, of excessive precipitation in the southeast, of normal precipitation in the central tableland regions, and then of varying degrees of aridity and moistness as one proceeds westwardly, until on the coast of Oregon, at Tillamook, is the heaviest average precipitation in the United States—120 inches a year.

The Southwestern United States is marked by several almost deserts, susceptible of reclamation by irrigation, some of which were the beds of great inland salt water seas, at some points the present surface elevation being below sea-level.

POPULATION DISTRIBUTION.

The United States has been known as a melting-pot of the peoples of the earth, its population at first of the ancient races such as the Aztecs, then of the American Indian, and in the first days of settlement by white people from Europe, English predominating. From the beginning immigration has been numerous, and attained a million persons a year up to the beginning of the World War, Chinese and Japanese being rigidly restricted. (See Index for tables.)

The 1920 census assigned of the total 105,710,620 of population, native white, 81,108,161; native parentage, 58,421,957; foreign parentage, 15,694,539; with 6,991,665 of mixed parentage. Those of foreign parentage and of recently immigrated foreign blood number more than 30,000,000. The Indian population on June 30, 1925, was 346,962, a gain of 16,283 in eleven years. (See Index for tables.)

Migration of Americans, mostly farmers, to Canada for six fiscal years has been, 1921, 48,059; 1922, 29,345; 1923, 22,007; 1924, 20,171; 1925, 19,689; and 18,778 in 1926. From Canada came 81,506 immigrants in 1926–27, and from Mexico, 67,721.

The increase in population in the decade 1910-20 was 13,738,354. Twelve States—New York, Pennsylvania, California, Ohio, Michigan, Illinois, Texas, New Jersey, Massachusetts, Oklahoma, North Carolina and Minnesota, in that order—supplied 8,979,722 of that increase, while three—Mississippi, Nevada and Vermont—returned a decrease totalling but 14,494. During this period the urban communities absorbed 7,000,000 of the 9,000,000 increase in native whites of native parentage, and the aggregate population of the sixty-eight cities of over 100,000 inhabitants comprised more than one-quarter of the entire population of the United States.

The Census makes use of nine subdivisions in its classification of occupations. These subdivisions

and their importance, in the sense of number of workers in each, at the Census of 1920 are:

Agriculture, forestry, animal husbandry	10,953,158
Extraction of minerals	1,090,223
Manufactures and mechanical industries	12,818,524
Transportation	3,063,589
Trade	4,242,970
Public service (not elsewhere classified)	770,462
Professional service	2,143,889
Domestic and personal service	3,404,892
Clerical	3,126,541
Total	41,614,248

The first three groups, agriculture, mining and manufactures, represent the basic occupations, and upon the location of these industries depends the location of the other six groups. If manufacturing settles in a particular centre, transportation, trade, public, professional and domestic service and clerical workers distribute themselves accordingly.

The number of women wage earners in 1920 was 8,549,571, of which 42 per cent. were under the age of twenty-five.

There were 122,519 lawyers and judges; 150.007 physicians and surgeons; 127,270 clergymen; and 136,121 civil, electrical, mechanical and mining engineers.

On the Federal civil service list, June 30, 1928, were 568,715; the record number was 917,760 on Armistice Day, Nov. 11, 1918.

In the registration district the death rate in 1928 was 12.3 (11.4 in 1927) and the birthrate 19.7 (20.4 in 1927). All but four states were included in 1927. Texas has recently passed satisfactory laws and New Mexico will soon be admitted. South Dakota and Nevada are still without efficient workable laws. Infant mortality rates in 1928 and 1927 were 68 and 64.6 respectively.

Marriages in 1927 numbered 1,200,694 (1,202,574 in 1926); and divorces 192,037 (180,853 in 1926).

STATISTICS OF EDUCATION.

For the school year 1925-26 it is estimated that there were 30,064,621 children of school age (5 to 17 inclusive) in the United States. Of these, 24,741,468 were enrolled in the public elementary, secondary and high schools, and 2,438,725 in the private schools, making a total of 27,180,193, or more than 90% of all children. Enrolled in the public elementary schools, including 673,231 in kindergartens, were 20,984,002; 3,757,466 in public high schools; 2,143,100 in private and parochial elementary and secondary schools, including kindergartens; 295,625 in private high schools; 55,632 in preparatory departments of colleges; 23,402 in secondary courses in normal schools; a total of 4,132,125 in all types of secondary schools and high schools.

In addition there were 188,363 students in private commercial and business schools; 187,828 in private trade and industrial schools; 77,768 in nurses training schools. There were 814,170 teachers (138,810 men, 675,359 women) in the public schools, whose average salary was $1,277, in 1926. The number of teachers in the private schools was 76,415.

Public elementary and high school property was valued in 1926 at $4,676,603,539, and increase of nearly 100% over 1920. Private high school property was valued at over $400,000,000, excluding endowments of over $67,000,000; private elementary school property at over $300,000,000; teacher training institutions at over $140,000,000, excluding endowments of nearly $19,500,000; and colleges and universities at over $1,100,000,000, excluding endowments which reached nearly $990,000,000.

There were in use in 1926, 256,104 public elementary and high school buildings of which number 161,521 were one-room schools, a decrease in the number of each owing to consolidation of the latter schools. There were approximately 22,500 public high schools; 2,500 private high schools; 90 teachers' colleges; 115 state normal schools; 30 city normal schools; and 70 private normal schools. There were about 145 colleges and universities under public control and 770 under private control.

The expenditures for public school education in 1926 were $2,026,308,190 ($1,036,151,209 in 1920, and $426,250,434 in 1910). The cost per capita, based on average daily attendance, was $102.05 in 1926 ($95.45 in 1925 and $64.16 in 1920). In addition 31 states reported 825,681 students in night schools with 21,213 teachers.

Students in American universities and colleges, 1925-26, numbered 821,052 (508,714 men, 312,338 women). Students enrolled in universities and colleges (including preparatory schools) were, public, 290,893; private, 532,002; teachers' colleges, 177,816; normal schools, 116,248. There were also in industrial schools for delinquents 84,317; in schools for the deaf, 17,496; for the blind, 6,084; for feeble minded and subnormal, 104,021; and in government schools for Indians and in Alaska, 31,393. Summer school enrollment in the universities and colleges in 1926 was 209,454, and in extension courses, 268,481.

The United States Bureau of Education estimated that in the American colleges for the year 1928-29 there will be about 920,000 enrolled, of which 250,000 entered college in 1928. From 1890 to 1926 enrollments in the collegiate departments increased 529%. The statistician of the Bureau declares that 2.14% of all persons more than 21 years of age are college graduates, and that 4.55% have done some college work. Secondary schools now enroll about 53% of those of secondary school age.

The number of institutions for the higher education of the Negro more than doubled and enrollments increased sixfold in the decade from 1917 to 1927. Of these 77 offered college work in 1927 to 13,680 students. Their annual income was $8,560,000 and the value of the plant was $38,680,000 and the productive endowments totalled $20,713,000. There are approximately 46,950 Negro teachers in elementary and high schools and 1,050 in institutions of higher learning. There are 22 publicly supported institutions under state government and control made up of land-grant colleges under independent control privately supported; 31 universities and colleges, privately supported; owned and controlled by Northern white church boards; and 17, privately supported, owned and controlled by Negro church organizations.

There were 3,114,750 colored children from 5 to 17 years of age, inclusive in the 16 states south of the Mason and Dixon line in 1926 of which 2,141,206 were enrolled in the elementary and secondary schools and 45,666 colored teachers there.

Of the population of 10 years of age and over, the percentage of illiteracy shown by the Census of 1920 was 5.9 (7.7 in 1910); of this native white 2 per cent. were illiterate; of the foreign born, 13.1; of the Negro, 22.9; attending school were 90.6 per cent. of those between 7 and 13 years of age; 79.9 of chose of 14 and 15; 42.9 of those of 16 and 17; and 14.8 of those of 18 to 20. The percentage of decrease in illiteracy in the United States from 1900 to 1910 was 27.74 per cent.; and from 1910 to 1920 it was 32.04 per cent.

AGRICULTURAL DEVELOPMENT.

The agricultural interests of the country are very large. The Farm Census reported for 1925 that, of the approximate land area of 1,903,215,360 acres all farm lands contained 924,319,352 (955,863,715 in 1920) acres; improved lands, 505,027,000 (503,073,067) acres, or 54.6 (52.6) per cent. of all the land in the farm lands classification; that the value of all farm property was $57,017,740,040 ($77,924,100,338); of land alone $37,721,018,222 ($54,829,563,059); of buildings, $11,746,629,065 ($12,486,439,543); and of livestock, $4,858,389,124 ($8,013,324,808); the value of all farm crops in being $9,531,495,000 (against $14,755,364,894 in 1919 and $9,523,514,211 in 1909). In woodland were 143,794,192 (167,730,794) acres, and in pasture land 407,935,558.

The number of farms in 1925 was 6,371,640 (6,448,343 in 1920). Those under 20 acres numbered 966,584 (796,535); from 20 to 49 acres, 1,450,643 (1,503,732); from 50 to 99 acres 1,421,078 (1,474,745); from 100 to 174, 1,383,777 (1,449,630); from 175 to 499 acres 942,378 (1,006,447); from 500 to 999 acres, 143,852 (149,819); 1,000 acres and over, 63,328 (67,405). Farms operated by owners numbered 3,868,336 (3,925,090) and by tenants, 2,464,608 (2,454,804). White farmers numbered 5,540,185 (5,498,454); colored farmers, 831,455 (949,889); and foreign-born farmers, in 1920 numbered 581,068.

It is interesting to note that in 1920 it was reported 1,979,564 farms had automobiles (being 307 per 1,000 of all farms) also 131,551 had motor trucks and 229,332 tractors which by 1925 had increased to 437,850. Farms supplied in 1920 with telephones numbered 2,498,498 (38.7% of all the farms) 643,899 (10%) had water piped into the house, and 452,620 (7%) had gas or electric light. In 1925 the number of farms having radio outfits was 284.608.

There were 3,085,000 laborers on tue farms on Jan. 1, 1925, (3,194,000 in 1924). An estimate of the Department of Agriculture gave the number of people living on farms on Jan. 1, 1928, as 27,699,000. The estimate for 1927 was 27,892,000. and for 1925, 28,981,688. The census of 1920 returned the farm population as 31,614,269.

Output of industry per worker employed increased during 1899-1925 according to the National Industrial Conference Board, 49%, and per farm worker, 47%; horsepower per industrial worker increased from 1.9 to 3.6 and per farm worker from 2.2 to 4.5 total horsepower on farms increased from 23,500,000 in 1899 to 47,400,000 in 1925.

Meat consumption including lard, 13.8 pounds per capita in 1927 was 153.1 pounds.

The Bureau of Agricultural Economics of the Department of Agriculture estimated the agricultural capital of the United States at $59,712,000,000 in 1927, as compared with $58,255,000,000 in 1926; and the gross agricultural income for the fiscal year 1926-27 at $12,080,000,000, a decrease of 5%, due to cotton prices, compared with $12,670,000,000 in 1925-26. This is made up of $9,549,000,000 computed as cash income from sales and $2,531,000,000, the value of food and fuel consumed on farms.

	1926	1927
Value of farm products:	*(millions of dollars)*	
Dairy and poultry	3,589	3,754
Meat animals	2,848	2,842
Fruits and vegetables	1,686	1,511
Grains	1,594	1,456
Cotton and cottonseed	1,749	1,291
Miscellaneous	1,204	1,176
Total value	12,670	12,080
Paid out of income:		
Wages to hired labor		1,238
Operating costs		2,987
Taxes on operator-owned investments		654
Rent on property from non-operator		1,042
Interest on debt to non-operator		750
Total paid out		6,671

The value of all farm crops in 1926 was estimated by the Department of Agriculture at $8,415,778,000 from 356,433,000 acres, and of all animal products at $6,694,222,000, making the total farm production, omitting crops fed to livestock, $15,110,000,000. The value of all farm property was estimated in 1925 at $56,913,567,000. Of this the value of the land was $37,779,050,000; of buildings, $11,767,473,000; of implements and machinery, $2,691,703,000; and of livestock, $4,675,340,000. The survey showed the number of farms to be 6,372,263, with a total acreage of 924,889,000.

Production of staple crops in 1928 was:

	Acreage.	*Bushels.*	*Farm Value.*
	——000 *omitted*——		
Wheat	57,724	902,749	$877,193
Corn	100,761	2,939,959	2,132,991
Oats	41,733	1,449,531	592,674
Potatoes	3,825	462,943	250,043
Tobacco	1,912 lbs.	1,373,501	254,322
Hay	70,919 tons	105,953	1,243,359

Cotton production for five years was:

Year.	*Bales.*	*Acreage. Picked.*	*Yield.*
1928	14,373,000	45,326,000	151.8 lbs.
1927	12,955,000	40,168,000	154.5 lbs.
1926	18,618,000	47,653,000	182.6 lbs.
1925	16,104,000	45,467,000	167.2 lbs.
1924	13,639,399	41,360,000	157.4 lbs.
Pre-war average	12,754,000	33,233,000	183.7 lbs.

The value was: 1928, $1,291,589,000 (farm value only); 1927, $1,269,885,000; 1926, $1,016,346,000; 1925, $1,597,670,000; 1924, $1,573,399,000. To this should be added the production of cotton seed, 6,390,000 tons in 1928 valued at $231,923,000; 5,759,000 tons in 1927 valued at $211,926,000; 8,267,000 tons in 1926 valued at $154,089,000; 7,150,000 tons valued at $194,970,000 in 1925; 6,051,000 tons valued at $195,951,000 in 1924.

To the commercial truck crop 2,710,970 acres were devoted in 1928 (2,435,340 acres in 1927), and the produce valued at $326,478,000 ($347,543,000); the output of fruit, apples, peaches, pears, grapes, oranges, grapefruit, lemons and cranberries in 1928 was valued at about $250,000,000.

The census of livestock was (in thousands):

	1910.	1920.	1926.	1927.	1928.
Cattle	61,804	66,505	59,184	57,521	55,696
Sheep	52,448	38,300	39,864	41,099	44,545
Swine	58,186	66,130	52,055	52,536	58,969
Horses	19,833	18,059	15,840	15,279	14,541
Mules	4,210	5,446	5,733	5,734	5,566

The number of dairy cows on Jan. 1, 1928, was 21,948,000 as against 21,824,000 in 1927 and 22,148,000 in 1926.

Even dogs were enumerated by the Department of Agriculture in 1926, the number reported being 7,000,000.

MINING.

The total value of mineral products of the United States in 1927 as given by the Bureau of Mines was $5,520,000,000; of these metallic products were valued at $1,217,000,000 and fuels, coal, petroleum, etc., at $3,084,000,000.

Bituminous coal production in 1928 was 492,755,000 short tons, (519,804,000 in 1927 valued at $1,039,608,000); and anthracite, 76,734,000 long tons (72,011,000 long tons in 1927 valued at $432,295,000).

Natural gas production in 1927 was 1,370,000,000 M. cubic feet valued at $298,000,000; and natural gas gasoline 1,627,600,000 gallons at $111,100,000.

The output of petroleum in 1928 was 902,000,000 barrels, and in 1927 901,129,000 barrels valued at $1,203,000,000. This was 68.2% of the world's production in 1928, and 71.5% in 1927. Production in the month of July, 1929, reached a highwater mark of 91,327,000 barrels. The oil lands held in the United States, Jan. 1, 1928, totaled 168,958 acres with 318,600 producing wells.

The gold production for the United States and its possessions for 1928 was 2,233,251 troy ounces valued at $46,165,400 (in 1927, 2,197,125 troy ounces valued at $45,418,000), and silver 58,462,507 troy ounces valued at $34,200,567 (in 1927, 60,434,441 troy ounces valued at $34,266,328).

The production of copper in 1927 from domestic ores was 1,684,040,983 pounds valued at $220,609,000. Lead production in 1927 from domestic ore was 668,320 short tons valued at $73,966,000.

The record production of pig iron was made in 1923, 38,363,509 long tons, which was nearly equalled in 1926, 38,181,053. Production fell to 34,866,644 tons in 1927, valued at $646,266,139. Output in 1926 was valued at $935,905,540. The output in 1928 was 38,155,714 long tons. The output of steel ingots in 1928 was 49,853,225 long tons (43,397,743 in 1927 and 48,293,763 in 1926).

MANUFACTURING.

The census of manufactures taken in 1927 returned 191,863 establishments (187,224 in 1925) with an output valued at $62,713,947,403 ($62,668,259,591) of which $27,585,792,755 ($26,771,373,163) was added by manufacture; the average number of wage earners was 8,351,257 (8,381,511); total wages paid $10,848,782,433 ($10,727,337,625).

Expansion of output per person has been 10% from 1923 to 1925, and 40% from 1919 to 1926. This is held to be due to increased utilization of machinery and power, new labor-saving devices, increased efficiency and elimination of waste.

The fourteen chief industries (including kindred products) by value of products in 1927 with number of wage earners and amount of wages paid, were:

Class of Industries	Wage Earners. *No.*	Wages. *Thous.Dol.*	Value of Products. *Thous.Dol.*
Food, etc	679,158	823,388	10,999,790
Textiles, etc	1,692,473	1,760,168	8,964,143
Iron and steel, etc, (not incl. mach.)	835,091	1,264,406	6,199,252
Chemicals, etc	394,817	534,948	6,404,914
Transportation equipment, air, land and water	494,905	803,298	4,702,378
Machinery not inc. trans. equipm'nt	886,344	1,287,778	5,367,015
Paper, printing, etc.	553,040	858,337	4,638,572
Lumber, etc	866,581	929,790	3,457,427
Metals and metal products other than steel & iron	270,665	380,365	2,668,697
Leather and its manufactures'	316,421	364,229	1,868,320
Stone, clay & glass	350,397	464,273	1,612,549
Railroad rep.shops	428,291	648,908	1,289,695
Rubber products	141,997	198,074	1,225,077
Tobacco manufac.	129,299	105,251	1,163,768

TRADE AND COMMERCE.

The balance of trade for the fiscal year 1928-29 was $1,082,000,000, the largest amount since 1921-22, offset in part by net imports of $155,000,000 less net exports of silver amounting to $17,000,000. Foreign loans were also sharply reduced from the preceding year.

Exports of merchandise reached $5,374,000,000, an increase of 10%, and imports $4,292,000,000, an increase of 3.5%. Cotton, petroleum, automobiles and parts, manufactured food stuffs, iron and steel products, copper, tobacco and fruit showed notable increases in export values. In quantity and value of imports, silk, newsprint and wood-pulp, vegetable oils and copper showed notable increases. Rubber and cane sugar showed increase in quantity but decrease in value.

Imports from Europe amounted to $1,303,000,000, an increase of $45,000,000. Exports to Europe amounted to $2,397,000,000 (45%), an increase of $75,000,000. Great Britain taking $865,000,000, an increase of $56,000,000, mostly cotton. Asia took $685,000,000, an increase of $117,000,000 of which $50,000,000 was the increase of sales to China and $39,000,000 to Japan. Sales to Africa amounted to $129,000,000, an increase of $18,000,000; and to Australia and New Zealand, $193,000,000, an increase of $19,000,000.

Canada, for the second year the best customer of the United States took $988,000,000 of the exports, an increase of $126,000,000 or 15%. She ranks far ahead in supplying our imports, furnishing $505,000,000, an increase of $23,000,000 (nearly 5%)

accounted for in copper and newsprint. Latin North America took $420,000,000 of exports, an increase of $25,000,000 and furnished $477,000,000 of the imports. South America took $551,000,000 of the exports, an increase of $115,000,000 (20.8%) taken chiefly by Argentina and Brazil, and supplied $612,000,000 of the imports, an increase of $52,000,000 (9%) chiefly copper ore from Chile and Peru and petroleum and coffee from Venezuela.

Finished manufactures supplied 47% of the exports. Imports showed an increase of 14% in semi-manufactured products which totaled $849,000,000, and a decrease of 2% in crude materials which totaled $1,510,000,000. The value of finished manufactures imported was $911,000,000; of manufactured foodstuffs, $961,000,000; and in crude foodstuffs, $544,000,000, both practically unchanged.

Americans at the beginning of 1928 according to estimates made by the Department of Commerce, had invested abroad approximately $5,200,000,000 in Latin America, $4,300,000,000 in Europe, $3,900,000,000 in Canada, $700,000,000 in China, Japan and The Philippines, and $400,000,000 elsewhere. Investments in foreign corporate securities publicly offered in the United States from Jan. 1, 1914 to Jan. 1, 1928 alone totaled $3,713,307,900; and in 1928 the foreign capital issues floated totalled $1,487,861,680 par value, about $1,250,951,267 net.

The value of imports and exports was:

Year (Fiscal).	Imports.	Exports.	Excess of Exports.
	Dollars.	*Dollars.*	*Dollars.*
1920-21	2,556,869,711	6,516,510,033	3,959,640,322
1921-22	3,073,853,263	3,771,156,489	697,303,226
1922-23	3,780,958,965	3,956,733,373	175,774,408
1923-24	3,554,036,954	4,223,973,222	669,936,268
1924-25	3,824,128,375	4,778,330,897	954,190,758
1925-26	4,463,613,831	4,653,509,472	186,895,641
1926-27	4,256,825,000	4,970,541,000	713,716,000
1927-28	4,147,499,473	4,877,070,585	729,571,112
1928-29	4,291,857,565	5,373,612,728	1,081,755,163

The amount of gold and silver imported and exported was:

	Imports.		Exports.

The United States Department of Commerce estimates that in 1928 $818,600,000 was spent by American tourists in Europe and in Canada,

MERCHANT MARINE.

The United States had on July 1, 1929, on the Sea and the Lakes, a merchant marine of 3,696 vessels of 100 tons and over (4,336 in 1928) totaling 14,377,114 tonnage (14,537,958). Of these 3,254 were steam, 233 motor, 748 sailing, and 37 auxilliary.

The United States leads in oil-using vessels, having on July 1, 1929, 381 (383 tankers of above 1,000 tons each, of 2,374,358 (2,375,121) tons, and 1,793 (1,818) steamers fitted for burning fuel with a tonnage of 8,799,433 (8,892,942), nearly one-half the world total of 3,787.

There entered at American ports in 1928 a total tonnage of 80,207,772 (74,309,813 in 1927) of which 31,284,611 tonnage were American and 48,923,161 tonnage were foreign.

RAILROADS AND HIGHWAYS.

The total railroad mileage, Jan. 1, 1929, was 249,131, of which that of Class I railroads was 240,243. The capitalization of the railroads was $23,614,325,858, of which $9,622,775,686 was stock, and $13,951,550,172 funded debt. Dividends in 1927 totaled $567,280,717. Net operating income (after deduction of taxes, equipment, rental, etc.) in 1928, $1,193,133,741, a return of 4.71% on their investment; (in 1927, $1,085,141,596, a return of 4.38%). Gross operating revenues in 1928 were $6,177,761,036 ($6,210,029,786 in 1927). Operating expenses in 1928 were $4,472,480,262. The railroads paid in taxes $395,066,480 in 1928. The number of employees of all railroads in 1927 was 1,735,105 whose average wage was $1,677.24 a year.

On Jan. 1, 1927 there were 287,928 miles of state highways, of which 163,059 miles were surfaced and 2,731,172 miles of local roads. Congress in June 1926, appropriated $165,000,000 for the construction of highways during the two years ending June 30, 1929. Of this $15,000,000 was for building improved roads in the national parks. The balance, $73,125,000 a year, was matched dollar for dollar by states through which the highways were to be built except in the mountain and Pacific states where a lesser amount is accepted, making the total minimum for the states $66,015,664.

Americans spend annually $14,000,000,000 for the purchase and maintenance of automobiles; the number of passenger cars produced in 1928 was 3,827,849 and trucks 530,899; 368,328 passenger cars and 138,782 trucks valued at $522,097,974 were exported in 1928. The number of all cars registered in 1928 was 24,629,921 (23,127,315 in 1927), or about one to every 5.6 inhabitants.

The production of electric power by public utility plants in 1928 was approximately 87,851,000,000 kilowatt-hours, about 40% being from water power, and there were over 22,000,000 consumers. Capital invested exceeds $25,500,000,000.

FINANCIAL STATISTICS.

The national wealth of the United States on Dec. 31, 1922, as shown by a survey by the Census Bureau, was $320,863,862,000, an increase of 72.2 per cent. over 1912 ($186,299,664,000). The per capita wealth of the nation increased from $1,950 to $2,918 in ten years, or 49.6 per cent. It is pointed out, however, that at 1913 prices the grand total for 1922 would be $206,000,000,000 and the per capita wealth $1,885. (See Index for tables.)

Real estate not taxed in the United States, including schools, churches, and State and local public buildings and institutions, is valued at $20,032,475,000.

The national income of the United States, according to a study made by the National Industrial Conference Board, was $78,649,000,000 in 1926, $77,313,000,000 in 1925, and $70,768,000,000 in 1924. This is $671.43 per capita, and $1,805.37 per person gainfully employed. The Board estimated the National wealth had risen by Dec. 31, 1925 to $355,300,000,000.

Millionaires have increased from 7,000 in 1914 to between 30,000 and 40,000 in 1928, Carl Snyder of the Federal Reserve Bank of New York told the American Statistical Association at Chicago, Dec. 27, 1928; half of these were due to the fall in the value of the dollar, and considerable part due to the enormous rise in the value of securities and to their collossal manipulation.

The volume of money in circulation on June 30, 1929 was $4,746,296,567 ($4,796,621,260 in 1928); the amount held by Federal Reserve Banks and agents, $156,039,088; the amount in the United States Treasury, $3,789,886,214 (which does not include $1,854,372,591 held in trust against gold and silver certificates and treasury notes of 1890); total stock of money $8,538,796,197. The circulation per capita was $39.62 ($40.52 in 1928).

The United States Treasury and Federal Reserve banks on Jan. 1, 1929 held $3,746,111,000 in gold, which was 37.6% of the total gold holdings of the forty principal countries.

The United States had a gross debt of $26,596,701,684 on Aug. 13, 1919, when the war debt was at its peak. This on June 30, 1929, had been reduced to $16,931,088,484, a decrease of $673,204,717 in the fiscal year. Interest on the public debt dropped from $731,764,476 to $678,330,400, a decrease of $73,434,076. The annual interest rate on the interest bearing debt was reduced to 3.87% on June 30, 1928. The Government's ordinary receipts in the fiscal year 1928-29 (previous fiscal year figures in parentheses) amounts to $4,033,250,225 ($4,042,348,156); expenditures chargeable to same $3,848,463,190 ($3,643,519,875); surplus for year, $184,787,035 ($398,828,281).

Internal Revenue taxes collected during the fiscal year 1928-29, totaled $2,939,054,575, an increase of $148,518,838 over the preceding year. Total individual income tax collections during the fiscal year 1928-29 were $1,095,541,172, an increase of $212,814,069 from 1927-28 which were $882,727,103. Total corporation income tax collected was $1,235,733,256, a decrease of $56,112,693 from 1928. Tobacco taxes brought in to the Federal Treasury in 1928-29, $434,444,543; automobiles, $5,545,866 (tax repealed effective May 29, 1928); admission to places of amusement, $6,083,056; club dues, $11,245,255 and distilled spirits, etc., $12,776,728.

The Customs receipts for the fiscal year 1928-29 amounted to $602,262,786 ($568,986,188 in 1927-28). The total Federal taxation was $3,541,317,361.

The latest figures available for Federal State and local taxation were for the fiscal year 1926-27, the estimate of the National Industrial Conference Board being $9,074,000,000, approximately $76.50 per capita. The pre-war total per capita tax as of 1913 was $22.73, about 6.4% of the national income.

Total revenues collected by the governments of the forty-eight states in 1927 amounted to $1,758,331,000 ($1,655,495,000 in 1926) with operating and maintenance expenditures amounting to $1,726,989,016 according to the Census Bureau. The net debt of the states at the end of 1927 was $1,444,927,000 ($1,327,514,000 in 1926) and the assessed valuation of property taxes in 1927 was $146,432,287,461. Figures for municipal and local taxation, revenue and expenditures were not available.

TERRITORIAL EXPANSION OF THE UNITED STATES.

(Compiled from official sources, mainly documents and other data gathered by the United States Bureau of the Census.)

The Thirteen Original States, comprising the United States of America, as constituted in 1790, were—New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, Georgia.

The present gross (land and water) area of these thirteen States is but 326,378 square miles, inasmuch as Maine, Vermont, Kentucky, West Virginia, Tennessee, Mississippi, Alabama, Ohio, Indiana, Illinois, Michigan, Wisconsin, and part of Minnesota, have been carved from the original boundaries of the Thirteen, which extended from Canada to Florida and from the Atlantic Ocean to the Mississippi River, exclusive of a portion of the southeastern part of Louisiana.

Congress, Oct. 30, 1779, asked the States to cede to the General Government the vast areas of unsettled lands lying between the Appalachian Mountain ranges and the Mississippi River, in order to end conflicting boundary claims inherited from royal charters.

This was done, 1781-1802, by New York; Massachusetts (1785); Connecticut (1786); Virginia (1784); North Carolina and Georgia.

The General Government welded the ceded areas into two great tracts—the territory northwest of the Ohio River (in 1787); and the territory south of the Ohio River. The former comprised the Territories of Ohio and Indiana.

LOUISIANA PURCHASE.

The first accession to the territory of the United States as it was constituted in 1790 came through the Louisiana Purchase. This vast region, bought by the United States (in the administration of President Jefferson), April 30, 1803, from France, in the reign of Napoleon Bonaparte, for 60,000,000 francs ($15,000,000), plus payment of the "French Spoliation Claims," comprised the Mississippi River's west side drainage basin, except that part held by Spain. It extended from Canada to the Gulf of Mexico, and included the areas now occupied by Louisiana, Arkansas, Oklahoma, Kansas, Missouri, Nebraska, Iowa, the Dakotas, Montana, most of Minnesota, and portions of Colorado and Wyoming.

The United States took formal possession of the Louisiana Purchase regions on March 10, 1804, and Congress divided it into two parts—the Territory of Orleans (later the State of Louisiana); and the Territory of Louisiana.

Settlement of the French Spoliation Claims was effected with France for $3,750,000. Interest accruals raised the final total cost of the Louisiana Purchase to $27,267,622.

The following table shows the territorial expansion of the United States, by years and areas:—

Division.	Yr.	Added. Square Miles.	Division.	Yr.	Added. Square Miles.	Division.	Yr.	Added. Square Miles.
Louisiana purchase.	1803	827,987	Gadsden purchase.	1853	29,670	Panama Canal Zone	1904	527
Gained through			Alaska	1867	590,884	Danish West Indies		
treaty with Spain	1819	13,435	Hawaiian Islands.	1898	6,449	(now Virgin Isl.).	1917	132
Florida	1819	58,666	Porto Rico	1899	3,435			
Texas	1845	389,166	Guam	1899	210	Total added area		2,850,749
Oregon	1846	286,541	Philippine Islands.	1899	114,400	Total United States including original 13 States,		3,738,371
Mexican cession	1848	529,189	American Samoa	1900	77			

The Oregon Territory, the northern limits of which were settled in the Webster-Ashburton Treaty of 1846 between the United States and Great Britain, is not classed as an accession, because the Government at Washington claimed it, in 1848, on three grounds—(1), discovery and occupation; (2), the Louisiana Purchase; (3), the Florida Purchase.

As constituted at its organization, in 1848, the Territory of Oregon extended from the Pacific to the crest of the Rocky Mountains, north of the forty-second parallel of latitude, and comprised the areas now covered by Oregon, Washington, Idaho and part of Montana and Wyoming.

The second accession was the Floridas, which the United States bought from Spain in 1819.

No money payment was made to Spain in connection with the acquisition of the Floridas, but the United States assumed and paid the sum of $5,000,000 in satisfaction of claims of citizens of the United States against Spain.

The third accession came Dec. 29, 1845, when the Republic of Texas was admitted to the Union as a State. This area now comprises Texas, and parts of New Mexico, Colorado and Wyoming.

The Guadalupe-Hidalgo Treaty of 1848 which concluded the Mexican War gave the United States its fourth accession of national territory. Serious disagreement as to the exact extent of the newly gained region in what is now Southern Arizona and Southwestern New Mexico developed, which was wiped out in 1853 by the Gadsden Purchase for the United States of the area in dispute. The 1848 Mexican cession price of $15,000,000 was raised to $16,800,000 by interest accruals. The Gadsden Purchase cost the United States $10,000,000.

The Mexican cessions added to this country the area of California, Nevada, Utah, Arizona, New Mexico and part of Colorado.

The fifth increase of United States territory came with the purchase of Alaska from Russia, by the treaty of 1867. The price, $7,200,000 in gold, was paid Aug. 1, 1868, no interest being charged.

The sixth accession brought in the Hawaiian Islands, which voluntarily joined the United States in 1898, the Hawaiian national debt of $4,000,000 being assumed by this country.

The victory of the United States over Spain in 1898, brought into the American national area the seventh accession.

Under the treaty of Dec. 10, 1898, the United States paid to Spain $20,000,000 in connection with the relinquishment of all claims to Porto Rico, Guam and the Philippine Islands; and, under a later treaty of Nov. 7, 1900, a further payment of $100,000 was made to Spain for cession to the United States of any and all islands (Cagayan Jolo) of the Philippine Archipelago lying outside of the lines described in Article III. of the treaty of Dec. 10, 1898. No interest was paid in either case.

The Samoan Isles, in 1889, by agreement of the United States, Great Britain and Germany, in conference at Berlin, were recognized as independent, neutral territory, with Malietoa as King, under the joint protection of the three powers named. In 1898 the United States accepted Pago Pago (ceded in 1872) as a coal and naval base.

By the Anglo-German Convention of Nov. 14, 1899, effective Feb. 16, 1900, Tutuila and the adjacent isles of Tau, Olesinga and Ofu were ceded to the United States; Samoa, to Germany; the Tonga, Savage and Solomon Islands to Great Britain. The Mauna Islands were ceded to the United States in 1904 by the King of the group.

The United States did not acquire, by the Isthmian Canal Convention of Nov. 18, 1903, any title to territory in the Republic of Panama, but merely a perpetual right of occupation, use, and control of and over a zone of land ten miles in width. For this privilege it paid to the Republic of Panama the sum of $10,000,000, and undertook to pay the sum of $250,000 annually so long as such occupancy continued, such payments beginning on Feb. 26, 1913.

The United States and the Colombian Congresses ratified, in 1921, a treaty of the United States with Colombia by which Colombia has received $25,000,000 (in yearly instalments of $5,000,000) as compensation for the loss of territorial sovereignty over Panama and the Canal Zone. Ratifications of the two countries were exchanged at Bogota, Colombia, on March 1, 1922. The first payment of $5,000,000 was made six months thereafter; the last on Sept. 2, 1926.

For the Danish West Indies, consisting of the Islands of St. Croix, St. Thomas and St. John, the United States paid $25,000,000, and took possession on March 31, 1917. They then had 32,000 population.

GROWTH OF THE UNITED STATES, 1774-1800.

(Compiled mostly from Official Documents; published at London in 1801.)

Length of the United States, 1,250 miles; breadth, 1,040 miles; area, 640,000,000 acres.

The Navy in 1799 had 42 vessels with 950 cannon. Metallic money in circulation in 1799 was estimated at $17,000,000; the nominal public debt, calculated in paper money of that period, was $200,000,000; funded debt, $88,456,038.

THE CENSUS OF 1800.

The Federal Census of 1800 (the figures of the later censuses have since then been officially revised and now stand as published elsewhere in the Almanac) divided the population as follows:

Free white males—under 10 yrs., 741,349; 10 to 16 yrs., 333,849; 16 to 26 yrs., 383,422; 26 to 45 yrs., 422,994; 45 yrs. and up, 257,560.

Free white females—under 10 yrs., 694,178; 10 to 16 yrs., 315,254; 16 to 26 yrs., 391,841; 26 to 45 yrs., 397,122; 45 yrs. and up, 243,296.

All other free persons except Indians, not taxed, 107,685.

Slaves, 875,626.

Total population, 5,172,312 exclusive of Tennessee, which was estimated at 100,000.

Eastern States population, 1,232,511, including 1,338 slaves (N. H., Mass., Me., Conn., Vt., R. I.).

Middle States population, 1,399,544, including 34,752 slaves (N. Y., N. J., Penn.).

Southern States population, 2,540,257, including 840,536 slaves (Del., Md., Va., N. Car., S. Car., Ga., Ky., Northwest. Terr., Indian Terr., Miss. Terr.).

The population of the Northwest Territory (that is, the territory northwest of the Ohio River) was 45,365; Indian Territory, 5,641; Mississippi Terr., 8,850.

The States of the Union.

ALABAMA.

Area, square miles ..... *51,998* ..... *28th in rank*
Population, 1920 ..... *2,348,174* ..... *13th in rank*
Population, 1923 (est.) ..... *2,573,000* ..... *49.5 to sq. m.*
Wealth, 1923 (Census est.) *$3,003,043,000*

Alabama, one of the States of the Old South, is in the heart of the cotton belt, in the East South Central group, on the Gulf of Mexico, bounded on the north by Tennessee, on the east by Georgia, on the south by the Gulf and Florida, and on the west by Mississippi.

It is level and largely alluvial along the seashore and for a considerable distance inland, rising to hilly or low mountainous elevations in the northeast. Forests originally covered most of the area, but have been materially reduced by non-conservation methods of lumbering. The State is well watered, and river navigation is available. The Alabama, formerly the Coosa, and the Tallapoosa, and the Tombigbee, joined by the Black Warrior, unite about 35 miles north of Mobile Bay into which their waters discharge through the Mobile and Tensas rivers.

On the Tennessee River rapids at Muscle Shoals are the nitrate fixation plants built by the Federal Government in the World War, but not carried to point of production. The first four units of 30,000 horse power each were placed in operation in 1925. The ultimate capacity is 612,000 horse power.

Agriculture is the chief interest, although in the past thirty years the mineral industries have been wonderfully developed. Birmingham being known as "the Pittsburgh of the South." In 1928, 2,546,000 tons of pig iron were produced, the State ranking sixth. Alabama, as one of the 16 cotton States, raises normally about one-fifteenth of the country's cotton; in 1928, 1,109,126 bales from 3,534,000 acres. The peanut crop in 1928 was 223,440,000 pounds, valued at $8,714,000 from 399,000 acres. Corn, white and sweet potatoes, oats, tobacco, sugar, hay and fruits are important crops.

The Census of 1920 showed the iron and steel industries, in value of products, $121,998,000, were second to agriculture, $304,348,638, and ahead of lumber and timber products, $55,139,000, yellow pine being 91.3 per cent. of the cut, with 1,642,588,000 board feet, the oak cut being 61,189,000. Gum, maple, ash, hickory, cypress and tupelo also supply lumber. Cotton mills numbered 99 in 1928, with 24,555 looms and 1,602,534 spindles.

Coal production in 1928 was 1,740,000 tons from 272 mines. Coal underlies approximately 8,000 square miles. Iron ore deposits are sufficient to last the present blast furnaces 165 years. In 1928 6,397,844 tons were mined. Limestone and dolomite are abundant. Rich quarries of fine marble are worked; production in 1928 was valued at $59,866,040.

The United States census of manufactures ,1927, reported 2,355 establishments (2,349 in 1925, with 119,019 employees (116,599) earning $105,488,817 ($101,242,839) and a product valued at $550,372,126 ($552,824,044). The leading industry is the manufacture of cotton goods, 68 mills with 24,825 employees earning $15,927,634 and an output valued at $80,833,617 ($85,982,623). The nine steel and rolling mills with 7,473 employees earning $11,910,770 had an output valued at $73,487,368 ($74,738,760 in 1925); 12 blast furnaces with 4,157 employees earning $4,574,023 had an output valued at $49,455,982 ($54,331,148); and 34 cast-iron pipe foundries with 10,840 (11,621) employees earning $10,619,902 ($12,404,887) had an output valued at $42,590,922 ($46,184,691). The production of coke was valued at $25,510,423 ($27,240,458) and of lumber, timber and planing-mill products, $67,140,249 ($71,467,832).

Practically all of the State's foreign commerce passes through Mobile. The channel from the docks to the Gulf is thirty miles long and thirty feet deep. The State owns the port terminal railway connecting all the railway lines entering Mobile with all the docks. Exports in 1928 from this port totalled $41,492,772.

Railroad mileage, in 1928, was 5,434.

A feature of Alabama is the high proportion of Negro population. Two of each five persons are black. Alabama is intensely American, there being only about 20,000 foreign-born. In some portions the Negro population is about 80 per cent. of the total. The rate of illiteracy, by the 1920 census, was 16.1 per cent. of the total population. Of the 1,038,692 native white, 65,394 were illiterate, or 6.3 per cent.; and of the 674,004 Negroes, 210,690 were illiterate, or 31.3 per cent. Excellent progress, however, is making toward a higher standard, the percentage of illiterates having been reduced from 22.9 in 1910. Expenditures on schools in 1926 were $17,304,956.

A famous agency for this improvement is the Tuskegee Normal and Industrial Institute, founded in 1880 by the late Dr. Booker T. Washington, a Negro acknowledged as leader of his race. The enrolment was 1,736. The enrolment at the University of Alabama, a State endowed and controlled institution, at which only whites matriculate, was 3,000, with 2,000 students in other higher educational institutions.

The convict leasing system came to an end by law on June 30, 1928 when 800 negro convicts were transferred from the coal mines to state farms and road work.

Alabama has neither a State income nor a State inheritance tax; both are prohibited by the Constitution.

ARIZONA.

Area, square miles ..... *113,956* ..... *5th in rank*
Population, 1920 ..... *334,162* ..... *46th in rank*
Population, 1928 (est.) ..... *474,000* ..... *4.1 to sq. m.*
Wealth, 1923 (Census est.) *$1,314,291,000*

Whereas Alabama has 49.5 persons and Massachusetts 509 to the square mile, Arizona, a mountain State, has 4.1—and of the 334,162 of population, (1920), there are 60,325 Mexicans, which fact, together with the warm climate and the ease of life there, made Arizona one of the picturesque States in the frontier days.

It is situated in Southwestern United States, west from New Mexico, east from California, and south from Utah and Colorado, and is on the boundary between the United States and Mexico.

Arizona prides itself on being a man-made State. Vast reaches of arid and semi-arid lands, useless before irrigating water was turned on, have been made highly productive. Agriculture has greatly increased, and new irrigation projects promise further enrichment. The topography is broken, being mountainous in portions of every section; the northern plateau is 4,000 to 7,000 feet in altitude, and the southern from 500 to 2,500. On the broad plains and mountain sides livestock graze, and through the valleys the irrigating waters are led. Long staple cotton has been developed as a principal crop, other products being wheat, corn, barley, oats, hay, potatoes and immense quantities of sub-tropical fruits. Dates thrive.

The citrus industry is rapidly growing in importance, grapefruit trees covering 8,750 acres in the Salt River valley in 1929.

Mining is extremely important. Copper mines in the State are among the greatest in the world, the most famous being the United Verde. In 1928 the smelter output was 735,632,406 pounds, valued at $107,497,572. Utah being second and Montana third.

Gold production in 1928 was 190,000 ounces valued at $3,930,000 (207,064 ounces in 1927 and 234,011 in 1926). Silver production was 6,943,000 ounces in 1928, valued at $4,062,000, and total value of all mineral products in 1928 was $116,462,000.

The United States census of manufactures, 1927, reported 300 establishments (294 in 1925), with 8,967 employees (9,127) earning $12,132,957 ($11,506,159), and the product valued at $117,624,434 ($138,781,477). The leading industry is the smelting and refining of copper, 8 smelters with 2,964 employees earning $4,325,430 and an output valued at $82,745,917 ($106,926,324 in 1925 and $95,945,565 in 1923).

Railroad mileage, in 1928, was 2,496.

Apart from the generally picturesque character of the State, tourists are attracted by the Roosevelt Dam, supplying irrigating waters for the Salt River Valley, one of the two greatest dams in the world, and the Grand Canyon of the Colorado River, one of the scenic wonders of the world, 200 miles long and averaging 12 miles wide and one mile deep.

Livestock raising lends both economic value and the element of the picturesque to life in Arizona, the industry having caused the development of many very large ranches, some of which comprise hundreds of thousands of acres, with the "cowboy" an essential factor.

Of the land area of the State, about 72,838,400 acres, 11,065,291 were taken up by 10,802 farms (census of 1925). The value of the land and buildings was $194,048,696, of implements, $6,928,123, and of livestock $43,106,566. The number of cattle was 1,068,727; sheep 1,163,905; and horses 111,601. Of the land 578,246 acres were crop land and 10,101,361 pasture. Two-thirds of the farms were irrigated

in 1920. Cotton grown on 202,000 acres in 1928 yielded 149,435 bales.

On the lower areas the surface of the earth is low, having formed the bed of a primal sea in which are immense deposits of the several kinds of salts, such as potash, nitrates and others, of great potential value.

Illiteracy among the native whites is low—2.1 per cent.—while among the foreign-born, mostly Mexicans, it is 27.5.

Tucson is the seat of the University of Arizona, and Flagstaff has the Lowell Observatory. Phoenix, the capital and largest city, is the centre of the richest agricultural district, the Salt River Valley.

Arizona has a large population of Indians, 32,989 (1920), mostly Apaches, Navajos, Hopis, on reservations, a number exceeded only in Oklahoma. They occupy 18,653,014 acres, valued at $61,843,402, and with an income of $5,482,039.

ARKANSAS.

Area, square miles ..... *53,335*.....*26th in rank*
Population, 1920.....*1,752,204*.....*25th in rank*
Population, 1928 (est.)...*1,944,000*....*36.4 to sq. m.*
Wealth, 1923 (Census est.).....*$2,599,617,000*

Arkansas (pronounced Ar-kan-saw) is of the Old South, situate inland, in the West South Central group, Missouri bounding it on the north, Tennessee and Mississippi on the east, Louisiana on the south, and Texas and Oklahoma on the west. The Mississippi River, down which much of its traffic flows, forms the entire Eastern boundary. Its topography is mostly level, but in the west rise the mountainous elevations of the Ozarks.

Agriculture is the chief source of wealth. The 1920 census gave $340,813,256 as the value of all crops; lumber and timber products are next with $84,000,000, and there is considerable coal, lead and manganese mining.

Of the 33,616,000 acres 15,632,439 are farm land in 221,991 farms with 7,323,199 acres in crops as returned by the census of 1925, land and buildings valued at $540,727,221, implements at $31,254,570, and livestock at $56,864,560.

Diamonds were discovered in Murfreesboro, Pike County in 1906, and over 10,000 have been found, the best weighing 40.23 carats.

Arkansas produced in 1928. 1,245,982 bales of cotton from 3,681,000 acres. The crop in 1927 suffered severely from the Mississippi flood, 3,048,000 acres yielding but 999,983 bales. The yield in 1926 from 3,790,000 acres was 1,547,932 bales.

Petroleum output in 1928 was 32,295,000 barrels, in 1927, 40,179,000 barrels.

The United States census of manufactures, 1927, reported 1,146 establishments (1,257 in 1925), with 40,032 employees (43,977) earning $35,288,168 ($37,538,492), and a product valued at $182,750,871 ($195,208,015). The leading industry is the manufacture of lumber and timber products (including furniture), 342 establishments with 22,583 employees earning $18,579,315 and an output valued at $64,765,117.

Wheat, corn, oats, potatoes, white and sweet, hay, tobacco and fruits are produced. Roses are grown extensively for the making of perfumes.

The State is richly endowed with forest wealth, every sort of tree which grows in the temperate zone abounding, with much of the rapidly-disappearing hardwood which forms an important article of Arkansan commerce.

Railroad mileage, in 1928, was 4,946.

The Negro represents one-third of the population, with the inevitable consequent illiteracy of 21.8 per cent. among them, that of the native-born whites being 4.5, and the average for the whole population, 9.4. As in all Southern States, keen effort is exerted to improve this matter, average illiteracy having fallen from 12.6 per cent. in 1910.

Likewise, as in most of the Southern States, the Baptist Church comes first with communicants, the Methodist being second, and Roman Catholic and Presbyterian following in that order.

The Southern custom is followed by providing separate schools for black and white, about 500,000 pupils attending. Besides the State University at Fayetteville, with 1,500 students, there are several church colleges with about 750 students each.

Expenditures for public schools in 1926 was $13,965,866.

The Hot Springs, a national reservation in the western part of the State, are world famed and support thousands who attend the wants of tourists.

CALIFORNIA.

Area, square miles ..... *158,297*.....*2d in rank*
Population, 1920.....*3,426,861*.....*8th in rank*
Population, 1928 (est.)...*4,556,000*....*28.8 to sq. m.*
Wealth, 1923 (Census est.).....*$15,031,734,000*

California, in the Pacific group, occupies about one-half of the Pacific coastline of the United States; is bounded on the north by Oregon, on the east by Nevada and Arizona, and on the south by Mexico. It is 1,000 miles long. Its topography is most varied and its climate as well. Every phase of surface character is presented, and the geological peculiarity of the North and South American Continents is here seen—the aged mountain ridge that runs from the Arctic Circle southward through the States into Mexico parallel to and near the seashore. There is much plains land, too, and every kind of soil that marks the temperate and sub-tropical zones, with practically all climates which are found in such regions. The State has no navigable rivers, except the lower Sacramento, but abundant waters in smaller streams enable immense irrigation of lands otherwise virtually useless. California is the leading State in irrigation, its enormous fruit, garden and much of the grain output being attributable largely thereto.

Californians especially pride themselves in the climate, which has such fame as to attract visitors from all corners of the earth, particularly in the winter. For their accommodation many luxurious hotels are maintained. There are thousands of miles of excellent roads on which the State has spent $60,000,000. California is second in per capita ownership of motor cars.

Railroad mileage, in 1927, was 8,288.

Agriculture is enormously developed. There are about 100,000,000 acres in the State, and the farms, which include orchards and vineyards, take up 29,365,667 acres, according to the 1920 census, of which 11,878,339 are improved, some highly so, the value of all being $3,431,021,861. There are 4,219,040 acres, 67,391 farms, now under irrigation.

Literally every product of the temperate and sub-tropical zones is grown there—all cereals, forage crops, vegetables, fruits and nuts. Crops in 1920 were valued at $589,757,377; dairy products, $276,424,216; livestock, $204,378,445, with other large agricultural production. California produced 90 per cent. of the country's grape crop in 1924, the crop being valued at $54,000,000 and 57,692 carload shipments were made. Shipments in 1919, the last pre-Volstead year, totaled 21,605 carloads. Shipments in 1925 totaled 84,399 carloads (1,097,187 tons) and in addition 15,524 carloads of table grapes were shipped east.

The capital invested in the grape-growing industry in 1929 was estimated at $336,000,000 with 656,000 acres in vineyards.

California produces about one-third of the total crop of pears, also of peaches, in the United States. In 1925, 8,765 car lots of pears and 12,785 car lots of peaches were shipped.

From 218,000 acres 172,230 bales of cotton were produced in 1928.

The United States census of manufactures, 1927, reported 10,066 establishments (9,635 in 1925), with 262,816 employees (249,529) earning $378,321,461 ($350,792,214), and a product valued at $2,593,247,224 ($2,442,183,042). The leading industry is petroleum refining, there being 54 refineries, with 7,586 employees earning $14,314,173, and the product valued at $356,910,953 ($369,581,955). The 350 canning and preserving establishments, for fruits, vegetables, sea food, etc., with 27,707 employees earning $25,194,824 had an output valued at $201,895,364 ($181,272,830, excluding sea food); 94 slaughtering and meat packing establishments (wholesale), with 3,647 employees earning $5,795,544 had an output valued at $124,546,033 ($115,787,976); 496 lumber, timber and planing mills with 33,582 employees earning $46,287,451 and an output valued at $129,168,177.

Motion picture production in 1927 had 78 studios with 6,614 employees earning $15,513,665 had an output valued at $101,044,521, as compared with 72 studios in 1925, employing 3,722 earning $8,783,692 from an output valued at $62,821,194.

Enormous shipping is carried on. The value of exports from the port of Los Angeles in 1928 was $141,898,579 and in 1927, $120,573,450; the value of imports for 1928, $54,401,013 and for 1927, $47,139,691. The value of exports from San Francisco in 1928 was $201,267,790 and in 1927, $174,554,589; mports for 1928, $198,289,682; in 1927, $199,998,613.

California was fourth in rank in the value of its exports in 1928, $345,436,658 ($309,544,746 in 1927).

Mining interests are extensive, in gold, silver, copper, lead and quicksilver, California in 1926 holding third rank in mineral production, the value being $523,352,259 ($496,923,376 in 1925).

California yielded first place in the production of petroleum to Oklahoma in 1927. The output was: 1928, 231,982,000 barrels; 1927, 230,752,000; 1926, 224,673,000; and 1925, 232,492,000. The output of natural gas in 1926 was 204,915,000 M. cubic feet, valued at $35,495,000. The State produces all the borax mined in the country.

The Sacramento River, navigable for 180 miles transports 1,000,000 tons of freight and over 100,000 passengers annually.

The forests, in common with all States of the Pacific group, are very extensive, comprising every variety of tree which grows north of the purely tropical zone. Coniferous trees are most numerous. The giant redwood groves are the destination of many tourists. The Sequoia trees number 1,156,000, and in Sequoia National Park there are 12,000 exceeding 10 feet in diameter, some of which are older than the pyramids. California no longer is an exporter of ordinary lumber, being compelled to buy from Oregon and Washington.

It is a State of romance in history. Acquired from Mexican political control in 1846, gold was discovered in 1848, and in 1849 the most remarkable "gold rush" ever known began, it being said that the gold produced thereafter enabled the United States to withstand so well the economic strain of the Civil War, which began in 1861. The gold output in 1923 was $13,465,000; silver, $3,025,682; in 1924, gold, $13,041,500; silver, $2,262,596; in 1925, gold, $13,042,200; silver, $2,130,792; in 1926, gold, $12,024,800; silver, $1,234,244, in 1927, gold $11,679,200; silver, $883,279; in 1928, gold, $10,609,800.

Illiteracy is low—3.3 per cent. in 1920; it was 3.7 in 1910. Of the 2,075,467 native whites, only 8,747, or 4-10ths of 1 per cent., were illiterate, illiteracy among the foreign-born being 10.5.

The Japanese population in 1920 was 71,952, an increase of 30,596 in ten years; and of Chinese, 28,812, a decrease of 7,436.

Los Angeles, by repeated annexation of territory, is now the largest city in area in the United States—442.5 square miles (one-third the size of Rhode Island), and claimed a population by local estimate for January 1, 1929, of 1,427,480.

The State has three universities—Leland Stanford Jr., the University of California, which matriculates about 19,000; and the University of Southern California. There are many colleges. The Lick observatory is one of the most important in the world.

One of the points of interest is the motion picture colony at Hollywood, a suburb of Los Angeles. The atmosphere is so clear that motion pictures may be taken on about 350 days of the year, while the topography and flora afford most varied "locations." Yosemite National Park is a scenic wonder. The retention of the Spanish influence in architecture, the climate and the profusion of vegetation where water flows on the lands attract many tourists.

The Roman Catholic Church leads all religious bodies, the bequeathal to later generations of the work done by the Catholic missionaries who established a string of 26 missions a day's march apart from the Mexican line to upper San Francisco Bay.

COLORADO.

Area, square miles ..... *103,948* ..... *7th in rank*
Population, 1920 ..... *939,629* ..... *33d in rank*
Population, 1928 (est.) ... *1,090,000* ... *10.4 to sq. m.*
Wealth, 1923 (Census est.) *$3,229,412,000*

Colorado, one of the mountain States, is bounded on the north by Wyoming and Nebraska, on the east by Nebraska and Kansas, on the south by Oklahoma and New Mexico, and on the west by Utah.

Its topography is varied, being plains lands in the east and south, but rising to the elevations of the Rocky Mountain range in the west, 40 peaks towering to an altitude of 14,000 feet. The Denver & Rio Grande Western Railroad, noted for its scenic beauty, crosses Marshall Pass at an altitude of 10,856 feet, and Tennessee Pass, near Leadville, has an altitude of 10,240.

The Moffat double-track railroad tunnel, 32,150 feet long under James Peak at an altitude of 9,100 feet was begun, Oct., 1923, and formally opened Mar. 1, 1928. It opened up a great territory lying west of the Continental Divide.

Soils vary from arid, when non-watered, to productive. Irrigation is extensive, and has lifted agriculture to first place in the State, ahead of mining and livestock, which come next. The 1920 census showed all crops valued at $181,065,239, even mineral production, $51,217,038, being behind, although the State abounds in mineral wealth, and development is rapid, with petroleum abundant and production great. Minerals produced are gold (second in output in the country), in 1926, $7,078,033; silver, $2,935,372; copper, zinc, lead, manganese, gypsum; and the State is first in radium output and second in tungsten. Coal output in 1928 was 9,877,000 tons.

Petroleum production in 1928 was 2,772,000 barrels; 1927, 2,787,000. There are 900,000 acres of oilshale land.

The United States census of manufactures, 1927, reported 1,483 establishments (1,414 in 1925), with 32,001 employees (31,958) earning $43,193,765 ($43,002,344), and the product valued at $278,221,431 ($278,692,486). The leading industry is slaughtering and meat packing, (wholesle), with 25 establishments, with 1,246 employees earning $1,552,897, and the product valued at $30,538,016.

Sixteen beet sugar refineries had an output valued at $41,165,742 ($30,165,810 in 1923).

The western ranges abound in forage grasses, on which large numbers of food animals and horses live and produce vast annual wealth.

The climate is warm in summer and cold in winter, but dry, and stimulating. It is said that the sky is absolutely cloudless in Denver (the capital and chief city, 5,280 feet above the sea) on 300 days of the year. These qualities have attracted many persons desiring relief from tuberculosis.

Railway facilities are plentiful, and freight tonnage and tourist travel are heavy. The rapidly improving highways are covered by many trans-continental automobile parties, which, en route, seek the local attractions of mountain and valley, chief among which are the mineral springs at Colorado Springs and everywhere are unusual conformation and coloration. The State has developed a wonderful highway through the reserved State Park, which is scenic and diverse in interest. The Royal Gorge of the Arkansas, through which the Denver & Rio Grande runs, is justly famed.

Railroad mileage, in 1927, was 5,077.

Illiteracy is low at 3.2 per cent. of the whole population in 1920; native white, 1.4 per cent. and foreign-born, 12.4 Higher education is served by the State University at Boulder, University of Denver, State Agricultural College at Fort Collins, State Teachers' College at Greeley, the State Normal School at Gunnison, and the State School of Mines at Golden, which has advanced far in mineralogic science.

CONNECTICUT.

Area, square miles ..... *4,965* ..... *46th in rank*
Population, 1920 ..... *1,380,631* ..... *29th in rank*
Population, 1928 (est.) ... *1,667,000* ... *335.7 to sq. m.*
Wealth, 1923 (Census est.) *$5,286,445,000*

Connecticut, one of the Original Thirteen States of the Union, is situate in New England; bounded on the south by Long Island Sound, on the east by Rhode Island, on the north by Massachusetts, and on the west by New York. It was settled early in the seventeenth century by the Dutch from New York, then known as New Amsterdam, and by Puritans from Massachusetts at Hartford, in 1635. In 1639 it adopted a written constitution, confirmed by a charter from King Charles II. in 1662, and replaced in 1818 by a State constitution.

Connecticut's surface is broken, there being ridge after ridge, with verdant valleys between. Toward the shores of the Sound, the land is generally flat, but it rises to about 2,000 feet of altitude in the northwestern part, where the Berkshire Hills begin and extend northward into Massachusetts and Vermont. Originally, the entire State was heavily wooded with all trees known to the temperate zone, hardwood and coniferous varieties abounding. Lumbering has reduced the timber supply materially. The water supply is large for industrial uses. The Connecticut River and the Housatonic are the principal streams, their valleys immensely productive. Tobacco is a very great source of wealth, 29,346,000 pounds being grown on 21,900 acres in 1926, and 28,886,000 pounds from 24,000 acres in 1927, all of the highest grade. In 1920 the value of all crops was $44,472,644.

The State is now intensely industrial, although earlier it was agricultural. The 1920 census indicated that 62.7 per cent. of the people live in towns of 10,000 or more population, and that, including smaller towns, 85 per cent. live urban lives, practically every town having industries. Connecticut presents an unusual contrast in the presence, especially in the western part, of hundreds of beautiful country homes of New York and other city folk, alongside of towns and villages in which industry flourishes.

Besides its pre-eminence in manufacturing industry, Connecticut has in the capital, Hartford, also the insurance centre of the United States.

The United States census of manufactures, 9927, reported 2,877 establishments (3,062 in 1925), with 240,806 employees (242,362) earning $304,503,907 ($301,199,566), and a product valued at $1,284,738,563 ($1,274,951,562). The leading industry is the production of brass products, with 67 establishments with 20,442 employees earning $28,537,673 and the product valued at $152,389,739 ($156,1 41,974). The 175 foundry and machine-shops, with 16,799 em-

ployees earning $24,206,125 had an output valued at $86,168,291 ($83,7219,59); 70 electrical machinery, apparatus and supplies shops with 14,500 employees earning $16,998,723 with an output valued at $75,926,216; 57 hardware factories with 18,201 employees earning $22,298,701 had an output valued at $68,012,785; 54 cotton goods mills, including small wares, with 15,372 employees earning $16,105,660 had an output valued at $62,657,873 ($65,740,674); 35 silk mills with 9,183 employees earning $11,400,520 had an output valued at $47,498,321 ($55,600,718); 29 woolen mills with 5,938 employees earning $7,265,284 had an output valued at $27,841,649 ($32,747,738); 11 worsted goods mills with 3,055 employees earning $4,397,185 had an output valued at $27,841,649 ($17,356,835); 34 fur-felt hat factories with 5,548 employees earning $7,998,771 had an output of $37,758,465 ($30,789,819); 17 corset factories with 3,138 employees earning $2,804,576 had an output valued at $15,198,789; six typewriter factories with 8,721 employees earning $10,700,751 had an output of $26,135,205. The output of needles and pins and hooks and eyes was valued at $8,481,852.

In early days shipping was important, but is to-day relatively negligible, excepting for coastwise water-borne traffic. The prevalence of good roads has enabled the development of many motor truck lines, which haul immense quantities of goods and materials to market without utilizing the railway for any part of the haul, while the same good roads have multiplied automobile tourist travel until the State accommodates very heavy vehicular traffic.

Railroad mileage, 1927, was 969.

Before the influx of foreigners, illiteracy was almost nil. It is now 6.2 per cent. for the State; 4-10ths of 1 per cent. for the native whites, and 12.8 for the foreign-born. The whole of New England was shown by the 1920 census to be 4.9 per cent. illiterate, and the United States 6 per cent.

Yale University, at New Haven, founded in 1701, has grown to be a world-famed institution, with 5,000 students. Wesleyan University at Middletown (now a city of 22,129), Trinity College at Hartford, and Connecticut College for Women at New London are also important. About 270,000 are enrolled in the public schools, or about 27 for each 108 of population.

DELAWARE.

Area, square miles . . . . . *2,370* . . . . . *47th in rank*
Population, 1920 . . . . . *223,003* . . . . . *47th in rank*
Population, 1928 (est.) . . . . *244,000* . . . *102.9 to sq. m.*
Wealth, 1923 (Census est.) *$625,765,000*

Delaware, one of the thirteen Original States, next to Rhode Island the smallest, lies in the South Atlantic group, bounded on the north by Pennsylvania, on the east by New Jersey, Delaware Bay, and the Atlantic Ocean, on the south by Maryland, and on the west by Maryland and Pennsylvania. It is 110 miles long with an extreme breadth of 35 miles. The land is low lying, one-twentieth being marshy.

It is essentially agricultural, 85 per cent., 944,511 acres, of the 1,500,000 total State acreage, being in farms, and 653,052 improved, with corn and wheat the chief products, and also much fruit and tomatoes, Delaware being the second State in tomato packing, and famous for its peach crop. Its flat, alluvial soils, practically unbroken, yielded, Census of 1920, $23,058,906, or almost exactly $100 per capita for the 223,000 of population. Oysters and fish are taken extensively.

Relative to the size and population, Delaware has large manufacturing interests. Wilmington, at the northern tip of the State, near Philadelphia, with 119,888 persons, about one-half the population, has most of the industries. Leather and knitting lead. The large parent plant of the duPont powder works is in the valley of the Brandywine.

The United States census of manufactures, 1927, reported 446 establishments (419 in 1925), with 21,324 employees (20,704) earning $25,222,182 ($25,072,303), and a product valued at $129,809,735 ($125,406,332).

Wilmington is the chief port, ship traffic passing up the Delaware River. A Government canal connects Delaware and Chesapeake Bays and was converted in 1927 into a sea-level canal. A concrete motor highway completing a trunk line through the State was built at a cost of nearly $4,000,000 by Gen. T. Coleman duPont as a gift to the State.

Railway mileage, 1927, was 332.

About 38,000 attend the public and other schools, and the percentage of illiteracy for the State was, in the 1920 census, 5.9; native white, 1.8, and 19.1 for the Negro, who totals 15 per cent. of the whole population. Educational progress is being made as proved by the 1910 illiteracy percentage, 8.1, reduced materially by 1920. Ability to read and write are requisites for voting.

Delaware is the only State to retain the whipping post as a punishment for criminals.

DISTRICT OF COLUMBIA.

Area, square miles . . . . . *70* . . . . . *49th in rank*
Population, 1920 . . . . . *437,571* . . . . . *42d in rank*
Population, 1928 (est.) . . . . *552,000* . . . *788.5 to sq. m.*
Wealth, 1923 (Census est.) *$1,697,270,000*

The District of Columbia is the seat of the Federal Government of the United States. Its area was originally 100 square miles taken from the sovereignty of Maryland and Virginia, Virginia's portion south from the Potomac in 1846 was ceded back to that State. It lies on the west central edge of Maryland on the Potomac River, opposite Virginia. It is in the South Atlantic group. The District is co-terminous with the City of Washington.

Almost the entire activity is governmental, there being about 65,000 civil service employees in the city. Industrial activity is mostly output for local consumption. Navigation is carried on via the Potomac River, which is a branch of Chesapeake Bay. The river was naturally capable of accommodating large vessels, and has been improved in depth and otherwise, so that heavy war or commercial craft may pass. Washington is the chief railway stopping point en route between North and South. The Union Station in Washington is one of the most efficient in the world for passenger transportation handling, also one of the finest architecturally. Railroad mileage, 1927, was 36.

The distinctive feature of the city municipally is the fact that the government is by the Congress directly as to legislation, and by Executive Commissioners, named by the President of the United States, confirmed by the Senate. Each House of the Congress has a Committee on District of Columbia, and taxation current and for improvements is chiefly borne by the tax payers of the district. The district stood sixteenth in the list of States in payment of income taxes in 1923, and first in percentage (15.92) of those filing returns to the population; and of per capita net income reported ($597.99).

Residents of the District of Columbia, as such, do not enjoy the franchise and do not vote on either national or municipal matters. Many persons residing in the District of Columbia are appointed to governmental positions through the Civil Service Laws and when accepting such positions, they do not give up their voting residence in the States. If they retain this voting residence, the laws of the various States permit them to vote as residents of such states. Neither they, nor any other persons residing in the District of Columbia however, vote as such residents on any local or national questions.

Physically, the distinctive feature is the excellent town planning done there by Major Pierre l'Enfant, French engineer, at the instance of George Washington. He, drawing on French history, laid out the city with wide diagonal avenues, traversing streets planned on the "gridiron" method with "circles" at the chief intersections.

The Capitol with its white dome dominates the city. The Mall, to be flanked in the future by administrative buildings beyond the Smithsonian Institute and the National Museum, runs westward to the lofty Washington Monument due south from the White House and its park; and beyond to the Potomac River and the beautiful white marble Lincoln Memorial designed by Henry Bacon and enshrining the statue of the Emancipator by Daniel C. French.

Congress by recent acts has approved a comprehensive program for new and needed public buildings calling for the expenditure of $115,000,000. In 1929 the administration building of the Department of Agriculture was completed at a cost of $2,000,000; the Bureau of Internal Revenue ($10,000,000), and the huge Department of Commerce building, 1,050 feet long and 325 feet wide, ($17,000,000), were under construction; and an Archives building ($8,750,000), a home for the United States Supreme Court, ($10,000,000), and an addition to the House office building ($7,500,000) were authorized for immediate construction. Symmetrical development is planned.

The city plan is overseen by the Commission of Fine Arts, Charles Moore of Detroit, Chairman. Other notable buildings include the Pan-American, the Red Cross, the D. A. R. Continental Hall, Cochran Art Gallery, the U. S. Chamber of Commerce, the Scottish Rite Temple, the Freer Art Gallery and the Episcopal Cathedral of St. Peter and St. Paul now being built on Mount St. Alban.

Across the Potomac, reached by the new Key Memorial Bridge (1,452 feet long), is the Arlington

National Cemetery. Here is a chapel and open-air marble amphitheatre seating 5,000, and the Tomb of the Unknown Soldier.

Washington streets are well shaded. Rock Creek Park is noted for its natural beauties. The Zoological Garden and the Botanical Garden are also famous.

Many wealthy Americans in late years have erected palatial dwellings in Washington, and there are many fine country estates nearby, with desirable suburban centres on all sides. The Census of 1920 returned 204 farms in the District.

The United States census of manufactures, 1927, reported 503 establishments (538 in 1925), with 9,519 employees (9,753) earning $15,668,655 ($15,320,067) and a product valued at $90,389,537 ($83,576,826). The leading industry is the printing business with 173 establishments with 2,391 employees earning $4,477,690 and the output valued at $29,959,154 ($20,996,472 in 1925).

Educationally, the District of Columbia is far advanced. The higher institutions are Georgetown University (Catholic), George Washington University, the Catholic University of America, the National Methodist University, Howard University for Negroes, and two normal schools for the training of teachers.

Illiteracy in the District is low at 2.8 for all; native white, 3-10ths of one per cent., Negro, 8.6. The Negro population is 25 per cent. of the total. About 6 per cent. are foreign-born.

In addition to the great Library of Congress, there are in the departments and institutions of the city about 200 special libraries of great diversity and value.

FLORIDA.

Area, square miles ..... *58,666* ..... *21st in rank*
Population, 1920 ..... *968,470* ..... *33d in rank*
Pop., 1925 (State Census) ..... *1,263,549* ..... *21.5 to sq. m.*
Population, 1928 (est.) ..... *1,411,000* ..... *24.0 to sq. m.*
Wealth, 1923 (Census est.) *$2,440,491,000*

Florida, a South Atlantic State, discovered Easter Sunday, March 27, 1513, by the Spaniard, Ponce de Leon, in his search for the "fountain of perpetual youth," is the southeasternmost point of the United States, bounded on the north by Georgia and Alabama, on the east by the Atlantic Ocean, on the south by the Straits of Florida, and on the west by the Gulf of Mexico. Its coast line is 3,751 miles.

Florida is of coral formation, with no high elevations, and in the southern part are vast swamps, the Everglades, which are being drained and provided with roads to make available large potential agricultural wealth. The drainage district embraces 4,927,759 acres of which one-quarter is owned by the State and is valued at $105,000,000.

Less than 1 per cent. of the area is forested, but from it comes about one-third the national supply of "naval stores." In the crop year 1927-28, 343 establishments produced 10,275,713 gallons of turpentine and 711,852 500-lb. barrels of rosin valued at about $13,500,000. Employees numbered 13,237.

Coastwise, the vegetation is sub-tropical and in the interior is a coniferous tree-clad, sandy region where citrus fruits have been developed highly.

The sub-tropical products prevail in fruits which in 1928 included oranges valued at $25,800,000 and grapefruit valued at $20,400,000, and vegetables, $33,500,000, while the staple crops brought $27,306,000. Only 6,000,000 acres were in farms in 1925, and only 2,500,000 acres were being plowed.

At present and future source of great wealth are the natural deposits of phosphatic rock, whence normally, pre-war, more than 1,000,000 tons were exported for foreign use as land fertilizer, and much was used domestically. It produced 2,821,961 long tons worth $9,324,306 in 1928. A 60-acre deposit of travertine was discovered in 1929.

The United States census of manufactures, 1927, reported 1,912 establishments (1,863 in 1925), with 61,219 employees (66,204) earning $56,671,574 ($65,780,109) and the product valued at $218,790,152 ($267,009,159.) The leading industry is lumber and timber production including planing mill products, with 256 mills with 16,576 employees earning $13,843,026 and the output valued at $39,869,986 ($64,346,386). The 87 cigar and cigarette factories with 11,174 employees earning $12,323,259 had an output value of $39,817,657.

The State is penetrated by several rivers, chief of which is the St. John, up which steamers ply for 150 miles. It has 30,000 lakes.

Railroad mileage, 1928, was 5,918.

Florida is the resort of very large numbers of winter tourists, who spent, it is estimated, $250,000,000 in the winter of 1924-25.

The State Census of 1925 showed that 68% of the population was white.

The illiteracy reported in the 1920 census was 9.6 per cent., against 13.8 in 1910, indicating remarkable progress in popular education. Native white illiteracy was 2.9, and of Negroes, 21.5. Public school enrolment was 196,405, and there are the John B. Stetson University at De Land, the University of Florida at Gainesville, Rollins College at Winter Park, and the State College for Women at the capital, Tallahassee.

Expenditure for public schools in 1926 was $30,089,478.

Florida experienced a great boom in 1925-26. It is estimated $400,000,000 was spent in 1925 in building; $50,000,000 in new railway trackage and equipment; $7,500,000 in making 286 miles of new State highways; and gross banking resources more than doubled, reaching $943,272,977 on Dec. 31, 1925. The hurricane of Sept. 18, 1926, which swept the East Coast killed 372, injured 6,281, made 17,884 families temporarily homeless and caused a property loss of about $80,000,000, brought a severe depression.

The tropical hurricane that struck Florida Sept. 16-17, 1928, between Fort Lauderdale and West Palm Beach, causing great property damage there, also flooded the Lake Okeechobee district where the loss of life as estimated by the Red Cross was over 2,000, with 15,000 made destitute. The property loss exceeded $25,000,000.

The Mediterranean fruit fly appeared in 1929 and brought disaster to the citrus crop. Federal aid was immediately sent to help stamp out the pest.

The State constitution prohibits the levying of income or inheritance taxes.

GEORGIA.

Area, square miles ..... *59,265* ..... *20th in rank*
Population, 1920 ..... *2,895,832* ..... *12th in rank*
Population, 1928 (est.) ..... *3,203,000* ..... *54.0 to sq. m.*
Wealth, 1923 (Census est.) *$3,896,759,000*

Georgia, of the South Atlantic group was one of the Thirteen Original States. It is bounded on the north by Tennessee, North Carolina and South Carolina, on the east by South Carolina and the Atlantic, on the south by Florida, and on the west by Alabama.

Agriculture is very important. Of the total of 37,584,000 acres, 25,441,061 in 1920 were in farms, or 62.5 per cent.; and more than 13,000,000 actually improved, or about 32 per cent.

All crops, Census of 1920, were valued at $540,613,626, of which $69,720,000 was for cotton in 1,681,907 bales from 4,720,498 acres, Georgia then was the second cotton State, but in 1928 she had dropped to fourth with 1,029,499 bales from 3,728,000 acres. Crops are various—cotton, corn, oats, wheat, sugar cane; corn, the most important cereal, with 38,010,000 bushels produced in 1928.

The acreage devoted to tobacco was 122,300 in 1928, the yield being 84,387,000 pounds (59,088,000 in 1927). Peanuts yielded 340,200,000 pounds from 630,000 acres, valued at $14,969,000 in 1928.

Manufacturing has, however, passed agriculture in relative importance, as water power abounds.

The United States census of manufactures, 1927, reported 3,175 establishments (2,876 in 1925), with 154,168 employees (141,173) earning $108,118,193 ($99,210,003) and a product valued at $609,917,660 ($648,852,294). The leading industry is cotton goods, with 139 mills with 56,607 employees earning $36,908,790 and the output valued at $180,509,344 ($193,423,660). The 678 lumber mills, including planing mills with output, with 19,014 employees earning $11,254,711 had an output value of $45,296,954 ($55,334,281); 27 factories for manufacture of oil cake and meal from cottonseed, had an output of $27,998,981 ($21,925,257); 114 fertilizer plants had an output of $22,093,903 ($28,261,583); and four hard substitute factories had an output value of $22,011,424.

There were 3,052,474 active spindles and 62,049 active looms in the cotton mills in 1928.

The State has important mineral resources, coal, iron, manganese, gold and silver, not yet highly developed, and fisheries of oysters and other shellfish are considerable.

Transportation is highly developed, with abundant rail lines and large ocean shipping in and out from Savannah, chief port. Vessels up to 32 feet draft are accommodated at high tide across the bar, and 26 feet at all times.

Railroad mileage, 1928, was 7,072.

Negro population is 42 per cent. of the total, bringing up the percentage of illiteracy for the whole State to 15.3, that of native white being 5.4 and of Negroes 29.1. Illiteracy percentage in 1910 was 20.7. Of 2,895,832 population, there were, Census of 1920, 570,000 attending school. Ex-

penditure for public schools in 1926 was $17,357,622.

The Georgia School of Technology, with 2,000 students, and the University of Georgia are the largest institutions for higher education.

Atlanta, chief city and capital, is accounted one of the progressive cities of the South, and nationally holds high place in banking strength.

The lumber cut, mostly pine, 1927, was 1,201,008,000 feet, although production, as in most of the Southern States, is due soon to diminish to negligible quantities for exportation owing to the enormous areas of the originally large forested lands having been cut over. Naval stores production in 1927-28 from 614 establishments with 17,453 employees was valued at $18,065,937 and consisted of 15,060,761 gallons of turpentine and 953,923 500-lb. barrels of rosin, one-half of the United States production.

Okefonokee Swamp, in the southeastern corner, 400,000 acres, is, like the Everglades of South Florida, potentially rich for agriculture when drained.

IDAHO.

Area, square miles ..... *83,888*..... *12th in rank*
Population, 1920..... *431,866*..... *43d in rank*
Population, 1928 (est.)..... *546,000*..... *6.5 to sq. m.*
Wealth, 1923 (Census est.)..... *$1,533,961,000*

Idaho, of the mountain group, is situate west of the Rockies in the Pacific Coast region, bounded on the north by British Columbia and Montana, on the east by Montana and Wyoming, on the south by Utah and Nevada, and on the west by Oregon and Washington.

Its topography is mountainous, with broad level plateaus. It classes as of the irrigation States agriculturally, the lands when watered being exceedingly productive, fruit raising having been highly developed. Most of the plains lands which have not been reclaimed by irrigation remain unproductive, with considerable livestock thereon.

The Rocky Mountains form the northeastern boundary from the Yellowstone Park continued by the Bitter Root and Coeur d'Alene to Cabinet thence the line goes due north to Canada. All the drainage is west chiefly by the Snake River to the Columbia. Mount Hyndman, 12,078 feet, in the Sawtooth Range in Central Idaho is the highest peak. The Snake River rising in Wyoming flows through southern part of Idaho and north for 200 miles forms part of the western boundary between Idaho and Oregon and Washington. Its course is marked by many falls. The Salmon River, a tributary in the middle of the State, is navigable for flatboats for 400 miles and through one of the longest canyons in the world and one filled with game.

The climate is dry and stimulating, warm in summer and cold in winter.

Idaho is undeveloped, having large mineral resources, and much land yet to be covered with irrigation waters. The Federal Reclamation Service has already built several important irrigation projects, in addition to many private projects.

Mineral production in 1926 was valued at $31,752,821 ($31,611,166 in 1925) of which lead was 136,490 short tons valued at $21,838,417, and zinc 26,307 short tons valued at $3,946,102. Gold production was: 1927, $314,400; 1926, $261,300; 1925, $431,771; silver, 1928, $5,235,584; 1927, $5,062,527; 1926, $4,719,714; 1925, $5,373,947; and copper (smelter output) 1928, 2,336,654 pounds. 1927, 1,811,103; 1926, 1,171,262; 1925, 3,144,064.

The value of the agricultural yields, Census of 1920, was $126,495,111, there being thirty States that exceed it. Of the total of 60,000,000 acres, there were 42,106 farms, census of 1920, comprising 8,375,873 acres, of which 3,266,386 were irrigated. Varied crops were raised, wheat, 27,079,000 bushels; oats, 7,740,000; barley, 2,784,000; potatoes, hay, all sorts of vegetables.

The livestock industry is very great, the wool clip alone in 1920 being 21,702,000 pounds; sheep, cattle and horses abounding, cattle numbering 642,000.

Normally, almost a billion feet of lumber are cut. The forest wealth is large; white and yellow pine, larch, white fir and cedar supply activity to many mills. It is claimed that the sawmill at Potlach, Idaho, cutting 750,000 feet daily, is the largest in the world. Idaho pine is famous for ship and yacht masts.

The United States census of manufactures, 1927, reported 470 establishments (487 in 1925), with 13,513 employees (15,872) earning $18,970,643 ($20,698,119) and a product valued at $86,256,399 ($96,641,797). The leading industry is lumber and timber products, with 96 factories with 9,386 employees earning $12,887,588 and the output valued at $31,660,296 ($40,131,950). The 51 dairies had an output of $11,543,060 ($10,974,381); and 47 flour and grain mills, an output of $6,001,897.

Railroad mileage, 1927, was 2,915.

Only Iowa, with 1.1 percentage of illiteracy, and Nebraska with 1.4 per cent., show a better record than Idaho with 1.5; native white, figures of 1920 census, 3-10 of 1 per cent., foreign-born, 6.5. Educational institutions show an unusually large proportion in school—105,000 of the total State population of 431,866; or one for each four persons. Higher institutions are the University of Idaho at Moscow, the College of Idaho at Caldwell, and State normal schools at Lewiston and Albion.

Forty square miles, 150 miles southwest of Yellowstone Park, of a newly discovered volcanic field with 63 extinct craters and brilliantly colored frozen lava flows, was set aside May 2, 1924 as a National Monument, "Craters of the Moon." Forty-one square miles were added July 23, 1928.

ILLINOIS.

Area, square miles ..... *56,665*..... *23d in rank*
Population, 1920..... *6,485,280*..... *3d in rank*
Population, 1928 (est.)..... *7,596,000*..... *130.5 to sq. m.*
Wealth, 1923 (Census est.)..... *$22,232,794,000*

Illinois, the third most populous State of the Union, lies in the East North Central group, its northeastern corner touching Lake Michigan, the Mississippi River flowing along its western boundary line, the Ohio River along its southern end, and is bounded on the north by Wisconsin, on the east by Indiana, on the south by Kentucky and Missouri and on the west by Missouri and Iowa. It is intensely industrial, agricultural, mining, and foremost in water and rail transportation.

Illinois is almost uniformly level, being situate in a glacial moraine, and is alluvial in all parts, with a climate such as prevails in the whole of the Middle West. It is so level that a railway possesses one precisely straight line 100 miles long in which scarcely a dirt cut was necessary—a vast prairie, once largely wooded, now with but 10 per cent. of forest cover. With the exception of Iowa, no other State has so large a proportion of lands susceptible of cultivation.

It is provided with remarkable mileage of riverways, the Mississippi, the Ohio, and the Wabash, which skirts the southeastern corner. The Illinois River is the principal intrastate river. An artificial waterway is the important Chicago Drainage Canal, 40 miles from Chicago on Lake Michigan to Joliet on the Illinois River, a unique engineering device which supplies drainage out from the flat lake-coastal district around the city and the Chicago River, and really reverses the natural tendency to drain into Lake Michigan. Eventually, the canal will be extended by improving the Illinois River to the Mississippi, giving Chicago navigation from "the Lakes to the Gulf" of Mexico.

Traffic on the Great Lakes to and from Chicago (population, estd., July 1, 1928, 3,315,400), the second most populous city in the country, is attaining immense proportions, in general cargo as well as in ore brought from the Minnesota, Wisconsin and Michigan mines to the great works of the United States Steel Corporation in Gary, Indiana, a suburb of Chicago.

Although second to Texas, which has 16,151 miles, Illinois, in 1927, with 11,994 miles of railway has the heaviest railway transport tonnage in the United States, Chicago being the greatest railway centre in the world. To Chicago come all the great railway systems from the East and South and from Chicago radiate all the trains with central lines to the Pacific Northwest and California.

Illinois has 237,181 farms with 31,974,775 acres, and yet the industrial interest of Illinois far exceeds its agricultural. The 1920 census gave the State $864,737,833 value of all crops, and $3,250,000,000 value of manufactured products. Were the products of the Gary works included, as economically they should be, the value would be vastly more; while for the same reason, the immense Standard Oil and other steel working industries of the East Chicago-Indiana, district, should be added.

The United States census of manufactures, 1927, reported 14,711 establishments (14,104 in 1925), with 623,468 employees (622,127) earning $914,102,612 ($897,729,057) and the product valued at $5,386,003,235 ($5,317,635,887). Chief in value of output was slaughtering and meat packing, (wholesale), with 81 establishments with 29,609 employees earning $41,246,967 and output valued at $663,054,316 ($680,591,940). The 2,187 printing and publishing houses with 36,631 employees earning $69,507,058 had an output valued at $342,259,214.

The 44 steel mills and blast furnaces with 27,161 employees earning $46,050,879 had an output valued at $279,729,726; the 258 shops for electrical machinery with 34,626 employees earning $52,502,568 had

an output valued at $261,089,307; the 783 foundries and machine shops with 39,483 employees earning $62,248,281 had an output valued at $245,148,773; motor vehicles and parts (138 factories with 6,549 employees) had an output valued at $59,853,817; the 177 car construction and repair shops with 36,374 employees earning $55,992,276 had an output valued at $110,394,796, and the 25 car construction shops (exclusive of the repair shops) with 8,850 employees earning $15,057,840 had an output valued at $75,585,816; and the 46 agricultural implements shops with 17,811 employees earning $26,337,328 had an output valued at $102,206,815. The 771 clothing manufacturing establishments with 35,005 employees earning $46,818,563 had an output valued at $201,427,769.

Illinois ranked as the eighth state in value exports in 1928, $206,355,671; and in 1927, $208,045,111.

Pig iron production was: 1927, 3,466,203 long tons; 1926, 3,626,330; 1925, 3,604,255.

Everything appertaining to the temperate zone is produced on Illinois lands—all cereals, vegetables, fruits and livestock. The 1920 census gave Illinois corn production as 301,000,000 bushels, nearly 10 per cent. of the national crop; wheat, 65,675,000; oats, 123,960,000; and immense output of other crops. The Chicago Board of Trade is the principal grain dealing exchange in the country.

Bituminous coal underlies more than half the area of the State, Illinois ranking third in mineral output. Coal output in 1928 was 55,640,000 short tons and in 1927, due to the strike, 46,848,000 tons. The petroleum output in 1928 was 9,876,000 barrels; 1927, 7,024,000; 1926, 7,760,000.

The 1920 census showed 1,116,099 pupils and students in all educational institutions reporting, about one in each six persons. Besides a very extensive public school system, there are 29 colleges and universities, and five State normal schools for training of teachers. The most prominent universities are the University of Illinois at Urbana, 11,083 students; the University of Chicago (endowed with more than $30,000,000 by John D. Rockefeller), 12,745; Northwestern University at Evanston, 8,010; Loyola University at Chicago, 3,000; James Milliken University at Decatur, 1,053.

Illinois shows 3.4 per cent. of illiteracy, Census of 1920, native white, 8-10 of 1 per cent., foreign-born, 11 per cent., and Negro (of whom there has been a remarkable influx induced by the late war demand for labor), 6.7 per cent. Of the 6,485,280 of population, Census of 1920, native-born whites were 5,092,382; foreign-born, 1,206,951; per cent. of native 78.5; foreign, 18.6; Negro, 2.8. Chicago is the chief Polish centre of the country, with a large percentage of Jews and all classes of immigrants.

Tourists find a wealth of art centres in Chicago; such as the Field Museum and the Chicago Museum of Art, with many art schools. Chicago is a great national convention resort.

Chicago's park and boulevard system, as planned, is perhaps the most ambitious ever conceived by any city in the world, with three large parks already developed, connected by a wide boulevard along the lake front cutting through the heart of the city, the whole laid out by some of the greatest city planning and landscape architects in the world.

INDIANA.

Area, square miles ..... *36,354* ..... *37th in rank*
Population, 1920 ..... *2,930,390* ..... *11th in rank*
Population, 1928 (est.) ..... *3,176,000* ..... *87.3 to sq. m.*
Wealth, 1923 (Census est.) *$8,829,726,000*

Indiana, in the East North Central region, touches Lake Michigan at the northwestern corner of the State and is bounded on the north by Michigan, on the east by Ohio and Kentucky, on the south by Kentucky, and on the west by Illinois. The Ohio River, important in navigation, skirts the entire southern side, and the Wabash River, also susceptible of greater navigation development, forms about half of the western boundary line. There are 550 miles of riverways navigable.

In general, Indiana occupies a fairly level tableland and was once a glacial moraine. The climate is characteristic of the Middle West, warm in summer and rather cold in winter.

Transportation is heavy, with 7,187 miles of railways. Immense tonnage moves riverwise on the Ohio and Wabash, and also enormous tonnage enters and leaves the Lake Michigan ports of Whiting, Standard Oil town; Indiana Harbor and Gary (United States Steel Corporation city), in iron ore, steel products, cereals and coal. Electric interurban traffic is the heaviest in the country.

The United States census of manufactures, 1927, reported 4,726 establishments (4,762 in 1925), with 280,717 employees (280,633) earning $375,217,514 ($364,789,224) and a product valued at $2,153,479,432 ($2,121,382,017). The leading industry was iron and steel works and rolling mills, 24 establishments with 30,098 employees earning $50,832,415 having an output valued at $288,719,078 ($276,228,174); the 78 motor vehicles and parts plants with 26,171 employees earning $39,432,829 had an output valued at $202,557,372 ($233,589,813); the 304 foundries and machine shops with 19,166 employees earning $27,103,959 had an output valued at $114,729,157; the 58 electrical machinery shops with 16,048 employees earning $24,925,292 had an output valued at $102,690,445; the 58 slaughtering and meat packing houses, (wholesale), with 5,109 employees earning $5,767,634 had an output valued at $93,169,867. Dairy products were valued at $33,304,179.

The 1920 census showed the value of all crops to be $497,229,719, with corn leading—169,848,000 bushels—about 5 per cent. of the national crop; oats, 45,072,000; wheat, 24,144,000; and all other temperate zone products, including fruits and livestock, generously represented. Farms numbered 205,126. The mining product was valued at $59,926,558.

Evansville, on the Ohio River, is the largest hardwood market in the country, selling not only the heavy State cut from hardwood forests of vast value, which formerly covered much of the State, but also handling immense output from Southern forests.

Indiana ranks sixth in coal production, bituminous and cannel—a very fine fuel for fireplaces—with 15,965,000 short tons in 1928, and 17,699,000 tons in 1927. Petroleum production in 1927 was 852,000 barrels; 1926, 808,000.

The State has, in seven counties, more than 45,000,000,000 tons of accessible oil shale and the Federal Government has withdrawn 52,000 acres of oil lands from entry.

Indiana has four educational institutions of fame—De Pauw University at Greencastle, with 2,000 students; Indiana University at Bloomington, 5,600; University of Notre Dame, Catholic, at South Bend, 3,000; Purdue University at Lafayette, 3,700. The public schools enroll 575,000 pupils. Illiteracy is low at 2.2 per cent., Census of 1920, native white, 1.3; foreign-born white, 11.8; Negro 9.5; native whites being 91.8 per cent. of the population; foreign-born, 5.9; Negro, 2.2. A racial phase was the influx of many Germans at the time of the German revolutionary movements of the last century, the result being that now from Fort Wayne southward the German population is predominant in many districts numerically and socially. That portion of the population has always been exceedingly thrifty and dependable economically, and has aided much in the late remarkable industrial development.

For the last four decades the centre of population of the United States has been in the southern part of Indiana, moving very slowly west.

IOWA.

Area, square miles ..... *56,147* ..... *24th in rank*
Population, 1920 ..... *2,404,021* ..... *16th in rank*
Pop., 1925 (State census) ..... *2,419,927* ..... *43.1 to sq. m.*
Population, 1928 (est.) ..... *2,428,000* ..... *43.2 to sq. m.*
Wealth, 1923 (Census est.) *$10,511,632,000*

Iowa lies in the West North Central part of the Middle West, bounded on the north by Minnesota, on the east by Wisconsin and Illinois, on the south by Missouri, and on the west by Nebraska and South Dakota. The Mississippi River flows along the entire eastern boundary line, and the Missouri River along three-fourths of the western line.

It is very level, only one point of elevation being 1,600 feet above the mean. Iowa claims the largest proportion of actually arable lands of all States and proves it by the immense agricultural production, soil and climate combining to give it that prestige, the climate being Middle West characteristically.

The value of all crops, Census of 1920, was $800,391,299, exceeded only by Texas with $1,071,542,103 on five times the land area of Iowa. Farm property exceeds $8,000,000,000 in value, its area being 33,474,896 acres of the total of 36,000,000 acres in the State. 14 per cent. of the corn of the country, Census of 1920, was produced in Iowa—444,190,000 bushels—wheat being low with 10,102,000, and potatoes high with 4,128,000 bushels, hay with 4,659,000 tons, and oats with 187,045,705 bushels.

Live stock interests are immense, with all animals raised in the temperate zone abundant, and dairy and poultry outputs likewise enormous.

Fruit interests are confined mostly to the smaller varieties, and garden truck is heavily cultivated.

The farms number 213,439, averaging 156.8 acres and 134 actually improved. Iowa is the strongest centre of the late agricultural movement which resulted in the rapid development of the American

Farm Bureau Federation, and agrarian influence dominates the State. Iowa has the largest ratio of automobiles per capita of all States, the farmer-owner prevailing.

Transportation is highly developed, with railways literally ribbing the State, for vast through, as well as immense local tonnage. River tonnage on the Mississippi moves in vast volume, with much on the Missouri. Railroad mileage 1927, was 9,814. Coal underlies about 19,000 square miles, the output, 1928, was 3,910,000 short tons; and 1927, 2,526,000 tons, and lead is found in the northeastern part, and the quarry output is heavy.

The United States census of manufactures, 1927, reported 3,061 establishments (3,219 in 1925), with 73,692 employees (74,258) earning $91,246,664 ($91,516,909) and a product valued at $769,340,610 ($746,329,586). The leading industry was slaughtering and meat packing (wholesale), with 21 establishments with 7,979 employees earning $9,227,211 with an output valued at $212,353,210 ($213,741,084). The 420 dairies with 1,988 employees earning $2,544,737 had an output valued at $86,932,789 ($78,110,309).

Iowa leads all States in literacy. Only 1.1 per cent., Census of 1920, are illiterate, the percentage of native whites being 5-10ths of 1 per cent., of foreign-born whites, 4.9, and of Negro, 8.1. The State has a large percentage of native-born whites—82.8.

There are about 600,000 persons at school in Iowa, or one for each four of the population. The public school system is highly advanced, in method and provision for the people of all classes.

The College of Agriculture at Ames is claimed to be the leading institution of that character in the country. It has 5,300 students, and has pursued scientific investigation along all lines that appertain to agrarian interests, with much original research, and development of methods for crop and animal production and care. The University of Iowa at Iowa City has 8,500 matriculated.

A signal enterprise is the utilization of vast electrical power in the Mississippi River at Keokuk, where a remarkable dam has been built.

The diffusion of prosperity is indicated, Census of 1920, by the $391,505,000 deposits in savings banks by 905,970 persons, averaging $432.14 per account or almost one account for each two and a half persons.

KANSAS.

Area, square miles.....*82,158*.....*13th in rank*
Population, 1920.....*1,769,257*.....*24th in rank*
Pop. 1925 (State Census).*1,813,986*.....*22.1 to sq.m.*
Population, 1928 (est.)...*1,835,000*...*22.3 to sq. m.*
Wealth, 1923 (Census est.).....*$6,264,058,000*

Kansas, a West North Central State, in almost the exact geographical centre of the United States, is bounded on the north by Nebraska, on the east by Missouri, on the south by Oklahoma, and on the west by Colorado. It is varied in topography, with prairies extending westward, where elevations of 4,000 feet are found. There is heavy forest cover in the eastern half, much hardwood, black walnut abounding. The climate is severe in winter and warm in summer, but constantly modified by the prevalent winds. The Missouri River skirts the northeastern side for 150 miles, giving navigation to St. Joseph, Atchison, Leavenworth and Kansas City, the only other considerable rivers being the Arkansas and the Kansas.

Railway traffic is mostly east and west, and several of the largest systems have lines, with liberal provision for branch service, to care for the heavy through traffic and the large State production.

Railroad mileage, 1927, was 9,494.

Kansas is essentially agricultural, although natural mineral wealth adds heavily to production. The Census of 1920 gives $588,923,248 as value of all crops, livestock products not included.

The total acres in the State are 52,581,120, of which by the 1920 census there were 45,425,179 in 165,286 farms, averaging 275 acres each, with a total value of $2,830,063,918 for land and buildings.

For twenty years Kansas averaged 119,256,179 bushels of corn, and 93,881,169 bushels of wheat per year, but in the ten years, 1917–27, these crops have been reversed and the State has averaged 111,532,943 bushels of wheat, and 84,890,994 bushels of corn per year. For the crop of 1923 Kansas sowed more than half its total of plough land to wheat alone, and used more bushels for seed than the total wheat yield of twenty-three other States. There were thirty-seven other States which did not have as many acres in all kinds of crops together as Kansas had in wheat alone.

The wheat crop in 1924 was 153,628,000 bushels valued at $1,638,095,000, and the corn crop was 131,007,817 bushels valued at $106,313,292. The total value of all crops, farm products and livestock marketed for 1924 was $501,629,566.

Farming is marked with the most modern of equipment in machinery. Cotton and tobacco are grown to some extent, the climate and soil being such as to enable the further development thereof when economic conditions demand.

In the western reaches of the valley of the Arkansas River irrigation is extensive and becoming more important (45,000 acres under water) as demand for land increases in the whole country. Dairy and poultry products run above $60,000,000 annually.

Cheap and abundant feeds and pasturage, with a mild climate, good water and nearness to market, make Kansas one of the four greatest cattle-producing States in the Union. Fifty per cent. of all cattle received at the Kansas City stockyards come from Kansas, and Kansas City is the second largest livestock market in the world.

Kansas, in 1927, had more passenger automobiles (431,810) and motor trucks (52,688) than milk-cows (467,983). A State Highway Commission was set up in 1929 which will consolidate and control 5,000 miles of State roads.

The United States census of manufactures, 1927, reported 1,767 establishments (1,856 in 1925) with 45,368 employees (46,078) earning $59,925,089 ($58,690,699) and a product valued at $681,750,334 ($698,096,115). The leading industry was slaughtering and meat packing (wholesale), with 29 establishments with 8,783 employees earning $11,297,040, with an output valued at $249,465,685 ($248,939,792). The 159 flour and grain mills had an output valued at $133,625,683 ($135,232,063); the 15 petroleum refining plants had an output valued at $73,878,325 ($101,670,342); and the 81 dairies an output valued at $27,266,496 ($25,511,829).

The coal fields underlie more than 15,000 square miles, and the 1928 output was 2,220,000 short tons; in 1927, 2,517,000 tons. Petroleum production in 1927 was 40,740,000 barrels and natural gas (1926) 38,095,000 M. cubic feet. Other mine products are zinc, lead and salt.

Kansas, which for 20 years had outlawed cigarettes, by a law passed in February, 1927, permits their sale except to minors, taxes every package 2 cents and prohibits all cigarette advertising.

Kansas has only 1.6 per cent. of illiteracy, that of the native whites being 6-10ths of 1 per cent.; of foreign-born whites, 10.5; and of the Negroes, 8.8; the Kansas colored man having advanced far along the roadway toward normal literacy. The attendance at all educational institutions is more than 400,000, or about one for each four persons.

The State supports the University of Kansas (5,000 students) and Agricultural College at Manhattan (4,000). There are four large colleges.

The diffusion of prosperity is to be judged by the fact that agricultural, livestock, dairying, mineral and manufacturing annual production totals about $1,700,000,000, or about $2,180 for each man, woman and child in the State.

Colby with 1,800 population has the distinction of being the only town in the United States where no local tax was levied in 1928 and 1929. All expenses were met by profits of the municipally-owned and operated light and power plant.

KENTUCKY.

Area, square miles.....*40,598*.....*36th in rank*
Population, 1920.....*2,416,630*.....*15th in rank*
Population, 1928 (est.)...*2,553,000*...*62.9 to sq. m.*
Wealth, 1923 (Census est.).....*$3,582,391,000*

Kentucky, grouped as East South Central, a border State between the North and South, is bounded on the north by Illinois, Indiana and Ohio, on the east by West Virginia and Virginia, on the south by Tennessee, and on the west by Missouri, Illinois and Indiana. The Mississippi River touches the westernmost tip, and the Ohio River forms the entire northern boundary. Navigable rivers flow past the State for a total distance of 813 miles. The Appalachian Mountains cross the eastern end and many hills dot the tablelands, of which the famous Blue Grass region in the northern part, east from Louisville, is best known and most productive.

Agriculturally, the State is very productive; $347,338,888 is given by the Census of 1920 as the value of all crops, which included the highest quantity of tobacco of all States, 467,500,000 pounds; and a most varied list of temperate zone products, shading off into those distinctly Southern. The corn crop in 1928 was 66,633,000 bushels.

In 1928, 306,000,000 pounds of tobacco valued at $58,550,000 was grown on 394,700 acres.

Livestock interest is important, Kentucky horses having been for long world famed, its thoroughbreds not being excelled anywhere. Other domestic animals abound, and fruits are extensive.

Coal mined in 1928, 63,255,000 tons, and petroleum lifted, 1928, 7,325,000 barrels.

Forest wealth is great, coniferous and hardwood trees abounding, and normally yielding annually $20,000,000.

The United States census of manufactures, 1927, reported 1,851 establishments (1,860 in 1925) with 74,912 employees (76,562) earning $83,858,607 (84,939,919) and a product valued at $447,764,961 ($453,731,042). The leading industry was railroad car construction and repair, with 33 shops with 13,986 employees earning $20,399,884 with an output valued at $36,727,777; the 5 steel works and rolling mills with 4,542 employees earning $6,639,791 had an output valued at $35,987,067 ($28,772,962); and the 38 plants for manufacture of tobacco with 3,888 employees earning $2,349,669 had an output of $28,933,640 ($30,319,651).

Railroad mileage, 1928, was 4,049.

The illiteracy percentage is 8.4, that of native whites being 7, of foreign-born 7.3, and of Negroes 21. The State public school system enrolls about 550,000, and four universities, 5,200. Expenditures for public schools in 1926 was $17,599,363.

The distinctive natural phenomenon is the 9,000 square miles in Central Kentucky which is ribbed with underground passages and caves, chief of which is the Mammoth Cave, with its 150 miles of connecting passages, now to be a National Park.

In the old days before Prohibition, Kentucky was famed for its whiskeys, Bourbon County, at Paris, in the Blue Grass region, having lent its name to the corn liquor formerly made and consumed in the United States.

Kentucky has no bonded indebtedness.

LOUISIANA.

Area, square miles . . . . . 48,506 . . . . . 30th in rank
Population, 1920 . . . . . 1,798,509 . . . . . 22d in rank
Population, 1928 (est.) . . . 1,950,000 . . . . 42.2 to sq. m.
Wealth, 1923 (Census est.) $3,416,860,000

Louisiana, situate in the West South Central region, on the Gulf of Mexico, at the mouth of the Mississippi River, is bounded on the north by Arkansas and Mississippi, on the east by Mississippi State and the Gulf, on the south by the Gulf, and on the west by Texas. It is practically all alluvial, built up from the silt brought down by the Mississippi River, which has thrust out a long point into the Gulf as the southernmost part of the State.

There are no hills of consequence, and much of the lands are lower than the immediate banks of the great river, powerful levees being necessary to protect from constant overflow. As a consequence of the downwash of river sedimentary matter, the lands are naturally highly enriched, and subsequent overflowing of the waters adds food values to the soil, as does the Nile in Egypt.

The western part, immediately next to Texas, shades off toward the drier character of climate and soils, the climate of Louisiana for the greater part being rather moist and very warm in summer, with little of winter cold. It is semi-tropical.

The Sabine River bounds the State on the west, and with the Red River and the Mississippi, Louisiana has 4,794 miles of navigable waterways, much of it being on the large bayous in the south.

The Mississippi River has always largely determined the character of New Orleans, chief city, for there river traffic from earliest days has been extensive, and New Orleans has dominated the State economically. For some years after the Civil War of 1861-5, river traffic fell off, but is now being revived, and is expected to grow to very heavy volume.

New Orleans opened its new industrial canal to navigation on Feb. 6, 1923. It connects the Mississippi River and Lake Ponchartrain to the north, which is not a lake but an arm of the Gulf of Mexico. The Industrial Canal is 5¼ miles long, and makes available 96,000 acres of potential harbor sites to connect with the great ship locks, in addition to the many miles of yet unused river frontage. The canal was paid for by the people of New Orleans with no Federal aid whatever.

Lake Charles has developed a deep water harbor opened Nov. 30, 1926.

Railroad mileage, 1928, was 5,099.

Agriculturally, Louisiana is prolific—rice, cotton, sugar cane, corn, sweet potatoes, tobacco, especially fine fruits of all sub-tropical sorts, and nuts are produced largely. The value of all crops, Census of 1920, was $231,506,000.

The sugar industry represents an investment of over $200,000,000 with an annual production from about 275,000 acres, formerly, of more than $25,000,000. This had been practically wiped out when mosaic disease ruined the cane. In 1922 a disease-resisting cane (P. O. J. 234) and with a higher sucrose content from the U. S. Department of Agriculture proved so successful that 400,000 tons of cane were harvested in 1927. The new cane averaged 20 tons to the acre.

The acreage planted for the 1928 crop was 180,000, all in the new canes, and production was 166,000 short tons of sugar.

The cotton crop in 1928 was 690,958 bales from 1,990,000 acres; and in 1927 because of the flood 548,026 bales from 1,542,000 acres. The lumber cut in 1926 was 2,889,530,000 feet.

The State ranks seventh in petroleum output, 1928, with 21,626,000 barrels. Sulphur has been largely produced. There are more than 6,000 square miles water covered, suitable for the propagation of oysters; the shrimp catch is very valuable, and commercial fishing an important industry. Trappers market muskrat, opossum, raccoon, mink and other furs in great quantities.
